Multi-Format HD/SD Compatibility for Worldwide Use

Compatibility with various HD/SD formats will help you meet changing production needs as video moves towards HD on a global scale.

The AV-HS400 lets you up-convert and mix SD signals with HD, to provide an easy transition to full HD production.

The AV-HS400 is compatible with virtually all common input devices.

Compatible formats

HD 1080/59.94i, 1080/50i, 720/59.94p, 720/50p

SD 480/59.94i, 576/50i

* The multi-format logo indicates a model that supports two or more formats including the HD format.

Built-in Frame Synchronizers for Versatile Operation

Each input features a built-in 10-bit Frame Synchronizer for smooth switching, even with asynchronous sources, such as DVDs or satellite feeds.

Reference (black burst) signal outputs are provided to enable synchronization with external systems.

The main unit and control panel are integrated in a compact body, ideal for small studios and mobile production.

* AC 220 V to 240 V power supply.

• The unit is not waterproof so please avoid direct contact with rain and water.
