**Caution:**

- The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)  
In order to program this information into your fax machine, you should complete the instructions on page 31 to page 34.
- Note that the images of copied or received documents will remain on the used ink film. Use discretion when disposing of the used ink film.
- Do not rub or use an eraser on the printed side of recording paper, as the print may smear.

**Energy Star:**

- As an ENERGY STAR<sup>®</sup> Partner, Panasonic has determined that this product meets the ENERGY STAR guidelines for energy efficiency.  
ENERGY STAR is a U.S. registered mark.

**Trademarks:**

## Battery charge

Place the handset on the cradle of the base unit for about **15 hours** before initial use.

- A beep will sound, and the following will be displayed for an instant on the base unit.

Base unit display: 

CHARGING
----------

The display will show the date and time.

- For further details, see page 21.

## Operating distance and noise

Calls are transmitted between the base unit and the handset using wireless radio waves.

**For maximum distance and noise-free operation**, the recommended base unit location is:

- 1 **Away from electrical appliances such as a TV, personal computer or another cordless phone.**
- 2 **In a HIGH and CENTRAL location with no obstructions such as walls.**
- 3 **Raise the antenna vertically.**

### Note:

- If you are using the handset near a microwave oven which is being used, noise may be heard from the receiver on the handset. Move away from the microwave oven and closer to the base unit.
- If more than one cordless phone is being used and your handset is near another cordless phone's base unit, noise may be heard. Move away from the other cordless phone's base unit and closer to your base unit.

# Safety Instructions

---

## Important safety instructions

When using this unit, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on this unit.
3. Unplug this unit from power outlets before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this unit near water, for example near a bathtub, wash bowl, kitchen sink, etc...
5. Place the unit securely on a stable surface. Serious damage and/or injury may result if the unit falls.
6. Do not cover slots and openings on the unit. They are provided for ventilation and protection against overheating. Never place the unit near radiators, or in a place where proper ventilation is not provided.
7. Use only the power source marked on the unit. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
8. For safety purposes this unit is equipped with a grounded plug. If you do not have this type of outlet, please have one installed. Do not defeat this safety feature by tampering with the plug.
9. Do not place objects on the power cord. Install the unit where no one can step or trip on the cord.
10. Do not overload wall outlets and extension cords. This can result in the risk of fire or electric shock.
11. Never push any objects through slots in this unit. This may result in the risk of fire or electric shock. Never spill any liquid on the unit.
12. To reduce the risk of electric shock, do not disassemble this unit. Take the unit to an authorized service center when service is required. Opening or removing covers may expose you to dangerous voltage or other risks. Incorrect reassembly can cause electric shock when the unit is subsequently used.
13. Unplug this unit from the wall outlet and refer servicing to an authorized service center when the following conditions occur:
  - A. When the power supply cord or plug is damaged or frayed.
  - B. If liquid has been spilled into the unit.
  - C. If the unit has been exposed to rain or water.
  - D. If the unit does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service center
  - E. If the unit has been dropped or physically damaged.
  - F. If the unit exhibits a distinct change in performance.
14. During thunderstorms, avoid using telephones except cordless types. There may be a remote risk of an electric shock from lightning.
15. Do not use this unit to report a gas leak, when in the vicinity of the leak.

## SAVE THESE INSTRUCTIONS

### INSTALLATION:

- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

### WARNING:

- To prevent the risk of fire or electrical shock, do not expose this product to rain or any type of moisture.

### OTHER INFORMATION:

- Keep the unit away from electrical noise generating devices, such as fluorescent lamps and motors.
- The unit should be kept free from dust, high temperature and vibration.
- The unit should not be exposed to direct sunlight.
- Do not place heavy objects on top of this unit.
- Do not touch the plug with wet hands.

## **CAUTION:**

### **Battery**

To reduce the risk of fire or injury to persons, read and follow these instructions.

- Use only the battery(ies) specified.
- Do not dispose of the battery(ies) in a fire. They may explode. Check with local waste management codes for special disposal instructions.
- Do not open or mutilate the battery(ies). Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if swallowed.
- Do not let the batteries come in contact with conductive materials such as rings, bracelets and keys or the battery and/or conductor may overheat and cause burns.
- Charge the battery(ies) provided with or identified for use with this product only in accordance with the instructions and limitations specified in this manual.

## **NOTICE:**

- Operating near 2.4GHz electrical appliances may cause interference. Move away from the electrical appliances and/or press the CH (Channel) button.
- Consult the manufacturer of any personal medical devices, such as pacemakers, to determine if they are adequately shielded from external RF (radio frequency) energy. (The unit operates in the frequency range of 2402 MHz to 2480 MHz, and the power output level can range 0.015 watts.) Do not use the unit in health care facilities if any regulations posted in the area instruct you not to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF (radio frequency) energy.

# Setting (Base Unit)

## Ink film

- 1** Open the front cover by pulling up the center part.

- 2** Release the back cover by pushing the back cover open button (green) on the right side of the unit.  
OR  
Release the back cover by pushing the back cover open lever (green) in the unit.

- 3** Open the back cover.

- 4** Insert the blue core of the front ink film roll into the right slot of the unit (①). Insert the "T" shaped gear (blue) into the left slot of the unit (②).  
Insert the rear ink film roll (③).  
● The ink film is safe to touch, and will not rub off on your hands like carbon paper.

# Setting (Base Unit)

- 5** Turn the "T" shaped gear (blue) in the direction of the arrow.

- Make sure that the ink film is wrapped around the blue core at least once.

## Correct

## Incorrect

- 6** Close the back cover securely by pushing down on the dotted area at both ends (①). Close the front cover securely (②).

- When the power cord is connected, the following message will be displayed while the unit is checking that there is no slack in the ink film.

PLEASE WAIT

# Setting (Base Unit)

## Paper tray

The included paper tray is for letter size recording paper.

Insert the tab on the paper tray into the slot on the back of the unit.

### Note:

- Do not place the unit in an area where the paper tray may be obstructed (i.e. by a wall etc.).

### To use legal size paper

- Please purchase a legal paper tray, Model No. KX-FA51 (page 10) and install it.

### To use A4 size paper

You need to install the A4 paper guide to the right side of the paper tray.

- Change the recording paper size (feature #16, page 88).
1. Insert the bottom tab on the A4 paper guide into the lower slot.
  2. Press the guide into the upper slot.

## Metal recording paper guide

Attach the metal recording paper guide into the slots on the recording paper exit.

- The recording paper will be ejected from the top of the unit after printing. The metal recording paper guide prevents the printed paper from curling.

# Setting (Base Unit)

## Recording paper

Letter, legal or A4 size recording paper can be loaded. The unit can hold up to 50 sheets of 75 g/m<sup>2</sup> (20 lb.) paper. You may use 60 g/m<sup>2</sup> to 90 g/m<sup>2</sup> (16 lb. to 24 lb.) paper. See the note for paper specifications (page 120). **For superior results, we recommend Hammermill® Jet Print paper.** If you use legal size paper, please install a legal paper tray (page 16).

- 1 Fan the stack of paper to prevent a paper jam.

- 2 Pull the tension plate forward and hold open while inserting the paper.

- The paper should not be over the tab.
- If the paper is not inserted correctly, readjust the paper, or the paper may jam.

**Correct**

### To add paper

1. Pull the tension plate forward and hold open while removing all of the installed paper.
2. Add paper to the stack of paper you removed and straighten.
3. Fan the stack of paper.
4. Pull the tension plate forward and hold open while inserting the paper.

## Belt clip and headset

### Belt clip

To install the belt clip

To remove the belt clip

### Headset (optional)

Plugging the headset into the handset allows a hands-free telephone conversation. Please use the Panasonic headset Model No. KX-TCA88 or KX-TCA90. See page 10 for accessory information.

To connect the headset

The pictured headset is KX-TCA88.

# Connections and Setup

## Selecting the way to use your fax machine

You may already have other devices such as a telephone or computer in addition to the fax machine. You may use them in the same room or a different room. Depending on your situation, select the way you prefer to use your fax machine.

- **Case 1:** Using the fax machine only (page 22)
- **Case 2:** Using the fax machine with an extension telephone (page 24)
- **Case 3:** Using the fax machine with a computer (page 26)

## Connecting to a telephone line jack and power outlet

### To use surge protectors

- The warranty does not cover damage due to power line surges or lightning. For additional equipment protection, we recommend the use of a surge protector. The following types are available: TELESPIKE BLOK MODEL TSB (TRIPPE MFG. CO.), SPIKE BLOK MODEL SK6-0 (TRIPPE MFG. CO.), SUPER MAX (PANAMAX) or MP1 (ITW LINX).

### Caution:

- **When you operate this product, the power outlet should be near the product and easily accessible.**

### Note:

- If any other device is connected on the same line, this unit may disturb the network condition of the device.

## Battery charge

Place the handset on the cradle of the base unit for about **15 hours** before initial use.

- A beep will sound, and the following will be displayed for an instant on the base unit.

Base unit display: CHARGING

The display will show the date and time.

- If the base unit is in use, a beep may not sound and the message may not be shown.

### Note:

- Clean the handset and the base unit charge contacts with a dry cloth once a month, or the battery may not charge properly.
- The battery cannot be overcharged.

## Battery strength

You can check the battery strength on the handset display.

## Battery life

If your Panasonic battery is fully charged;

- the battery life will last up to 5 hours while in use (in conversation).
- it will last for up to about 11 days while not in use (off the base unit).
- Battery life may vary depending on usage conditions and ambient temperature.

## Recharge

Recharge the battery when:

- the handset beeps intermittently while it is in use, or
- the following is shown and “[ ■ ]” flashes on the handset display.

Handset display:

Recharge  
[ ■ ]

- Recharge the handset battery for more than 15 minutes, or the display will continue showing the indication.

## Automatic security code setting

The security code helps to avoid unauthorized use of your telephone line by another cordless telephone. Whenever you place the handset on the base unit, the unit will automatically select one of more than a million security codes.

## Caller ID service from your phone company

This unit is compatible with the Caller ID service offered by your local telephone company. To use this feature, you must subscribe to a Caller ID service.

Change the following ring setting to 2 or more rings beforehand.

- TAD ring setting and FAX ring setting (feature #06, page 88)

### How Caller ID is displayed

The calling party's name or telephone number will be displayed after the first ring. You then have the option of whether or not to answer the call depending on the caller.

The unit will automatically store the caller information (name, telephone number and the time of the call). You can view the caller information (page 50) and print the Caller ID list (page 111).

#### Note:

- If the unit is connected to a PBX (Private Branch Exchange) system, you may not receive the caller information. Consult your PBX supplier.
- If the unit cannot receive caller information, the following will be displayed:
  - The caller dialed from an area which does not provide Caller ID service:

Base unit display: OUT OF AREA

Handset display: Out of area

- The caller requested not to send caller information:

Base unit display: PRIVATE CALLER

Handset display: Private caller

- The caller made a long distance call:

Base unit display: LONG DISTANCE

Handset display: Long distance

### To confirm caller information using the Caller ID list

The unit will store information for the most recent 30 callers.

- To print manually, see page 111.
- To print automatically after every 30 new calls, activate feature #26 (page 89).

### Visual Call Waiting (Call Waiting ID) Service

If you hear a call-waiting tone during a conversation, the display will show the second caller's information.

Press **[CALL WAIT]** to answer the second call.

- The first call is put on hold and you can answer the second call.
- To return to the first caller, press **[CALL WAIT]** again.

#### Note:

- The second caller's information will not be displayed when:
  - the answering system is recording an incoming message,
  - an extension telephone on the same line is in use, or
  - you are sending or receiving a fax document.
- Please contact your telephone company for details and availability of this service in your area.

## Viewing and calling back using caller information

You can easily view caller information and call back.

### Important:

- Calling back will not be possible in the following cases:
  - The telephone number includes data other than numbers (i.e. \* or #).

# Sending Faxes

---

## To send more than 10 pages at a time

Insert the first 10 pages of the document. Add the other pages (up to 10 at a time) before the last page feeds into the unit.

## Convenient way to send a fax

You can dial the fax number first before inserting the document. This is convenient if the other party's number is indicated on the document.

1. Enter the fax number.
2. Insert the document.
3. Press **[FAX/START]**.

## Sending from memory (Quick scan feature)

You can scan the document into memory before sending. To use this feature, activate feature #34 (page 89).

1. Insert the document.
2. Enter the fax number.
3. Press **[FAX/START]**.
  - The document will be fed into the unit and scanned into memory. The unit will then transmit the data. If the document exceeds the memory capacity, sending will be canceled and this feature will be turned off automatically. Transmit the entire document manually.
  - This feature cannot be used if **[DIGITAL SP-PHONE]**, **[TALK]** or **[SP-PHONE]** is pressed.

## To stop transmission

Press **[STOP]**.

## Sending a fax with the voice guide

You can send documents by following the voice guide.

1. Press **[HELP]** 2 times.
2. Press **[SET]**.
3. Follow steps 1 to 6 (page 55).
  - After transmission, the voice guide will turn off automatically.

## Sending report for confirmation

This report will provide you with a printed record of transmission results. To use this feature, activate feature #04 (page 88). For the communication message in the result column, see page 93.

## Journal report

The unit stores the 30 most recent fax communication results. To print manually, see page 111. To print automatically after every 30 new fax communications, activate feature #22 (page 89). For the communication message in the result column, see page 93.

## Documents you can send

### Note:

- Remove clips, staples or other similar fasteners.
- Do not send the following types of documents: (Use copies for fax transmission.)
  - Chemically treated paper such as carbon or carbonless duplicating paper
  - Electrostatically charged paper
  - Badly curled, creased or torn paper
  - Paper with a coated surface
  - Paper with a faint image
  - Paper with printing on the opposite side that can be seen through the other side (i.e. newspaper)
- Check that ink, paste or correction fluid has dried completely.
- To transmit the document with a width of less than standard letter size (216 mm), we recommend using a copy machine to copy the original document onto letter-sized paper, then transmitting the copied document.

## How to receive calls

When receiving calls, the unit works as a fax and/or answering device.

- If the call is a phone call, the answering machine will record a voice message automatically.
- If a fax calling tone is detected, the fax machine will receive a fax automatically.

---

### Ring setting in TAD/FAX mode

You can choose from 1, 2, 3, 4, "TOLL SAVER" and "RINGER OFF". This setting can be changed by feature #06, page 88.

- **"TOLL SAVER"**: When you call the unit from a remote location, the number of rings will tell you if there are any new voice messages. If the unit answers on the 2nd ring, there is at least one new recorded message. If the unit answers on the 4th ring, there are no new recorded messages. To save the toll charges for the call, hang up immediately when you hear the 3rd ring. The 3rd ring indicates that there are no new recorded messages.
- **"RINGER OFF"**: The unit will answer without ringing.
  - If you subscribe to a Caller ID service, set to 2 or more rings.

# Distinctive Ring

## Using two or more phone numbers in a single telephone line

The Distinctive Ring service is a service offered by your local telephone company. This service provides several telephone numbers for a single telephone line, and the ring pattern differs according to which telephone number the call was addressed to. Originally, this service was designed for the purpose of allowing different ring patterns to distinguish which number the call was addressed to.

This unit distinguishes the different ring patterns. If the ring pattern is one which is assigned for a fax, the fax machine will automatically start fax reception. This service is convenient if you wish to have a different number for fax in a single telephone line.

**To use this service, you must subscribe to the Distinctive Ring service offered by your local telephone company.**

### Activating the Distinctive Ring feature

### How to receive calls

If the incoming call is for the fax number, the fax machine will ring with the assigned ring pattern and automatically start fax reception.

If the incoming call is for the phone number;

- the fax machine will keep on ringing in TEL mode.
- the fax machine will record voice message in TAD/FAX mode.
- fax communication will be attempted in FAX ONLY mode.

**4** Press **[SET]**.

**5** Press **[MENU]**.

## If you use three or more phone numbers

You may wish to use three or more phone numbers for a single telephone line to distinguish which number the call was addressed to. A different ring pattern must be assigned for each number.

### Example: Using three phone numbers

Telephone number	Ring pattern	Use
012 1234	Standard ring	Personal
012 5678	Double ring	Business
012 9876	Triple ring	Fax

To use one phone number for the fax, program the ring pattern assigned for the fax in feature #32. In the example, the ring pattern assigned for fax is triple ring, so you should program "C" (triple ring).

Ring pattern	Settings in feature #32
Standard ring (one long ring)  1st ring    2nd ring	<b>A</b>
Double ring (two short rings)  1st ring    2nd ring	<b>B</b>
Triple ring (short-long-short rings)  1st ring    2nd ring	<b>C</b>
Other triple ring (short-short-long rings)  1st ring    2nd ring	<b>D</b>

- If necessary, enter the number of copies (up to 50).

- 5 Press **[START]**.
  - The unit will start copying.
  - If you do not press **[START]** for 15 seconds, the unit will start copying automatically.

### Note:

- Any transmittable document can be copied (page 57).

### To select the resolution

Select the desired resolution according to the type of document.

- “**FINE**”: For printed or typewritten originals with small printing.
- “**SUPER FINE**”: For originals with very small printing.
- “**PHOTO**”: For originals containing photographs, shaded drawings, etc.
  - If you select “**STANDARD**”, copying will be done using “**FINE**” mode.

### Quick scan feature

This feature is helpful when you want to copy the document, then remove it for other uses. To use this feature, activate feature #34 (page 89).

- The document will be fed into the unit and scanned into memory. The unit will then print the data.

If the document exceeds the memory capacity, copying of the exceeded document will be canceled and this feature will be turned off automatically.

### To stop copying

Press **[STOP]**.

### Note:

- The unit will store the documents into memory while collating the copies. If memory becomes full while storing, the unit will only print out the stored pages.
- After copying, the collating feature will turn off automatically.

## Recording your own greeting message

You can record your own greeting message for TAD/FAX mode. The recording time will be limited to 16 seconds. We recommend you record a message less than 12 seconds in length to make it easier to receive faxes.

**Suggested message for TAD/FAX greeting:** "This is (your name, business and/or telephone number). We are unable to answer right now. To send a fax, start transmission. To leave a message, speak after the beep. Thank you."

### Note:

- You can choose 60 seconds for your own TAD/FAX greeting message (feature #54, page 91).
  - If you change to 60 seconds, we recommend that you tell the caller in your own TAD/FAX greeting message to press \*9 before starting fax transmission.
  - If you change to 16 seconds from 60 seconds, your own TAD/FAX greeting message will be deleted. When receiving a call, the pre-recorded greeting message will be played.

  - select the desired mode using feature #77 (page 92), and
  - press **[AUTO ANSWER]** repeatedly until the desired mode is displayed.
- If you want to set TEL mode:
  - press **[AUTO ANSWER]** repeatedly until TEL mode is displayed.

---

### The other party complains that they cannot send a document.

- The unit is not in TAD/FAX or FAX ONLY mode. Select the desired mode using feature #77 and press **[AUTO ANSWER]** repeatedly until TAD/FAX or FAX ONLY mode is displayed.

---

## Copying

---

### The unit does not make a copy.

- You cannot make a copy during programming. Make the copy after programming or stop programming.
- You cannot make a copy during telephone conversation.

---

### A black line, a white line or smudge appears on the copied document.

- The glass or rollers are dirty. Clean them (page 108).

---

### The copied image is distorted.

- The thermal head is dirty. Clean it (page 109).

---

### The printing quality is poor.

#### Note:

Please do not reuse the ink film!

Please use genuine Panasonic replacement film. Refer to page 10 for further details.

- Some paper has instructions recommending which side to print on. Try turning the paper over.
- You may have used paper with a cotton and/or fiber content that is over 20%, such as letterhead or resume paper. We recommend smooth paper such as “Hammermill Jet Print” for clearer printing.

# Frequently Asked Questions

---

## Answering device

---

### I cannot retrieve recorded messages from a remote location.

- Press the remote operation ID correctly and firmly (page 77).

### Messages in the mailbox do not play back.

- The mailbox password is wrong. Enter the correct password.
  - For mailbox 1 password, see feature #51 (page 91).
  - For mailbox 2 password, see feature #52 (page 91).

### The other party complains that they cannot leave a voice message.

- The memory is full. Erase unnecessary messages (page 75, 76, 81).

### While operating the answering device from the handset, the remote operation stops and the unit starts to ring.

- Someone is calling you from outside. Press **[TALK]** or **[SP-PHONE]** to answer the outside call.

### I cannot operate the answering device with the handset.

- Someone is operating the answering device.
- You are too far from the base unit. Move closer to the base unit.

## If a power failure occurs

- The unit will not function.
- The unit is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services.
- Fax transmission and reception will be interrupted.
- If the delayed transmission (feature #25, page 89) is programmed and the start time is passed during a power failure, transmission will be attempted soon after power is restored.
- If any fax documents are stored in the memory, they will be lost. When power is restored, a power down report will be printed out stating which contents in the memory have been erased.

## Paper specifications

Recording paper size: Letter: 216 mm × 279 mm (8<sup>1</sup>/<sub>2</sub>" × 11")  
Legal: 216 mm × 356 mm (8<sup>1</sup>/<sub>2</sub>" × 14")  
A4: 210 mm × 297 mm (8<sup>1</sup>/<sub>4</sub>" × 11<sup>1</sup>/<sub>16</sub>" )

### Note for recording paper:

- Do not use the following types of paper:
  - Paper with a cotton and/or fiber content that is over 20%, such as letterhead paper or paper used for resumes
  - Extremely smooth or shiny paper, or paper that is highly textured
  - Coated, damaged or wrinkled paper
  - Paper with irregularities, such as tabs or staples
  - Paper which has dust, lint or oil stains
  - Paper that will melt, vaporize, discolor, scorch or emit dangerous fumes, near 200 °C (392 °F), such as vellum paper. These materials may transfer onto the fusing roller and cause damage.
  - Moist paper
- Some paper only accepts print on one side. Try using the other side of the paper if you are not happy with the print quality or if misfeeding occurs.
- For proper feeding and best print quality, we recommend using long-grained paper.
- Do not use paper of different types or thickness at the same time. This may cause a paper jam.
- Avoid double-sided printing.
- Do not use paper printed from this unit for double-sided printing with other copiers or printers. This may cause a paper jam.
- To avoid curling, do not open paper packs until you are ready to use the paper. Store unused paper in the original packaging, in a cool and dry location.

### Note:

- Any details given in these instructions are subject to change without notice.
- The pictures and illustrations in these instructions may vary slightly from the actual product.

## FCC and Other Information

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the rear of this equipment is a label that contains, among other information, a product identifier in the format US:ACJ-----.

If requested, this number must be provided to the telephone company.

- Registration No. .... (found on the rear of the unit)
- Ringer Equivalence No. (REN)  
..... (found on the rear of the unit)

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3).

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact a Factory Servicenter or other Authorized Servicer. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

This equipment is hearing aid compatible as defined by the FCC in 47 CFR Section 68.316.

When you hold the phone to your ear, noise might be heard in your Hearing Aid. Some Hearing Aids are not adequately shielded from external RF (radio frequency) energy. If noise occurs, use an optional headset accessory or the speakerphone option (if applicable) when using this phone. Consult with your audiologist or Hearing Aid manufacturer about the availability of Hearing Aids which provide adequate shielding to RF energy commonly emitted digital devices.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

**WHEN PROGRAMMING EMERGENCY NUMBERS AND (OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:**

- 1) Remain on the line and briefly explain to the dispatcher the reason for the call.
- 2) Perform such activities in the off-peak hours, such as early morning or late evenings.

The software contained in this equipment to allow user access to the network must be upgraded to recognize newly established network area codes and exchange codes as they are placed into service. Failure to upgrade the premises systems or peripheral equipment to recognize the new codes as they are established will restrict the customer and the customer's employees from gaining access to the network and to these codes.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Privacy of communications may not be ensured when using this phone.

### **CAUTION:**

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

# ***FCC and Other Information***

---

## **NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## **CAUTION:**

To comply with FCC RF exposure requirements, the base unit should be installed with its antenna located at 20 cm or more from persons and handset should be carried with the specific belt-clip provided for the handset to ensure compliance. Other non-tested belt-clips or similar body-worn accessories may not comply, therefore, should be avoided.

## Panasonic Facsimile Product Limited Warranty

### Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Sales Company (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

FAX categories	Parts	Labor
Thermal Transfer Facsimile	6 Months	6 Months
Laser Facsimile	1 (one) Year	1 (one) Year

Batteries, antennas, ink film, toner cartridge, drum unit, and ink cartridge (as may be applicable), and cosmetic parts (cabinet) are not warranted under this Limited Warranty.

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts. You must carry-in or mail-in your product during the warranty period. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for warranty service.

### Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States call 1-800-HELP-FAX (1-800-435-7329)  
For assistance in Puerto Rico call Panasonic Sales Company (787)-750-4300 or fax (787)-768-2910.

### Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor such as non Panasonic ink film, toner cartridge or drum unit, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, signal reception problems, misadjustment of consumer controls, improper maintenance, power line surge, improper voltage supply, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicer or other Authorized Servicer, or damage that is attributable to acts of God.

**THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY.** (As examples, this excludes damages for lost time, cost of having someone remove or re-install an installed unit if applicable, or travel to and from the servicer. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

# Warranty

---

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

## **PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.**

### **For product service**

- Call toll-free 1-800-HELP-FAX (1-800-435-7329) for the location of an authorized servicenter.

### **For out of warranty technical support**

- After the warranty has expired, please contact our Continued Services Technical Support Line at 1-900-555-PANA (1-900-555-7262) for support on a fee basis.

### **When you ship the product**

- Carefully pack your unit, preferably in the original carton.
- Attach a letter, detailing the symptom or problem, to the outside of the carton.
- Send the unit to an authorized servicenter, prepaid and adequately insured.
- Do not send your unit to the Panasonic Consumer Electronics Company or to any executive or regional sales office. These locations do not repair consumer products.

## Panasonic FAX ADVANTAGE PROGRAM

*Free peace of mind,  
direct from Panasonic*

**NO EXTRA COST**

- **6-month limited warranty<sup>1</sup>: parts, labor, and toll-free help line<sup>2</sup>**
- **Free replacement<sup>3</sup> and repair program**

### **The Panasonic Fax Advantage Consumer Service Program.**

Panasonic knows that if your fax machine is not up and running, neither is your business. That's why we created the Panasonic Fax Advantage Program. Included at no extra cost with the purchase of a new and unused Panasonic Fax Machine, the Fax Advantage Program can provide a free replacement unit<sup>3</sup> if your original unit is in need of repair.

#### **Here's how it works:**

1. If you have a problem with your fax that you purchased new and unused while it is covered by the period of limited warranty<sup>1</sup>, call our toll-free help-line at 1-800-HELP-FAX<sup>2</sup>.
2. Talk to one of our technical experts to diagnose your problem over the phone.
3. If repairs are necessary and you are entitled to service under the terms and conditions of the limited warranty<sup>4</sup>, we will send a refurbished replacement unit to you by UPS Ground service delivery. The shipping method is upgradable for an extra charge.

A second option available under our limited warranty is to mail-in or carry-in your fax to one of our Regional Service centers, where the unit will be repaired and returned to you.

#### **Instructions:**

If you choose to receive a replacement unit under the Fax Advantage Program, Panasonic will provide a replacement unit which will be completely refurbished, quality-tested by Panasonic technicians and individually hand-inspected before it is shipped to you. You will keep the replacement unit and send the original unit to us in the replacement unit's box. UPS will pick up the unit at no charge to you, should it be determined that you are entitled to warranty service. A proof-of-purchase must be included with the returned product. Any unit that is replaced by Panasonic and not shipped with proper proof-of-purchase by you will be subject to a minimum \$100.00 charge. The original unit must be properly packaged in the same manner as the replacement unit, utilizing the packing materials provided. Damage due to improper or inadequate packing will be charged to you as an out-of-warranty cost.

If our 1-800-HELP-FAX technicians determine that your unit may be an "out-of-box failure"<sup>5</sup>, we will attempt to provide you with a factory-new replacement unit<sup>6</sup>. You must ship a copy of your receipt with your original unit to verify that you purchased the unit within 10 days prior to your 1-800-HELP-FAX call.

#### **Requirements:**

You must give our technicians a valid credit card number (Discover, VISA, Master Card, or American Express/Optima). Product that is not returned to Panasonic by 10 business days after shipment of the replacement product will be charged to your credit card account at Panasonic's Suggested Retail Price (see dealer for details). If your original unit is not eligible for warranty service, your card will be charged for the non-warranty repair of the unit at Panasonic's current rate for parts and labor and for any shipping charges associated with this program. If you do not wish to pay out-of-warranty repair costs, you will be responsible for returning the replacement unit to Panasonic and for paying all shipping charges associated with this program including the UPS delivery of the replacement product to you, shipment of the problem unit to Panasonic, shipment of the replacement unit back to Panasonic and the return of your original unit back to you. Credit status will be verified prior to sending the replacement product.

1. See dealer for limited warranty details.
2. After the fax advantage program, contact our Continued Services Technical Support Line at 1-900-555-PANA (1-900-555-7262), for fee based technical support.
3. Replacement unit is refurbished.
4. Replacement program is only available in the 50 United States and is subject to termination at any time without advance notice.
5. "Out-of-box failure" is an inoperable unit that was purchased no more than 10 days prior to your 1-800-HELP-FAX call, and would otherwise qualify for warranty service under the terms and conditions of the limited warranty.
6. Panasonic reserves the right to send a refurbished unit.
