Precautions

Installation

- Install in a place which is level, dry and neither too hot nor too cold—between 5°C and 35°C (41°F and 95°F).
- Install the System in a location with adequate ventilation to prevent internal heat buildup inside the System.

DO NOT install the System in a location near heat sources, or in a place subject to direct sunlight, excessive dust or vibration.

- Leave sufficient distance between the System and the TV.
- Keep the speakers away from the TV to avoid interference with TV.

Power sources

- When unplugging the System from the wall outlet, always pull on the plug, not the AC power cord.

DO NOT handle the AC power cord with wet hands.

Moisture condensation

Moisture may condense on the lenses inside the System in the following cases:

- After starting to heat the room
- In a damp room
- If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, then plug it in again.

Internal heat

- A cooling fan is mounted on the rear panel to prevent heat buildup inside the main unit (see page G-1).

For safety, observe the following carefully:

- Make sure there is good ventilation around the main unit. Poor ventilation could overheat and damage the System.
- DO NOT block the cooling fan and the ventilation openings or holes. If they are blocked by a newspaper or cloth, etc., the heat may not be able to get out.

Others

- Should any metallic object or liquid fall into the System, unplug the AC power cord and consult your dealer before operating any further.

DO NOT disassemble the System since there are no user serviceable parts inside.

- If you are not going to operate the System for an extended period of time, unplug the AC power cord from the wall outlet.

If anything goes wrong, unplug the AC power cord and consult your dealer.

How to Read This Manual

To make in this manual as simple and easy-to-understand as possible, we have adapted the following methods:

- Button and control operations are explained as listed in the table below. In this manual, the operations using the remote control is mainly explained; however, you can use the buttons and controls on the main unit if they have the same (or similar) name and marks.
- **Some related tips and notes are explained later in the sections "Learning More about This System" (on pages 37 to 38) and "Troubleshooting" (on page 40), but not in the same section explaining the operations.** If you want to know more about the functions, or if you have a doubt about the functions, go to these sections and you will find the answers.

	Indicates that you press the button **briefly**.
	Indicates that you press the button **briefly and repeatedly** until an option you want is selected.
	Indicates that you press one of the buttons.
	Indicates that you **press and hold** the button for a specified period. • The number inside the arrow indicates the period of press (in this example, 2 seconds). • If no number is inside the arrow, press and hold until the entire procedure is complete or until you get a result you want.
	Indicates that you turn the control toward the specified direction(s).

	Indicates that this operation is only possible using the remote control.
	Indicates that this operation is only possible using the buttons and controls on the main unit.

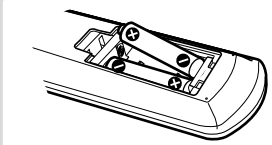
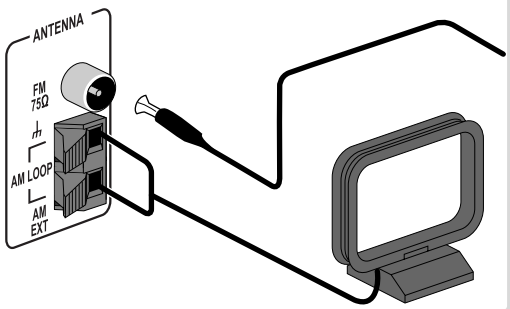
Getting Started

Step *1*: Unpack the package and check the accessories.

Step *2*: Prepare the remote control.



Step *3*: Hook up the components such as AM/FM antennas, speakers, etc. (see pages 4 to 6).



Finally plug the AC power cord.

Now you can operate the System.

Step *1*: Unpack

After unpacking, check to be sure that you have all the following items. The number in parentheses indicates the quantity of each piece supplied.

- FM antenna (1)
- AM loop antenna (1)
- Remote control (1)
- Composite video cord (1)
- Batteries (2)

If any item is missing, consult your dealer immediately.

Step *2*: Prepare the Remote Control

Insert the batteries into the remote control by matching the polarity (+ and –) correctly.

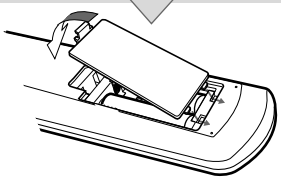
3



STOP!

- DO NOT use an old battery together with a new one.
- DO NOT use different types of batteries together.
- DO NOT expose batteries to heat or flame.
- DO NOT leave the batteries in the battery compartment when you are not going to use the remote control for an extended period of time. Otherwise, the remote control will be damaged from battery leakage.

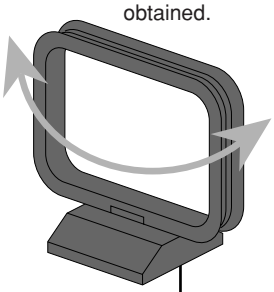
Step 3: Hook Up

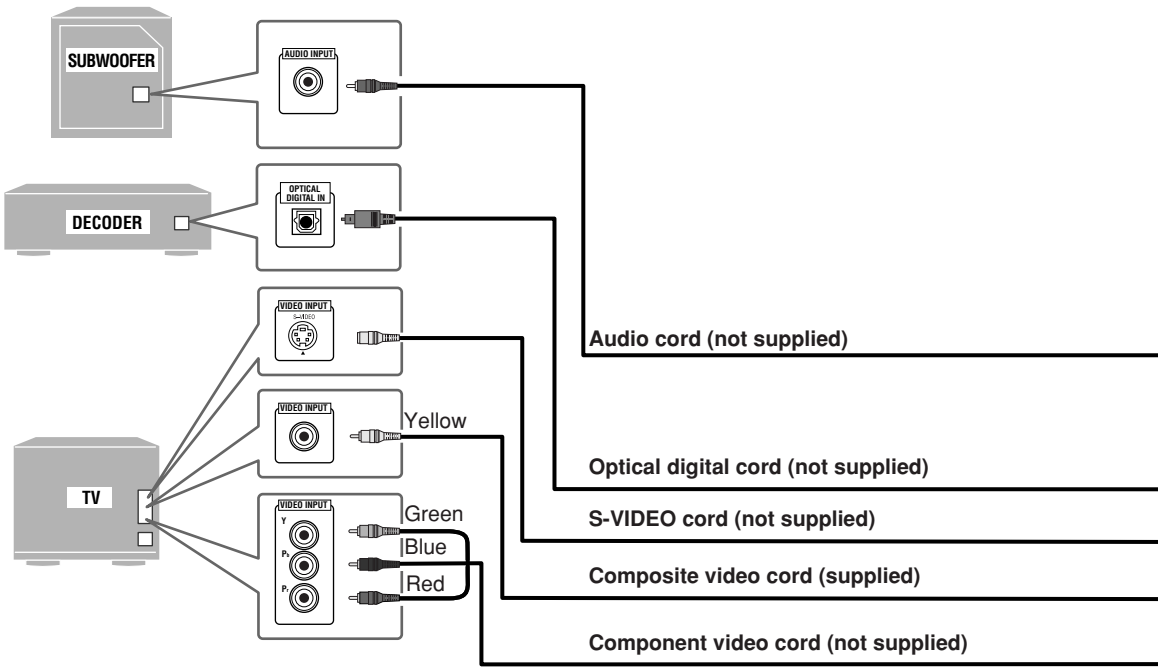
If you need more detailed information, see page 6.

Illustrations of the input/output terminals below are typical examples.
When you connect other components, refer also to their manuals since the terminal names actually printed on the rear may vary.

Turn the power off to all components before connections.

AM loop antenna (supplied)
Turn it until the best reception is obtained.





To a wall outlet
Plug the AC power cord only after all connections are complete.

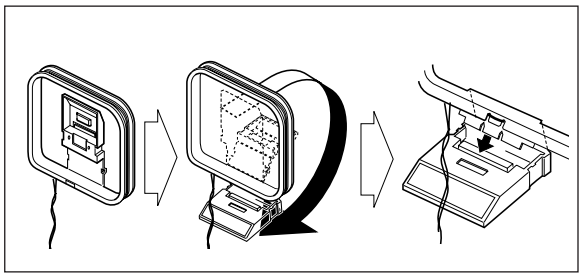
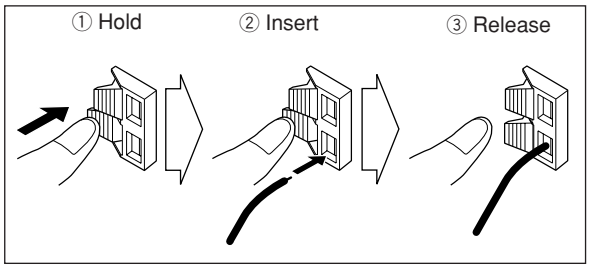
To assemble and connect the AM loop antenna

To assemble the AM loop antenna



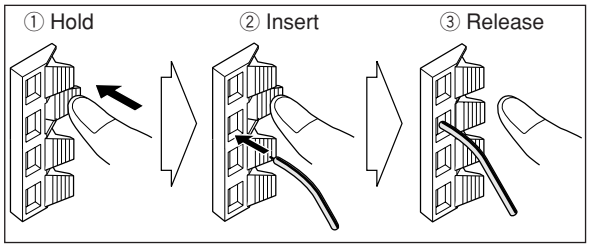
To connect the AM loop antenna



- If the AM loop antenna wire or speaker cords are covered with vinyl, remove the vinyl to expose the tip of the antenna by twisting the vinyl.
- Make sure the antenna conductors do not touch any other terminals, connecting cords and power cord. Also, keep the antennas away from metallic parts of the System, connecting cords, and the AC power cord. This could cause poor reception.

To connect the speaker cords

Connect the right speaker to the R terminals, and the left speaker to the L terminals.



When connecting the speaker cords, match the polarity of the speaker terminals: gray cord (+) to red (+) and gray cord with black stripe (–) to black (–).

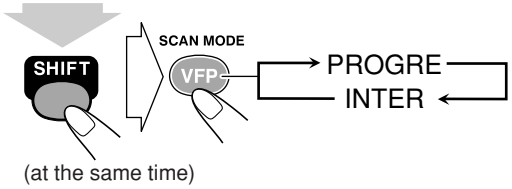
STOP!

- DO NOT connect more than one speaker to each terminal.
- DO NOT allow the conductor of the speaker cords to be in touch with the metallic parts of the System.

Changing the Scanning Mode

Remote ONLY

This System supports progressive scanning.
If you connect a progressive TV through the COMPONENT jacks, you can enjoy a high quality picture from the built-in DVD player by selecting progressive mode.



PROGRE (Progressive)	Progressive scanning. For a progressive TV. The PROGRESSIVE indicator lights.
INTER (Interlaced)	Interlaced scanning. For a conventional TV.

Before Operating the System

Playable Disc Types

This System has been designed to play back the following discs:

Disc Type	Mark (Logo)	Video Format	Region Code* Number
DVD Video		NTSC	1 or ALL
DVD Audio			
Video CD (VCD)			——
Super Video CD (SVCD)			——
Audio CD		——	——
CD-R	The System can play back CD-R or CD-RW recorded in the Audio CD, Video CD, SVCD, MP3, and JPEG formats.		
CD-RW			
DVD-R	The System can play back DVD-R or DVD-RW recorded in the video format.		
DVD-RW			

In addition to the above discs, this system can play back audio data recorded on CD Text, CD-G (CD Graphics), and CD-Extra.

- The following discs cannot be played back:
  DVD-ROM, DVD-RAM, DVD+R, DVD+RW, CD-I (CD-I Ready), CD-ROM, Photo CD, SACD, etc.
  Playing back these discs will generate noise and damage the speakers.
- In this manual, "file" and "track" are interchangeably used for MP3/JPEG operations.

*** Note on Region Code**

DVD players and DVDs have their own Region Code numbers. This System can play back only DVDs recorded with the NTSC color system whose Region Code numbers including "1."

Ex.:

If a DVD with the improper Region Code numbers is loaded, "RGN ERR (REGION CODE ERROR)" appears on the display and playback will not start.

Caution for DualDisc playback:

The Non-DVD side of a "DualDisc" does not comply with the "Compact Disc Digital Audio" standard. Therefore, the use of Non-DVD side of a DualDisc on this product may not be recommended.

DVD Video—digital audio formats

The System can play back the following digital audio formats.

- **Linear PCM:** Uncompressed digital audio, the same format used for CDs and most studio masters.
- **Dolby Digital:** Compressed digital audio, developed by Dolby Laboratories, which enables multi-channel encode to create the realistic surround sound.
- **DTS (Digital Theater Systems):** Compressed digital audio, developed by Digital Theater Systems, Inc., which enables multi-channel like Dolby Digital. As the compression ratio is lower than for Dolby Digital, it provides wider dynamic range and better separation.

When playing a multi-channel encoded DVD, the System properly converts these multi-channel signals into 2 channels, and emits the downmixed sound from the speakers.

- **To enjoy the powerful sound of these multi-channel encoded DVDs,** connect a proper decoder or an amplifier with a proper built-in decoder to the digital output terminal on the rear.

IMPORTANT: Before playing a disc, make sure of the following...

- Turn on the TV and select an appropriate input mode on the TV to view the pictures or on-screen displays on the TV screen.
- For disc playback, you can change the initial setting to your preference. See "Setup Menu Operations" on page 32.

If " ⃠ " appears on the TV screen when you press a button, the disc cannot accept the operation you have tried to do, or data required for that operation is not recorded on the disc.

- Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic", "MLP Lossless", and the double-D symbol are trademarks of Dolby Laboratories.
- "DTS" and "DTS 2.0 + DIGITAL OUT" are trademarks of Digital Theater Systems, Inc.

"DVD Logo" is a trademark of DVD Format/Logo Licensing Corporation registered in the US, Japan and other countries.

D. (Dynamic) RANGE COMPRESSION

You can compress the dynamic range (the difference between the loudest sound and the softest sound) to enjoy a powerful sound even at a low volume level when listening to Dolby Digital software. This is useful at night.

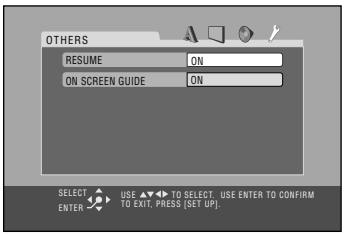
• The effectiveness varies depends on a software.

Select one of the following:

AUTO:	To apply the compression effect to the downmixed multi-channel sound.
ON:	To always apply the compression effect for all Dolby Digital software. Loud sound will become low and vice versa.

■ OTHERS Setup Menu

You can change some other convenient functions.



RESUME

You can activate or deactivate Resume for disc playback (see pages 12).

Select one of the following:

ON:	To activate Resume.
OFF:	To cancel Resume.

ON SCREEN GUIDE

You can activate or deactivate the on-screen guide icons (see pages 12 and 25).

• When recording the picture on a VCR, select “OFF” to avoid recording the guide icons on your video tape.

Additional Information

Learning More about This System

Getting Started (see pages 3 to 6)

Changing the Scanning Mode:

• To enjoy the progressive video picture, connect a TV with the progressive video input using component video cord.

Daily Operations—Playback (see pages 10 to 14)

Listening to the Radio:

• If you store a new station into an occupied preset number, the previously stored station in that number will be erased.
• When you unplug the AC power cord or if a power failure occurs, the preset stations will be erased in a few days. If this happens, preset the stations again.

Playing Back a Disc:

• When using an 8 cm (3-3/16 inch) disc, place it on the inner circle of the disc tray.
• On some DVD, SVCD, or VCD discs, the actual operations may be different from what is explained in this manual, due to the programming and disc structure; such differences are not malfunction of this System.
• When discs* in more than one tray are loaded on the disc trays, they are played in sequence as follows. (When DVD Video, DVD Audio or SVCD/VCD with PBC is loaded in the System, playback of the disc next to these discs will not start.):
  Ex.: When DISC 2 is selected:
  DISC 2⇨DISC 3⇨DISC 4⇨DISC 5⇨DISC 1⇨ (then stops)
  * When no disc is loaded on the disc tray, that disc number is skipped.
• You can exchange discs while playing or selecting another disc.
• Some DVD Audio discs prohibit downmixed output. When you play back such a disc, “LR ONLY” appears on the display and the System plays back the left front and right front signals.
• 3D Phonic setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUT terminal.
• For MP3/JPEG playback...
  – This System cannot play “packet write” discs.
  – MP3/JPEG discs require a longer readout time than regular CDs. (It depends on the complexity of the group/file configuration.)
  – Some MP3/JPEG files cannot be played back and will be skipped. This result from their recording processes and conditions.
  – When making MP3 discs, use ISO 9660 Level 1 or Level 2 for the disc format.
  – This System can play back MP3/JPEG files with the extension code <.mp3> or <.jpg> (regardless of the letter case—upper/lower).
  – It is recommended that you make each MP3 file at a sampling rate of 44.1 kHz and at bit rate of 128 kbps.
  – This System can recognize the total of 1000 tracks and of 99 groups (each group can contain up to 150 tracks). Those exceeding the maximum number cannot be recognized.
  – This System can show up to 23 characters of the file (track) names (except for extention) and 30 characters of the ID3 tags on the display and the TV screen.
  – Some characters or symbols will not be shown (and will be blanked) on the display.
• When using Resume on SVCD or VCD with PBC, the playback might start on a position slightly different from where you have stopped.
• You can use Resume only for the DVD/SVCD/VCD except for some discs—depending how the disc is programmed.

Playing Back from the PC:

• Check if your PC equipped with the CD-ROM drive is running on Windows® 98*, Windows® 98SE*, Windows® Me*, Windows® 2000*, or Windows® XP* and prepare its CD-ROM.
• DO NOT turn off the System or disconnect the USB cable while installing the drivers and for a several seconds each time your PC is recognizing the System.
• Use a full speed USB cable (version 1.1).
• If your PC does not recognize the System, disconnect the USB cable and connect it again. If this does not work, restart Windows.
• The drivers installed can be recognized only when the USB cable is connected between the System and your PC.
• The sound may not be played back correctly—interrupted or degraded—due to your PC settings or PC specifications.

* Microsoft®, Windows® 98, Windows® 98SE, Windows® Me, Windows® 2000 and Windows® XP are registered trademarks of Microsoft corporation.

Daily Operations—Sound&Other Adjustments (see pages 15 to 18)

Adjusting the Volume:

• Be sure to turn down the volume before connecting or putting the headphones.

Adjusting the Sound:

• This function also affects the sound through the headphones.

Setting the clock:

• “AM 12:00” will flash on the display until you set the clock.
• The clock may gain or lose 1 to 2 minutes per month. If this happens, reset the clock.

Unique DVD/VCD Operations (see pages 19 to 21)

• During slow-motion playback, no sound will be reproduced.
• One touch replay function works only within the same title, though it works between chapters.
• While zoomed in, the picture may look coarse.

Advanced Disc Operations (see pages 22 to 24)

Programming the Playing Order—Program Play:

- If you try to program a 100th track, "MEM FULL (memory full)" appears on the display.
- While programming steps...
  Your entry will be ignored if you have tried to program an item number that does not exist on the disc (for example, selecting track 14 on a disc that only has 12 tracks).
- You cannot use Program Play and Random Play for JPEG discs.
- You cannot eject tray while in Program Play.

Playing at Random—Random Play:

- The |◄◄ button does not work for skipping chapters or tracks, but only work for going back to the beginning of the current chapter or track.

On-Screen Disc Operations (see pages 25 to 29)

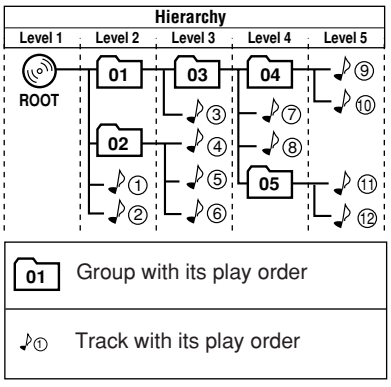
- For JPEG files playback...
  – It is recommended that you record a file at 640 x 480 resolution. (If a file has been recorded at a resolution of more than 640 x 480, it will take a long time to be shown.)
  – This System can play only baseline JPEG files. Progressive JPEG files or lossless JPEG files cannot be played.

Baseline JPEG format:	Used for digital cameras, web, etc.
Progressive JPEG format:	Used for web.
Lossless JPEG format:	An old type and rarely used now.

  – This System may not play back JPEG files properly which are recorded by the devices other than digital still camera.
  – If progressive or lossless JPEG files are played back, a black screen appears. In this case, stop playback and select a baseline JPEG file. Note that it may take a long time to select another file.

MP3/JPEG groups/tracks configuration

This System plays back the tracks as follows.



Timer Operations (see pages 30 and 31)

- When you unplug the AC power cord or if a power failure occurs, the timer will be canceled. You need to set the clock first, then the timer again.
- If you set the Sleep Timer after Daily Timer starts playing the selected source, Daily Timer is canceled.

Setup Menu Operations (see pages 32 to 35)

LANGUAGE Setup Menu:

- When the language you have selected for "MENU LANGUAGE," "AUDIO LANGUAGE," or "SUBTITLE" is not recorded on a disc, the original language is used as the initial language.

PICTURE Setup Menu—MONITOR TYPE:

- Even if "4:3 PS" is selected, the screen size may become 4:3 letter box with some DVD Video discs. This depends on how the discs are recorded.
- When you select "16:9" for a picture whose aspect ratio is 4:3, the picture slightly changes due to the process for converting the picture width.

AUDIO Setup Menu—DOWN MIX:

- This setting is not effective when DTS multi-channel software is played back.

OTHERS Setup Menu—ON SCREEN GUIDE:

Setup Menus and on-screen bar will be displayed (and recorded) even though this function is set to "OFF." Subtitles and the information for zooming in always appear on the display regardless of this setting.

Maintenance

To get the best performance of the System, keep your discs and mechanism clean.

Handling discs

- When removing the disc from its case, hold it at the edge while pressing the center hole lightly.
- Do not touch the shiny surface of the disc, or bend the disc.
- Put the disc back in its case after use to prevent warping.
- Be careful not to scratch the surface of the disc.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

To clean the disc:
Wipe the disc with a soft cloth in a straight line from center to edge.

Cleaning the System

- Stains should be wiped off with a soft cloth. If the System is heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.
- Since the System may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following:
  – DO NOT wipe it with a hard cloth.
  – DO NOT wipe it strongly.
  – DO NOT wipe it with thinner or benzine.
  – DO NOT apply any volatile substance such as insecticides to it.
  – DO NOT allow any rubber or plastic to remain in contact for a long time.

MP3/JPEG groups and tracks are not played back as you expect.
⇨ The playing order is determined when the disc was recorded. It depends on the writing application.

MP3/JPEG tracks are not played back.
⇨ The inserted disc may includes both type of tracks (MP3 files and JPEG files). In this case, you can only play back the files selected by the “FILE TYPE” setting (see page 34).

The disc sound is discontinuous.
⇨ The disc is scratched or dirty.

The disc tray does not open or close.
⇨ The AC power cord is not plugged in.
⇨ Child Lock is in use (see page 24).

USB Operations:

Unable to play back through the USB connection.
⇨ USB connection and setting is incorrect (see page 14).

⇨ The System has been turned on when the on-time comes. Timer starts working only when the System is turned off.

Setup Menu Operations:

No subtitle appears on the display though you have selected the initial subtitle language.
⇨ Some DVDs are programmed to always display no subtitle initially. If this happens, press SUBTITLE after starting play (see page 20).

Introduction

Precautions

Installation

- Install in a place which is level, dry and neither too hot nor too cold—between 5°C and 35°C.
- Install the System in a location with adequate ventilation to prevent internal heat buildup inside the System.

DO NOT install the System in a location near heat sources, or in a place subject to direct sunlight, excessive dust or vibration.

- Leave sufficient distance between the System and the TV.
- Keep the speakers away from the TV to avoid interference with TV.

Power sources

- When unplugging the System from the wall outlet, always pull on the plug, not the AC power cord.

DO NOT handle the AC power cord with wet hands.

Moisture condensation

Moisture may condense on the lenses inside the System in the following cases:

- After starting to heat the room
- In a damp room
- If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, then plug it in again.

Internal heat

- A cooling fan is mounted on the rear panel to prevent heat buildup inside the main unit (see page G-1).

For safety, observe the following carefully:

- Make sure there is good ventilation around the main unit. Poor ventilation could overheat and damage the System.
- DO NOT block the cooling fan and the ventilation openings or holes. If they are blocked by a newspaper or cloth, etc., the heat may not be able to get out.

Others

- Should any metallic object or liquid fall into the System, unplug the AC power cord and consult your dealer before operating any further.

DO NOT disassemble the System since there are no user serviceable parts inside.

- If you are not going to operate the System for an extended period of time, unplug the AC power cord from the wall outlet.

If anything goes wrong, unplug the AC power cord and consult your dealer.

How to Read This Manual

To make in this manual as simple and easy-to-understand as possible, we have adapted the following methods:

- Button and control operations are explained as listed in the table below. In this manual, the operations using the remote control is mainly explained; however, you can use the buttons and controls on the main unit if they have the same (or similar) name and marks.
- **Some related tips and notes are explained later in the sections "Learning More about This System" (on pages 37 to 38) and "Troubleshooting" (on page 40), but not in the same section explaining the operations.** If you want to know more about the functions, or if you have a doubt about the functions, go to these sections and you will find the answers.

	Indicates that you press the button **briefly**.
	Indicates that you press the button **briefly and repeatedly** until an option you want is selected.
	Indicates that you press one of the buttons.
	Indicates that you **press and hold** the button for a specified period. • The number inside the arrow indicates the period of press (in this example, 2 seconds). • If no number is inside the arrow, press and hold until the entire procedure is complete or until you get a result you want.
	Indicates that you turn the control toward the specified direction(s).

	Indicates that this operation is only possible using the remote control.
	Indicates that this operation is only possible using the buttons and controls on the main unit.

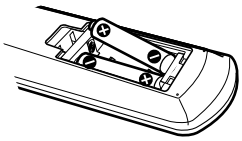
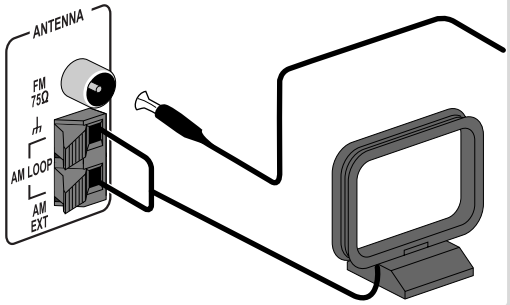
Getting Started

Step *1*: Unpack the package and check the accessories.

Step *2*: Prepare the remote control.



Step *3*: Hook up the components such as AM/FM antennas, speakers, etc. (see pages 4 to 6).



Finally plug the AC power cord.

Now you can operate the System.

Step *1*: Unpack

After unpacking, check to be sure that you have all the following items. The number in parentheses indicates the quantity of each piece supplied.

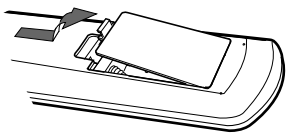
- FM antenna (1)
- AM loop antenna (1)
- Remote control (1)
- Composite video cord (1)
- Batteries (2)

If any item is missing, consult your dealer immediately.

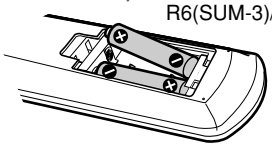
Step *2*: Prepare the Remote Control

Insert the batteries into the remote control by matching the polarity (+ and –) correctly.

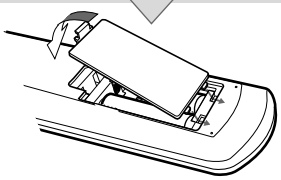
1



2



3



STOP!

- DO NOT use an old battery together with a new one.
- DO NOT use different types of batteries together.
- DO NOT expose batteries to heat or flame.
- DO NOT leave the batteries in the battery compartment when you are not going to use the remote control for an extended period of time. Otherwise, the remote control will be damaged from battery leakage.

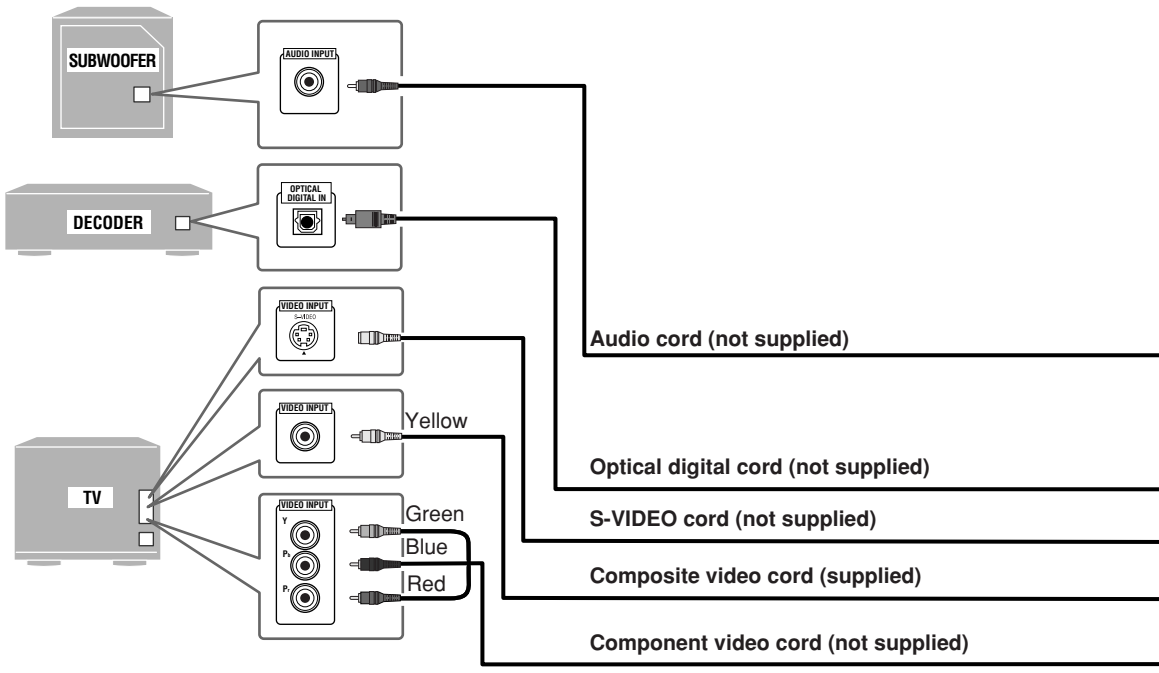
Step 3: Hook Up

If you need more detailed information, see page 6.

Illustrations of the input/output terminals below are typical examples.
When you connect other components, refer also to their manuals, since the terminal names actually printed on the rear may vary.

Turn the power off to all components before connections.

AM loop antenna (supplied)
Turn it until the best reception is obtained.



To a wall outlet
Plug the AC power cord only after all connections are complete.

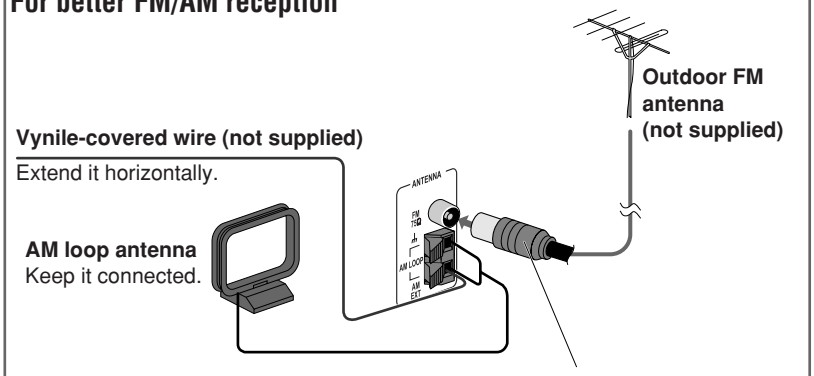
For better FM/AM reception



Disconnect the supplied FM antenna, and connect to an outdoor FM antenna using a 75 Ω wire with coaxial type connector.

FM antenna (supplied)
Extend it so that you can obtain the best reception.

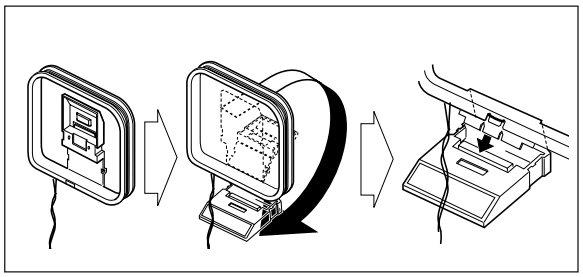
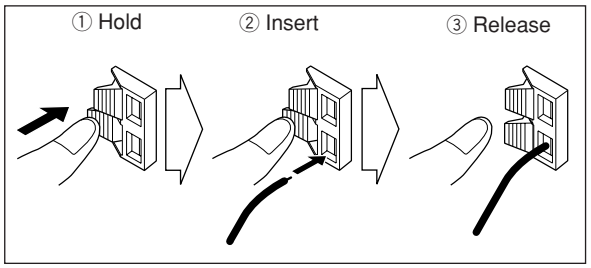
To assemble and connect the AM loop antenna

To assemble the AM loop antenna



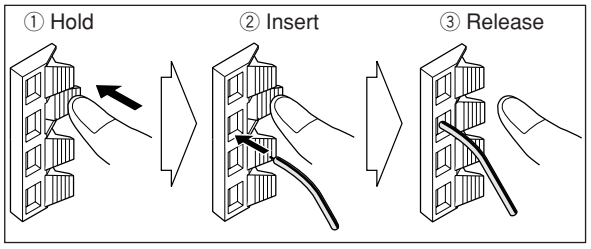
To connect the AM loop antenna



- If the AM loop antenna wire or speaker cords are covered with vinyl, remove the vinyl to expose the tip of the antenna by twisting the vinyl.
- Make sure the antenna conductors do not touch any other terminals, connecting cords and power cord. Also keep the antennas away from metallic parts of the System, connecting cords, and the AC power cord. This could cause poor reception.

To connect the speaker cords

Connect the right speaker to the R terminals, and the left speaker to the L terminals.



When connecting the speaker cords, match the polarity of the speaker terminals: gray cord (+) to red (+), and gray cord with black stripe (–) to black (–).

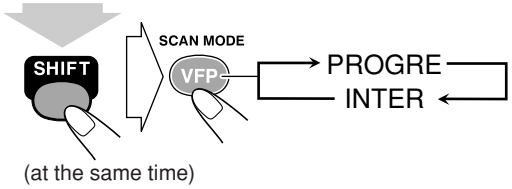
STOP!

- DO NOT connect more than one speaker to each terminal.
- DO NOT allow the conductor of the speaker cords to be in touch with the metallic parts of the System.

Changing the Scanning Mode

Remote ONLY

This System supports progressive scanning.
If you connect a progressive TV through the COMPONENT jacks, you can enjoy a high quality picture from the built-in DVD player by selecting progressive mode.



PROGRE (Progressive)	Progressive scanning. For a progressive TV. The PROGRESSIVE indicator lights.
INTER (Interlaced)	Interlaced scanning. For a conventional TV.

Before Operating the System

Playable Disc Types

This System has been designed to play back the following discs:

Disc Type	Mark (Logo)	Video Format	Region Code* Number
DVD Video		NTSC	1 or ALL
DVD Audio			
Video CD (VCD)			——
Super Video CD (SVCD)			——
Audio CD		——	——
CD-R	The System can play back CD-R or CD-RW recorded in the Audio CD, Video CD, SVCD, MP3, and JPEG formats.		
CD-RW			
DVD-R	The System can play back DVD-R or DVD-RW recorded in the video format.		
DVD-RW			

In addition to the above discs, this System can play back audio data recorded on CD Text, CD-G (CD Graphics), and CD-Extra.

- The following discs cannot be played back:
  DVD-ROM, DVD-RAM, DVD+R, DVD+RW, CD-I (CD-I Ready), CD-ROM, Photo CD, SACD, etc.
  Playing back these discs will generate noise and damage the speakers.
- In this manual, "file" and "track" are interchangeably used for MP3/JPEG operations.

*** Note on Region Code**

DVD players and DVDs have their own Region Code numbers. This System can play back only DVDs recorded with the NTSC color system whose Region Code numbers including "1."

Ex.:

If a DVD with the improper Region Code numbers is loaded, "RGN ERR (REGION CODE ERROR)" appears on the display and playback will not start.

Caution for DualDisc playback:

The Non-DVD side of a "DualDisc" does not comply with the "Compact Disc Digital Audio" standard. Therefore, the use of Non-DVD side of a DualDisc on this product may not be recommended.

DVD Video—digital audio formats

The System can play back the following digital audio formats.

- **Linear PCM:** Uncompressed digital audio, the same format used for CDs and most studio masters.
- **Dolby Digital:** Compressed digital audio, developed by Dolby Laboratories, which enables multi-channel encode to create the realistic surround sound.
- **DTS (Digital Theater Systems):** Compressed digital audio, developed by Digital Theater Systems, Inc., which enables multi-channel like Dolby Digital. As the compression ratio is lower than for Dolby Digital, it provides wider dynamic range and better separation.

When playing a multi-channel encoded DVD, the System properly converts these multi-channel signals into 2 channels, and emits the downmixed sound from the speakers.

- **To enjoy the powerful sound of these multi-channel encoded DVDs,** connect a proper decoder or an amplifier with a proper built-in decoder to the digital output terminal on the rear.

IMPORTANT: Before playing a disc, make sure of the following...

- Turn on the TV and select an appropriate input mode on the TV to view the pictures or on-screen displays on the TV screen.
- For disc playback, you can change the initial setting to your preference. See "Setup Menu Operations" on page 32.

If " ⃠ " appears on the TV screen when you press a button, the disc cannot accept the operation you have tried to do, or data required for that operation is not recorded on the disc.

- Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic", "MLP Lossless", and the double-D symbol are trademarks of Dolby Laboratories.
- "DTS" and "DTS 2.0 + DIGITAL OUT" are trademarks of Digital Theater Systems, Inc.

"DVD Logo" is a trademark of DVD Format/Logo Licensing Corporation registered in the US, Japan and other countries.

• When using an 8 cm disc, place it on the inner circle of the disc tray.
• On some DVD, SVCD, or VCD discs, the actual operations may be different from what is explained in this manual, due to the programming and disc structure; such differences are not malfunction of this System.
• When discs* in more than one tray are loaded on the disc trays, they are played in sequence as follows. (When DVD Video, DVD Audio or SVCD/VCD with PBC is loaded in the System, playback of the disc next to these discs will not start.):
  Ex.: When DISC 2 is selected:
  DISC 2⇨DISC 3⇨DISC 4⇨DISC 5⇨DISC 1⇨ (then stops)
  * When no disc is loaded on the disc tray, that disc number is skipped.
• You can exchange discs while playing or selecting another disc.
• Some DVD Audio discs prohibit downmixed output. When you play back such a disc, “LR ONLY” appears on the display and the System plays back the left front and right front signals.
• 3D Phonic setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUT terminal.
• For MP3/JPEG playback...
  – This System cannot play “packet write” discs.
  – MP3/JPEG discs require a longer readout time than regular CDs. (It depends on the complexity of the group/file configuration.)
  – Some MP3/JPEG files cannot be played back and will be skipped. This result from their recording processes and conditions.
  – When making MP3 discs, use ISO 9660 Level 1 or Level 2 for the disc format.
  – This System can play back MP3/JPEG files with the extension code <.mp3> or <.jpg> (regardless of the letter case—upper/lower).
  – It is recommended that you make each MP3 file at a sampling rate of 44.1 kHz and at bit rate of 128 kbps.
  – This System can recognize the total of 1000 tracks and of 99 groups (each group can contain up to 150 tracks). Those exceeding the maximum number cannot be recognized.
  – This System can show up to 23 characters of the file (track) names (except for extention) and 30 characters of the ID3 tags on the display and the TV screen.
  – Some characters or symbols will not be shown (and will be blanked) on the display.
• When using Resume on SVCD or VCD with PBC, the playback might start on a position slightly different from where you have stopped.
• You can use Resume only for the DVD/SVCD/VCD except for some discs—depending how the disc is programmed.

Playing Back from the PC:

• Check if your PC equipped with the CD-ROM drive is running on Windows® 98*, Windows® 98SE*, Windows® Me*, Windows® 2000*, or Windows® XP* and prepare its CD-ROM.
• DO NOT turn off the System or disconnect the USB cable while installing the drivers and for a several seconds each time your PC is recognizing the System.
• Use a full speed USB cable (version 1.1).
• If your PC does not recognize the System, disconnect the USB cable and connect it again. If this does not work, restart Windows.
• The drivers installed can be recognized only when the USB cable is connected between the System and your PC.
• The sound may not be played back correctly—interrupted or degraded—due to your PC settings or PC specifications.

* Microsoft®, Windows® 98, Windows® 98SE, Windows® Me, Windows® 2000 and Windows® XP are registered trademarks of Microsoft corporation.

Daily Operations—Sound&Other Adjustments (see pages 15 to 18)

Adjusting the Volume:

• Be sure to turn down the volume before connecting or putting the headphones.

Adjusting the Sound:

• This function also affects the sound through the headphones.

Setting the clock:

• “AM 12:00” will flash on the display until you set the clock.
• The clock may gain or lose 1 to 2 minutes per month. If this happens, reset the clock.

Unique DVD/VCD Operations (see pages 19 to 21)

• During slow-motion playback, no sound will be reproduced.
• One touch replay function works only within the same title, though it works between chapters.
• While zoomed in, the picture may look coarse.

Advanced Disc Operations (see pages 22 to 24)

Programming the Playing Order—Program Play:

- If you try to program the 100th track, "MEM FULL (memory full)" appears on the display.
- While programming steps...
  Your entry will be ignored if you have tried to program an item number that does not exist on the disc (for example, selecting track 14 on a disc that only has 12 tracks).
- You cannot use Program Play and Random Play for JPEG discs.
- You cannot eject trays while in Program Play.

Playing at Random—Random Play:

- The ⏮ button does not work for skipping chapters or tracks, but only work for going back to the beginning of the current chapter or track.

On-Screen Disc Operations (see pages 25 to 29)

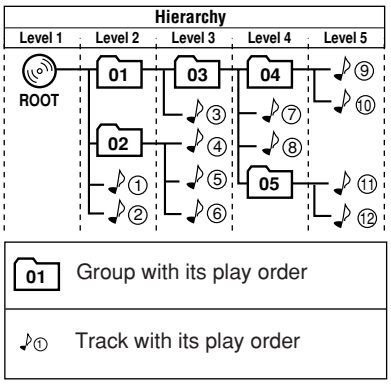
- For JPEG files playback...
  – It is recommended that you record a file at 640 x 480 resolution. (If a file has been recorded at a resolution of more than 640 x 480, it will take a long time to be shown.)
  – This System can play only baseline JPEG files. Progressive JPEG files or lossless JPEG files cannot be played.

Baseline JPEG format:	Used for digital cameras, web, etc.
Progressive JPEG format:	Used for web.
Lossless JPEG format:	An old type and rarely used now.

  – This System may not play back JPEG files properly which are recorded by the devices other than digital still camera.
  – If progressive or lossless JPEG files are played back, a black screen appears. In this case, stop playback and select a baseline JPEG file. Note that it may take a long time to select another file.

MP3/JPEG groups/tracks configuration

This System plays back the tracks as follows.



Timer Operations (see pages 30 and 31)

- When you unplug the AC power cord or if a power failure occurs, the timer will be canceled. You need to set the clock first, then the timer again.
- If you set the Sleep Timer after a Daily Timer starts playing the selected source, the Daily Timer is canceled.

Setup Menu Operations (see pages 32 to 35)

LANGUAGE Setup Menu:

- When the language you have selected for "MENU LANGUAGE," "AUDIO LANGUAGE," or "SUBTITLE" is not recorded on a disc, the original language is used as the initial language.

PICTURE Setup Menu—MONITOR TYPE:

- Even if "4:3 PS" is selected, the screen size may become 4:3 letter box with some DVD Video discs. This depends on how the discs are recorded.
- When you select "16:9" for a picture whose aspect ratio is 4:3, the picture slightly changes due to the process for converting the picture width.

AUDIO Setup Menu—DOWN MIX:

- This setting is not effective when DTS multi-channel software is played back.

OTHERS Setup Menu—ON SCREEN GUIDE:

Setup Menus and on-screen bar will be displayed (and recorded) even though this function is set to "OFF." Subtitles and the information for zooming in always appear on the display regardless of this setting.

Maintenance

To get the best performance of the System, keep your discs and mechanism clean.

Handling discs

- When removing the disc from its case, hold it at the edge while pressing the center hole lightly.
- Do not touch the shiny surface of the disc, or bend the disc.
- Put the disc back in its case after use to prevent warping.
- Be careful not to scratch the surface of the disc.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

To clean the disc:
Wipe the disc with a soft cloth in a straight line from center to edge.

Cleaning the System

- Stains should be wiped off with a soft cloth. If the System is heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.
- Since the System may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following:
  – DO NOT wipe it with a hard cloth.
  – DO NOT wipe it strongly.
  – DO NOT wipe it with thinner or benzine.
  – DO NOT apply any volatile substance such as insecticides to it.
  – DO NOT allow any rubber or plastic to remain in contact for a long time.

Troubleshooting

If you are having a problem with your System, check this list for a possible solution before calling for service.

General:

Adjustments or settings are suddenly canceled before you finish.
⇨ There is a time limit. Repeat the procedure again.

Operations are disabled.
⇨ The built-in microprocessor may malfunction due to external electrical interference. Unplug the AC power cord and then plug it back in.

Unable to operate the System from the remote control.
⇨ The path between the remote control and the remote sensor on the System is blocked.
⇨ Point it at the remote sensor on the front panel.
⇨ Signals cannot reach the remote sensor. More closer to the System.
⇨ The batteries are exhausted.

No sound is heard from the speakers.
⇨ Speaker connections are incorrect or loose.
⇨ Headphones are connected.

No picture is displayed on the TV screen, the picture is blurred, or the picture is divided into two parts.

MP3/JPEG groups and tracks are not played back as you expect.
⇨ The playing order is determined when the disc was recorded. It depends on the writing application.

MP3/JPEG files are not played back.
⇨ The inserted disc may includes both type of tracks (MP3 files and JPEG files). In this case, you can only play back the files selected by the "FILE TYPE" setting (see page 34).
⇨ You have changed the "FILE TYPE" setting after you inserted a disc. In this case, reload the disc.

"NO AUDIO" appears.
⇨ This System cannot play back illegally produced DVD Audio discs.

"LR ONLY" appears.
⇨ Some DVD Audio discs prohibit downmixed output. When you play back such a disc, this System plays back the left front and right front signals only.

The disc sound is discontinuous.
⇨ The disc is scratched or dirty.

The disc tray does not open or close.
⇨ The AC power cord is not plugged in.
⇨ Child Lock is in use (see page 24).

USB Operations:

Unable to play back through the USB connection.
⇨ USB connection and setting is incorrect (see page 14).

Timer Operations:

Daily Timer does not work.
⇨ The System has been turned on when the on-time comes. Timer starts working only when the System is turned off.

Setup Menu Operations:

No subtitle appears on the display though you have selected the initial subtitle language.
⇨ Some DVDs are programmed to always display no subtitle initially. If this happens, press SUBTITLE after starting play (see page 20).

Audio language is different from the one you have selected as the initial audio language.
⇨ Some DVDs are programmed to always use the original language initially. If this happens, press AUDIO after starting play (see page 19).
