FCC Notice

Warning: This equipment generates, uses, and can radiate radio frequency energy; and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of part 15 of FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case, the user, at his own expense, will be required to take whatever measures may be required to correct the interference.

The Gateways are listed by a Nationally Recognized Testing Laboratory.

25F to 25F Gender Changer

This is used to change a 9-pin male end connector to female.

Units Supported

- **C20**

JBM Electronics Part Number: **C/9FF-XGENDER**

25F to 25F Gender Changer

This is used to change a 25-pin male end connector to female.

Units Supported

- **C20**

JBM Electronics Part Number: **C/25-XGENDER**

RJ-45 Straight

This table lists the Ethernet pins used in the Ethernet Port ETH0. For a straight-wired connection the pins should be connected from one connector to the other without transpositions or other wiring changes.
