## Safety Information

### About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

**Immediately stop playing and consult a doctor** if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms - children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

**Other Important Health and Safety Information** The Xbox Instruction Manual contains important safety and health information that you should read and understand before using this software.

### Avoid Damage to Your Television

**Do not use with certain televisions.** Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

Along with game features, your adjusted game options are automatically saved as well. Once saved, the options will automatically be loaded the next time you power up, as long as you have previously saved MKA data. The Profile code window will be available again for you to load a different Profile.

Press the **O** button to display the Handicap window. Press the D-pad **←** or **→** to adjust the handicap's percentage. The fighter's Health will then be adjusted for the next match only. You can choose a value between 100% (full Health) and 20%. Press the **O** button to remove the Handicap display.

# The Kombat HUD

## ROUND TIMER

By default, each round has a **Round Timer**. If the time is up before either kombatant has been defeated, the warrior with fewer injuries is declared the victor.

## VICTORY SKULLS

Each time a fighter wins a round, a **Victory Skull** is earned. The first fighter to earn two (in the default setting) wins the match and is declared the victor.

## COMBO % METER

To advance your fighting skills to the highest level, you must learn how to do Combination Attacks. When a combo is executed, the **Combo Meter** briefly appears to display the amount of damage that has been done to an opponent. The more complex the combination, the more damage is done.

## FIGHTING STYLES

**Mortal Kombat: Armageddon** includes two Fighting Styles per fighter. Pull the **L** trigger during any match to toggle between them. If you often change your fighting style to confuse your opponent, you may lose track. Take a quick look at the bottom of the screen to see which fighting style you're currently using.

## HEALTH BARS

In all **Mortal Kombat** battles, Health Bars in the upper portion of the screen measure each warrior's diminishing Health. The meters begin each round reflecting Health at 100%, but the amount of Health is reduced with each blow taken. The reduction amount depends on the type of attack and whether or not it was blocked. When a fighter's Health Meter is depleted, he/she is knocked out and the round goes to the opponent.

## KOMBAT PARRY

Press Block and Away (**R** trigger + Away on the D-pad) from an opponent to Parry an attack. Timing a Parry against an enemy's attack can make the difference between a win and a loss.

# The Kombat HUD

## AIR KOMBAT

Find character-specific pop-up moves which allow a Kombatant to use Air Kombat. When an opponent is in the air, jump up to perform Air Kombat combos against him/her.

## GROUND KOMBAT

After being knocked to the ground, hold the Block button to stay there. Press the D-pad to roll away, or press the attack buttons to perform a quick attack from the ground.

## BREAKER SYSTEM

At the beginning of each match, you're given only three Combo Breakers. You should use these wisely, because they won't be replenished at the end of a round. Press Forward and Block to break a combo. Each time you perform a Breaker, one of the icons will disappear.

## MOVES LIST

During a match, press the **○** button to view the Pause Menu. Select **Moves List** to view the moves for your character. Press the D-pad **←** or **→** to cycle between the two fighting styles and special moves, then press **↑** or **↓** to scroll through all the moves for that style. The Moves List is available in all game modes, including Practice.

## KREATE A FATALITY

If you've defeated an opponent in a Kombat Match, the "Finish Him/Her" prompt will appear. As the red bar drains, you have a limited amount of time to enter a button sequence and create one string of a Fatality. The red bar indicates the time left to perform the next Fatality sequence. If you successfully enter the right sequence, the timer will reset, allowing you to attempt another sequence. You can enter up to 10 sequences of a Fatality, pounding away until nothing is left of your opponent.
