Before applying power

Units are designed for operation as follows.

Europe and U.K. .... AC 230 V only

For the United Kingdom

Factory fitted moulded mains plug

1. The mains plug contains a fuse. For replacement, use only a 13-Amp ASTA-approved (BS1362) fuse.

2. The fuse cover must be refitted when replacing the fuse in the moulded plug.

3. Do not cut off the mains plug from this equipment. If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or adapter, or consult your dealer. If nonetheless the mains plug is cut off, remove the fuse and dispose of the plug immediately, to avoid a possible shock hazard by inadvertent connection to the mains supply.

IMPORTANT: The wires in the mains lead are coloured in accordance with the following code:

        Blue   : Neutral
        Brown   : Live

Do not connect those leads to the earth terminal of a three-pin plug.

Preparation section

Safety precautions

WARNING : TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

⚡	**CAUTION** RISK OF ELECTRIC SHOCK DO NOT OPEN ⚠	CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE, REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.
⚡		THE LIGHTNING FLASH WITH ARROWHEAD SYMBOL, WITHIN AN EQUILATERAL TRIANGLE, IS INTENDED TO ALERT THE USER TO THE PRESENCE OF UNINSULATED "DANGEROUS VOLTAGE" WITHIN THE PRODUCT'S ENCLOSURE THAT MAY BE OF SUFFICIENT MAGNITUDE TO CONSTITUTE A RISK OF ELECTRIC SHOCK TO PERSONS.
⚠		THE EXCLAMATION POINT WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF IMPORTANT OPERATING AND MAINTENANCE (SERVICING) INSTRUCTIONS IN THE LITERATURE ACCOMPANYING THE APPLIANCE.

REQUIREMENT BY NEDERLAND GAZETTE

Batteries are supplied with this product. When they empty, you should not throw away. Instead, hand them in as small chemical waste.
The marking of products using lasers
(Except for some areas)

**CLASS 1
LASER PRODUCT**

The marking is located on the rear panel and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.

Caution : Read the pages marked ⚠ carefully to ensure safe operation.

Basic section

Application section

Knowledge section

Special features

Easy operation

Playback, recording and input selection can be performed with simplified operations.

Dynamic rotary volume control

When adjusting the volume, fast turning of the volume control produces a larger volume change for the same angle of rotation of the **VOLUME (MULTI) CONTROL** knob. Slow turning produces a small volume change, thus permitting fine adjustment.

3-Disc carousel CD player ➙ 18

Three discs can be set. There are various ways for enjoyment at the time of program playback, repeat playback, random playback, etc.

One-touch edit ➙ 42 ➙ 43

One-touch recording of only a single title or the entire CD is possible while listening to a CD.

R.D.S. (Radio Data System) ➙ 35

The RDS data included in FM broadcasts can be used to search for the intended broadcasting contents and for automatic reception from standby.

Versatile tone and sound field adjustment ➙ 45

Equalizer patterns can not only be selected from preset patterns, but patterns also can be created and registered. It is possible to recreate a feeling of presence and to recreate a sound field.

Karaoke also can be enjoyed. ➙ 49

When the HIT MASTER function is used with mic mixing, normal CDs and tapes with voice recorded on them can be used as Karaoke software.

Simple operation timer ➙ 51

Wake-up timer and sleep timer setting is simple. There are also two types of program timers operating every day.

Unpacking

Unpack the unit carefully and make sure that all accessories are put aside so they will not be lost.

Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the shipping company without delay. Only the consignee (the person or company receiving the unit) can file a claim against the carrier for shipping damage.

We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.

Accessories
FM indoor antenna (1)   **Speaker cords (2)**   **AM loop antenna (1)**   **Loop antenna stand (1)**

Remote control unit (1)   **Batteries (R6/AA) (2)**

Handling of discs and tapes

Disc handling precautions
Handling
Hold compact discs so that you do not touch the playing surface.
Label side
Playing side

Do not attach paper or tape to either the playing side or the label side of compact discs.
Cleaning
If fingerprints or foreign matter become attached to the disc, lightly wipe the disc with a soft cotton cloth (or similar) from the center of the disc outwards in a radial manner.

Storage
When a disc is not to be played for a long period of time, remove it from the CD player and store it in its case.

Caution on disc used
Never play cracked or warped disc.
During playback, the disc rotates at high speed in the player.
Therefore, to avoid malfunction, never use a cracked or deformed disc or a disc repaired with tape or adhesive agent.

Discs which can be played with this unit

CD (12 cm, 8 cm), CDV (only the audio part)
÷ With CD-G (CD Graphics) discs, this unit can play only the audio.

Notes on cassette tape

Safety tab (accidental erasure prevention tab)
After an important recording has been finished, break the safety tab, to prevent the recorded contents from being erased or recorded on accidentally.

For A side
For B side

To re-record   Apply tape only to the position where the tab has been removed.

To store cassette tapes
Do not store the tapes in a place which is subject to direct sunlight, or near equipment that generates heat. Keep the cassette tapes away from any magnetic field.

When there is slack in the tape
In such a case, insert a pencil into the reel hole and wind the reel hub to remove the slack.

Notes

1. Longer tape than 110 minutes cassette tape
Since longer tape than 110 minutes cassette tape is very thin, the tape could adhere to the pinch roller or be easily cut. It is recommended that these tapes not be used with this unit to prevent possible damage.

2. Endless tapes
Do not use an endless tape, as this could damage the mechanism of the unit.

Connection of the System Accessories

This is the connection method for system and accessories. Please look carefully at the illustration and connect correctly in the order of the numbers.

Malfunction of microcomputer

If operation is not possible or erroneous display appears even though all connections have been made properly, reset the microcomputer referring to "In case of difficulty".

➔ 56

AM loop antenna

The supplied antenna is for indoor use. Place it as far as possible from the main system, TV set, speaker cords and power cord, and set it to a direction which provides the best reception.

Caution regarding placement

To maintain proper ventilation, be sure to leave a space around the unit (from the largest outer dimensions including projections) equal to, or greater than, shown below.

left and right panels: 10 cm, rear panel: 10 cm, top panel: 50 cm
FM indoor antenna

The accessory antenna is for temporary indoor use only. For stable signal reception we recommend using an outdoor antenna. Remove the indoor antenna if you connect one outdoors.

❶ **Locate the position providing good reception condition.**
❷ **Fix the antenna.**

Speaker (left)

Front View
The external view is variable depending on the model and marketing destination type.

Notes
1. In case an associated system component is connected, also read the instruction manual of the component.
2. Never short-circuit the + and – speaker cords.
3. If the left and right speaker connections or the + and – polarity are inverted, the sound will be unnatural with unclear positioning of musical instruments, etc. Be sure to connect them without mistake.

Notes

1. Be sure to insert all connection cords securely. If their connections are imperfect, the sound may not be produced or noise may interfere.
2. Before plugging or unplugging a connection cord, be sure to unplug the power cord from the wall AC outlet. If connection cords are plugged or unplugged with the power cord left plugged in, malfunction or damage may result.

Connection of Options *(Optional Parts)*

**Connect separately sold parts as shown in the figure.
Do not plug the power cord into the power outlet until all
of the required connections have been made.**

In regard to the SURROUND switch

**This switch can be used only when the separately sold
surround (rear) speakers are connected. When the switch
is set to ON, surround playback can be enjoyed. When
this switch is set to OFF, normal playback is executed.**

÷ Please operate this switch while the power is switched off.
÷ We recommend to keep this switch set to OFF when no
surround (rear) speakers are connected to obtain a better
sound quality.
÷ When the switch is set to OFF, no sound will come from the
surround (rear) speakers.

DIGITAL AUDIO

Receiver

❶ON/STANDBY (|/([|])) key ➡️ 16
Power ON/OFF switching is executed.

❷RESET key ➡️ 56
Press to reset the microcomputer built in the system.

❸MIC MIX. knob ➡️ 49
At the time of mic mixing , this knob controls the volumes of the microphones.

❹MIC 1, MIC 2 terminal ➡️ 49
For connection of a microphone (optional).

❺HIT MASTER key ➡️ 49
Used in karaoke singing, etc.

❻BEST HITS key ➡️ 17 ➡️ 44
When power is ON: Records the first tracks of all of the CDs stored in the unit.
When power is STANDBY: Switches the auto power-save mode on and off.

❼EX. BASS (Extra bass) key ➡️ 17 ➡️ 52
When power is ON: Switches the extra bass play on and off.
When power is STANDBY: Used in the timer setting operation.

❽DISPLAY ➡️ 12

❾SRS 3D key/Indicator (XD-750/XD-700) ➡️ 48 ➡️ 53
When power is ON: Switches the SRS 3D play on and off.
When power is STANDBY: Used in the timer setting operation.
SOURCE DIRECT key/Indicator (XD-550, XD-500)
➡️ 48 ➡️ 53
When power is ON: Press to turn the Source Direct play on and off.
When power is STANDBY: Used in timer setting operations.

❿DISP. /DEMO key ➡️ 46
When power is ON: Switches the displayed information. Switches the demonstration on and off.

When power is STANDBY: Switches the demonstration on and off.

⓫ENTER key ∞ ➡️ 50
Used for time setting, timer setting, etc.

⓬MODE key ➡️ 45 ➡️ 51
When power is ON: This key switches the function of the **MULTI CONTROL/VOLUME** knob. The items which can be selected differ according to the status at that time.
When power is STANDBY: This key is used in the OTT timer setting.

⓭Equalizer operation keys ➡️ 46 ➡️ 47
The equalizer effect is switched ON/OFF and the type of equalizer effect is selected.

⓮MULTI CONTROL/VOLUME knob ➡️ 16
Normally this is used for volume adjustment. Depending on the purpose, the function can be switched with the **MODE** key.

⓯PHONES terminal ➡️ 17
For connection of a headphone (optional).

⓰INPUT key ➡️ 16
Press to select the input source. When TAPE or CD is selected, playback starts automatically provided that a tape or disc has already been loaded.

⓱Tuner operation keys ➡️ 24
AUTO key
When power is ON: Switches the tuning mode.
When power is STANDBY: Used in the clock adjustment.
TUNING keys
Press to select a radio station.
**BAND key**
Press to switch the receiving band.

Cassette deck unit

⓲A deck cassette holder
Press the area marked **PUSH OPEN** to load or eject a tape.

⓳O.T.E. key ➡️ 40
When this key is pressed during CD playback, only the title being played at that time will be recorded on tape. When this key is pressed during stop, the CD selected at that time will be recorded on tape from the first title onward.

⓴DOLBY NR key ➡️ 21
Dolby noise reduction ON/OFF switching is executed.

㉑REV. MODE key ➡️ 21
The reverse mode of the deck (both sides, repeated, one side) is switched.

㉒REC/ARM key ➡️ 27
Press to start recording. Pressing the key during recording stops it after leaving a non-recorded space (blank) of about 4 seconds.

㉓DUBBING key ➡️ 29
The contents of the tape of the A deck are copied to the tape of the B deck.

㉔B deck cassette holder
Press the area marked **PUSH OPEN** to load or eject a tape.

∞ Cassette deck operation keys
Play (◀ ▶) keys
Stop (■) key
Fast forward and rewind (◀◀ ▶▶) keys

㉖A/B key ➡️ 20 ➡️ 28
Press to select the deck to be operated. Used as the beat cancel key during recording of AM broadcasting.

CD player unit

㉗DISC SELECTOR key ➡️ 19
The disc for playback (or recording) is selected.

㉘TIME DISP. (Time display) key ➡️ 18
Press to switch the CD time display information.

㉙Disc tray ➡️ 18
Three discs can be stored.

㉚OPEN/CLOSE (⏏) key ➡️ 18
The disc tray is opened and closed.

㉛DISC SKIP key ➡️ 19
The disc for playback (or recording) is selected. This is also used for insertion of a CD to the inside of the disc tray.

㉜CD operation keys ➡️ 18
Play/pause (▶/II) key
Stop (■) key
Skip (I◀◀ ▶▶I) keys

Preparation section
Display

➊ **Tuner and applied operation indicators**
This section contains the indicators of the tuner operations as well as applied CD operation and timer play information.

➋ **Character display**
Displays the input selection, frequency, volume level, etc.

➌ **Cassette deck indicators**
This section contains the cassette deck operation indicators. The indicated information includes the current selected deck (A or B), tape transport direction, etc.

➍ **CD player indicators**
This section displays the CD playback and pause mode information as well as the disc number being played.

➎ **Equalizer indicators**
This section shows the equalizer pattern in use.

➏ **Volume display**
This section shows the currently set volume level.
➐ **RUNNING INDICATOR**
This indicator blinks according to the operation modes during operation of the CD player, tape decks, etc.

➑ **Spectrum analyzer display**

➒ **Track number indicator**
Indicates the CD track number being played.

Remote control Unit

❶ SRS 3D key (XD-750/XD-700 only) ➡ 48 ➡ 53
Press to switch SRS 3D on and off.

❷ EX.BASS (Extra bass) key ➡ 17 ➡ 52

❸ Numeric keys ➡ 19
Used as number keys when the input is switched to CD.
The **PTY SEARCH** key is used when searching the programme type of RDS broadcasting.

❹ P.MODE key ➡ 30
Used to program the CD playback sequence.

❺ EDIT key ➡ 41
Used for CD edit recording (time edit recording).

❻ RDS DISPLAY key ➡ 35
The display contents are switched during reception of RDS broadcasts.

❼ TA/NEWS/INFO. key ○
Used for automatic reception of transmissions of a certain content.

Basic section

÷ If the tape transport direction is opposite to the desired direction, press the play key corresponding to this.

Note Please play back tapes recorded with equalizer etc. without applying any effect.

Relay play

When tapes are set in the decks A and B and the reverse mode is set to "⊃" (play of both sides), play of the second deck will be started automatically after play of the first deck has been completed. Tape play will be repeated alternately.

÷Relay play is not possible in the reverse modes " ⊂⊃ " and " ⇄ ".
A tip for use of the tape counter

**The tape counter is set to "0000" when a cassette tape is loaded. By writing down the counter reading in case you want to interrupt recording (playback) in the middle of the tape, the memo will be helpful as a reference for locating the same position when continuing the recording (playback) the next time. The tape counter figure decrements during recording or playback of the back side (while the ◄ tape transport indicator is lit).
To set the tape counter to "0000", open the cassette holder once. Then the counter will be reset.**

TAPE   0000
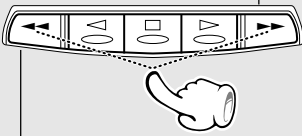

Searching for the desired music program *(DPSS)*

The DPSS (Direct Program Search System) is capable of detecting non-recorded spaces of more than 4 seconds as "blanks between programs" and, based on this information, can return to the beginning of the music program being played or the beginning of a desired program by skipping up to 16 other programs.

During play in direction ►
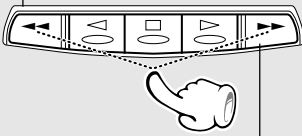

To play the next program	: Press once.
To play the 4th program after the current program	: Press 4 times.

To return to the beginning of the current program	: Press once.
To play the 4th program before the current program	: Press 5 times.

During play in direction ◄

To play the next program	: Press once.
To play the 4th program after the current program	: Press 4 times.

To return to the beginning of the current program	: Press once.
To play the 4th program before the current program	: Press 5 times.

Notes

The DPSS may not function normally with the following kinds of tape.
÷ Tapes containing several no-sound intervals of more than 4 seconds, such as conversation and talk tapes.
÷ Tapes containing pianissimo sections, such as classical music tape.
÷ Tapes in which large noise is recorded in blanks between programs.
÷ Tapes containing blanks between programs that are shorter than 4 seconds.
÷ Tapes recorded at low level.
÷ Tapes recorded by cross-fade recording (in which the beginning of next program is overlapped on the end of previous program).

÷ Pressing the ◄◄ key once returns to the beginning of the track being played.

To cancel random playback

Press so that the "RANDOM" indicator goes off.

RANDOM

÷ The **"RANDOM"** indicator goes off and the playback in order of the tracks starts from the track being played.

Application section

R.D.S. *(Radio Data System)*

RDS is a system which transmits useful information (digital data) for FM broadcasts together with the broadcast signal. Tuners and receivers designed for RDS reception can extract the information from the broadcast signal for use with various functions such as automatic display of the station name.
This unit is equipped with the following functions utilizing RDS data:

PTY (Program Type Identification) Search : → 36
The tuner automatically searches for a station which is currently broadcasting a specified program type (genre).

PS (Program Service Name) Display : (See below.)
When an RDS broadcast is received, the station name is automatically displayed.

EON (Enhanced Other Network) : °
When the information to be received is set in advance and any RDS station in the same network starts broadcasting of such information, the reception automatically will be switched to that station.

The **"RDS"** indicator lights up when an RDS broadcast (signal) is received.
÷Some functions may not be provided or be given different names depending on countries or areas.

Note before the use of RDS
To receive RDS stations, you have to preset RDS stations using the auto preset function. The auto preset function presets the RDS stations in priority. Flashing "NO DATA" will be displayed when no RDS station has been preset with this function.

Set the receiving band to FM and preset RDS stations with the auto preset function.
To switch the display contents

Pressing the RDS DISPLAY key changes the display contents.
RDS
DISPLAY
Display mode priority ranking

When an RDS broadcast is received :

① **PS (Program Service Name) Display :**
When an RDS broadcast is received, the station name is automatically displayed.
If no PS data was sent, **"NO PS"** is displayed.

② **Frequency Display :**
The frequency of the current station is displayed.

# Searching for a desired program type *(PTY search)*

By specifying the type of program (genre) you want to lis-
ten to, the tuner automatically searches for a station which
is currently broadcasting a program of the specified type.

**Set the reception band to FM. Preset RDS stations with the auto preset function.** → 24

1 Select the PTY search mode.

PTY

When an RDS broadcast is received, the program type is shown on
the display. If no PTY data is available, or if the station is not an
RDS station, "NONE" is displayed.

2 Select the desired program type.
Use program type table on the right for your convenience.

TUNING

Select while "PTY" is lit.

The desired program type can be se-
lected with the TUNING keys from 31
types. Press the key and release it when
the desired type is displayed.

Station name display.
To change to a different program type :

Repeat steps 1, 2, 3.

÷ No sound is heard while **"PTY"** is blinking.
÷ If a program of the desired type cannot be found, **"NO PROG"** is displayed, then after several seconds the display returns to the original display.
÷ If a program of the desired type is found, that program is received and the program type name display changes temporarily to the frequency display, and then to the station name display.

Application section

To be able to listen to the desired information at any time

By using the EON function, which manages the informa-
tion of other stations, listening to desired information like
traffic information or news etc. can be reserved even when
it is not being transmitted at the present. When listening
to a station with the "EON" display lit and another station
of the same network starts to broadcast an information
program for which a reservation has been made, then that
station will be selected automatically. When the desired
information program ends, return is made to the original
program.
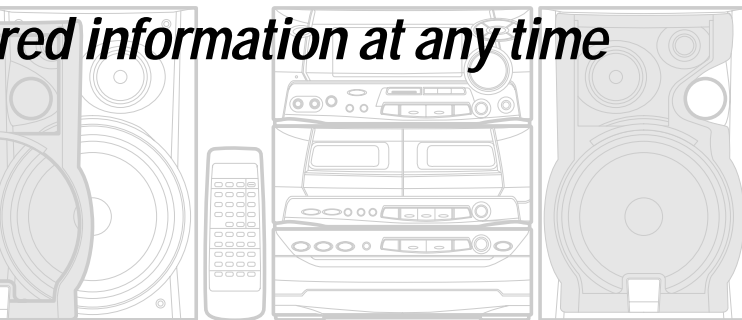

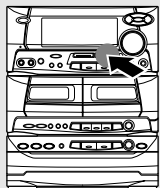

Set the reception band to FM.

1 Auto preset the stations.

❶ Receive a broadcast.

❷ Keep the ENTER key pressed (2 sec
or longer).

ENTER

The EON data presently being broad-
casted are taken in automatically.

This is not required when auto presetting has already been
executed.

÷ When all 40 stations have already been preset by the procedure for
"One-by-one presetting", the EON function will not operate. Auto
presetting must be used.
2 Select the desired information.

TA/NEWS
/INFO.

Each press switches the modes as follows.

① TA .... Traffic Announcement
② NEWS .... News
③ INFO .... Information
④ Display not lit ...... EON cancelled

Lights with a station broadcasting traffic announcement programs.
Lights when "INFO." is selected

÷ Please execute automatic presetting when **TA, NEWS,** and **INFO** can
not be selected.

3 Receive an RDS station.

Select a station where "RDS" and "EON"
are lit.

P. CALL

"RDS" and "EON" are lit

÷ When "EON" does not light although an RDS station is received, that
station is not transmitting EON data. Please select a different station.
÷ If you want **TA** programs, select the stations with which the "TP"
indicator lights.

Application section

4 *Wait for the desired information.*

CD or tape playback may also be started.
As long as the unit is ON, the unit is always ready for the reception.

÷ When one of the stations of the network of the station received in **3** starts broadcasting the program contents selected in **2**, that station will be received automatically. At this time, tape playback will stop and CD playback will pause. However, external equipment (AUX) will remain as it is.

÷ When the power is OFF and during recording (including dubbing), the EON function does not operate.

÷ When the transmission of the selected program contents ends in case of automatic reception with the EON function, return will be made to the status directly before operation of the EON function. When tape or CD playback has been interrupted, it will be continued from the point of interruption.

Waiting for information while a RDS station without EON function is tuned

**If the EON indicator does not light with the RDS station in steps 3 and 4, the tuner will wait for only the desired information broadcast from the tuned RDS station provided that the desired information has been selected in the previous step.**

TP (Traffic Program) indicator

The lighting of the TP indicator indicates that the currently tuned station or a station in the same network as it broadcasts traffic announcement programs. If the TP indicator already lights with the current station, you can listen to the traffic announcement program through the station without making reservation with the EON function.

Application section

Selection of the convenient CD recording type

With this unit, the following edit recording is possible according to the purpose.
Note Note that this cassette deck cannot record onto Metal tapes.

If you want to avoid any tune being interrupted at the end of tape

➡️

Giving preference to the tape length over the title sequence *(time edit recording)* ➡ 41

Edit recording of CD is possible by the simple operation of entering the recording length of the tape.

If you want to select the tracks to be recorded while playing a CD

➡️

Recording only desired titles
(ONE TOUCH EDIT.....single title recording) ➡ 42

Play a CD and, if a track you want to record starts, press the O.T.E. key. The track will be recorded from the beginning.

If you want to record a CD in order of track numbers

➡️

One touch recording of an entire CD
(ONE TOUCH EDIT.....recording of all titles) ➡ 43

Press the O.T.E. key when in the stop mode. The disc will start to be recorded.

For recording of only one title from several CDs

➡️

Producing a tape collecting only the first titles
(BEST HITS function) ➡ 44

When the BEST HITS key is pressed, the first titles of all set CDs will be recorded in sequence on the tape.
As already recorded CDs can be exchanged while recording, it is not necessary to interrupt the recording.

Enjoying Sound Field Effects
Experiencing SRS 3D *(Sound Retrieval System) (XD-750/XD-700 only)*

The Sound Retrieval System is an epochal system which produces a three-dimensional sound space by applying the most suitable processing to the sound signal on the basis of the human listening mechanism. This permits real depth and sound location, considered as difficult to realize with conventional 2-channel stereo (general stereo). A sufficient effect can be obtained for any source (CD, tape, broadcasts, etc.). Recording with applied SRS 3D also is possible.

❶ Set SRS 3D to ON.

**Lights**

SRS 3D → SRS 3D

**Each press of the key switches SRS 3D on and off alternately.**

❷ Adjust the effect strength (level).

LEVEL will be displayed.

Maintenance

Cleaning the head section

Cotton swab

Capstan

Head

Pinch roller

Tape guides
Cleaning the heads and peripheral components

For maintaining the best condition of the deck and for longer service life, always keep the heads (recording / playback / erase), capstan and pinch roller clean. To clean them, perform the following:
1. Open the cassette holder.
2. Using a cotton swab dipped in alcohol, clean the head (recording / playback / erase), capstan and pinch roller carefully.

Demagnetizing the head

When the recording / playback head is magnetized, the sound quality will deteriorate. In such a case, demagnetize the head using a commercially available demagnetizer (head eraser).

Note There are precisely aligned parts around the heads, including the tape guides. When cleaning, pay special attention so as not to apply shock to them.

Maintenance of the set

When the front panel or case becomes dirty, wipe with a soft, dry cloth. Do not use thinner, benzine, alcohol, etc. for these agents may cause discoloration.

In regardto contact cleaner

Do not use contact cleaners because it could cause a malfunction. Be specially careful not to use contact cleaners containing oil, for they may deform the plastic component.

Reference

Beware of condensation

When water vapor comes into contact with the surface of a cold material, condensation is produced.
If condensation occurs, correct operation may not be possible, or the unit may not function correctly.
This is not a malfunction, however, and the unit should be dried-out. (To do this, turn the ON/STANDBY switch ON and leave the unit as it is for several hours.)

Be especially careful in the following conditions:
÷ When the unit is brought from a cold place to a warm place, and there is a large temperature difference.
÷ When a heater starts operating.
÷ When the unit is brought from an air-conditioned place to a place of high temperature with high humidity.
÷ When there is a large difference between the internal temperature of the unit and the ambient temperature, or in conditions where condensation occurs easily.

	  DOLBY NR
	  Reverse mode

When your unit needs to be repaired, bring the entire set (Speakers excluded) to your dealer.

What seems to be a malfunction is not always so. Before calling for service, check the following table according to the symptom of your trouble.

Operation to reset

The microcomputer may fall into malfunction (impossibility to operate, erroneous display, etc.) when the power cord is unplugged while power is ON or due to an external factor. In this case, execute the following procedure to reset the microcomputer and return it to normal condition.

÷ Please note that resetting the microcomputer clears the contents stored in and returns and to condition when it left the factory.

Reset using a sharp-tipped object.

RESET

Remote control unit

Symptom	Cause	Remedy	
Remote control operation is not possible.	÷ Batteries are exhausted.	÷ Replace with new batteries.	➜ 14
	÷ The remote control is too far away from the system, the controlling angle is deviated or there is an obstacle in between.	÷ Operate the unit inside the remote controllable range.	➜ 14
	÷ There is no tape or CD set in the component to be played.	÷ Set a tape or CD in the component to be played.	
	÷ An attempt is made to play the cassette deck which is recording something.	÷ Wait until the recording ends.	

Receiver, speakers

| Symptom	Cause	Remedy	
Sound is not produced.	÷ The speaker cords are disconnected.	÷ Connect properly referring to " System connection" .	➜ 6
	÷ The volume control is set to the minimum position.	÷ Adjust to an required volume.	➜ 16
	÷ The **MUTE** switch of remote control unit is switched ON.	÷ Switch MUTE OFF.	➜ 17
	÷ The headphone plug is inserted into the jack.	÷ Unplug the headphone plug.	➜ 17
The character display blinks and sound is not produced.	÷ The speaker cords are short-circuited.	÷ Turn the power OFF, remove the short-circuit and turn the power ON again.	➜ 6
Sound is not produced from the left or right speakers.	÷ The speaker cords are disconnected.	÷ Connect properly referring to " System connection" .	➜ 6
The clock display blinks without changing the figures.	÷ There was a power failure.	÷ Adjust the present time again.	➜ 50
	÷ The power cord was unplugged from the outlet.	÷ Adjust the present time again.	➜ 50
Timer operation is not possible.	÷ The present time has not been adjusted or there was a power failure.	÷ Adjust the present time referring to " Clock adjustment" .	➜ 50
	÷ The timer ON time and OFF time have not been set.	÷ Set the timer ON time and OFF time.	➜ 52
	÷ The timer execution was not set up.	÷ Execute the timer program with the **SRS 3D (SOURCE DIRECT)*** key.	➜ 53
Radio stations cannot be received.	÷ The antennas have not been connected.	÷ Connect antennas.	➜ 6
	÷ A proper broadcasting band has not been selected.	÷ Select a band.	➜ 24
	÷ The frequency of the station to be received is not tuned.	÷ Tune to the frequency of the desired station.	➜ 24
Noise interferes.	÷ Car ignition noise.	÷ Install the outdoor antenna in an apart position from the road.	➜ 9
	÷ Influence of an electric appliance.	÷ Switch the suspected electric appliance OFF.	
	÷ A TV set is installed near the system.	÷ Install the TV or the system at an increased distance between them.	

* The key inside ( ) is used only with the XD-550/XD-500.

A station has been preset but it cannot be received by pressing the P.CALL key.	÷ The frequency of the preset station is not tunable. ÷ The preset memory has been cleared because the power cord has been unplugged for a long period.	÷ Preset stations with tunable frequencies. ∞ ÷ Preset stations again. ∞
Demonstration starts suddenly.	÷ The power plug was unplugged from the outlet while the power switch was ON, or there was a power failure.	÷ This is not malfunction. Press the **DISP./ DEMO** key to cancel the demontration. ➡ 46

Cassette deck

Symptom	Cause	Remedy
Sound cannot be produced by pressing the play key or no operation occurs even when an operation key is pressed.	÷ The head is dirty. ÷ The tape is wound too tight due to irregular winding. ÷ A nonrecorded tape is played.	÷ Clean the head referring to "Maintenance". ➡ 55 ÷ Try another tape. ÷ Play a recorded tape.
No operation occurs even when an operation key is pressed.	÷ The cassette holder is not closed completely. ÷ The operation key is pressed immediately after closing the cassette holder. ÷ The operation key is pressed in less than 4 seconds after turning the power ON. ÷ A tape is not inserted in the unit. ÷ The tape is wound too tight due to irregular winding. ÷ The tape is fully wound to one of the reels.	÷ Close the holder completely. ➡ 20 ÷ Press operations keys in more than a few seconds after closing the holder. ÷ Press operation keys after waiting for more than 4 seconds. ÷ Insert a tape. ➡ 20 ÷ Try another tape. ÷ Change the tape transport direction or reverse the tape insertion orientation. ➡ 20
The DPSS malfunctions.	÷ The tape used is not suitable for DPSS, for example the spaces between tunes may be too short.	÷ Refer to "Searching for the desired music program (DPSS)". ➡ 23
In dubbing, the tape stops at different moments in decks A and B.	÷ This is due to the difference in the tape length or characteristics of the mechanisms of two cassette decks.	÷ Small time difference does not mean a malfunction.
The cassette holders cannot be opened by pressing the PUSH OPEN area.	÷ The key is pressed during recording or playback. ÷ The microcomputer is malfunctioning due to external noise.	÷ Press in stop mode. ÷ Reset the microcomputer. ➡ 56
Sound is harsh or high frequencies are not reproduced.	÷ The head is dirty. ÷ The tape is stretched or shrunk.	÷ Clean the head referring to "Maintenance". ➡ 55 ÷ Try another tape.
Sound is distorted.	÷ The tape being played was recorded with distorted sound.	÷ Try another tape.
Noise is noticeable.	÷ The tape head is magnetized. ÷ External noise is induced. ÷ A tape recorded with Dolby NR ON is played with Dolby NR OFF.	÷ Demagnetize the head referring to "Maintenance". ➡ 55 ÷ Install the system at a distance from other electric appliances and TV. ÷ Set the Dolby NR to on. ➡ 21
Sound vibrates.	÷ The capstans or pinch rollers are dirty. ÷ The tape is wound irregularly.	÷ Clean the head referring to "Maintenance". ➡ 55 ÷ Wind the tape again by fast forwarding, rewinding or playing from an end to the other. ➡ 21
Recording cannot be started by pressing the record key.	÷ The recording protect tab of the cassette has been broken. ÷ The cassette holder is not closed completely. ÷ The **TAPE** input is selected. ÷ The tape is fully wound to one of the reels.	÷ Use a cassette with an unbroken recording protect tab or block the hole. ➡ 5 ÷ Close the holder completely. ➡ 20 ÷ Select the source to be recorded with the input selector key. ➡ 26 ÷ Change the tape transport direction of deck B or reverse the tape insertion orientation. ➡ 26
Volume of the recorded track changed.	÷ **MIC MIX.** control knob is moved during recording.	÷ Fully turn the **MIC MIX.** control knob to the left. ➡ 49

CD player

Symptom	Cause	Remedy	
A CD is placed in the player but it cannot be played.	÷The disc is placed upside down. ÷The disc position is displaced. ÷The disc is extremely dirty. ÷The disc is scratched. ÷Dew is condensed on the optics lens.	÷Place the disc properly, with the label side facing upward. ÷Place the disc properly. ÷Clean the disc referring to "Disc handling precautions". ÷Try another disc. ÷Refer to "Beware of condensation" and remove the condensation by evaporation.	➠ 18 ➠ 18 ➠ 5 ➠ 55
Sound is not produced.	÷The disc has not been placed. ÷The player is not put to the play mode. ÷The disc is extremely dirty. ÷The disc is scratched.	÷Place a disc in the CD player. ÷Press the play key. ÷Clean the disc referring to "Disc handling precautions". ÷Try another disc.	➠ 18 ➠ 18 ➠ 5
Sound skips.	÷The disc is dirty. ÷The disc is scratched. ÷The player is subject to vibration.	÷Clean the disc referring to "Disc handling precautions". ÷Try another disc. ÷Install the unit in a place not subject to vibrations.	➠ 5

Notes

1. With some tapes, a squeaky noise is produced when the tape is stopped automatically. This is due to the tape protection function, and not a malfunction.
2. Do not use longer tape than 110 minutes tapes, for the tape is too thin and gets easily tangled.

WARNING NOTICE:
IN MOST CASES IT IS AN INFRINGEMENT OF COPYRIGHT TO MAKE COPIES OF TAPES OR DISCS WITHOUT THE PERMISSION OF THE COPYRIGHT OWNERS. ANYONE WISHING TO COPY COMMERCIALLY AVAILABLE TAPES OR DISC SHOULD CONTACT THE MECHANICAL COPYRIGHT PROTECTION SOCIETY LIMITED OR THE PERFORMING RIGHTS SOCIETY LIMITED.

Specifications

Main unit (RXD-750/700/550/500)

[Amplifier section]
Rated power output (RXD-750/700)
  STEREO MODE

> 100 watts per channel minimum RMS, both channels driven, at 6 Ω, 1 kHz with no more than 10 % total harmonic distortion.

  (DIN) 1 kHz at 6 Ω, 0.7 % T.H.D. .... 70 W + 70 W
Rated power output (RXD-550/500)
  STEREO MODE

> 70 watts per channel minimum RMS, both channels driven, at 6 Ω, 1 kHz with no more than 10 % total harmonic distortion.

  (DIN) 1 kHz at 6 Ω, 0.7 % T.H.D. .... 50 W + 50 W
Input sensitivity / Impedance
  AUX .... 200 mV / 30 kΩ
  MIC .... 3.0 mV / 20 kΩ
Signal to noise ratio
  AUX .... 85 dB (IHF'66)

[FM Tuner section]
Tuning frequency range .... 87.5 MHz ~ 108 MHz

[MW (AM) Tuner section]
Tuning frequency range .... 531 kHz ~ 1,602 kHz

[LW Tuner section]
Tuning frequency range .... 153 kHz ~ 279 kHz

[Cassette deck section]
Track .... 4-track, 2-channel stereo
Recording system .... AC bias system
  (Frequency: 105 kHz)
Heads
  A deck Playback head 1
  B deck Playback / recording head 1
        Erasing head 1
Motors 2
Fast winding time .... Approx. 115 seconds
  (C-60 tape)

[CD player section]
Laser .... Semiconductor laser
Playing rotation .... 200 rpm ~ 500 rpm (CLV)
Wow & Flutter .... Unmeasurable Limit

General
Power consumption
  RXD-750/700 .... 200 W
  RXD-550/500 .... 150 W
Dimensions .... W: 270 mm
  H: 330 mm
  D: 357 mm
Weight (net)
  RXD-750/700 .... 10.2kg
  RXD-550/500 .... 9.5 kg

Speakers (LS-N750/N700)
Enclosure .... Bass-reflex type
Speaker configuration .... 3-Way system
  MAIN
    Woofer .... 180 mm, cone type
    Tweeter .... 65 mm, cone type
    Super tweeter .... 25 mm, dome type
Impedance .... 6 Ω
Maximum input level .... 100 W

General
Dimensions .... W: 220 mm
  H: 330 mm
  D: 316 mm
Weight (net) .... 4.1 kg (1 piece)

Speakers (LS-N550/N500)
Enclosure .... Bass-reflex type
Speaker configuration .... 3-Way system
  MAIN
    Woofer .... 160 mm, cone type
    Tweeter .... 65 mm, cone type
    Super tweeter .... 25 mm, dome type
Impedance .... 6 Ω
Maximum input level .... 100 W

General
Dimensions .... W: 200 mm
  H: 330 mm
  D: 278 mm
Weight (net) .... 3.7 kg (1 piece)

Notes

1. KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.
2. Sufficient performance may not be possible at very low temperatures (0°C or less).
