Setup Code

⚠️

This is a backup of your device's Setup Code. Please keep it as future reference for your device.

## Installation

1. Plug the router into a power source. Wait for the status LED to flash orange.

2. Download the EAGLE PRO AI app and launch it.

   Download on the **App Store**

   GET IT ON **Google Play**

   🔍 EAGLE PRO AI

   ❯

   EAGLE PRO AI

3. Tap **Install New Device**. Scan the Setup code. Follow the on-screen instructions to complete the setup.

   Install New Device

😉 You're all good to go! Connect devices to your network using the Wi-Fi Name (SSID) and Wi-Fi Password that you created during the setup process. Enjoy the Internet!

Quick Extender Setup

You can easily pair you device with any router to extend your wireless coverage.

1 / Plug the M32 into a power source near your wireless router. Wait for the status LED to flash orange.

2 / Press the WPS button on your router for 3 seconds. Refer to your router's manual for router behaviour.

3 / Press the WPS button on your M32 for 3 seconds. The status LED should start to flash white.

4 / When the status LED turns solid white (may take up to 3 minutes), this indicates that your M32 is connected to your wireless router.

Your setup is complete! You can now unplug and move your device to a location between your router and the area where you want wireless coverage. By default, your device will share the same Wi-Fi Name and Wi-Fi Password as your router.

IMPORTANT

WPS may be disabled on some Routers or Modems. If the WPS Status LED on your Router or Modem does not start blinking when you have pressed the WPS button, try again and hold it a little longer. If it still does not blink, STOP, and configure your M32 using *EAGLE PRO AI App Setup.*

FAQ

Why can't I access the web-based configuration utility?
Verify that **http://WXYZ.devicesetup.net/** has been correctly entered into the browser (WXYZ represents the last 4 characters of the MAC address). The Wi-Fi Name(SSID), Wi-Fi Password, and device password are printed on the Quick Installation Guide and on the device label.

Why can't I access the Internet?
Power cycle your router and check your Internet access again. If you still can not connect to the Internet, contact your Internet service provider.

What do I do if I forgot my device password or my Wi-Fi Password?
If you forgot your password, you must reset your router. This process will change all your settings back to the factory defaults.

How do I restore the router to its factory default settings?
Locate the reset button. With the router powered on, use a paper clip to hold the button down until the LED turns solid red. Release the button and the router will go through its reboot process.

GPL Code Statement

This D-Link product includes software code developed by third parties, including software code subject to the GNU General Public License ("GPL") or GNU Lesser General Public License ("LGPL").
