2 Getting Started

We recommend that you:

- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment
- Review the contents of this user manual

Go to http://www.kramerelectronics.com/support/product_downloads.asp to check for up-to-date user manuals, application programs, and to check if firmware upgrades are available (where appropriate).

2.1 Achieving the Best Performance

To achieve the best performance:

- Use only good quality connection cables (we recommend Kramer high-performance, high-resolution cables) to avoid interference, deterioration in signal quality due to poor matching, and elevated noise levels (often associated with low quality cables)
- Do not secure the cables in tight bundles or roll the slack into tight coils
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality
- Position your Kramer **6810HDxI** away from moisture, excessive sunlight and dust

This equipment is to be used only inside a building. It may only be connected to other equipment that is installed inside a building.

2.2 Safety Instructions

Caution: There are no operator serviceable parts inside the unit

Warning: Use only the Kramer Electronics input power wall adapter that is provided with the unit

Warning: Disconnect the power and unplug the unit from the wall before installing

2.3 Recycling Kramer Products

The Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC aims to reduce the amount of WEEE sent for disposal to landfill or incineration by requiring it to be collected and recycled. To comply with the WEEE Directive, Kramer Electronics has made arrangements with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of waste Kramer Electronics branded equipment on arrival at the EARN facility. For details of Kramer's recycling arrangements in your particular country go to our recycling pages at <http://www.kramerelectronics.com/support/recycling/>.

The “–” indicates that no group is chosen and the given channels are not embedded.

If no audio is connected to the AES inputs, the display shows “–”.

3. The audio channels are embedded from the audio sources into the selected groups of the SDI data stream.

If audio was already embedded in the groups of the SDI stream, it is replaced by the audio embedded by the 6810HDxI.

To operate the **6810HDxI** as a de-embedder:

1. Connect the AUDIO OUT TO DE-EMBEDDER connectors to the audio acceptors.
2. Choose the source group by pressing the DE-EMBEDDER GROUP SELECT button.

The display cycles through groups 1, 2, 3, 4, and –.

The “–” indicates that no group is chosen and the given channels are muted.

You can scroll only the groups where audio is detected (as indicated by the Audio Group Detect LEDs)

3. The audio channels are de-embedded from the selected groups of the SDI data stream to the audio acceptors.

Note: You cannot de-embed the same group for two channels at the same time.
