WASHER/DRYER COMBO

All-in-One Washer and Dryer

This laundry dream washes and dries all in one machine.

Who Is It for?

People who want to be able to do laundry at home but don't have an external venting source which conventional dryers require. It's great for busy people who want to start a load and return to clean clothes. The Delay Start feature allows convenient completion of laundry to fit your schedule. Homes, apartments, businesses and vacation homes where there may be space constraints.

What Are The Advantages?

No outside venting is required because it is ventless condensing. It runs on a standard 115V electricity and not gas. No need to wait to transfer from the washer to the dryer.

What Else Should I Know?

Ventless condensing dries from within the drum so the water that is extracted from the clothes drains through the drum and out the water pump. This drying process takes longer than conventional drying.

It requires installation where a water hook-up is available.
