

## PHILIPS Kala 6822 extra handset

With outstanding talk and standby times PHILIPS Kala 6822 is an extremely easy to use DECT / GAP digital cordless phone. Its elegant, ergonomic design is enhanced by many benefits such as the large numeric display with icons, 10 memory speed dials, last number redial and adjustable audio volumes. If the main telephone is equipped with a loudspeaker or answerphone, then the extra handset also has access to these practical features.

### The PHILIPS Kala 6822 main features

Message  
Loudspeaker

#### Package contents

Handset  
Charger  
2 AA/R6 NiCd batteries  
Power block and cord  
User manual

**Radio RF power** < 250 mW

\* Quoted talk and standby times with 2 AA/LR6 600 mAh NiCd batteries

\*\* The quoted range is under ideal conditions, i.e. with no obstacles between the base and handset.

The range of DECT cordless telephones depends on:

- the environment in which the base station is located: thick walls, metallic window frames etc. near the base will reduce the phone's range
- the presence of obstacles between the base station and handset: for example, when using a handset in the garden with the base station inside the house, the range may be reduced by the exterior wall of the house.

Availability in individual countries depends on approval by the relevant authorities. Data subject to alteration without notice.

*Let's make things better.*
