Watch Charging

The GPS watch features a built-in rechargeable battery. To charge it, you need to use the charging cable which has been supplied with the device.

To protect the battery, please charge the watch for at least 12h for first time usage and for over 8 hours for second and third time usage.

Insert SIM Card

This watch relies on GPS technology and modern mobile devices. In order for these to work, they require a Micro SIM card with 2G data.

Not support the ordinary size SIM card
Not support the Nano SIM card

- The ICE Pal Plus watch works with GSM signal (2G network).
- It only supports the iPhone 4s-size Micro SIM card.

How to Use the Watch

Without a SIM card, it works as a watch

- 1) Long press the Power button to turn ON watch.
- 2) Long press the Power button for about 3 seconds to turn OFF the watch.

With a SIM card, it acts as a mobile phone after being powered on

- 1) Power OFF the watch and insert the Micro SIM card. Then, close the rubberplug.
Tips: Please make sure the SIM card has the function of Caller ID Display, SMS and GPRS mobile data flow.
- 2) Light up the watch display screen to check the time, data, weeks and steps.

Watch Functions

- **SOS**
Long press phone call button for 3 seconds, the watch will automatically send a current location to the "family contact list", and continually dial the 1st number and alternate between the 2nd and 3rd numbers for 3 times until the phone gets through successfully. Press the "Voice Message" button to hang up the phone call.

• Make a phone call

Standby statement
Double press the "Phone Call" button to enter the phonebook page. Press the "Phone Call" button again to choose a phone number; then long press this button to dial; press voice message button to exit the phonebook page. Press the "Voice Message" button to hang up the phone call during dialing and answering a phone call.

• Answer a phone call

Press the "Phone Call" button to answer the phone call from family members pre-set.

Press the "Voice Message" button to hang up the phone call.

About App

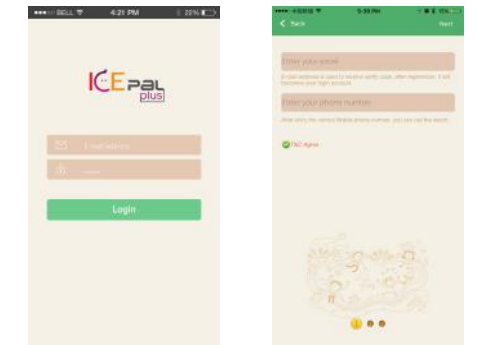

App Download

iPhone users can search and download the app "ICE PAL plus" on the App Store. Android users can search and download the app "ICE PAL plus" on GooglePlay.

Registration

- 1) Install and open the App after download.
- 2) Click the "Registration" button to enter the registration page. Choose your country and fill in your phone number to complete the registration.

Add Devices

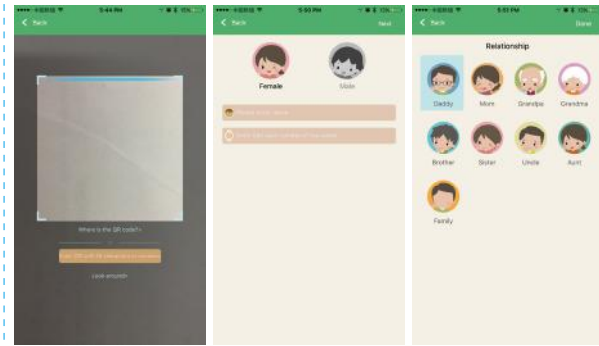

- 1) Connect your mobile phone using WIFI or switch on mobile data to get an internet connection
- 2) Choose your country and fill in your account number and password to log on to the App.
- 3) Click the icon on the left head to enter the watch addition page.

How to Add a Device

Way 1: Scan the QR-code on the back of watch or the below QR-code to add the device

Please keep this QR-code for future device addition

Way 2: Fill in the CID number on the gift box or warranty card to add the device and edit device information.

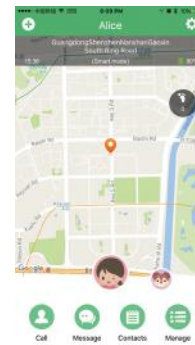

- The first account connected with the watch will default as its administrator.
- You can add contacts as many as you want.

App Operation

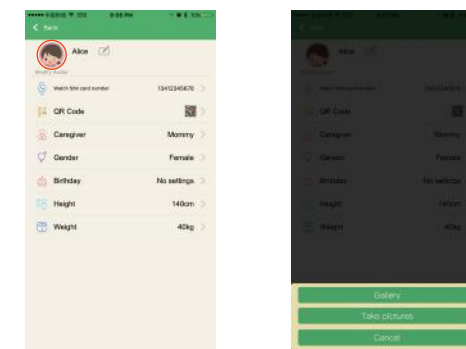

Main Screen

After logging in, you will see the main screen as shown below. It shows your added device information such as your device name / time / address / watch battery capacity and the main functions of the watch.

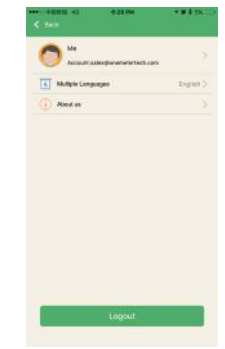

1. Edit User Information

Press the person icon on the left top of the main screen. Then, you can edit the user information of the watch. You can also change the watch image by clicking the person icon in the user info page.

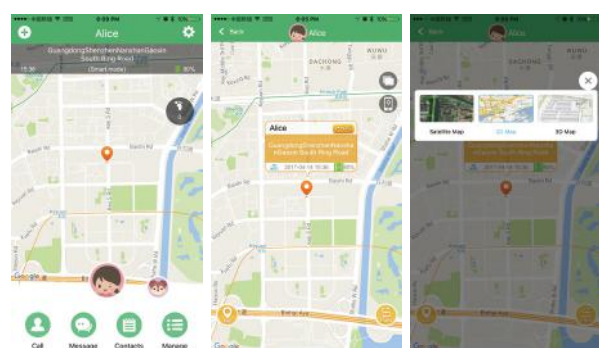

2. Settings

Press the setting icon on the top right corner to enter the watch settings page as shown below. You can change the App's languages, manage your account information or logout from the App.

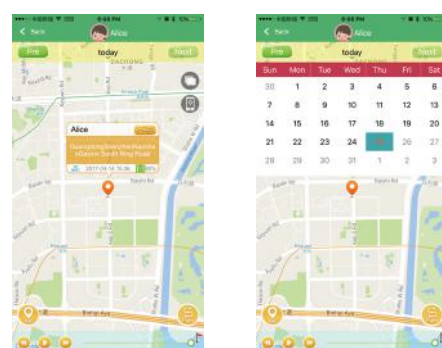

3. Watch Location

Press the location area on the main page to check the precise position of the watch. You can also change the map model: satellite map, 2D map or 3D map by pressing the icon on the right hand side.

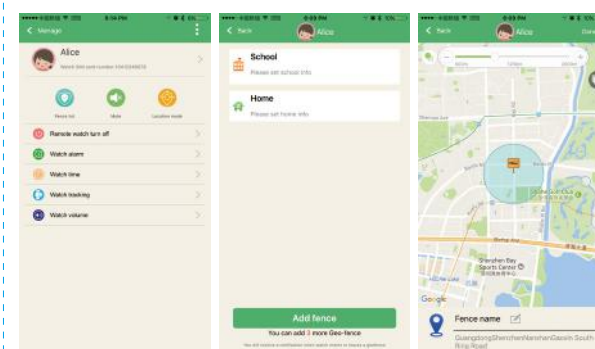

4. Route Playback

Press the icon to track the history of the watch device by setting the date. It will then show the route on the map.

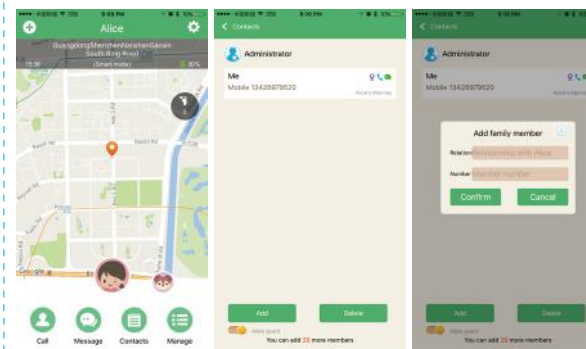

5. Geo-fence List

A "fence" is a virtual boundary for a zone which the GPS watch is not supposed to leave. For example, if you use the GPS watch device on your child, you could set up a geo-fence around your house or school to get an alert if your child leaves the area. Press the fence list icon in "Manage Page" to set a geo-fence. Press the icon and click the fence list icon.

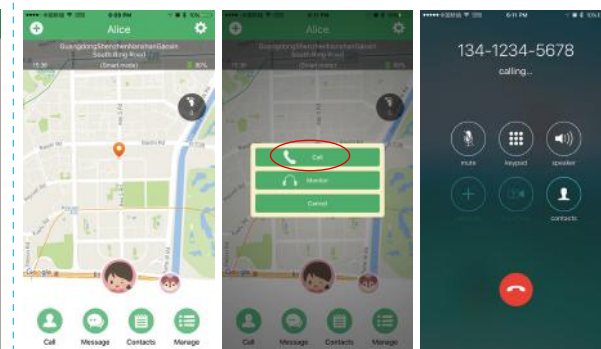

6. Contact List

This watch allows 30 contact numbers including the administrator preset in the contact list. Press the icon in "Manage Page" to enter the contact list. Click the "Add" button to add numbers as shown below.

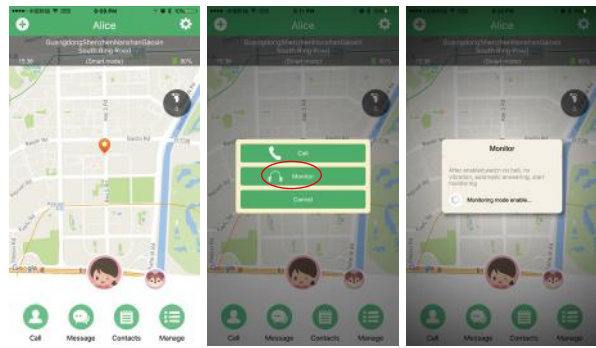

7. Phone Call

Press the icon to make a phone call to the watch device as shown below.

8. Guarding

Click icon  in main page to enter the guarding function. Press the icon  and it will automatically place a phone call to the watch without ringing. Then, you can hear the environment around the watch to ensure the safety of your child.

9. Voice Message

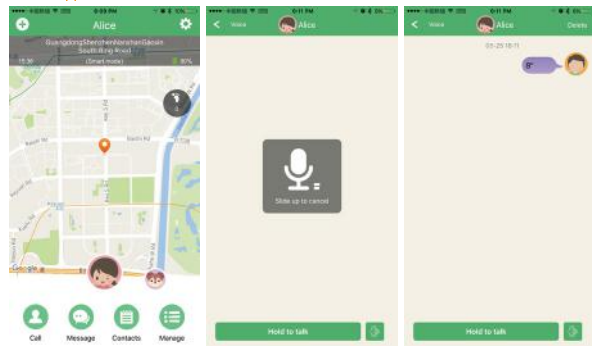

Press voice message button 

(1) Long press "Hold to Talk" to record a voice message and send it to the watch

***Voice message recorded cannot be longer than 15 seconds.**

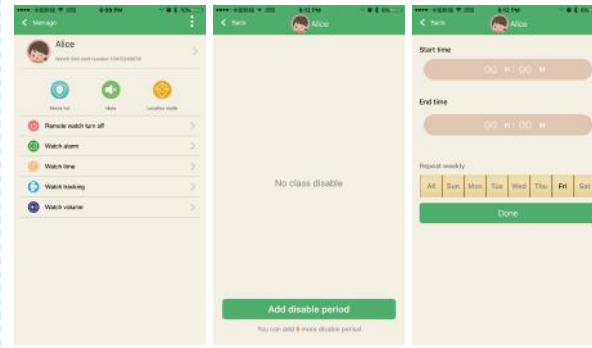

(2) When receiving a voice message from the watch, the icon will look like this and you can click the icon to check message details.

*** The mobile phone will receive reminder messages even if it is switched off as the App still runs offline**

10. Mute Mode

To make sure kids are not disturbed during class, you can set the watch on mute mode using the App. Click the icon  in "Manage Page" to enter mute mode settings. You can set 5 different mute periods and repeat days at the same time. During the mute period, the watch will receive the phone call without ringing or vibrating as shown below:

11. Manage the Watch

Press the manage icon  on the main screen to enter the watch's "Advanced Settings" page as shown below. You can remotely turn off the watch, watch alarm, watch volume or press the icon  to restore factory settings.
