Listening caution

Do not play your headphones or earphones at a high volume. Hearing experts advise against continuous extended play.
If you experience a ringing in your ears, reduce volume or discontinue use.
Do not use while operating a motorized vehicle. It may create a traffic hazard and is illegal in many areas.
You should use extreme caution or temporarily discontinue use in potentially hazardous situations.
Even if your headphones or earphones are the open-air type designed to let you hear outside sounds, don't turn up the volume so high that you can't hear what's around you. Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So what sounds "normal" can actually be loud and harmful to your hearing.
Guard against this by setting your equipment at a safe level BEFORE your hearing adapts. To establish a safe level:
• Start your volume control at a low setting.
• Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.
Once you have established a comfortable sound level:
• Leave it there.

Protection de l'ouïe

Éviter l'écoute à volume élevé. Les spécialistes en otologie recommandent de ne pas prolonger l'écoute afin de ne pas endommager l'ouïe.
Si un bourdonnement se fait entendre, réduire le volume ou cesser l'écoute.
Ne pas utiliser au volant d'un véhicule motorisé. Cela peut être dangereux et est interdit dans plusieurs régions.
Démontrer une grande prudence ou interrompre l'écoute dans des situations potentiellement dangereuses.
Même si le casque d'écoute ou les écouteurs sont du type ouvert devant permettre d'entendre les bruits ambiants, ne pas trop élever le volume.
Le son peut être trompeur. Avec le temps, votre niveau de confort auditif s'adapte à des volumes plus élevés. Ainsi, un niveau qui semble normal peut en fait être trop élevé et être nuisible à l'oreille.
Protégez-vous en réglant le volume à un niveau sécuritaire avant que votre oreille ne s'adapte à un volume trop élevé.
Pour déterminer un niveau d'écoute sécuritaire:
• Régler le volume au minimum.
• Monter lentement le volume jusqu'au niveau d'écoute confortable avant qu'il n'y ait distorsion.
Après avoir identifié le niveau d'écoute confortable:
• Laisser l'appareil réglé à ce niveau.
