# Important Safety Instructions

---

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one blade wider than the other. A grounding plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the points where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Only use with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. Unplug the apparatus during lightning storms or when unused for long periods of time.
15. Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases shall be placed on the apparatus.
16. **WARNING:** To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.
17. Installation should be done only by qualified personnel and conform to all local codes.
18. Unless this unit is specifically marked as NEMA Type 3, 3R, 3S, 4, 4X, 6, or 6P enclosure, it is designed for indoor use only and it must not be installed where exposed to rain and moisture.
19. Only use installation methods and materials capable of supporting four times the maximum specified load.
20. Only use replacement parts recommended by Pelco.
21. Avoid touching the screen directly with your fingers as the oils from your skin may be difficult to remove from the screen.
22. Do not apply direct pressure on the screen.
23. Keep the monitor in a dust-free environment and away from strong electromagnetic fields.
24. Do not use attachments, such as mounts, that are not recommended by Pelco. They may be hazardous.
25. Do not place the monitor on an unstable stand, bracket, or mount. The unit may fall, causing serious damage to the unit or injury to a person. Only use mounts recommended by Pelco.
26. A CCC-approved power cord must be used to power this equipment when used in China.
27. A still image displayed too long may cause permanent damage to the plasma panel. Watching the monitor in 4:3 format for a long time may leave traces of borders displayed on the left, right and center of the screen caused by the difference of light emission on the screen. Using a camera or a system may cause a similar effect to the screen. Damages caused by this effect are not covered by the warranty.

The product and/or manual may bear the following marks:

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit.

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying this unit

<b>CAUTION:</b>
<b>RISK OF ELECTRIC SHOCK. DO NOT OPEN.</b>

# Regulatory Notices

---

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## **RADIO AND TELEVISION INTERFERENCE**

This equipment has been tested and found to comply with the limits of a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes and Modifications not expressly approved by the manufacturer or registrant of this equipment can void your authority to operate this equipment under Federal Communications Commission's rules.

In order to maintain compliance with FCC regulations shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio and television reception.

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

# Description

The 600 Series high performance plasma monitors are designed to fit the specific needs of the security industry. The plasma monitors work well using the VGA output of a Pelco® DVR or the DVI output of an Endura™ system.

For viewing multiple cameras simultaneously in high definition quality on the plasma monitor, Pelco recommends using PMVC4 and PMVR2 multiviewers. The PMVC4 can accept up to four composite inputs while the PMVR2 can accept up to two DVI or VGA inputs. Both models can be mixed and matched and cascaded together (daisy chained) to put as many as 60 images of varying window sizes on the screen in clear HD quality. This method eliminates the need of having multiple CRTs or smaller LCD monitors in racks to monitor security video. One or two plasma monitors and a number of multiviewers can accomplish the same with less space, less energy, and more versatility.

The 600 Series plasma monitors incorporate a pixel shifting feature that optimizes the display life. Refer to *Minimizing Screen Sticking Using Pixel Shift* on page 25.

## MODELS

PMCP642	42-inch (1,067 mm) plasma monitor
PMCP650	50-inch (1,270 mm) plasma monitor
PMCP660	60-inch (1,524 mm) plasma monitor

## UNPACKING

- The display is packed in a carton with the standard accessories. Any optional accessories are packed separately.
- Due to the size and weight of the display, it is recommended that two people unpack and move the display.
- Handle the product with care to avoid breaking the glass on the front of the display. Never place the display glass face down unless it is protected with pads.
- After opening the carton, ensure the contents are complete and in good condition.

## PACKAGE CONTENTS

- 1 42-, 50-, or 60-inch monitor with attached stand (removable)
- 1 US standard power cord
- 1 EU standard power cord
- 1 VGA cable with 15-pin D-sub connection
- 1 DVI cable
- 1 Remote control unit
- 2 AAA batteries
- 1 Installation/Operation manual

Figure 1. Parts List Illustration

# Installation

The monitor can be placed on any flat surface (desk or table), or it can be wall mounted. You can remove the desktop stand by removing the screws that secure it to the monitor.

**NOTE:** Only use a recommended wall mount kit, such as the PMCP-WM, PMCP-WMT, or PMCP-WM60. To wall-mount the monitor, follow the instructions supplied with the optional mount kit. Refer to manual C2230M for the wall mount kit instructions.

## DESKTOP STAND

You can remove the desktop stand by removing the screws.

## REAR PANEL CONNECTORS

**NOTE:** There is a slight difference in the location of external speaker jacks on the 600 Series models.

Figure 2. Rear Panel Connectors

1. **External Speaker Output:** Line-out connections to a pair of amplified speakers or amplifier.
2. **RS-232 Connector:** For authorized service use.
3. **DVI Input:** Connection to digital video signals from a computer or any Pelco device with DVI output, especially PMVC4 and PMVR2 multiviewers.
4. **RGB (VGA) Input:** Connection to RGB (VGA) output of a computer or any Pelco device with VGA output, especially PMVC4 and PMVR2 multiviewers.
5. **Component Video Input:** Auto-detecting component video inputs (Y/Pb/Pr or Y/Cb/Cr) for connecting to the component output jacks of a DVD player.
6. **S-Video Input:** Connection of S-Video signals from external sources such as VCRs or DVD players.
7. **Monitor Output:** Looping output from video inputs.
8. **Video Input:** Connection to the video and audio output of an external device, such as a matrix, switcher, camera, or DVR.
9. **Video1/Video 2:** Input connections from DVD players or time-lapse VCRs.
10. **AC Power Connection:** Connection to a 100-240 VAC, 50/60 Hz power source.

**NOTES:**

- The monitors include internal speakers.
- RGB is also referred to as VGA or PC connector in the video security market. We use the term RGB in this manual. The RGB connector is a D-sub 15-pin female plug. RGB is analog but provides a clear, sharp picture. It can carry either standard or HDTV formats.
- Component video input is not commonly used in the video security industry. It uses three RCA cables: red, green, and blue for better color separation and a superior picture over composite. Component is an analog format that can carry standard and high-definition video and is most commonly found on DVD players.
- DVI (Digital Video Interface) provides the best picture. It is used in Pelco products such as Endura, PMVR2, PMVC4, PL outputs, DVD players, and satellite boxes. Since the signal received and monitor are both digital, no conversion occurs to degrade the signal. Pelco recommends using multiviewers (PMVR2, PMVC4) with the 600 Series monitors using DVI. DVI can carry either standard or HDTV formats.

# VIDEO AND AUDIO CONNECTIONS

## CONNECTING S-VIDEO INPUT

Refer to Figure 3. To use S-Video input, do the following:

1. Connect the external device's S-Video (4-pin DIN) connector to the monitor's S-VIDEO INPUT connector.
2. Connect the device's red (R) and white (L) audio jacks to the monitor's R and L audio-in jacks of the Video Input.

Figure 3. Connecting S-Video Input

## CONNECTING COMPONENT VIDEO INPUT

Refer to Figure 4. To use component video input, do the following:

1. Connect the external device's green jack (labeled Y) to the monitor's green Y jack.
2. Connect the device's red jack (labeled Pr) to the monitor's red Pr/Cr jack.
3. Connect the device's blue jack (labeled Pb) to the monitor's blue Pb/Cb jack.
4. Connect the device's red (R) and white (L) audio jacks to the monitor's R and L audio-in jacks.

Figure 4. Connecting Component Video Input

## CONNECTING VIDEO INPUT

Refer to Figure 5. To use video input, do the following:

1. Connect the external device's jack to the monitor's VIDEO INPUT jack.
2. Connect the device's red (R) and white (L) audio jacks to the monitor's R and L audio-in jacks of the Video Input.

**Figure 5.** Connecting Video Input

## CONNECTING MONITOR OUTPUT

Refer to Figure 6. To use monitor output, do the following:

1. Connect the jack from the DVR or VCR (for recording) or audio system to the monitor's MONITOR OUTPUT jack.
2. Connect the device's audio jack to the monitor's R and L audio-in jacks located next to the VIDEO connector.

**Figure 6.** Connecting Monitor Output

## CONNECTING DVI INPUT

Refer to Figure 7. To use DVI (Digital Video Interface) input, do the following:

1. Connect the DVI-jack of the Pelco multiviewer, Endura, or computer to the monitor's DVI input jack.
2. Connect the device's red (R) and white (L) audio jacks to the monitor's R and L audio-in jacks located next to the DVI connector. Audio might be used with DVD players or PCs.

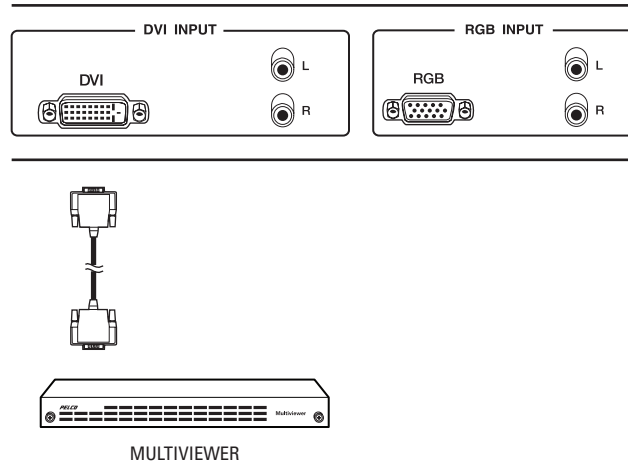

Figure 7. Connecting DVI Input

## CONNECTING EXTERNAL AMPLIFIED SPEAKERS

Refer to Figure 8. You can connect this monitor to an external set of amplified speakers using the EXTERNAL SPEAKER OUTPUT (L/R) jacks located on the back of the monitor. A standard size phono jack is required to plug into the L/R jacks on the monitor. These line-out connections can also be sent to an amplifier to play through a stereo or home theater system.

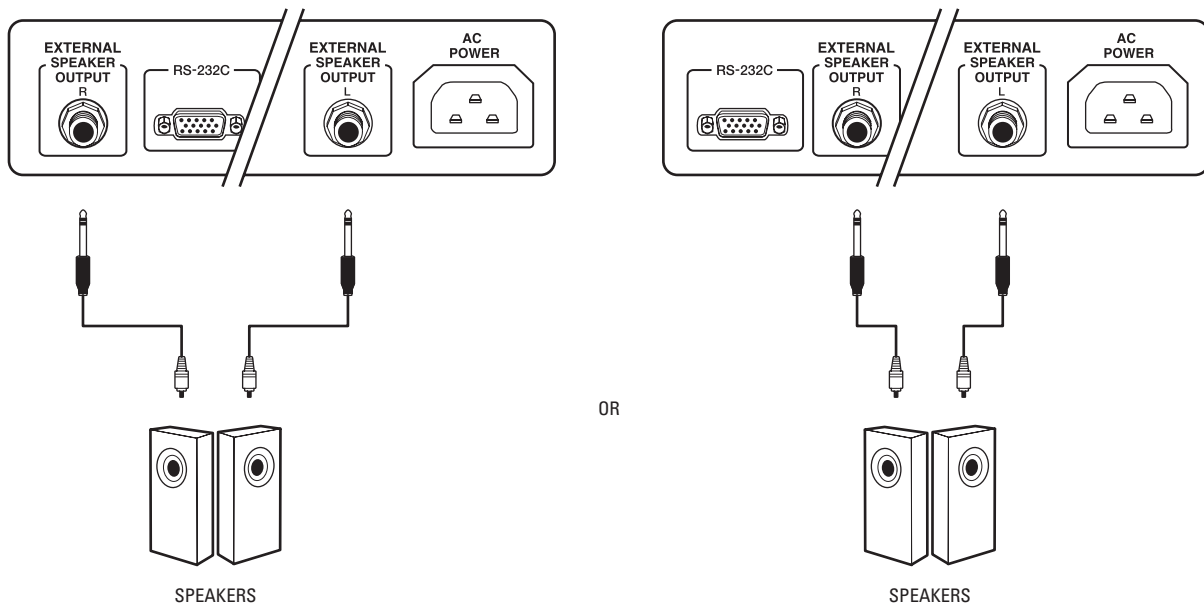

Figure 8. Connecting External Amplified Speakers

# PC CONNECTIONS

## USING RGB (VGA) OR DVI VIDEO INPUT

Refer to Figure 13.

1. Connect the PC's 15-pin D-Sub RGB (VGA) connector to the monitor's RGB-IN connector.  
If you have a PC that is equipped with a DVI, you can connect the PC DVI connector from the PC to the monitor's DVI-IN connector.
2. For either RGB (VGA) or DVI, connect the PC's audio jack to the monitor's R and L (DVI/RGB) audio-in jacks.

**Figure 9.** PC Connections for VGA or DVI

## CONNECT POWER

Plug the provided power cord into the AC IN connection on the back panel. Plug the other end of the cord into a power receptacle.

## SETTING UP YOUR DISPLAY USING PLUG AND PLAY

This display adheres to the VESA® plug and play standard to eliminate complicated and time-consuming monitor setup. This monitor identifies itself to the computer and automatically sends the PC its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols.

## SETTING UP YOUR PC IN WINDOWS FOR USE WITH MONITOR USING A VGA CONNECTOR

The display settings for a typical Windows®-based computer are shown below. However, the actual screen on your computer will differ depending on the Windows version and video card in the computer. The basic setup will apply in most cases even though the actual screen may look different from the example below.

1. Go to the Windows' Control Panel by clicking START/SETTINGS/CONTROL PANEL. The system displays the Control Panel window.
2. Select the DISPLAY icon from this window. The system displays the Display Properties dialog box (refer to Figure 10).

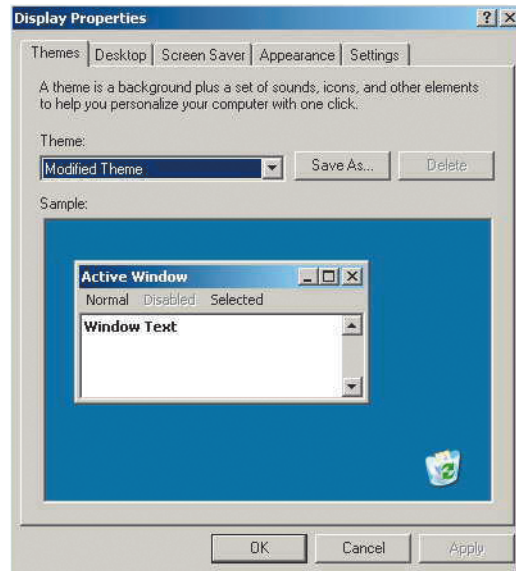

Figure 10. Display Properties Dialog Box

3. Select the SETTINGS tab to display your computer's video output settings (refer to Figure 11).

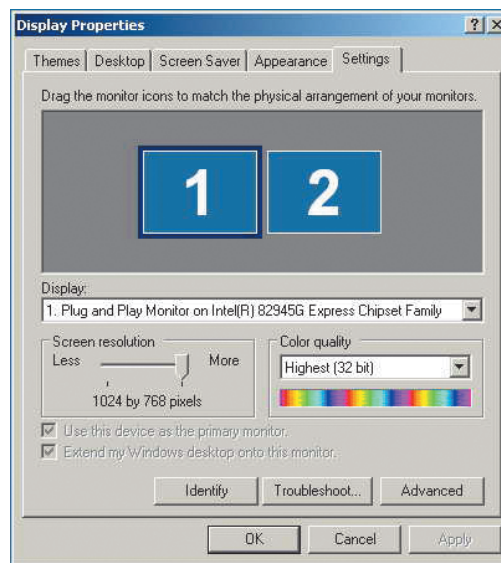

Figure 11. Settings Screen

4. Set the Screen Resolution settings to 1024 x 768 pixels. For Color Quality, select 24 Bit Color or higher (might also be expressed as 16 million colors).

5. If a vertical-frequency option is available, set the value to 60 Hz (refer to Figure 12).

**Figure 12.** Plug and Play Screen

6. Click OK to complete the setting.

**NOTE:** Both screen position and size will vary depending on the type of PC graphics card and its selected resolution.

# Operation

## FRONT PANEL CONTROLS

Figure 13. PMCP42 and PMCP50 Front Panel Controls

Figure 14. PMCP60 Front Panel Controls

The following apply to all models.

1. **INPUT:** Switches between available inputs.
2. **MENU:** Engages the OSD (on-screen display) menu.
3. **VOL:** Adjusts volume up and down. These buttons also serve as navigation and adjustment keys when the OSD menu is engaged.
4. **▲ and ▼:** Navigates through the OSD menu.
5. **(power/standby button):** Turns on/off power from standby mode. There is a waiting period between on/off cycles.
6. **(power indicator):** Indicates power status. Solid green means the power is on. Red means the display is shut off, but the power cord is plugged in. When the LED is not lit, the power cord is unplugged.
7. **(remote control signal receiver):** Receives signal. Point the remote control at this spot.

## INSTALLING REMOTE CONTROL BATTERIES

**Figure 15.** Battery Installation

Refer to Figure 15 for the following procedure.

1. Open and remove the battery cover on the back of the remote control.
2. Install two AAA size 1.5 V batteries (supplied). Match the + and – signs on the batteries to the signs on the battery compartment.
3. Close the battery cover. Make sure the lock snaps closed.

**⚠ WARNING:**

- Dispose of batteries in a designated disposal area. Do not throw batteries into a fire.
- Do not mix battery types.
- Remove dead batteries immediately to prevent battery acid from leaking into the battery compartment.
- Remove the batteries if you do not intend to use the remote control for a long period of time.

## REMOTE CONTROL FUNCTIONS

**Figure 16.** Remote Control Functions

1. **MUTE:** Turns on/off sound.
2. **POWER:** Switches the monitor from standby mode to on, and back to standby mode.
3. **LOCATE:** Selects a location for the subpicture. Available in PIP (picture-in-picture) mode only.
4. **SIZE:** Selects a size for the subpicture. Available in PIP mode only.
5. **SWAP:** Switches the main picture and subpicture. Available in PIP and PBP modes only. (PBP is picture-by-picture, which is two images of the same size side by side on the screen.)

6. **A.SWAP:** Selects audio for the main or subpicture. Available in PIP and PBP modes only.
7. **SPLIT:** Selects a PIP mode (NORMAL, PIP, PBP).
8. **S.SELECT:** Selects the main picture or subpicture. Then you can adjust the status of the selected picture. Available in PIP and PBP modes only.  
  
When in PIP or PBP mode, this button lets you put "focus" on either the subpicture (PIP) or the main picture. For example, select the subpicture. Any adjustment made to the picture will affect only the PIP.
9. **MENU:** Activates the OSD (on-screen display) menu.
10. **VOL:** Adjusts the volume up or down.
11. **▲ and ▼:** Used in the selection process when navigating menus and submenus.
12. **INPUT:** Displays the available input sources.
13. **AUTO:** Auto adjusts the image with RGB and DVI if not centered correctly.
14. **I.SIZE:** Determines whether to display the image in wide screen, zoom, 4:3, etc.
15. **FREEZE:** Freezes the screen display. The playback system will continue playing.
16. **(not in use)**
17. **RECALL:** Shows the current input and sleep timer.
18. **SLEEP:** Turns the timer on and activates the sleep timer.

**NOTE:** In Figure 16, buttons on the remote control that are not identified by a callout are disabled.

## BASIC FUNCTIONS

### POWERING ON/OFF

Make sure the monitor is plugged into the wall outlet with the supplied power cord. The STATUS LED on the control panel will glow red.

1. Press the on/off button on the front panel or the POWER button on the remote control. The monitor will turn on after a brief pause. The STATUS LED will turn green to indicate power is on.
2. Turn off the power by again pressing the on/off button on the front panel or the POWER button on the remote control.

### SELECTING SIGNAL SOURCE

1. Press the INPUT button on the front panel or the remote control.
2. Press the ▲ or ▼ button to cycle the monitor through the available input signal sources in the following order: VIDEO1>VIDEO2>VIDEO>S-VIDEO>COMPONENT>RGB>DVI (refer to Figure 17).
3. Press the VOL+ or VOL- button to select the source.

Figure 17. Main Input Menu

### ADJUSTING/MUTING VOLUME

Adjust the volume up or down using the volume button on either the remote control or the front panel.

### MUTING VOLUME USING REMOTE CONTROL

1. Press the MUTE button on the remote control to silence the audio.
2. Press the MUTE, VOL+, or VOL- button to restore the audio.

### DISPLAYING INFORMATION

Press the RECALL button to display the channel information and the setting status. Press RECALL again to exit. The displayed information can differ depending on the selected source.

## ADVANCED FUNCTIONS

### ADJUSTING PICTURE SETTINGS

You can make various picture adjustments by using the Picture Adjustment OSD menu.

1. Press the MENU button on the front panel or the remote control. The program displays the Image menu.
2. Press the ▲ button to enter the selected menu group (refer to Figure 18).
3. Press the ▼ button to select the option you want to adjust. The following menus appear depending on the input source:
  - Brightness, Contrast, Sharpness, Color, Tint, Video Defaults
  - Brightness, Contrast, Phase, Frequency, Sharpness (RGB [PC] mode), Video Defaults
4. Press the VOL+ or VOL- button to select the optimal setting (refer to Figure 19).
5. Press the MENU button to return to the previous menu.

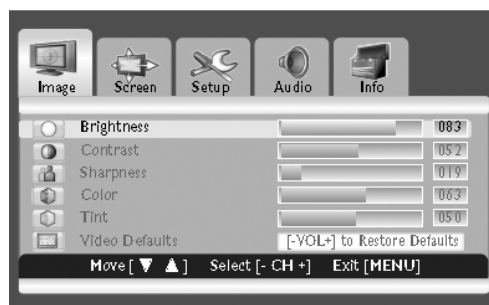

Figure 18. Picture Adjustment

Figure 19. Optimal Picture Adjustment

## RESETTING PICTURE TO FACTORY DEFAULTS

1. In the Image Menu, press the ▼ button to select Video Defaults (refer to Figure 20).
2. Press the VOL+ or VOL- button to reset the picture settings to the factory defaults.

Figure 20. Factory Default Reset

## ADJUSTING SOUND SETTINGS

You can make various sound adjustments by using the Sound Adjustment OSD menu.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Audio.
3. Press the ▼ button to enter the selected menu group (refer to Figure 21).
4. Press the ▲ or ▼ button to select the desired option: Treble>Bass>Balance.
5. Press the VOL+ or VOL- button to adjust the settings.

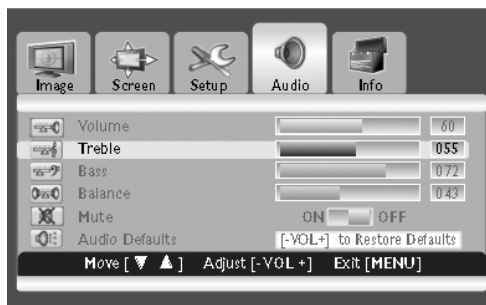

Figure 21. Sound Adjustment

## RESETTING SOUND TO FACTORY DEFAULTS

1. Press the ▼ button to select Audio Defaults.
2. Press the VOL+ or VOL- button to reset the audio settings to the factory defaults (refer to Figure 22).

Figure 22. Sound Defaults

## SELECTING LANGUAGE

The monitor has multiple OSD Menu languages built in.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Setup.
3. Press the ▼ button to enter the selected menu group (refer to Figure 23).
4. Press the VOL+ or VOL- button to select the desired language.

Figure 23. Selecting Language

## ADJUSTING COLOR TEMPERATURE

You can change the color temperature (Kelvin) of the entire screen to suit your requirements.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Setup.
3. Press the ▼ button to enter the selected menu group. Select Color Temp (refer to Figure 24).
4. Press the VOL+ or VOL- button to select the desired option: Warm>Normal (6500K)>Cool (9300K).

Figure 24. Color Temperature

## SETTING POWER SAVE MODE

The monitor has a built-in sleep timer that lets you set a time interval (10 to 180 minutes) for the monitor to turn off. (For example, a security guard who makes rounds but is not sure how long he will be gone, can set the sleep timer to go off in 10 minutes to minimize possible burn in and to save energy.)

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Setup.
3. Press the ▼ button to enter the selected menu group (refer to Figure 25).
4. Press the ▲ or ▼ button to select Sleep Timer.
5. Press the VOL+ or VOL- button to select the desired time interval.

**NOTE:** You can also select the desired time period by repeatedly pressing the SLEEP button on the remote control.

Figure 25. Power Save Mode

## MINIMIZING SCREEN STICKING USING PIXEL SHIFT

A difference in brightness can occur around dark or bright areas. This is due to deterioration in the fluorescent substance used in the plasma display if a fixed pattern is displayed for a long period of time; this is image sticking. A feature is built in to shift the pixels enough to reduce the chance of burning an image onto the screen. You can turn this feature on or off.

**NOTE:** This feature is disabled when DVI input is selected.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Screen.
3. Press the ▼ button to enter the selected menu group.
4. Press the ▲ or ▼ button to select Pixel Shift (refer to Figure 26).
5. Press the VOL+ or VOL- button to select the desired option (OFF or ON).

Figure 26. Pixel Shift

## FREEZING CURRENT PICTURE

You can freeze the picture when watching video.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Screen.
3. Press the ▼ button to enter the selected menu group (refer to Figure 27).
4. Press the ▲ or ▼ button to select Freeze.
5. Press the VOL+ or VOL- button to select the desired option (OFF or ON).

You can also freeze the current picture by pushing Freeze on the remote control. Press it again to return to normal viewing.

Figure 27. Freeze Picture

## SELECTING ON-SCREEN DISPLAY TIMEOUT

You can choose how long the OSD will be shown.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Setup.
3. Press the ▼ button to enter the selected menu group (refer to Figure 28).
4. Press the ▲ or ▼ button to select OSD Settings (5 to 20 seconds).
5. Press the VOL+ button to enter the selected menu group.
6. Press the ▲ or ▼ button to select Timeout.
7. Press the VOL+ or VOL- button until you have the desired setting.

Figure 28. Display Timeout

## ADJUSTING MENU TRANSPARENCY (OPAQUENESS)

You can give the OSD transparency background.

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Setup.
3. Press the ▼ button to enter the selected menu group (refer to Figure 29).
4. Press the ▲ or ▼ button to select OSD Settings.
5. Press the VOL+ button to enter the selected menu group. Transparency is selected.
6. Press the VOL+ or VOL- button until you have the desired setting.

Figure 29. Transparency

## CHANGING SCREEN SIZE

You can select the screen size that best corresponds to your viewing requirements.

1. Press the MENU button on the front panel or the remote control.
  2. Press the VOL+ or VOL- button to select Screen.
  3. Press the ▼ button to enter the selected menu group. Size is selected (refer to Figure 30).
  4. Press the VOL+ or VOL- button until you have the desired setting, as follows: AUTO>FILL ALL>FILL ASPECT>ZOOM>ANAMORPHIC>WIDE\* (refer to Figure 31).
- **AUTO** is the default and chooses the best setting for the selected input.
  - **FILL ALL** fills the screen completely, regardless of the aspect ratio.
  - **FILL ASPECT** puts the screen in the proper aspect ratio (4:3 or 16:9).
  - **ZOOM** enlarges the image.
  - **ANAMORPHIC** stretches a 4:3 image to fit properly on a 16:9 screen.
  - **WIDE** stretches an image with no regard to 16:9 aspect ratio. The image may turn off the screen (cropped).
- \*WIDE is not available in split screen mode.

You can also select the desired screen size by repeatedly pressing the I.SIZE (image size) button on the remote control.

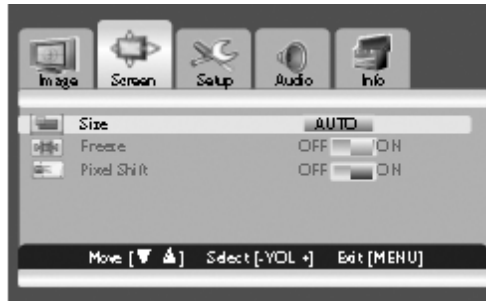

Figure 30. Screen Size

Figure 31. Size Setting

## SETTING UP RGB INPUT

### RGB Mode Preset

You can access the RGB mode preset by pressing the INPUT button, as follows:

1. Press the MENU button on the front panel or the remote control.
2. Press the VOL+ or VOL- button to select Screen.
3. Press the ▼ button to enter the selected menu group.

### Automatic Adjustment

You can adjust the PC screen automatically, as follows:

1. Press the ▲ or ▼ button to select Auto Positioning (refer to Figure 32).
2. Press the VOL+ or VOL- button. Screen quality and position are automatically adjusted.

You can also adjust the PC screen automatically by pressing the AUTO button on the remote control.

**Figure 32.** Automatic PC Adjustment

## VIEWING PIP

You can control PIP (picture-in-picture), as follows:

### Select PIP Mode

Press SPLIT on the remote control repeatedly to select the desired mode (refer to Figure 33). Available modes are displayed in the following order: NORMAL>PIP>PBP.

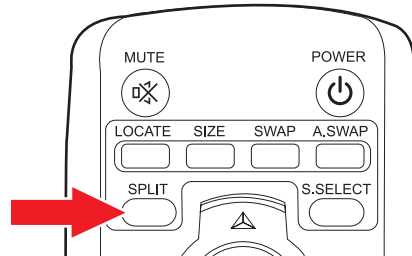

Figure 33. PIP Mode

### Select PIP Location

1. Press the LOCATE button (refer to Figure 34).
2. Press the VOL+, VOL-, ▲, or ▼ button to select the desired location (available in PIP mode only).

Figure 34. PIP Location

### Select PIP Size

1. Press the SIZE button (refer to Figure 35).
2. Press the VOL+ or VOL- button to select the desired size (available in PIP mode only).

Figure 35. PIP Size

## Swap PIP

You can swap the main picture and PIP by pressing the SWAP button (available in PIP and PBP mode only). The two pictures are interchanged.

<b>Sub \ PIP</b>	<b>VIDEO 1</b>	<b>VIDEO 2</b>	<b>VIDEO</b>	<b>S-VIDEO</b>
VIDEO 1		√	√	√
VIDEO 2	√		√	√
VIDEO	√	√		√
S-VIDEO	√	√	√	
COMPONENT				
RGB				
DVI				

## Swap Audio

You can alternate between the main or PIP audio by pressing the A.SWAP (audio swap) button. (Available in PIP and PBP mode only.)

## Select Status

You can select main or PIP to adjust their status by pressing the S.SELECT button. (Available in PIP and PBP mode only.)

## PIP Settings

<b>Sub \ PIP</b>	<b>VIDEO 1</b>	<b>VIDEO 2</b>	<b>VIDEO</b>	<b>S-VIDEO</b>
VIDEO 1		√	√	√
VIDEO 2	√		√	√
VIDEO	√	√		√
S-VIDEO	√	√	√	
COMPONENT*	√	√	√	√
RGB*	√	√	√	√
DVI*	√	√	√	√

\*Maximum: 480p, 576p, 1024 x 768/60Hz

In PIP mode, the subinput source is defined differently for the default value (Video 1 or Video 2) depending on your plasma model.

## INFORMATION

This screen displays information about Pelco headquarters.

1. Press the MENU button on the front panel or remote control.
2. Press the VOL+ or VOL- button to select Info.

**Figure 36.** Information Screen

# Maintenance

---

If the quality of the picture is poor and cannot be improved by making adjustments on the front control panel, inspect all system connections and cable runs.

 **WARNING:** To reduce the risk of electrical shock, do not remove the cover or back of the monitor. No user-serviceable parts are inside. Refer servicing to qualified personnel, or contact the Pelco Customer Service Department (1-800-289-1981) for assistance. Refer to the *Product Warranty and Return Information* located on the inside back cover of this manual.

## CLEANING

### CAUTION

Keep your hands, face, and objects away from the display's ventilation holes. The air being released through the exhaust holes is very hot and can cause burns. Placing an object near the top of the display may damage the object or the display itself.

### CLEANING THE FRONT PANEL

- Gently wipe your screen with a cleaning cloth or a soft, clean, lint-free cloth.
- If the surface is especially dirty, soak a soft, clean, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the panel to remove dirt, and then use a dry cloth of the same type to dry the panel.
- Do not scratch the surface with hard objects or use volatile substances such as insect sprays, solvents, or thinners.

### CLEANING THE CABINET

- Clean the cabinet with a soft, clean, lint-free cloth if it becomes dirty.
- If it becomes especially dirty, soak a soft, clean, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the cabinet, and then use a dry cloth of the same type to dry the cabinet.
- Do not get water or detergent on the display surface.
- Do not place anything made of rubber or PVC near the cabinet for long periods.

## TROUBLESHOOTING

### NO PICTURE IS DISPLAYED

- Possible cause: The power cord is disconnected.  
Remedy: Plug in the power cord.
- Possible cause: The selected input has no connection, or the monitor is in standby mode in RBG mode.  
Remedy: Connect a known, good video source.

### INTERFERENCE DISPLAYED ON THE MONITOR OR AUDIBLE NOISE IS HEARD

Possible cause: Caused by surrounding electrical appliances, cars/motorcycles or fluorescent lights.

Remedy: Move the monitor to another location to see if the interference is reduced.

### COLOR IS ABNORMAL

Possible cause: The signal cable is not connected properly.

Remedy: Make sure the signal cable is attached firmly to the back of the monitor, and from the source.

## **PICTURE IS DISTORED WITH ABNORMAL PATTERNS**

- Possible cause: The signal cable is not connected properly.  
Remedy: Make sure the signal cable is attached firmly to the back of the monitor, and from the source.
- Possible cause: The input signal is beyond the monitor's capabilities.  
Remedy: Check the video signal source to see if it is beyond the monitor's range. Verify the signal source's specifications with the monitor's specifications.

## **DISPLAY IMAGE DOES NOT FILL THE SCREEN COMPLETELY**

- Possible cause: Under RGB mode, the H-Size and V-Size are set incorrectly.  
Remedy: Use H-Size and V-Size to adjust the video size.
- Possible cause: Under AV1, AV2, or Component with 480i input, the 4:3 Wide mode is switched on.  
Remedy: Use the WIDE button to scroll through the various full screen modes.

## **SOUND BUT NO PICTURE**

Possible cause: Improperly connected source signal cable.

Remedy: Make sure both video inputs and sound inputs are correctly connected.

## **PICTURE BUT NO SOUND**

- Possible cause: Improperly connected source signal cable.  
Remedy: Make sure both video inputs and sound inputs are correctly connected.
- Possible cause: Volume is turned all the way down.  
Remedy: Use VOL +/- to hear sound.
- Possible cause: Mute is turned on.  
Remedy: Use the MUTE button to switch off mute.

# Supported Input Modes

## MODELS

PMCP642	42-inch (1,067 mm) plasma monitor
PMCP650	50-inch (1,270 mm) plasma monitor
PMCP660	60-inch (1,524 mm) plasma monitor

## GENERAL

Native Resolution	
PMCP642	1024 X 768; XGA
PMCP650, PMCP660	1366 X 768; WXGA
Panel Aspect Ratio	16:9
Viewing Area	
PMCP642	922 x 519 mm
PMCP650	1106 x 622 mm
PMCP660	1320 x 742 mm
Pixel Pitch	
PMCP642	0.900 x 0.676 mm
PMCP650	0.810 x 0.810 mm
PMCP660	0.966 x 0.966 mm
Brightness	
PMCP642	1200 cd/m <sup>2</sup>
PMCP650, PMCP660	1000 cd/m <sup>2</sup>
Contrast Ratio	
PMCP642, PMCP650	8000:1
PMCP660	6000:1
Panel Life	45,000 hours
Viewing Angle	<160°
Displayable Colors	16.7 million
Supported Video Formats	480i, 480p, 576p, 576i, 720p, 1080i
PIP	Selectable, sizable, moveable
Video Input/Output Interfaces	
DVI Input	1 DVI jack, 24-pin
RGB (DVI) Input	1 D-Sub jack, 15-pin
Component Input	1 RCA jack
S-Video Input	1 mini DIN jack, 4-pin
Composite Video Input/Output	1 BNC jack, looping
Video 1, 2 Input/Output	2 RCA jacks, looping
Audio Input/Output Interfaces	
Audio for DVI Input	1 RCA jack
Audio for RGB Input	1 RCA jack
Speakers	2 internal; 2 external jacks
Front Panel Controls	Power, input, volume, menu, selection
Indicators	Status LED (power on/standby/off)

## ELECTRICAL

Input Voltage	100-240 VAC, 50/60 Hz, internal power supply
Power Consumption	
PMCP642	350 W
PMCP650	450 W
PMCP660	610 W
Horizontal Frequency	31 kHz to 68 kHz
Vertical Frequency	25 Hz to 85 Hz
Sync Format	NTSC/PAL

## PHYSICAL

### Dimensions (without stand)

PMCP642	4.2" D x 40.5" W x 24.6" H (10.7 x 102.8 x 62.5 cm)
PMCP650	4.6" D x 47.5" W x 28.4" H (11.7 x 120.7 x 72.1 cm)
PMCP660	3.7" D x 57.2" W x 34.5" H (9.4 x 145.4 x 87.6 cm)

### Unit Weight (without stand)

PMCP642	66.1 lb (30.0 kg)
PMCP650	92.6 lb (42.0 kg)
PMCP660	149.9 lb (68.0 kg)

### Shipping Weight

PMCP642	80 lb (36 kg)
PMCP650	108 lb (49 kg)
PMCP660	172 lb (78 kg)

## ENVIRONMENTAL

Operating Temperature	32° to 104°F (0° to 40°C)
Storage Temperature	-4° to 140°F (-20° to 60°C)
Operating Humidity	20% to 80% noncondensing
Storage Humidity	10% to 90% noncondensing

## OPTIONAL ACCESSORIES

PMCP-WM	Fixed wall mount for PMCP642 and PMCP650
PMCP-WMT	Tilt wall mount for PMCP642 and PMCP650
PMCP-WM60	Fixed wall mount for PMCP660
PMVR2	Multiviewer with 2 DVI and 2 VGA inputs, VGA or DVI output
PMVC4	Multiviewer with 4 composite inputs, VGA or DVI output

## PRODUCT WARRANTY AND RETURN INFORMATION

### WARRANTY

Pelco will repair or replace, without charge, any merchandise proved defective in material or workmanship **for a period of one year** after the date of shipment.

Exceptions to this warranty are as noted below:

- Five years on FR/FT/FS Series fiber optic products and TW3000 Series unshielded twisted pair transmission products.
- Three years on Spectra® IV products.
- Three years on Genex® Series products (multiplexers, server, and keyboard).
- Three years on Camclosure® and fixed camera models, except the CC3701H-2, CC3701H-2X, CC3751H-2, CC3651H-2X, MC3651H-2, and MC3651H-2X camera models, which have a five-year warranty.
- Three years on PMCL200/300/400 Series LCD monitors.
- Two years on standard motorized or fixed focal length lenses.
- Two years on Legacy®, CM6700/CM6800/CM9700 Series matrix, and DF5/DF8 Series fixed dome products.
- Two years on Spectra III™, Esprit™, ExSite™, and PS20 scanners, including when used in continuous motion applications.
- Two years on Esprit and WW5700 Series window wiper (excluding wiper blades).
- Two years (except lamp and color wheel) on Digital Light Processing (DLP®) displays. The lamp and color wheel will be covered for a period of 90 days. The air filter is not covered under warranty.
- Eighteen months on DX Series digital video recorders, NVR300 Series network video recorders, and Endura™ Series distributed network-based video products.
- One year (except video heads) on video cassette recorders (VCRs). Video heads will be covered for a period of six months.
- Six months on all pan and tilts, scanners or preset lenses used in continuous motion applications (that is, preset scan, tour and auto scan modes).

Pelco will warrant all replacement parts and repairs for 90 days from the date of Pelco shipment. All goods requiring warranty repair shall be sent freight prepaid to Pelco, Clovis, California. Repairs made necessary by reason of misuse, alteration, normal wear, or accident are not covered under this warranty.

Pelco assumes no risk and shall be subject to no liability for damages or loss resulting from the specific use or application made of the Products. Pelco's liability for any claim, whether based on breach of contract, negligence, infringement of any rights of any party or product liability, relating to the Products shall not exceed the price paid by the Dealer to Pelco for such Products. In no event will Pelco be liable for any special, incidental or consequential damages (including loss of use, loss of profit and claims of third parties) however caused, whether by the negligence of Pelco or otherwise.

The above warranty provides the Dealer with specific legal rights. The Dealer may also have additional rights, which are subject to variation from state to state.

If a warranty repair is required, the Dealer must contact Pelco at (800) 289-9100 or (559) 292-1981 to obtain a Repair Authorization number (RA), and provide the following information:

1. Model and serial number
2. Date of shipment, P.O. number, Sales Order number, or Pelco invoice number
3. Details of the defect or problem

If there is a dispute regarding the warranty of a product which does not fall under the warranty conditions stated above, please include a written explanation with the product when returned.

Method of return shipment shall be the same or equal to the method by which the item was received by Pelco.

### RETURNS

In order to expedite parts returned to the factory for repair or credit, please call the factory at (800) 289-9100 or (559) 292-1981 to obtain an authorization number (CA number if returned for credit, and RA number if returned for repair).

All merchandise returned for credit may be subject to a 20% restocking and refurbishing charge.

Goods returned for repair or credit should be clearly identified with the assigned CA or RA number and freight should be prepaid. Ship to the appropriate address below.

*If you are located within the continental U.S., Alaska, Hawaii or Puerto Rico, send goods to:*

Service Department  
Pelco  
3500 Pelco Way  
Clovis, CA 93612-5699

*If you are located outside the continental U.S., Alaska, Hawaii or Puerto Rico and are instructed to return goods to the USA, you may do one of the following:*

If the goods are to be sent by a COURIER SERVICE, send the goods to:

Pelco  
3500 Pelco Way  
Clovis, CA 93612-5699 USA

If the goods are to be sent by a FREIGHT FORWARDER, send the goods to:

Pelco c/o Expeditors  
473 Eccles Avenue  
South San Francisco, CA 94080 USA  
Phone: 650-737-1700  
Fax: 650-737-0933

 The materials used in the manufacture of this document and its components are compliant to the requirements of Directive 2002/95/EC.

This equipment contains electrical or electronic components that must be recycled properly to comply with Directive 2002/96/EC of the European Union regarding the disposal of waste electrical and electronic equipment (WEEE). Contact your local dealer for procedures for recycling this equipment.
