

DX HUB

Getting Started Guide

The DX Hub is a remote audio expansion hub that can be connected to an Allen & Heath SQ, Avantis, or AHM system, or to a dLive system fitted with a gigaACE card. It provides 4 DX ports to connect to DX Expanders, each port carrying 32x32 channels of 96kHz audio.

One DX32 or up to two DX168/DX164-W/DX012 expanders can be connected to each DX port allowing up to 128 remote inputs / outputs to be added to the system. With dLive, multiple DX Hubs can be used for further expansion or for dual redundancy.

① dLive requires firmware V1.6 or higher and a gigaACE I/O Port card to work with the DX Hub.

① SQ requires firmware V1.2 or higher to work with the DX Hub.

The DX Hub can be used free standing, or up to two units can be installed in a 1U rack space using our optional rack ear kit **FULLU-RK19X**, which can be ordered from your A&H dealer.

Connections and routing

Refer to the **DX System Guide** or **SQ SLink Connectivity** documents at www.allen-heath.com for details of supported connections and example diagrams.

① Use Cat5e or higher STP cables with a maximum length of 100m per connection.

Use the mixer I/O screen or AHM **Assign** screen to patch signals to and from the DX Hub.

Each DX port on the DX Hub has 32x32 available channels:

	SLink or I/O Port
DX 1	01-32
DX 2	33-64
DX 3	65-96
DX 4	97-128

Front and rear panels

① **DX Link 1-4** Four DX ports each capable of 32x32 channels of 96kHz audio. Each DX socket can be connected to 1 DX32 or up to 2 DX168/DX16-4W/DX012 expanders. A status LED flashes yellow for Link activity and illuminates red to indicate a stream error.

② **gigaACE** For connection to an SQ / Avantis / AHM SLink port, or gigaACE card in a dLive / Avantis system. The gigaACE connection provides 128x128 channels of audio at 96kHz. A status LED flashes yellow for Link activity and illuminates red to indicate a stream error.

③ **Vents** Ensure good ventilation at the rear of the DX Hub. Avoid obstruction of vents while operating. Avoid dirt or liquid ingress.

④ **Power** IEC connector and fuse for the built-in universal voltage power supply unit. This accepts voltages from 100 to 240V AC 50/60Hz. Check that you have received the correct mains lead for your territory.

Read the Safety Instructions Sheet included with the product and the information printed on the panel before operating.

A limited one year manufacturer's warranty applies to this product, the conditions of which can be found at: www.allen-heath.com/legal
