#### Important cautions

#### Installation of the system

- Select a place which is level, dry and neither too hot nor too cold; between 5°C and 35°C.
- Leave sufficient distance between the system and the τv
- Do not use the system in a place subject to vibration. Power cord
- Do not handle the power cord with wet hands!
- A small amount of power is always consumed while the power cord is connected to the wall outlet.
- When unplugging the power cord from the wall outlet, always pull on the plug, not the power cord.

#### To prevent malfunctions of the system

- There are no user-serviceable parts inside. If anything goes wrong, unplug the power cord and consult your dealer.
- Do not insert any metallic object into the system.
- Do not use any non-standard shape disc (like a heart, flower or credit card, etc.) available on the market, because it may damage the system.
- Do not use a disc with tape, stickers, or paste on it, because it may damage the system.

#### Note about copyright laws

Check the copyright laws in your country before recording from DVDs, Super Video CDs (SVCDs), VCDs and CDs. Recording of copyrighted material may infringe copyright laws.

#### Note about copy guard system

DVDs are protected by copy guard system. When you connect the system to your VCR directly, the copy guard system activates and the picture may not be played back correctly.

#### Safety precautions

#### Avoid moisture, water and dust

Do not place the system in moist or dusty places.

#### Avoid high temperatures

Do not expose the system to direct sunlight and do not place it near a heating device.

#### When you are away

When away on travel or for other reasons for an extended period of time, disconnect the power cord plug from the wall outlet.

#### Care of the cabinet

When cleaning the system, use a soft cloth and follow the relevant instructions on the use of chemically-coated cloths. Do not use benzene, thinner or other organic solvents including disinfectants. These may cause deformation or discoloring.

#### If water gets inside the system

Turn the system off and disconnect the power cord plug from the wall outlet, then call the store where you made your purchase. Using the system in this condition may cause fire or electrical shock.

#### When condensation or water drops adhere to the lens

In any of the following cases, condensation or water drops may adhere to the lens to prevent the system from working properly:

- Immediately after roomheating starts
- When the system is installed in a steamy or damp space
- When the system is suddenly moved from a cold place to a warm space

In any of these cases, leave the system turned on for 1 or 2 hours before use.

# **Playable disc types**

This system has been designed to play back the following discs:

DVD VIDEO, DVD AUDIO, VCD, SVCD, CD

- This system can also play back the following discs:
  Finalized DVD-R/RW discs recorded in the DVD VIDEO format.
- CD-R/RW discs recorded in the following formats
- Music CDs (finalized discs)
- VCDs
- SVCDs

- MP3/JPEG discs recorded in ISO 9660 (for details, refer to "About MP3/JPEG discs ")

However, some discs may not be played back because of their disc characteristics, recording conditions, or damage or stain on them.

Only sounds can be played back from the following discs:

MIX-MODE CD	CD-G
CD-EXTRA	CD TEXT

#### Discs you can play:

Biooc you can play:				
Disc Type	Mark (Logo)	Video Format	Region Code Number*	
DVD VIDEO		PAL	2/ALL	
DVD AUDIO		-		
VCD	UISC Video CD	PAL		
SVCD	COMPACT SUPER VIDEO	PAL	_	
CD			_	
CD-R	Digital Audio Recordable		_	
CD-RW	DIGITAL AUDIO Fewritable		_	

#### \* Note on Region Code

DVD players and DVD VIDEOs have their own Region Code numbers. This system can only play back a DVD VIDEO recorded with the Region Code number and video format mentioned above.

#### Examples:

If a DVD VIDEO with an improper Region Code number is loaded, "REGION CODE ERROR!" appears on the TV screen and playback cannot start.

 On some DVD VIDEOs, DVD AUDIOs, VCDs or SVCDs, their actual operation may be different from what is explained in this manual. This is due to the disc programming and disc structure, not a malfunction of this system.

#### Discs that cannot be played back

 The following discs cannot be played back: DVD-ROM, DVD-RAM, DVD-R/RW (recorded in VR format), CD-ROM, CD-I (CD-I Ready), Photo CD, SACD, etc.

Playing back these discs will generate noise and damage the speakers.

Damaged discs and discs in an extraordinary shape (other than a disc of 12 cm or 8 cm in diameter) cannot be played back.

#### About MP3/JPEG discs

Playable MP3/JPEG discs and files

- Discs recorded in the ISO 9660 format are playable (except discs recorded in the "packet write" format (UDF format)).
- Discs recorded in the multi-session format are also playable.
- Files with an extension of ".mp3," ".jpg" or ".jpeg" (extensions with uppercase and lowercase letters mixed are also acceptable) are playable.

#### Notes on MP3/JPEG discs and files

- A disc may not be played, or reading it may take a long time depending on its recording conditions or properties.
- The time needed for reading varies with the number of groups or tracks (files) recorded on the disc.
- If a character other than single byte English characters is used in the file name of an MP3/JPEG file, the track/ file name will not be displayed correctly.
- The order of tracks/groups displayed on the MP3 Control screen, and the order of files/groups displayed on the JPEG Control screen may be different from that of files/folders displayed on PC's monitor screen.
- An off-the-shelf MP3 disc may be played in an order different from that indicated on the label attached to the disc.
- Playing an MP3 file including a still image may take a long time. The elapsed time is not displayed until playing starts. If playing starts, the elapsed time may not be displayed correctly.
- This system does not handle the ID3 tag of the MP3 file.
- For an MP3 file, a disc with a sampling frequency of 44.1 kHz and transmission rate of 128 kbps is recommended.
- This system can play a baseline JPEG file, excluding monochromatic JPEG files.
- This system can play JPEG data taken with a digital camera conforming to the DCF (Design Rule for Camera File System) standard (when a function is applied such as the automatic rotation function of a digital camera, data goes beyond the DCF standard, so the image may not be displayed).
- If data has been processed, edited and restored with PC image editing software, the data may not be displayed.
- This system cannot play animations such as MOTION JPEG, or still images (TIFF etc.) other than JPEG, and image data with sound.
- The resolution of 640 x 480 pixels is recommended for JPEG files. If a file has been recorded at a resolution of more than 640 x 480 pixels, display may take a long time. An image with a resolution of more than 8192 x 7680 pixels cannot be displayed.
- Files recorded on DVD-R/RW discs cannot be played back.

#### Caution for DualDisc playback:

The Non-DVD side of a "DualDisc" does not comply with the "Compact Disc Digital Audio" standard. Therefore, the use of Non-DVD side of a DualDisc on this product may not be recommended.

# **Disc structure**

#### DVD VIDEO

A DVD VIDEO consists of "titles" and each title may be divided into "chapters".

Title 1		Title 2	
Chapter 1 Chapter 2	Chapter 3	Chapter 1	Chapter 2

#### **DVD AUDIO**

A DVD AUDIO consists of "groups" and each group may be divided into "tracks".

Some discs include a "bonus group" that requires a password for playing (I page 27).

	Group 1		Gro	up 2
Track 1	Track 2	Track 3	Track 1	Track 2

#### VCD/SVCD/CD

VCD, SVCD and CD consist of "tracks". In general, each track has its own track number. (On some discs, each track may also be further divided by indexes.)

Track 1	Track 2	Track 3	Track 4	Track 5
<>	← →	◄>	← →	◄──►

#### MP3 [JPEG] discs

On an MP3 [JPEG] disc, each still picture (material) is recorded as a track [file]. Tracks [Files] are usually grouped into a folder. Folders can also include other folders, creating hierarchical folder layers.

This unit simplifies the hierarchical construction of a disc and manages folders by "groups".

Group 1		4	Group 2	
Track 1 [File 1]	Track 2 [File 2]	Group 3	Group 4	Group 5

This product can recognize up to 1000 tracks [files] in a disc. Also, the product can recognize up to 150

tracks [files] per group and up to 99 groups in a disc. Since the unit ignores the tracks [files] whose numbers are exceeding 150 and the groups whose numbers are exceeding 99, they cannot be played back.

 If there is any type of files other than MP3 [JPEG] files in a folder, those files are also counted in the total file number. The numbers represent the page numbers.

## Front panel

\* Connect a pair of headphones (commercially available) with a stereo mini plug. If the headphones are connected, the speakers and subwoofer will not produce any sound.

# **Rear panel**

# Using the remote control

The numbers represent the page numbers.

# Putting the batteries in the remote control

If the range or effectiveness of the remote control decreases, replace the batteries. Use two R6P (SUM-3)/AA(15F) type dry-cell batteries.

#### CAUTION

- Do not use a used battery and a new battery together.
- Do not use different types of batteries at the same time.
- Take out the batteries if the remote control is not to be used for a long time. Otherwise it may cause a leakage.

### **Remote control operation**

When operating the remote control, point it towards the front panel of the main unit. If the remote control is operated from a direction that is extremely oblique or when there is an obstacle in the way, signals may not be transmitted.

If the remote control sensor is exposed to a strong light such as direct sunlight, correct operation may not be carried out. This page is for when operating your TV using the remote control of this product.

**3** Turn the AM loop antenna to the direction of the best radio reception.

Locate the AM loop antenna as far away from the main unit as possible.

- Do not locate the AM loop antenna on a metallic table or close to a TV, personal computer, etc. Otherwise it may result in bad radio reception.
- When good radio reception cannot be obtained with the supplied AM loop antenna

Electric wire: 3 - 5m (commercially available)

### **Connecting FM antenna (supplied)**

Put the antenna up straight in the direction where the best radio reception can be obtained, and fix by using tape.

When good radio reception cannot be obtained with the supplied antenna or when using a communal antenna

For details of connecting a separately sold antenna, refer to the user guide for the antenna or converter.

When positioning the antenna, listen to an actual radio program (refer to "Listening to a radio broadcast" on page 32).

# **Connecting speakers**

There is no difference between the left and right speakers.

#### CAUTION

- DO NOT connect more than one speaker to one speaker terminal.
- The speakers of this product are magnetically shielded, but color irregularities may occur on the TV depending on how the speakers are installed. Keep in mind the following.
  - 1. Turn off the main power of your TV before installing the speakers. Wait for about 30 minutes before turning on the TV again.
  - 2. If color irregularity occurs in pictures , keep a distance of more than 10 cm between the TV and the speakers.

The speakers employ natural wood for the diaphragm and the cabinet in order to reproduce the original sound faithfully. The appearance will therefore be different for each unit.

- Impedance of speaker that can be connected to the main unit is within a range of 4Ω to 16Ω.
- In order to have a sufficient cooling effect, leave a space of more than 1cm between the main unit and the speakers or other objects.

# **Connecting other devices**

This page is for when connecting the main unit with other devices.

#### **Connecting subwoofer**

With an amplifier-built in subwoofer (sold separately), you can enjoy a more dynamic bass sound. Refer to the manual of the subwoofer for details.

## 

#### Automatic tuning:

Hold down **TUNING**  $\bigcirc$  or **TUNING**  $\bigcirc$  until the system starts searching, and then release the button.

When a station of sufficient signal strength is tuned in to, the system stops searching automatically.

To stop searching manually, press **TUNING**  $\bigcirc$  or **TUNING**  $\bigcirc$  .

#### Manual tuning:

Each time you press **TUNING**  $\bigcirc$  or **TUNING**  $\bigcirc$ , the frequency changes.

- When an FM stereo program is received, the "ST" (Stereo) indicator lights.
- You can also select the station with cursor ▲/▼.

#### NOTE

If the stereo FM program currently tuned in to is noisy, you can improve the reception by pressing FM MODE to switch to the monaural mode ("MONO" lights). If you press FM MODE again, or tune in to another station, the receiving mode returns automatically to the stereo mode.

### Tuning in to a preset station

## Receiving FM stations with RDS

RDS (Radio Data System) allows FM stations to send an additional signal along with their regular program signals.

For example, the stations send their station names, as well as information about what type of program they broadcast, such as sports or music, etc.

When tuned to an FM station which provides the RDS service, "RDS" appears on the display window on the main unit.

#### Example:

You can receive the following types of RDS signals.

PS (Program Service):

Shows commonly known station names.

PTY (Program Type): Shows types of broadcast programs.

**RT (Radio Text):** Shows text messages the station sends.

Enhanced Other Networks: Refer to page 37.

#### NOTE

RDS may not work correctly if the received station is not transmitting the signals properly or if the signal strength is weak.

#### Alarm function

If an "Alarm !" (Emergency) signal is received from a station while listening to the FM station with RDS, the system automatically switches to the station broadcasting the "Alarm !" signal, except when you are listening to non-RDS stations (all AM and some FM stations).

#### Changing the RDS information

You can see RDS information on the display window on the main unit while listening to an FM station.

## Press RDS DISPLAY repeatedly while listening to an FM station.

#### PS (Program Service):

While searching, "WAIT PS" appears and then the station names will be displayed. "NO PS" appears if no signal is sent.

#### PTY (Program Type):

While searching, "WAIT PTY" appears and then the type of the broadcast program will be displayed. "NO PTY" appears if no signal is sent.

#### RT (Radio Text):

While searching, "WAIT RT" appears and then text messages the station sends will be displayed. "NO RT" appears if no signal is sent.

#### NOTE

- If the system takes time to show the RDS information received from a station, "PS", "PTY" or "RT" may appear on the display window.
- When PS, PTY, or RT signals appear on the display window, some special characters and marks may not be displayed correctly.

#### Searching for programs by PTY codes (PTY Search)

One of the advantages of RDS is that you can locate a particular kind of program by specifying the corresponding PTY code.

The PTY Search is applicable only to the preset stations.

Press SEARCH when the source is FM.

2 Press PTY ⊕ or PTY repeatedly to select a PTY code while "SELECT" is flashing.

Example: when "News" is selected as a PTY code

· Refer to page 36 for the PTY codes.

#### **3** Press SEARCH.

While searching, "SEARCH" and the selected PTY codes will be displayed.

Example: when "News" is selected as a PTY code

The system searches 30 preset FM stations, and stops when it finds the one you have selected. At this time the selected frequency and PTY code flash. When "SEARCH" is pressed while the selected frequency and PTY code are flashing, the system automatically starts to find the next station. After the frequency and PTY code stop flashing or if any other operation is done, the system automatically tunes in to the station.

To stop searching, press SEARCH.

If no program is found, "NOTFOUND" appears on the display window and the system returns to the last received station.

T

#### CASE 2
