# B4000 SERIES MONO PRINTERS

B4100: Personal printing for professionals

Mono printing is the engine room of a smooth running business, the unsung hero powering through the workload.

More uptime and less downtime are simple prerequisites.

Historically, a buyer choosing a printer has had to select between individual benefits such as highest quality print, greatest memory, fastest first page to print or most pages per minute.

However, these days business demands a more holistic approach. Business demands that we excel in all areas because they all impact together on the productivity of a business.

As business print specialists, Oki understands this and ensures our printers work the way good businesses work.

Oki mono printers are built to perform with all class-leading attributes working together. They also work efficiently across all other areas that affect productivity.

For example, a printer delivering more pages per minute is not truly efficient if you have to wait for a slow processor, or have to stop because its small memory keeps on becoming full. Likewise, greater memory and faster

processing speed are of little use if you're constantly refilling a paper tray with limited capacity. Maximising office productivity is about striking a balance of all key performance benefits. Ensuring each works in unison.

another  
way of  
thinking  
in mono  
printing

Equally important, our printers are built to cope with the fast-moving world of business. A world where you can't afford things to go wrong. Which is why our 'Ask Oki' support service is so valuable in providing immediate help and assistance at the touch of a button. You'll find the 'Ask Oki' button on your printer's driver screen; it will take you straight to a dedicated support web site.

These examples of our business insight and innovation make your decision to buy Oki an inspired one.

## THE B4000 SERIES

With the B4000 Series printers Oki continues to lead the field in delivering high speed, professional office printing in extremely compact and powerful machines. They are ideal wherever the priorities are fast output, quality printing, quality printing, value for money and high office productivity.

There are three models in the B4000 Series: the B4100 for the individual business user and the B4250 and B4350 ideal for individuals or smaller-sized workgroups.

# B4000 SERIES MONO PRINTERS

## WHATEVER YOUR PRINTING NEEDS, OKI MEANS BUSINESS.

### WHY OKI?

We believe that effective printed communications are fundamental to successful businesses. That's why we focus purely on understanding their diverse printing requirements. Through our considerable technological resources we develop fast, high quality, cost-effective printing solutions that will benefit businesses today and long into the future.

It is the same progressive spirit that drove Kibataro Oki to found Oki Electric in 1881, and which helped his company to become the global, multi-billion Euro business that it is today. A business whose people share one single-minded purpose: helping other businesses grow and prosper by enabling them to create the best possible impression with their printed communications.

### EVERY KIND OF PRODUCT FOR EVERY KIND OF BUSINESS

Whether your business is a start-up or a multinational, we have the products to suit your needs from dot matrix printers to mono and colour multi-functional units. Because we have such a diverse product range, we have colour-coded our product segments to help you save time. When it's time to add another printer to your range or to check out the latest advances in technology on our website, simply use the following colour guide.

B4250: High-speed personal printing for professionals

B4350: Reliable, high-speed professional printing for personal and very small workgroup users

The B4250/B4350 have options for networking and upgrades, so you'll find the B4000 Series can be specified to meet your requirements, precisely. Our printers excel in all areas affecting workplace productivity. Choose your printer and its particular benefits based on the specification requirements for your business.

#### THE B4100

Offering excellent print and processing speed for your money, the B4100 is the consummate mono printer for the individual business user. Compact, stylish and robust, it boasts class-leading features including 18 pages per minute (ppm), 8MB RAM memory and faster first page to print at 6.2 seconds. Ideal for the personal desktop where high quality documents such as reports, letters and labels are required.

#### THE B4250

Keep business flowing smoothly with this supremely productive A4 mono printer. Perfect for very small workgroups and personal

the  
printers  
of choice  
for business  
users

desktop applications, it produces an impressive 22 ppm with 16MB memory upgradeable to 272MB. Options include network capability, second input tray and multi-purpose feeder for different paper stock, making it a highly flexible and affordable printer for a multitude of printing tasks.

#### THE B4350

The B4350 printer brings new levels of performance to desktop mono printing. The B4350 is ideal for the small to medium sized workgroups and where performance and compact footprint is a necessity, such as hotel receptions or retail environments. The B4350 comes with LCD operator panel for complete control and hassle free printing. Optional built-in network interface means that the B4350 can be shared by small to medium workgroups and the optional PostScript emulation (standard on B4350nPS) ensures compatibility across multi-operating system environments. Flexible media handling is provided as standard with the 250 sheets paper tray and the range of paper handling options, including the 500 sheet second tray and multi feeder for envelopes and non standard media. To minimize user intervention there is a choice of standard or high capacity toner cartridges to suit individual printing requirements.
