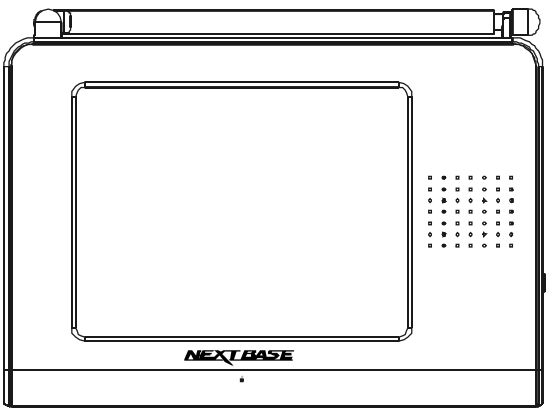
## OPERATING INSTRUCTIONS



DVB
Digital Video
Broadcasting

Download from Www.Somanuals.com. All Manuals Search And Download.

Thank you for purchasing this *HI-SPEED* TV360 tablet digital TV. Please read this manual carefully before operating your unit and keep it handy for future reference. It will be helpful to you if you encounter any operational problem.

## IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this unit near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacture's instructions.
8. Do not install the unit near any heat sources such as radiators, heat registers, stoves, or other apparatus including amplifiers that produce heat.
9. Position the cables well so that they cannot be walked on or pinched by items placed on or against them.
10. Do not dispose of the unit into fire, to prevent the danger of explosion.
11. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way.
12. Only the original AC-DC adapter can be used.
13. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
14. Unplug this apparatus during lightning storms or when unused for long periods of time.
15. Do not expose this appliance to rain or moisture, dripping or splashing and that no objects filled with liquids, such as vases, or naked flame sources, such as candles, shall be placed on the unit.

Download from Www.Somanuals.com. All Manuals Search And Download.

## WARNING:

* Do not touch the antenna with your hands while scanning the TV channel.
  Doing so would lower down the receiving quality.

## CAUTION:

Do not take the unit apart. No user serviceable parts inside. Do not perform any servicing other than contained in this operating instructions unless you are qualified to do so. These servicing instructions are for use by qualified service personnel only.

## NOTICES:

1. Fully charge the Lithium polymer battery before using it for the first time or reusing it after being stored for a long period. It would need 3 to 5 circles of charging and discharging operations to get the optimum performance of the battery.

2. The surrounding temperature has much to do with the charging efficiency and should be between 0℃ and 40℃. The charging performance will be in the most efficient state from 10℃ to 30℃.

3. It is suggested to carry out the actions of charging and discharging the battery at least every one or two months if the battery is stored for a long time. Fully recharge it again to be stored. This action can avoid the leakage or the bad performance of the battery for its self-discharging action.

4. When the charging time or available operation time become extremely short, battery may reach the end of its life. The battery pack can be used for about 500 cycles of recharging and operations.
