1 Overview

What is an embedded Web server?

A Web server provides an environment in which Web programs can run, much in the same way that an operating system, such as Microsoft® Windows®, provides an environment in which programs can run on your computer. A Web browser, such as Microsoft Internet Explorer or Netscape Navigator, can show output from a Web server.

An “embedded” Web server (EWS) resides on a hardware device (such as a printer) or in the firmware, rather than as software that is loaded on a network server.

The advantage of an embedded Web server is that it provides an interface to the product that anyone who has a network-connected computer and a standard Web browser can open and use. No special software needs to be installed or configured.

With the HP Embedded Web Server, you can view product status information, change settings, and manage the product at your computer.

Note

In this guide, the terms “product” and “device” are sometimes used interchangeably. When products or devices are discussed in this guide, the information pertains to HP LaserJet printers, HP color LaserJet printers, and HP LaserJet MFPs unless otherwise noted. For specific information about the features that your printer or MFP supports, see the documentation that came with your product.

Features

You can use the HP Embedded Web Server to view product and network status and to manage printing functions from your computer, rather than at the product control panel. With the HP Embedded Web Server, you can perform these tasks:

- View control-panel messages and product-status information.
- Determine the remaining life for all supplies.
- Gain access to the product's technical support page.
- Gain access to specific support for recent product events.
- View and change tray configurations.
- View and change product configuration.
- View and print information pages, such as the Configuration page.
- Receive alerts about product events, such as when the product is low on supplies, through e-mail.
- Add or customize links to other Web sites.
- Select the language in which to display the HP Embedded Web Server pages.
- View and change network configuration.
- Print to an HP product without installing a printer driver.
- Configure specific ordering information for supplies.
- Schedule copier shutdown and wakeup times.
- Set up copy and send authentication and tracking.
- Send device configuration and supplies usage information periodically to your service provider.

HP Web Jetadmin and the HP Embedded Web Server

HP's Web Jetadmin is a Web-based system management tool that you can use with a Web browser.

The HP Embedded Web Server and Web Jetadmin work together to meet all of your product management needs. You can install and manage networked devices effectively. Network administrators can manage networked devices remotely, from practically anywhere.

The HP Embedded Web Server provides a simple, easy-to-use solution for one-to-one product management in environments that have a limited number of products. However, environments that have several products might want to use HP Web Jetadmin for group product management. With HP Web Jetadmin you can discover, manage, and configure multiple devices simultaneously.

HP Web Jetadmin is available from HP online support (<http://www.hp.com/go/webjetadmin>).

System requirements

- A Web browser installed on your computer. The HP Embedded Web Server is designed to work best with later versions of most Web browsers. For example, Netscape Navigator 6.2 or later, or Microsoft Internet Explorer 5.01 and later for Macintosh computers or Internet Explorer 6.0 or later for Windows work well with this Web server.
- A transmission control protocol/Internet protocol (TCP/IP)-based network connection.
- An HP Jetdirect print server enhanced input/output (EIO) network card.

Opening the HP Embedded Web Server

Note

You cannot view the HP Embedded Web Server pages from outside a firewall.

- 1 Open a Web browser.
- 2 In the **Address** or **Go to** field, type the IP address that is assigned to the product (for example, `http://192.168.1.1`) or the host name (for example, `http://www.[your_server].com`).

If you do not know the IP address for the product, it is listed on the Configuration page. See the user guide that came with your product to see how to print a Configuration page at the control panel.

Login and logoff

The HP Embedded Web Server has pages that can be used to view product information and change configuration options. The pages that appear, and the settings on them, vary according to how you gain access to the HP EWS - as a general user, an information technology (IT) administrator, or a service provider. These passwords can be customized by an IT administrator or a service-provider user.

In a password-protected HP Embedded Web Server, only the Information tab is available to a user who is not logged in using the password. If no password has been set, or if you log in as an IT administrator or a service provider, all three tabs (Information, Settings, and Networking) are visible when you open the HP Embedded Web Server.

If a password has been set, you must log on as an IT administrator or a service user to gain access to the protected HP Embedded Web Server tabs (Settings and Networking). To log in, click the **Login** link. The Enter Network Password dialog box appears, as shown in the following illustration.

Note

The appearance of the login screen may vary, depending on your operating system.

For information about changing passwords as an IT administrator, see [“Security” on page 31](#). If you are a service provider, see your product service guide.

If you are logged on as an IT administrator, either close the browser or click the **Logoff admin** link in the upper right corner of the screen, and then close the browser.

Note

To finalize the logoff, you must close the browser.

Navigating through the HP Embedded Web Server

To navigate through the HP Embedded Web Server pages, click one of the tabs (**Information**, **Settings**, and **Networking**) and then click one of the menus on the navigation bar that is located on the left side of the screen.

The following illustration and table provide information about the EWS screens.

Note

The appearance of the EWS screens may differ from the illustrations in this user guide, depending on product features and settings determined by your IT administrator.

The screenshot shows the HP Embedded Web Server interface for an hp LaserJet 9065mfp. The interface is divided into several sections:

- Header:** hp LaserJet 9065mfp / 192.168.0.10
- Navigation Bar:** Information, Settings, Networking, Log In
- Left Sidebar:** Device Status, Configuration Page, Supplies Status, Event Log, Usage Page, Device Information, Print
- Main Content Area:**
 - Device Status:** Ready, Continue (with a green checkmark icon)
 - Supplies:**
 - Black Toner: OK (Order HP Part: Q3681C (Americas), Q3682C (Europe), Q3683C (Asia Pacific))
 - Front Staples: OK (Order HP Part: Q3641A)
 - Rear Staples: OK (Order HP Part: Q3641A)
 - Media:**

2 Viewing product status from the Information pages

The Information pages are for informational purposes only; you cannot configure the device from these pages. To configure the device through the EWS, see [“Configuring the product from the Settings pages” on page 19](#).

The following are the Information pages:

- Device Status (page 8)
- Configuration Page (page 10)
- Supplies Status (page 13)
- Event Log (page 14)
- Usage Page (page 15)
- Device Information (page 16)
- Print (page 17)

Note

Some products do not support all of these pages.

Device Status

Use the Device Status page to view the current status of the product. The following illustration and table describe how to use this page.

hp LaserJet 9065mfp / 192.168.0.10
hp LaserJet 9065mfp

Note: See the table on the following page for information about the callouts.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Device Information	Lists the serial number, version numbers, and other information for the product.
3	Installed Personalities and Options	Lists all of the printer languages that are installed (such as printer command language [PCL] and PostScript [PS]), and lists options that are installed in each DIMM slot and EIO slot.
4	Memory	Lists the memory information, PCL Driver Work Space (DWS), and resource saving information.
5	Print Controller Security	Lists the status of control-panel lock and disk write-protect options.
6	Paper Trays and Options	Lists the size and type of media that is specified for each of the trays in the product. If a duplexer or any paper-handling accessories are installed on the product, information about those devices is listed here as well.

Supplies Status

The Supplies Status page shows more detailed supplies information and provides part numbers for genuine HP supplies. (It is helpful to have the part numbers available when ordering supplies.) The following illustration and table describe how to use this page.

The screenshot shows the HP Embedded Web Server interface for an hp LaserJet 9065mfp. The page title is 'Supplies Status'. The left navigation menu includes 'Device Status', 'Configuration Page', 'Supplies Status', 'Event Log', 'Usage Page', 'Device Information', and 'Print'. The 'Supplies Status' section is expanded, showing 'Customer Installable' supplies. Two items are listed:

- Black Toner**: Order HP Part: Q3681C (Americas), Q3682C (Europe), Q3683C (Asia Pacific). Toner Low Reached: NO, Pages Printed Since Low: 0.
- Staple Cartridge**: Order HP Part: Q3641A. Front Staples: OK, Rear Staples: OK.

Callout 1 points to the navigation menu, callout 2 points to the Black Toner status, and callout 3 points to the Staple Cartridge status.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “ Navigating through the HP Embedded Web Server ” on page 5.
2	Black Toner	Displays the toner part numbers, states whether or not the Toner Low status has been reached, and displays the number of pages printed since the Toner Low status was reached.
3	Staple Cartridge	Lists Front Staples and Back Staples status (OK or OUT) and HP Staple Cartridge part number. Staple status appears only when a finishing device is installed.

Event Log

The Event Log shows the most recent device events, including printer jams, service errors, and other printer errors. The following illustration and table describe how to use this page.

hp LaserJet 9065mfp / 192.168.0.10

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “ Navigating through the HP Embedded Web Server ” on page 5.
2	Number	Lists the order in which the errors occurred. The last error to occur has the highest number.
3	Page Count	Lists the number of pages that had been printed from the product when the error occurred.
4	Event	Shows the internal error code for each error.
5	Description	Shows a brief description of some errors.
6	Product Support	Provides access to HP’s support Web site for product-specific troubleshooting information.

Usage Page

The Usage page gives a page count for each size of media that has passed through the device, as well as the number of duplexed pages. The total is calculated by multiplying the sum of the Print Count and Copy Count values by the Units value.

The information on this page can be used to determine how much toner or paper to keep on hand. The following illustration and table describe how to use this page.

hp LaserJet 9065mfp / 192.168.0.10

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.

Callout	Area on the page	Information or capability provided by the area
2	Usage Totals (equivalent)	Indicates the types of pages that have been printed, the number of single-sided pages that have been printed, the number of duplexed pages that have been printed, and the total number of pages that have been printed.
3	Units	A unit is equal to a standard Letter-size page. All other page sizes are referenced in relation to this standard size. For example, Ledger-size paper (11x17) is twice the size of letter and counts as 2 units. A Ledger page printed on both sides counts as 4 units.
4	Coverage	Indicates the average amount of toner used on each printed page.

Device Information

The Device Information page shows the device name, asset number, company name, contact person, device location, and the device's IP address, name, model, and serial number.

The device name, asset number, company name, contact person, and device location can be configured from the Device Information page located on the **Settings** tab.

The screenshot displays the HP LaserJet 9065mfp web interface. At the top left is the HP logo with the word 'invent' below it. To the right, a blue header bar contains the text 'hp LaserJet 9065mfp / 192.168.0.10' and 'hp LaserJet 9065mfp'. Below the header are three tabs: 'Information' (selected), 'Settings', and 'Networking'. A 'Log In' link is located in the top right corner. On the left side, there is a vertical navigation menu with the following items: 'Device Status', 'Configuration Page', 'Supplies Status', 'Event Log', 'Usage Page', 'Device Information' (highlighted), and 'Print'. Below this menu is an 'Other Links' section containing two links: 'hp instant support' and 'Product Support'. The main content area is titled 'Device Information' and lists the following details:

Device Name:	hp LaserJet 9065mfp
Asset Number:	
Company Name:	your company
Contact Person:	Any Body
Device Location:	floor 7 room 2
IP Address:	192.168.0.10
Product Name:	hp LaserJet 9065mfp
Device Model:	CXXXXA
Device Serial Number:	CNZZX91001

Print

You can use this page to print one file at a time from a product that supports the HP Embedded Web Server. This feature is especially useful if you are a mobile user, because you do not have to install the product's printer driver in order to print—you can print anywhere at any time.

You can print print-ready files, such as documents that have been generated by using a “print to file” driver option (.PRN extension by default), Printer Control Language (PCL) documents, PS documents, Portable File Documents (.PDF), and text (.TXT) files.

The following illustration and table describe how to use this page.

Note The Print page (and its menu item on the left) is available only if it has been configured to appear on the Security tab. For more information, see “Security” on page 31.

The screenshot shows the HP Embedded Web Server interface for an hp LaserJet 9065mfp. The top navigation bar includes 'Information', 'Settings', and 'Networking' tabs, with 'Log In' on the right. The left sidebar contains a menu with items like 'Device Status', 'Configuration Page', 'Supplies Status', 'Event Log', 'Usage Page', 'Device Information', and 'Print'. The 'Print' page is active, showing 'Device Status Ready'. Below this, there are two options for printing: 'Option 1' (local file) and 'Option 2' (web address). Callouts 1 through 4 point to the navigation menu, Device Status, Option 1, and Option 2 respectively.

Callout	Area on page	Information or capability provided by area on page
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Device Status	Shows the product status (the same as what appears on the Device Status page and the control-panel display).
3	Option 1	Prints a file that is located on your laptop, computer, or a network file server.
4	Option 2	Prints a file that you can gain access to over the Web.

Printing a file using the Print page

- 1 To print a file using the Print page, do *one* of the following:
 - Click **Browse** to browse to a file that you want to print (Option 1).
 - or-
 - Type the address (beginning with “http://” or “https://”) of a file that you want to print that is available over the Web (Option 2).
- 2 Click **Apply**.

3 Configuring the product from the Settings pages

Use the pages on the **Settings** tab to configure the product from your computer. The following are the Settings pages:

- Configure Device (page 20)
- Email Server (page 22)
- Alerts (page 24)
- AutoSend (page 30)
- Security (page 31)
- Edit Other Links (page 32)
- Device Information (page 34)
- Language (page 35)
- Date & Time (page 36)
- Ordering Information (page 38)
- Other Settings (page 39)
- ON/OFF Schedule (page 40)
- Copy Monitor (page 42)

Note

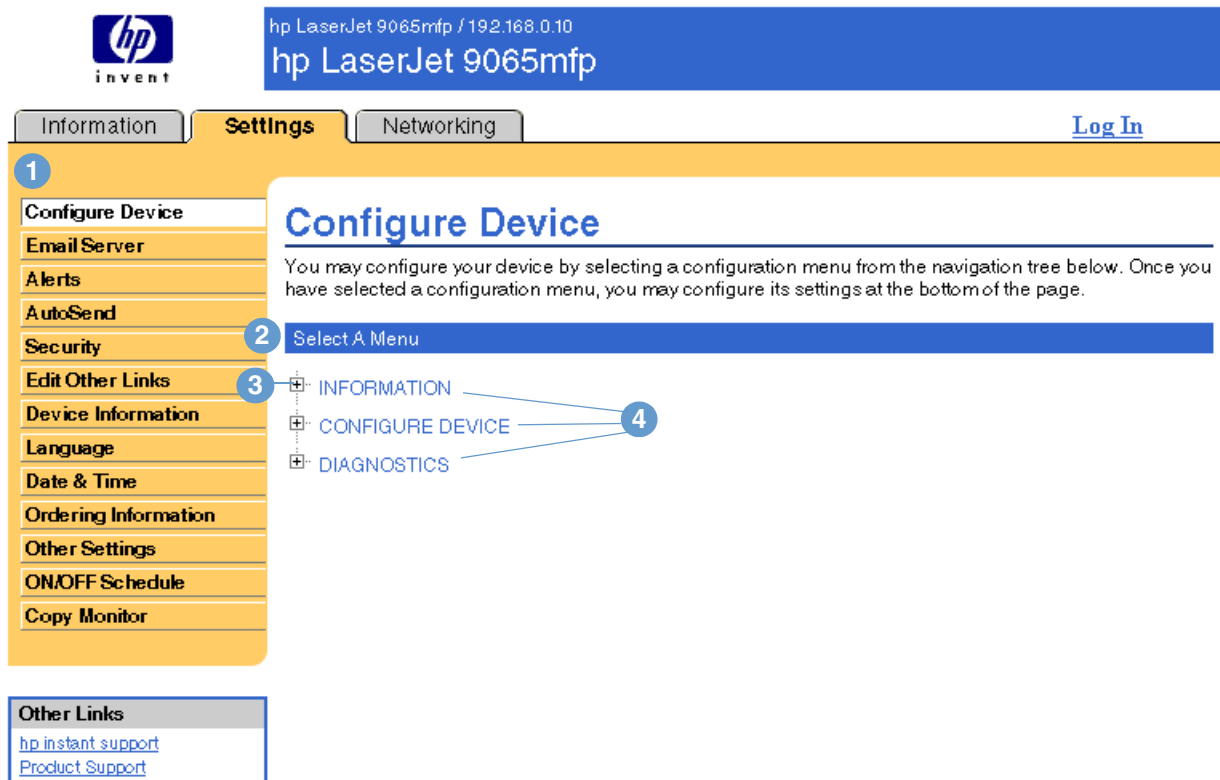

Some products do not support all of these pages.

Configure Device

You can use the Configure Device page to print product information pages and configure the product *remotely*. The following illustration, table, and example procedure describe how to use this page. The following example shows the **Information** menu options.

Note If your product has a control-panel display, these menus are similar to the menus that are available at your product control panel. Some of the product control panel menus are not available from the HP Embedded Web Server.

See the documentation that came with your product for more information about the different menus that your product supports.

Callout	Area on the page	Information or capability provided by the area

3	Plus sign	Click the plus sign (⊕) next to a menu, or click the menu itself, to see the submenus or subentries.						

Callout	Area on the page	Information or capability provided by the area
4	Menu subentries	Gain access to product information or to configure the product.

Using the menus on the Configure Device page

The following procedure is provided *only* as an example. Other menu items can be set in a similar manner.

Note

Printer drivers and software programs frequently override selections that are made in the **Printing** menu. For more information, see the user guide that came with your product.

Any changes are reflected on the Printer Status page, the Configuration page, and the **Paper Handling** menu (on the Other Settings page).

Follow these steps to select a different default paper size (example procedure):

- 1 Click **CONFIGURE DEVICE**.
- 2 Click **PRINTING**. The blue **PRINTING** title bar appears in the lower portion of the screen.
- 3 Click the arrow in the **DEFAULT PAPER SIZE** drop-down menu, and select the paper size you want to be the default (for example, you can change the default paper size from **LETTER** to **LEGAL**).
- 4 Click **Apply**.

Email Server

Use the Email Server page to configure e-mail settings for outgoing and incoming e-mail. Settings on this page allow the device to send and receive e-mail messages, including product alerts. The following illustration, table, and procedures describe how to use this page.

The screenshot shows the HP LaserJet 9065mfp EWS interface. At the top, there's a blue header with the HP logo and the device name. Below that are tabs for Information, Settings, and Networking. The Settings tab is selected. On the left, there's a vertical menu with various settings categories. The 'Email Server' category is highlighted. The main content area is titled 'Email Server' and has two sections: 'Outgoing Email' and 'Incoming Email (not required for Email Alerts)'. The 'Outgoing Email' section has a checkbox for 'Enable Outgoing Email' which is checked, and three input fields for 'SMTP Server' (192.68.00.00), 'Domain Name' (your.company.com), and 'Device Email Address' (device@your.company.com). The 'Incoming Email' section also has a checked 'Enable Incoming Email' checkbox and three input fields for 'POP3 Server' (192.68.01.01), 'Device POP3 Username' (device), and 'Password'. At the bottom right, there are 'Apply' and 'Cancel' buttons. Callout numbers 1-4 are placed on the page to indicate specific areas of interest.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5 .
2	Outgoing Email	Configure outgoing e-mail if you intend to use the Alerts or AutoSend features. For more information, see “Using the Alerts page with a product” on page 25 .
3	Device Email Address	This is the product’s e-mail address that appears in product alerts. This is <i>not</i> the e-mail address that you want to use when sending commands to the product. See “Sending e-mail commands to the product” on page 29 .

Callout	Area on the page	Information or capability provided by the area
4	Incoming Email (not required for Email Alerts)	Configure incoming e-mail if you intend to request information pages from the product by using e-mail messages. For more information, see “Sending e-mail commands to the product” on page 29 .

Configuring outgoing e-mail

It is necessary to configure outgoing e-mail if you intend to use the Alerts or AutoSend feature.

- 1 Gather the following information. (Your organization’s network or e-mail administrator typically provides the information that is required to configure outgoing mail.)
 - The IP address of the simple mail transfer protocol (SMTP) mail server on your network. The EWS uses the SMTP Server IP address to relay e-mail messages to other computers.
 - The e-mail domain name suffix that is used to address e-mail messages within your organization.
- 2 Select the **Enable Outgoing Email** check box.
- 3 Type the SMTP server IP address in the **SMTP Server** text box.
- 4 Type the domain name, and then click **Apply** to save the changes.

Configuring incoming e-mail

You should configure incoming e-mail if you intend to request information pages from the product by using e-mail messages. For more information, see [“Sending e-mail commands to the product” on page 29](#).

- 1 Establish a Post Office Protocol 3 (POP3) mailbox account for the product on a mail server within your organization’s network.

Each POP3 account requires a username and a password. The username combined with the product’s domain name (which is specified in the outgoing mail configuration) is the e-mail address for the product. For example, if the POP3 mailbox account username is “product” and the POP3 server is “hp.com”, the product’s e-mail address will be “product@hp.com”.

Note

Each product that is configured for incoming mail must have its own POP3 mailbox account on your network’s e-mail server.

The POP3 mailbox accounts are typically configured by your organization’s network or e-mail administrator.

- 2 Select the **Enable Incoming Email** check box.
- 3 Type the IP address of the POP3 mail server in the **POP3 Server** text box.
- 4 Type username and password for the product’s mailbox account, and then click **Apply** to save the changes.

Alerts

From the Alerts page, IT administrators can set up the product to send alerts to anyone through e-mail messages. When configured, alerts are automatically triggered about supplies and paper path status, as well as service and advisory information. More than one individual can receive alerts, with each person receiving only specific alerts. For example, an administrative assistant might be responsible for ordering toner or fixing jams, and could receive advanced warning when toner is low or a paper jam occurs. Similarly, the long-life supplies might be handled by an external service provider who could receive alerts about performing device maintenance, loading the front or rear stapler, and similar needs.

You can create as many as four different destination lists, with up to 20 recipients for each list. The following illustration, table, and procedures describe how to use this page.

Note In order for alerts to function, outgoing e-mail must be enabled. To enable outgoing mail, see “Configuring outgoing e-mail” on page 23.

Note: See the table on the following page for information about the callouts.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Destination list summary	Lists the current selections for each destination.
3	Edit	Click to make changes to the destination or destination list.
4	Test	Click to send a test alert to the destination or destination list.
5	Delete	Click to delete the destination or destination list.
6	New Destination List	Click to define the settings for a new destination list for alerts.

Using the Alerts page with a product

This section contains information about these alerts features:

- [“To configure alerts” on page 25](#)
- [“To test the configuration of a destination list” on page 28](#)
- [“To delete destinations and destination lists” on page 29](#)

To configure alerts

You can create as many as four different destination lists, with up to 20 recipients for each list.

1 Do one of the following:

- To create a new destination list, click **New Destination List**.

-Or-

- To modify an existing destination list, click **Edit** next to the list that you want to modify.

Note

For more information about testing or deleting an alert, see [“To test the configuration of a destination list” on page 28](#) and [“To delete destinations and destination lists” on page 29](#).

The window that appears looks similar to the following illustration.

hp LaserJet 9065mfp / 192.168.0.10
hp LaserJet 9065mfp

Information **Settings** Networking [Log In](#)

Alerts - setup

Step 1: Type the list name

Type a name for your destination list.

List Name:

Step 2: Type the alert destinations

Type the alert destinations (maximum: 20) in any of the following forms:

- An e-mail address, such as (your_name)@(your_company).com
- A mobile device, such as 208-555-5555@(mobile_company).net
- A posting to a website, such as http://www.(your_server).com

Separate alert destinations using a semi-colon (;) or a comma (,).

Alert Destinations:

Step 3: Select Alerts

Select the alerts that you would like the alert destinations to receive. The most common alerts are listed here.

Alert Name	Selected	Threshold
Replace toner bottle	<input checked="" type="checkbox"/>	
Replace toner bottle (Out)	<input checked="" type="checkbox"/>	
Load Front Stapler	<input type="checkbox"/>	
Load Rear Stapler	<input type="checkbox"/>	
Remove Paper Jam	<input checked="" type="checkbox"/>	<input type="text" value="2"/> minutes elapsed
Close Drawers, Doors And Covers	<input checked="" type="checkbox"/>	<input type="text" value="2"/> minutes elapsed
Tray Open	<input type="checkbox"/>	<input type="text" value="2"/> minutes elapsed
Tray Empty (Load)	<input type="checkbox"/>	<input type="text" value="2"/> minutes elapsed

[Additional Alerts](#)

To view all of the alerts for this product, click the **Show All Alerts** button.

Note: Clicking this button saves your current changes and opens the page that lists all of the alerts options.

Step 4: Select e-mail attachments (optional)

Select the attachments that you want to include with each e-mail alert message in this destination list. Go to the **Information** tab to see examples of these pages.

- Supplies Status Page
- Usage Page
- Configuration Page
- Event Log Page

Select this option if one of the alert destinations you have chosen to receive alerts is an automated computer system.

- XML Data

- 2 Type a name for the **List Name** field, such as Service or Supplies.
- 3 Type the e-mail addresses for people who you want to receive alerts. In enterprise environments, system administrators can route e-mail addresses to list servers or URLs for expanded alerts. Add multiple destinations by separating each destination with a comma or semicolon.
- 4 Select the check box for the alerts that you want to be sent with this destination list. (To see all of the alerts that are available for the product, click **Show All Alerts**.)
- 5 Where applicable, set the threshold value for the individual alerts.

The threshold value for service alerts and for the paper path alerts is a user-specified number of minutes. This is the amount of time that an event will be ignored before an e-mail alert message is sent. For example, you might want to set the threshold value for the “Tray Open” alert to 10 minutes to allow someone to close the tray after loading the tray or clearing a jam.
- 6 Select the attachments that you want to be included with your e-mail alert messages. These attachments can include Supplies Status Page, Usage Page, Configuration Page, Event Log, and XML Information. (Go to the **Information** tab to see examples of the pages.) The **XML Information** option should be selected if one of the destinations you have chosen to receive alerts is an automated computer system. Each item that you select will be attached to the e-mail; for example, if you selected **Usage Page** and **Event Log**, you would receive one e-mail message with two attachments, one for each selection. If you also selected the **XML Information** option, you would receive one e-mail message with three attachments - one attachment for the Usage Page in HTML, one for the Event Log in HTML, and a third consisting of instant support information in a text file attachment with an .XML extension.
- 7 Click **Apply** to save the information.
- 8 Repeat steps 1 through 7 for each additional list or destination.

Note

To test the configuration of a destination list, see [“To test the configuration of a destination list” on page 28](#).

To test the configuration of a destination list

- 1 Click the **Test** button next to the destination list that you want to test.

The following window appears. More than one destination can be tested from this window.

The screenshot shows a web interface with a top navigation bar containing 'Information', 'Settings', and 'Networking' tabs, and a 'Log In' link. A left sidebar lists various configuration options, with 'Alerts' selected. The main content area is titled 'Alerts - test' and contains the following elements:

- Alerts - test** (Section Header)
- Instructional text: "You are about to send a test alert to the selected alert destinations. Click **OK** to send the test, or click **Cancel** to return to the main Alerts page without sending the test."
- Alert Destinations:** A list with a checked checkbox next to 'admin@your.company.com'.
- Instructional text: "By default, the return address on the test alert is the product's e-mail address. To receive any response that is generated from this test, type your own e-mail address in the following box."
- Return Address:** A text input field containing 'device@your.company.com'.
- Message Text:** A large text area containing a test alert message:

This is a test alert. You have received this alert because you have been selected to receive information about the following product.

The product does not need attention at this time.

Product:
hp LaserJet 9065mfp

Currently selected alerts:
Replace toner bottle
Replace toner bottle (Out)
Remove Paper Jam
Close Drawers, Doors And Covers

Currently selected attachments:
Supplies Status Page
Usage Page

Thank you for using Hewlett-Packard products!
- Instructional text: "If you want additional notes to appear at the beginning of the test alert, type the information in the following box."
- Your Notes (optional):** An empty text input field.
- Buttons: 'OK' and 'Cancel' at the bottom right.

- 2 Select the destinations that you want to test.
- 3 The return address is the product's e-mail address. Type your e-mail address if you would like to receive any errors that are generated from the test alert (for example, to be notified of an incorrect destination address).
- 4 If applicable, type additional information that you would like to appear at the beginning of the e-mail alert message in the **Your Notes (optional)** text field.

- 5 Click **OK**.

To delete destinations and destination lists

You can delete a destination or destination list by clicking the **Delete** button next to the destination or destination list that you want to delete. Click **OK** to confirm the deletion.

Sending e-mail commands to the product

Another method for receiving information pages is by requesting them from the product. When outgoing and incoming mail are configured, the product can attach information pages, such as the Supplies Status page or the Configuration Page, to e-mail messages. You can use this feature to solve a problem or check the status of supplies.

To request information pages by using an e-mail message

When composing a message to the product, you must properly format the **To**, **From**, and **Subject** fields in your e-mail program.

- 1 Enable the outgoing and incoming e-mail by following the instructions that are listed in this chapter. (For more information, see [“Email Server” on page 22.](#))
- 2 From your e-mail program, compose a message to the product by completing the following steps:
 - a In the **To** field, type the product’s e-mail address. The username combined with the product’s domain name (which is specified in the outgoing mail configuration) is the e-mail address for the product. For example, if the POP3 mailbox account username is “product” and the POP3 server is “hp.com”, the product’s e-mail address will be “product@hp.com”.
 - b Your e-mail program should automatically complete the **From** field as your return e-mail address.
 - c In the **Subject** field, type the appropriate text for the format and page that you would like to attach. You can request a Configuration page, a Supplies Status page, or an AutoSend page. For example, if you would like to attach the Configuration page in HTML format, type “this.configpage?configpage=email&format=html”.

Page	HTML format	XML format
Configuration page	this.configpage?configpage=email&format=html	this.configpage?configpage=email&format=xml
Supplies Status page	this.configpage?suppliespage=email&format=html	this.configpage?suppliespage=email&format=xml
AutoSend page	not applicable	this.configpage?autosend=email&format=xml

- 3 Click **Send**.

The product checks for new e-mail messages once every 3 minutes. When the product receives the e-mail message, it generates a reply and sends the requested information back to the sender’s e-mail address (as specified in the **From** field of the original e-mail message).

Note

Depending on delays in the network and your organization’s mail server, a response might take from 1 minute to several hours to arrive back in your e-mail program’s Inbox.

If the **To**, **From**, and **Subject** fields are not properly formatted in your e-mail message, the product does not send a message in response.

AutoSend

Use the AutoSend page to send device configuration and supplies usage information periodically to your service provider. This feature enables you to have a relationship with Hewlett-Packard or another service provider to provide you with services that include, but are not limited to, proactive toner replacement, pay-per-page contracts, support agreements, and usage tracking. The following illustration, table, and procedure describe how to use this page.

The screenshot shows the HP LaserJet 9065mfp settings interface. The 'Settings' tab is active, and the 'AutoSend' section is expanded. The 'Enable AutoSend' checkbox is checked. The frequency is set to 'Send every 1000 pages printed'. The 'E-Mail destinations' field contains 'Anybody@your_company.com'. A 'Test' button is located at the bottom right of the settings area. The left-hand navigation menu includes options like 'Configure Device', 'Email Server', 'Alerts', 'AutoSend', 'Security', etc.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5 .
2	Enable AutoSend	Select this check box to enable the AutoSend feature.
3	Send every [interval]	Select the interval at which you want the product to send the product configuration and supplies usage information to the destinations configured in the E-Mail destinations field.
4	E-Mail destinations	Save a list of up to 20 e-mail addresses to receive the device configuration information. Each e-mail address can be up to 50 characters long.
5	Test	When you press the Test button, your settings are saved and the information is sent immediately, enabling you to ensure that the recipient receives the messages.

To enable the AutoSend feature

- 1 Enable the outgoing and incoming e-mail by following the instructions that are listed in this chapter. (For more information, see “Email Server” on page 22.)
- 2 Select the **Enable AutoSend** check box.
- 3 Click an option to specify the interval at which you want the product to send the product configuration and supplies usage information to the e-mail recipients determined in the next step, and then type the number of days, weeks, months, or pages printed.
- 4 Configure up to 20 destination e-mail addresses, using the format shown.
- 5 Click **Apply**.

Security

The following illustration and table describe how to use this page.

The screenshot shows the HP LaserJet 9065mfp EWS interface. At the top, there's a blue header with the HP logo and the device name 'hp LaserJet 9065mfp / 192.168.0.10'. Below the header, there are three tabs: 'Information', 'Settings', and 'Networking'. The 'Settings' tab is active. On the left, there's a navigation menu with various options like 'Configure Device', 'Email Server', 'Alerts', 'AutoSend', 'Security', etc. The 'Security' option is selected. The main content area is titled 'Security' and contains two sections: 'Set Password' and 'Set Options'. The 'Set Password' section has a blue header and a description: 'A security password can be set to prevent unauthorized users from remotely configuring the printer or gaining access to functionality reserved for the network administrator.' It includes fields for 'Username' (pre-filled with 'admin'), 'New Password', and 'Verify Password'. The 'Set Options' section also has a blue header and contains three checkboxes: 'Print Page' (checked), 'Stop Button' (checked), and 'Continue Button' (checked). At the bottom right, there are 'Apply' and 'Cancel' buttons. Callouts 1 through 4 are placed over the navigation menu, the 'Set Password' header, the 'Set Options' header, and the 'Print Page' checkbox respectively.

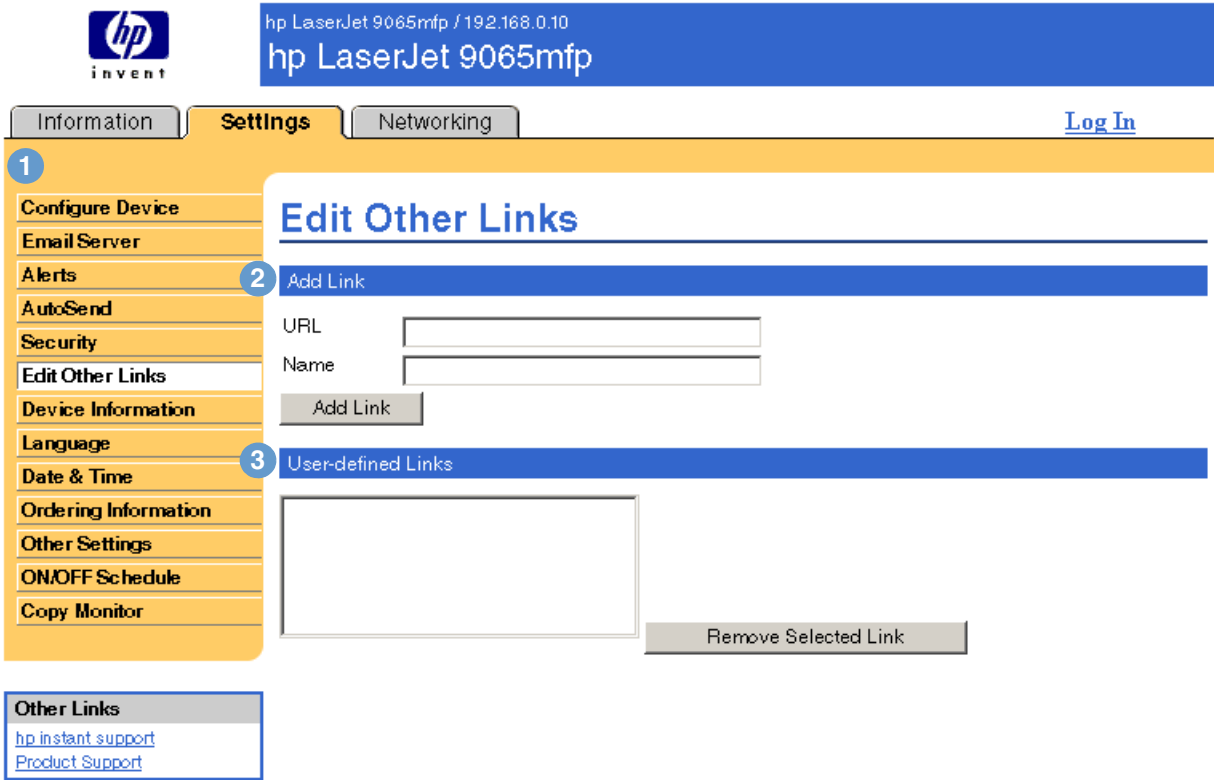

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Set Password	Set a password to control who can gain access to the HP EWS Settings and Networking tabs. After the password has been set, users are prompted to type a password when they open the HP EWS Settings and Networking pages.
3	Set Options	Select the control-panel buttons that you want to appear on the Device Status page (on the Information tab).
4	Print Page	When selected, makes the HP EWS Print page available to the general user in the Information tab menu.

Note

Take care not to lose your password. If a password is lost, please contact your IT administrator or service provider.

Edit Other Links

Use the Edit Other Links page to add up to five customized links to the Web sites of your choice. These links appear throughout the HP Embedded Web Server pages, in the **Other Links** box beneath the left navigational bar, together with the two permanent links (**hp instant support** and **Product Support**) that have already been established. The following illustration, table, and procedures describe how to use this page.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Add Link	Add a user-defined link.
3	User-defined Links	Lists the user-defined links that have been added. Use this area to delete links.

Callout	Area on the page	Information or capability provided by the area	
4	Other Links	hp instant support	Connect to Web resources that help you to solve specific problems and determine what additional services are available for your product. (Detailed information, including serial number, error conditions, and status, is forwarded to Hewlett-Packard's Customer Care. Hewlett-Packard treats this information as confidential.)
		Product Support	Gain access to specific product help from the HP Web site.
		My Service Provider	Connect to the home page of your service provider. This link appears only if it has been configured by the service provider.
		My Service Contract	Connect to a page that displays the terms and limits of your service contract. This link appears only if it has been configured by the service provider.

Adding a link

- 1 Under **Add Link**, type the URL and the name as you would like them to appear in the HP Embedded Web Server.
- 2 Click **Add Link**.

Removing a link

- 1 Under **User-defined Links**, select the link or links that you would like to remove.
- 2 Click **Remove Selected Link**.

Device Information

Use the Device Information page to provide a name of your choice for the device, assign an asset number, and configure the company name, person to contact about the device, and the device's physical location. The product IP address, product model, product number, and serial number are also available on this page.

The screenshot shows the HP LaserJet 9065mfp Settings page. At the top left is the HP logo and the word 'invent'. To the right, it says 'hp LaserJet 9065mfp / 192.168.0.10' and 'hp LaserJet 9065mfp'. Below this are three tabs: 'Information', 'Settings' (which is selected), and 'Networking'. In the top right corner, there is a 'Log In' link. On the left side, there is a vertical menu with the following items: 'Configure Device', 'Email Server', 'Alerts', 'AutoSend', 'Security', 'Edit Other Links', 'Device Information' (which is highlighted), 'Language', 'Date & Time', 'Ordering Information', 'Other Settings', 'ON/OFF Schedule', and 'Copy Monitor'. The main content area is titled 'Device Information' and contains the following fields:

Device Name:	hp LaserJet 9065mfp
Asset Number:	
Company Name:	your company
Contact Person:	anybody
Device Location:	floor 7 room 2
IP Address:	192.168.0.10
Product Name:	hp LaserJet 9065mfp
Device Model:	CXXXXXA
Device Serial Number:	CNZZX91001

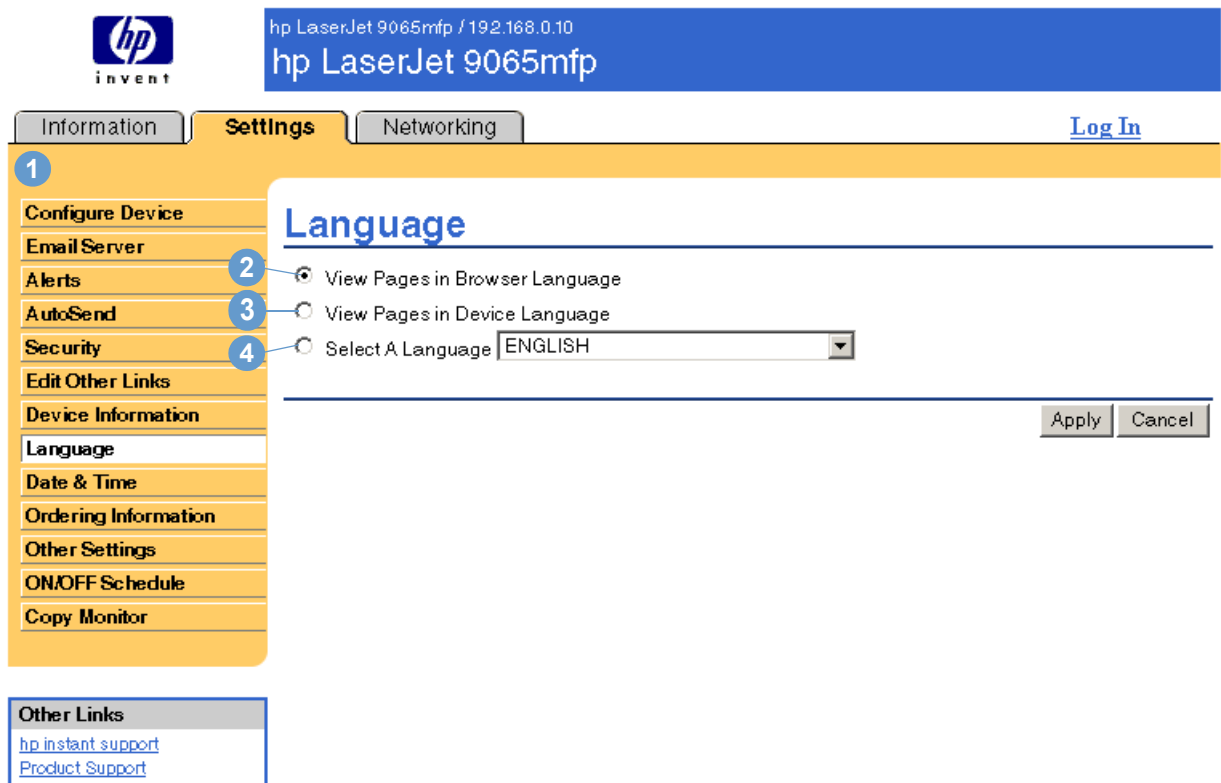

At the bottom right of the form area are 'Apply' and 'Cancel' buttons. Below the main content area, there is a section titled 'Other Links' with two links: 'hp instant support' and 'Product Support'.

Note If you make any changes on the Device Information page, click **Apply** to save the changes.

The information that is typed here appears on the Device Information page that can be opened from the **Information** tab. It also appears in e-mail messages that are sent from the product. This might be useful if you need to locate the product to replace supplies or fix a problem.

Language

Use the Language page to select the language in which the HP Embedded Web Server pages appear. The following illustration and table describe how to use this page.

CAUTION

Selecting **View Pages in Device Language** or **Select a Language** changes the language for everyone who uses the HP Embedded Web Server.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “ Navigating through the HP Embedded Web Server ” on page 5.
2	View Pages in Browser Language (default)	Use this feature to detect which language is selected for your Web browser and displays the HP Embedded Web Server pages in the same language.
3	View Pages in Device Language	Use this feature to detect which language is selected for the product control panel and displays the HP Embedded Web Server pages in the same language.
4	Select A Language	Display the HP Embedded Web Server pages in the selected language from these choices: <ul style="list-style-type: none"> • English • French • German • Italian • Spanish • Swedish • Danish • Norwegian • Dutch • Finnish • Portuguese

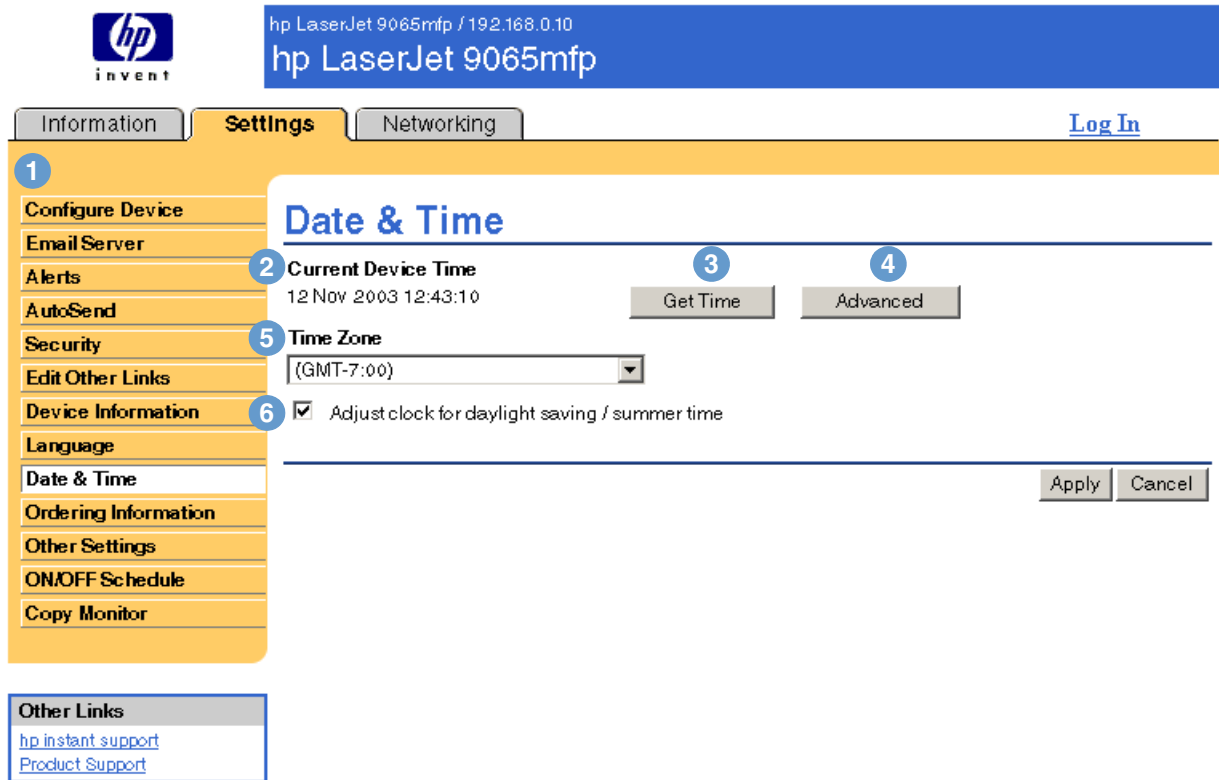

Note

The default language is the language that the Web browser is currently using. If your browser and control panel both use a language that is not available for the HP Embedded Web Server, English is selected as the default.

If you make any changes on the Language page, click **Apply** to save your changes.

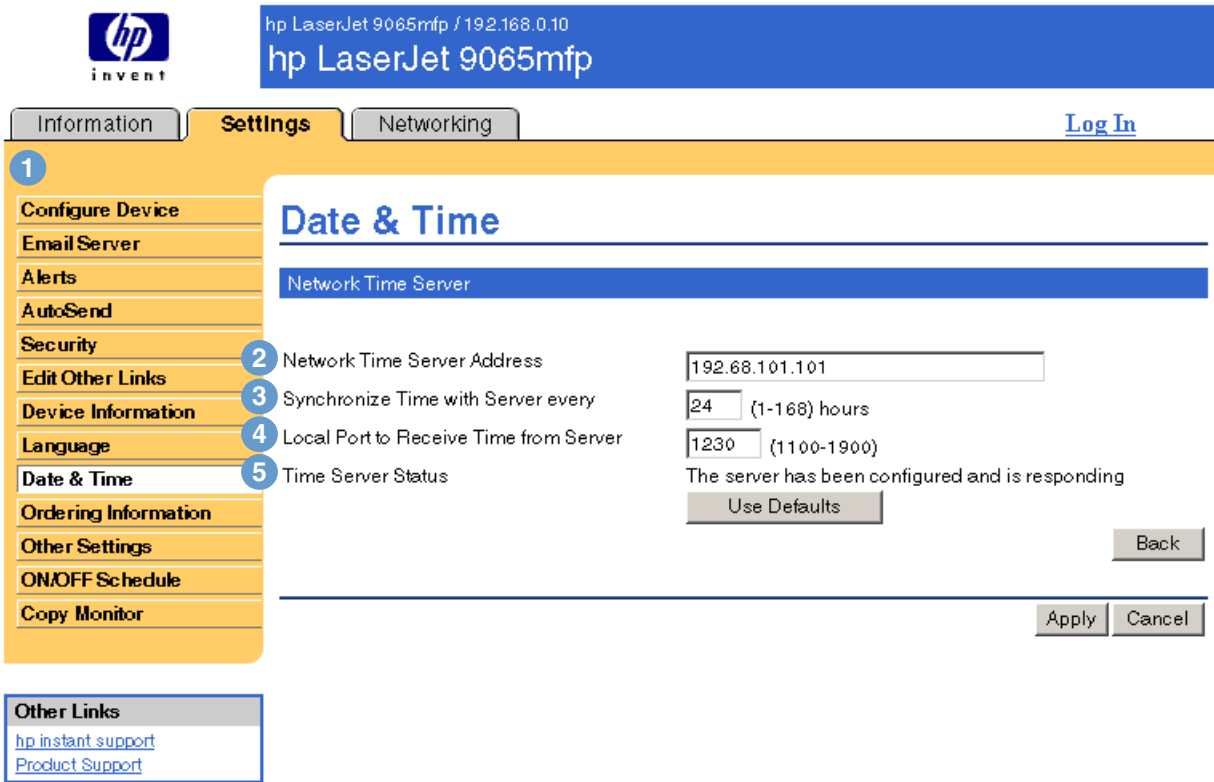

Date & Time

Use the Date & Time page to update the product time and configure the Network Time Server. The following illustration and table describe how to use this page.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “ Navigating through the HP Embedded Web Server ” on page 5.
2	Current Device Time	Displays the device's time. If the time is incorrect, an IT administrator can change the time from the device's control panel.
3	Get Time	When clicked, updates the Current Device Time.
4	Advanced	The button connects you to a page where you can configure a Network Time Server.
5	Time Zone	For each time zone selected, this setting adjusts the device time by the difference in hours between the selected time zone and Greenwich Mean Time (GMT).
6	Adjust clock for daylight saving / summer time	If selected, the device time is adjusted forward one hour.

The following illustration and table describe how to use the page that appears when you click the **Advanced** button.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Network Time Server Address	Lists the IP address of a Network Time Server that the product uses to get the Current Device Time.
3	Synchronize Time with Server every	Lists how often the product will refresh its current time with the Network Time Server.
4	Local Port to Receive Time from Server	Lists the port that the product uses to receive data from the Network Time Server.
5	Time Server Status	Shows the current status of the connection to the Network Time Server.

Ordering Information

Use the Ordering Information page to write specific ordering information for supplies. The text boxes allow customization of ordering procedures. Messages can hold up to 255 characters.

The IT administrator can decide which ordering information is displayed for staples on the 'Supplies Status' page.

The screenshot shows the HP LaserJet 9065mfp web interface. At the top, there's a blue header with the HP logo and the text 'hp LaserJet 9065mfp / 192.168.0.10'. Below this, there are three tabs: 'Information', 'Settings', and 'Networking'. The 'Settings' tab is active. On the left, there's a sidebar with a list of settings categories: 'Configure Device', 'Email Server', 'Alerts', 'AutoSend', 'Security', 'Edit Other Links', 'Device Information', 'Language', 'Date & Time', 'Ordering Information', 'Other Settings', 'ON/OFF Schedule', and 'Copy Monitor'. The 'Ordering Information' category is selected. The main content area is titled 'Ordering Information' and contains the following text: 'This feature allows you to input specific supplies ordering information to be displayed on the Supplies Status Page. Here you should add information like email address, URL, street address, phone number, contact person, etc.' Below this, there's a blue bar labeled 'Customer Installable'. Underneath, there's a section titled 'Current Staples Ordering Information:' followed by a text input field with a placeholder text '(Maximum of 255 characters allowed.)' and a 'Use Defaults' button. At the bottom right, there are 'Apply' and 'Cancel' buttons. Callout numbers 1 through 4 are placed on the page to indicate specific areas of interest.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Current Staples Ordering Information	Customer-installable supplies include current staples ordering information. This area of the page appears only when you are logged in as an IT administrator.
3	Enter any relevant information to order supplies (email address, URL, telephone number, etc...):	The text box enables complete customization of ordering information for service-related items, including detailed, supplier-specific instructions. If the text exceeds 255 characters, an error message will appear. This area of the page appears only when you are logged in as an IT administrator.
4	Use Defaults	The following message appears when you click the Use Defaults button: “Hewlett-Packard staples can be ordered on the internet, on-line through your printer software or by calling an authorized reseller. Refer to your device User Guide for instructions.”

Other Settings

The Other Setting page displays the configuration of the paper trays and the auto shut-off feature. You can also use this page to configure the paper-tray type and auto shut-off settings. The Other Settings page is shown in the following illustration and described in the following table.

The screenshot shows the HP LaserJet 9065mfp EWS interface. At the top, there's a blue header with the HP logo and 'invent' text, and the device name 'hp LaserJet 9065mfp'. Below the header are three tabs: 'Information', 'Settings' (selected), and 'Networking'. A 'Log In' link is in the top right. On the left is a navigation menu with items like 'Configure Device', 'Email Server', 'Alerts', 'AutoSend', 'Security', 'Edit Other Links', 'Device Information', 'Language', 'Date & Time', 'Ordering Information', 'Other Settings' (highlighted), 'ON/OFF Schedule', and 'Copy Monitor'. The main content area is titled 'Other Settings' and has two sections: 'Paper Handling' and 'Powersave Time'. The 'Paper Handling' section lists five trays with their sizes and types, and dropdown menus for selecting the paper type for each tray. The 'Powersave Time' section has an 'AUTO SHUT OFF' dropdown menu set to '240 MINUTES'. At the bottom right are 'Apply' and 'Cancel' buttons. Three callouts are present: '1' points to the EWS tabs, '2' points to the TRAY 2 TYPE dropdown, and '3' points to the AUTO SHUT OFF dropdown.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	TRAY TYPE	Select paper type for each configurable tray.
3	AUTO SHUT OFF	This setting determines the amount of idle time that elapses before the device shuts off automatically. Settings range from 30 minutes to 240 minutes.

Using the Paper Handling menu

To select the paper type for Tray 2, select **LETTERHEAD** from the list next to TRAY 2TYPE and click **Apply** to save the change. This procedure is provided *only* as an example. Other menu items can be set in a similar manner.

Note

Print drivers and software programs frequently override selections that are made in the Other Settings page. For more information, see the user guide that came with your product. All changes are reflected on the Printer Status page, the Configuration page and on the device's control panel.

ON/OFF Schedule

The ON/OFF schedule enables an IT Administrator to schedule copier shutdowns/wakeups on a daily basis. For example, the copier can be set to wake up at 08:00 and shut down at 18:00 hours. There can only be one time setting per day; however, each day can have a different wakeup and shutdown time. Additionally, there is also a lunch time setting that enables a set time when the copier will shut down and wake up for lunch.

ON/OFF Schedule

Enable ON/OFF Schedule

The ON/OFF Schedule is a device management function that shuts down power to the machine on a daily or hourly basis, and can be programmed specifically for lunch breaks, weekends and holidays, or any time the device is not required.

Enable ON/OFF Schedule

Timer Interrupt Password

Use this mode to establish a 4-digit PIN for using Timer Interrupt function. The default PIN of 0000 allows the timer function to be interrupted without entering the PIN.

Enter Timer Interrupt Password

Confirm Timer Interrupt Password

Timer Action ON/OFF Setting

Use this function to set the On/Off condition of the device for a given month. Set the On-Off condition for specific days or collectively, for all Mondays through Sundays of the given month. The default setting is collective: On for Mondays through Saturdays, and Off for Sundays.

5 Select month and year
November 2003 Update calendar

6 Select the days the device will be on (November / 2003)

Sun Mon Tue Wed Thu Fri Sat

1 2
 3 4 5 6 7 8 9
 10 11 12 13 14 15 16
 17 18 19 20 21 22 23
 24 25 26 27 28 29 30
 31

Note: before selecting another month, click Apply to store the current month settings.

Timer Setting

Use this function to set the On/Off times in hours and minutes for each day of the week or set the collective time for the entire week, i.e., the same On/Off time for each day.

7 Week Day	Power Up	Power Down
Sunday	00 : 00	10 : 20
Monday	07 : 30	10 : 20
Tuesday	05 : 00	10 : 20
Wednesday	07 : 45	10 : 20
Thursday	09 : 00	10 : 20
Friday	07 : 00	10 : 20
Saturday	00 : 00	10 : 20

8 Lunch Hour Off Setting
 Enable Lunch Hour

9 Power Down : Power Up :

[Apply](#) [Cancel](#)

Note: See the table on the following page for information about the callouts.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Enable ON/OFF Schedule	The ON/OFF Schedule check box is clear (not selected) by default.
3	Enter Timer Interrupt Password	Set a password that allows users to turn the copier on when it is in the off mode. When the setting is 0000 (the default setting), users are not required to enter a password to turn on the copier.
4	Confirm Timer Interrupt Password	Type the Timer Interrupt Password to confirm the timer-interruption password.
5	Select month and year	Select the month and year for which you are configuring the ON/OFF schedule.
6	Select the days the device will be on	Select the days on which to use the ON/OFF schedule. These selections will be in effect for all months unless specifically changed.
7	Timer Setting - Weekday Power Up and Power Down	For each day of the week, set the time to turn copying on and off.
8	Lunch Hour Off Setting	Select this check box to turn copying off during lunch.
9	Lunch Hour Off Setting - Power Down and Power UP	Set the time (in hours and minutes) to turn copying off for lunch and on again after lunch.

Copy Monitor

The Copy Monitor page displays and provides configuration settings for the device's Electronic Copy Monitor (ECM) feature. ECM authenticates and tracks copies on a per-user basis. The Copy Monitor stores up to 1,000 personal identification numbers (PINs). Each PIN is a unique, 8-digit password that represents a separate account that can be used for billing and record keeping. An 8-character user name can also be associated with each PIN. Each user name must be unique.

When ECM is enabled, users are required to enter a password at the control panel in order to make copies. Besides authenticating, ECM also tracks the number of copies a user makes.

The screenshot shows the HP LaserJet 9065mfp Copy Monitor settings page. The page is titled "Copy Monitor" and includes a "Define Copy Monitor Settings" section. This section contains two checkboxes: "Enable Copy Monitor" (2) and "Enable Send Authentication" (3). Below this is an "Add/Edit User Account" section. It features a form for adding a new user account with fields for Name (7), Password (8), and Limit (9), and a "Clear" button (10). An "Add >>" button (11) is used to add the user to a table. The table has columns for Name, Count, Limit, and Action. The Action column contains buttons for "Change Selected Item" (12), "Delete Selected Item" (13), and "Reset Selected Item Count" (14). A "Reset All Counts" button (15) is also present. At the bottom of the page are "Apply" (16) and "Cancel" (17) buttons.

Callout	Area on the page	Information or capability provided by the area
1	EWS tabs and menus	For more information, see “Navigating through the HP Embedded Web Server” on page 5.
2	Enable Copy Monitor	Select this box to turn on passwords for copying.
3	Enable Send Authentication	Select this box to turn on passwords for sending.

Callout	Area on the page	Information or capability provided by the area
4	Immediately stop device	Select this option to stop the device immediately when the copy count limit is reached.
5	Stop device after job finishes	When this option is selected, the device stops printing when the user's copy count is reached, after finishing the current print job.
6	Display warning	Select this option to display a warning that the copy count limit has been reached. The warning message appears in the copy menu of the device control panel.
7	Name:	The user name that you type in this field can be up to eight alphanumeric characters in length. It can also contain the following special characters: hyphen (-), forward slash (/), opening parenthesis ((), and closing parenthesis ()). Each user name must be unique.
8	Password:	Type an 8-digit numeric password. Each password must be unique.
9	Limit:	Set the number of copies that the user can make. The minimum setting is 0; the maximum is 999,999 copies.
10	Clear	Click this button to clear the settings for the name, password, and limit.
11	Add	After setting a new user account in the User Account area, click this button to add the user name to the Copy Monitor list. The change occurs only in the browser. To put the change into effect, click Apply . If you change your mind, click Cancel , and no change is made in the Copy Monitor.
12	Change Selected Item	Click this button to edit the selected user account. If you select more than one user, information for the first user appears in the User Account area, where you can change the user account information. After changing it, you must click Add to return the modified user account back to the Copy Monitor list.
13	Delete Selected Item	After you select a user name, click this button to delete the account. You can select more than one user account to delete.
14	Reset Selected Item Count	Select this button to reset to zero the copy counts for the selected user name. You can select more than one user name and perform this operation for all of them at once.
15	Reset All Counts	Select this button to reset all counts to zero. A new confirmation page will be opened, so that you can confirm the operation or return to the Copy Monitor page without resetting any count.
16	Apply	Click this button to send all changes made in the Copy Monitor list to the device. The Action column indicates the action that will go into effect for each user account when you press Apply .
17	Cancel	Click this button to revert to the Copy Monitor settings that were in effect before you made any changes in the browser.

4 Managing network operation from the Networking pages

Overview

Use the Networking pages to configure and manage your device on your network. The appearance and features of the Networking pages will differ, depending on the model and version of your HP Jetdirect print server. The following screen is similar to what you might see when you click **Networking**. From the left navigational bar, click the Networking menu for the page that you want to view.

The screenshot displays the HP LaserJet 9065mfp Networking Settings page. The top navigation bar shows 'Information', 'Settings', and 'Networking'. The left sidebar is divided into three sections: CONFIGURATION (with sub-items: Network Settings, Other Settings, Privacy Settings, Select Language), SECURITY (with sub-items: Settings, Authorization, Mgmt. Protocols), and DIAGNOSTICS (with sub-items: Network Statistics, Protocol Info, Configuration Page, Configuration Page). Below the sidebar are 'Other Links' for Help, Support, and HP Home. The main content area is titled 'Network Settings' and features tabs for TCP/IP, IPX/SPX, AppleTalk, DLC/LLC, and SNMP. The IP Configuration Method is set to BOOTP. A note states: 'Note: A change in IP Address will result in loss of connectivity to the browser.' The fields are as follows: Host Name: HP LaserJet 9065mfp; IP Address: 192.168.0.10; Subnet Mask: 255.255.255.0; Default Gateway: 192.68.0.200; Domain Name: (empty); Primary WINS Server: (empty); Secondary WINS Server: (empty); Syslog Server: (empty); Syslog Maximum Messages: 10; Syslog Priority: 7; Idle Timeout: 270 Seconds; TTL/SLP: 4; System Contact: (empty); System Location: (empty); LPD Banner Page: Enable; Default IP: Legacy Default IP (when BOOTP/DHCP/RARP servers are not available). A checkbox is checked for 'Send DHCP requests if IP address is Auto IP (169.254.x.x) or Legacy Default IP'. 'Apply' and 'Cancel' buttons are at the bottom right.

Note: See the table on the following page for information about the callouts.

Callout	Area on page	Information or capability provided by area on page
1	EWS tabs and menus	For more information, see “ Navigating through the HP Embedded Web Server ” on page 5.
2	Help	Click Help for more information about the options on the Networking tab.

Depending on your HP Jetdirect print server model and operating version, the following are some tasks that you can perform from the Networking pages:

- Change network configuration settings for various types of network connections.
- Enable or disable printing protocols.
- Set up a support contact and support URLs.
- Set a password to control access to printer and network configuration settings.
- Configure the security of your product through the use of passwords, access lists, and management protocols.
- View general network status information, including network statistics that are stored on the print server, for network troubleshooting or optimization.
- View protocol information for all supported network connections.
- Display the HP Jetdirect Configuration page.
- Set the frequency at which the HP Embedded Web Server checks the network status.

For more information about the Networking pages, see the following sources:

- **Help.** On each Networking page, a **Help** link under **Other Links** provides a description of the networking features and helpful tips for using them. Also, from the Help page you can gain access to additional help from HP’s Web site.
- **HP Jetdirect Print Server Administrator’s Guide.** This guide is normally available on the software CD that came with your product. To download the most recent version of the guide, go to: http://www.hp.com/support/net_printing.

5 Using the Other Links as a resource

The **Other Links** box contains two permanent links that provide quick access to product-specific information, such as interactive troubleshooting and ordering information for HP genuine supplies.

Note You can use the Edit Other Links page on the **Settings** tab to add up to five customized links to the Web sites of your choice. These links appear throughout the HP EWS pages, in the **Other Links** box beneath the left navigational bar. For more information, see [“Edit Other Links” on page 32](#).

hp instant support

Hewlett-Packard offers hp instant support, an internet-based support system that collects diagnostic information from your product and matches it with HP's information database. At hp instant support, you can find intelligent solutions that help you resolve problems quickly and easily.

How hp instant support works

Information is gathered from your product and securely transmitted to Hewlett-Packard when you click **hp instant support**. The hp instant support Web site reads the product data to analyze the product's current status. The Web site creates a customized Web page that appears in the browser window and contains easy-to-follow text and visual aids. The hp instant support Web site also directs you to additional services that are available for your product.

Before any of the product data is sent to Hewlett-Packard for analysis, you can view all of the information (for example, serial number, error conditions, and product status) that will be forwarded. Hewlett-Packard treats this information as confidential.

Information you can get from hp instant support

The hp instant support Web site provides these tools for troubleshooting and for maintenance:

- Firmware and software updates.
- Troubleshooting for recent events that are listed on the Event Log. For example, the product might show a jam as the most recent event listed in the event Log. The hp instant support Web site detects the event and provides troubleshooting information for the jam.
- Support packs.
- Product documentation, such as user guides and getting started guides.

Product Support

The **Product Support** link connects you to a Web page that brings together a comprehensive menu of support resources that business people need. From this Web page, you can accomplish these tasks and more:

- Find a list of HP products at one site: desktops, workstations, servers, storage devices, printer, scanners, digital imaging, and mobile devices.
- Obtain technical support. Solve a problem; find information to set up, install, and configure your product; discover and use a product; maintain your product; upgrade and migrate your product software and driver; and recycle products or dispose of them correctly.
- Gain access to self-solve resources such as FAQs, user documentation, features and specifications, and product compatibility information.
- Collaborate with HP and with your peers through discussion groups, e-mail support, and phone support.
- Use task-based navigation to identify the task area that you want to work on and quickly discover related topics and tools.

In addition, you can find these features: hot topics, a subscription center, product rebate offers and other announcements, and training and education opportunities.

My Service Provider and My Service Contract

The **My Service Provider** and the **My Service Contract** links appear only if they have been created by the service provider in the Other Links page on the **Settings** tab. The link can then be clicked by any user to get information about the service provider and the service contract. The information, which can be up to 50 characters long, is stored in the permanent storage of the device.

When these links have been created, the appearance of the **Other Links** box changes to include the new links, as shown in the following illustration.
