

# Ceramalux® Instant Restrike High Pressure Sodium Lamps

***Ideal for security lighting,  
roadway lighting, warehouse lighting,  
and industrial applications***

- ▶ **Extra Arc Tube Offers Light Instantly After Momentary Power Interruption and will Provide 80% Light Output within 1–2 Minutes**
- ▶ **Rated Average Life 24,000+ Hours<sup>1</sup>**
- ▶ **For Applications where Instant Restrike is Not Required, Rated Average Life is 40,000 Hours**
- ▶ **Operates on Standard HPS Ballasts and Auxiliary Equipments**

1) Rated average life is the life obtained, on the average, from large representative groups of lamps in laboratory tests under controlled conditions at 10 or more operating hours per start. It is based on survival of at least 67% of the lamps and allows for individual lamps or groups of lamps to vary considerably from the average.

# PHILIPS

- 1) Rated average life is the life obtained, on the average, from large representative groups of lamps in laboratory tests under controlled conditions at 10 or more operating hours per start. It is based on survival of at least 67% of the lamps and allows for individual lamps or groups of lamps to vary considerably from the average.  
 2) Measured at 100 hrs. life. Approximate lumen values listed are for vertical and horizontal operation of the lamp.  
 3) Approximate lumen output at 40% of lamp rated average life.

### WARNINGS, CAUTIONS AND OPERATING INSTRUCTIONS for Ceramalux® High Pressure Sodium Lamps

#### Warnings, Cautions and Operating Instructions

**WARNING:** These lamps must be operated in fixtures designed for use with High Pressure Sodium lamps. The fixture wattage rating must match the wattage indicated on the outer glass bulb. Do not scratch the outer bulb or subject it to pressure as this could cause the outer bulb to crack or shatter. A partial vacuum in the outer bulb may cause glass to fly if the glass is struck. Operating the lamp improperly may result in **PERSONAL INJURY, PROPERTY DAMAGE, BURNS AND FIRE.**

1. If the outer glass bulb is broken, shut off power immediately and remove the lamp after it has cooled.

- Use only auxiliary equipment meeting Philips and/or ANSI standards. Use within voltage limits recommended by ballast manufacturer:
  - Operate lamp only within specified limits of operation.
  - For total supply load refer to ballast manufacturers electrical data.
- Protect lamp base, socket and wiring against moisture, corrosive atmospheres and excessive heat.
- Replace the lamp if the outer glass bulb has been scratched, cracked or damaged in any way.
- If a lamp bulb support is used, be sure to insulate the support electrically so as to avoid possible decomposition of the bulb glass.

- Do not use this lamp in a fixture which redirects a substantial portion of the energy toward the arc tube and its immediate vicinity, as this may lead to very early lamp failure.
- Take care in handling and disposing of lamps. If arc tube is broken, avoid skin contact with any of the contents or fragments.
- The arc tube of this lamp contains sodium and mercury. Dispose of in accordance with federal, state and local requirements.
