- **Temperature range (storage):** -20°C to 60°C

### Power

- **Power consumption:** (System on and battery charging) 12 W
- **Operating time on battery:** 0.8 hr
- **Battery LED indicator:** Charging - Amber, Not charging - Off
- **Power LED indicator:** Operation - green
- **Power mode supported:** AC powered, Battery powered

7FFIM4/05

## Product highlights

### High pixel density display

The very best high density screen in the industry displays 88 percent more pixels per square inch than even a high end 17-inch LCD monitor – showing off your treasured photos with the same 'real life' rich detail and vibrant colours as high quality prints.

### Rich, vibrant colours

Full colour display brings out the best in your photos with vibrant, real life colours by displaying the same full range of colours found in professionally printed photos.

### Quality design and materials

High quality design and exquisite materials include a solid stylish stand, designer frame and detailed finishing that convey an impression of value and refined taste, adding lustre to the photos displayed on PhotoFrame.

### Award-winning design

Prestigious international organisations select outstanding products for design awards; Philips display devices regularly win such awards including the iF, Good Design Award and Red Dot Design Award etc.

### Interchangeable frames

A selection of interchangeable frames that snap onto your PhotoFrame fits your personal taste and compliments your home or office decor.

### Memory card slots

Two memory card readers are built-in for easy viewing and sharing of photos stored in memory cards. One memory card slot accepts Compact Flash I (CF) cards while the second accommodates Memory Stick (MS), SD Card and Multi Media Cards (MMC).

### Easy USB connectivity

A USB connector is built into the device for easy and quick downloading photos from a PC.

### Create slideshows

A slideshow is a collection of images arranged in sequence for presenting to an audience. Pressing the button and selecting the slideshow function automatically displays all photos stored on your PhotoFrame page-by-page.

### Multiple viewing modes

Flexible display modes give you the freedom to display your photos one image at a time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.

### Run on built-in battery or AC

AC or onboard battery power give you the choices of operating your PhotoFrame on standard AC power or cordlessly with the onboard rechargeable battery.

### On-off timer

A built-in clock turns your PhotoFrame™ on or off at times you select.
