Safety precautions

▲ CAUTION

To prevent injury or fire, Please take the following precautions:

- Do not operate when driving.
- Be sure to store the liquid crystal panel inside the main unit when parking the car outdoors for long time.
 - To prevent electric, etc., Please do not let the metal goods (silver, coin, tools...) fall into the installation.
 - If you smell or see smoke, turn off the power immediately and consult our dealer.
- Be careful not to drop or shock the unit strongly.
- Do not touch the liquid crystal to avoid the life hurt. If the clothes is stained with it, Please clean it immediately by soap.
- In extremely cold weather, the display movement may slow down and the display may darken, but this is not a malfunction. Then display will work normally when the temperature increases.

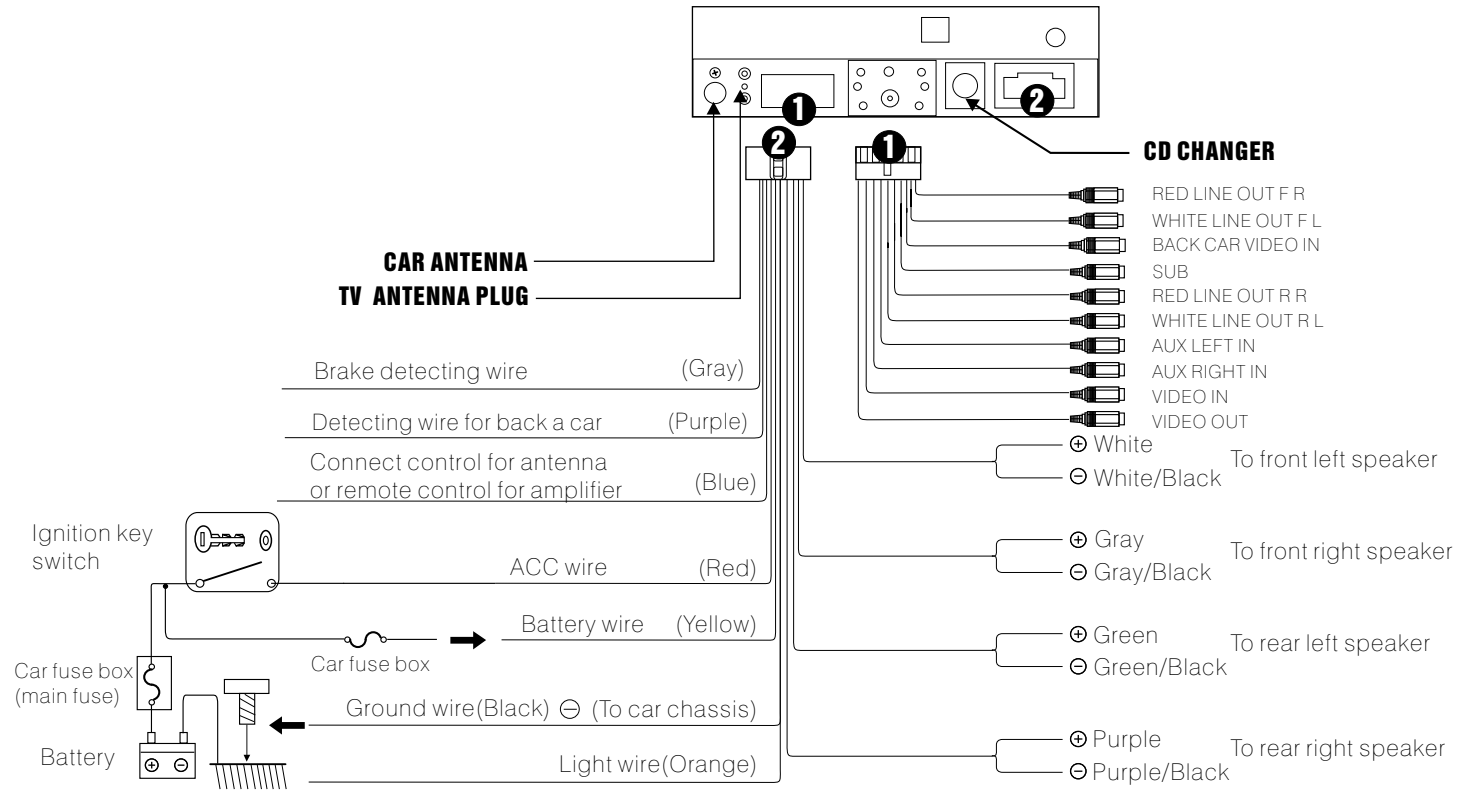

▲ WARNING

To prevent damage to the machine, take the following precautions:

- Be sure the unit is connected to a 12V DC power with a Negative Ground.
- Do not install the unit in places where it is exposed to direct sunlight, high heat or humidity, water splash or dust.
 - To change fuse, please use the same one in specification and capacity.
- When changing fuse, please do it after pulling down power wires to avoid short circuit.
- Do not place anything on the display when then panel is tilted.
- If the unit seems not work properly press the reset button to reset the memory of the unit.

Electric Connection

Installation

- Before installing the receiver permanently, fit it in the approximate place in your car, and connect the equipment according to the speakers and electrical connections. When your system is operated properly, (preferably with the car engine running), follow the instructions for permanent installation of your system.

INSTALL THE UNIT

- 1) Install half sleeve, can be with or without adapter. It will fit better with adapter.
- 2) Bend over some tabs to secure the half sleeve inside of dash.
- 3) Support strap to be strutted under dash, secure this strip to avoid skipping of disc.

REMOVE THE UNIT

- Insert removal wrench into the small gap on the right side of the unit and pull the unit slightly out on the same side, then release the wrench. Repeat the same action for the left side. By now, you can remove the unit and unplug the wires connector.
