Smart Travel Charger

OWNER'S MANUAL — Please read before using this equipment.

Your RadioShack Smart Travel Charger gives you some of the finest features in cellular phone battery chargers. Its short circuit and overload protection ensure reliable performance, and its slim shape and lightweight body make it easy to carry wherever you go.

Its features also include:

100–240 VAC Wide AC Input Range — lets you charge a battery from any AC power source worldwide. Great for traveling!

12–24 VDC Wide DC Input Range — lets you charge the battery in either a car or large truck with a 24V DC system. Switches from 12V DC to 24V DC automatically.

Over-charge Protection — when the battery is fully charged, the charger automatically switches to trickle charging to avoid overcharging.

Convertible Charging Outlet and Cables — let you easily charge your cellular phone at home or on the road.

Power Indicator — lights when the power source is connected.

CELLULAR PHONE BATTERIES

The charger is designed for use with the following cellular phone batteries.

Motorola	Nokia
StarTAC series	5100 Series
V3620	6100 Series
L7089	7100 Series
P8090	8022 Series
	8800 Series

See "Specifications" on Page 2 for a list of other phones' charging cables that can be used with this charger.

CONNECTIONS

Connecting AC Power (100–240 VAC)

To charge the battery using AC power, connect the supplied AC cord's small plug to the charger's **AC INPUT** socket, then connect the AC cord's larger end to a standard AC outlet. The green power indicator lights.

Note: The supplied AC cord's two-bladed plug is suitable in the USA and Canada. For use in other countries, your local RadioShack store offers a variety of adapters.

Connecting Vehicle Power (12–24 VDC)

To charge the battery using a vehicle's DC power, connect the supplied DC cord's barrel plug to the charger's **DC INPUT** socket, then connect the DC cord's cigarette-lighter plug to the vehicle's cigarette-lighter socket. The green power indicator lights.

Note: The adapter automatically adjusts for 12V or 24V systems.

Connecting a Motorola Rechargeable Battery

If your cellular phone is a Motorola StarTAC model, connect the supplied flat-plug cable labeled **FOR MOTOROLA STARTAC** to the cellular phone's battery charging socket, then connect the cable's RJ11 plug to the charger's **TO PHONE** socket.

Connecting a Nokia Rechargeable Battery

If your cellular phone is a Nokia model, connect the supplied barrel-plug cable labeled **FOR NOKIA 5110/6110** to the cellular phone's battery charging socket, then connect the cable's RJ11 plug to the charger's **TO PHONE** socket.

CHARGING THE BATTERY

When the connection is completed, the charger starts charging the battery. Consult your cellular phone's owner's manual for directions regarding your specific phone and how to tell when it is charged.

REPLACING THE DC POWER CORD'S FUSE

Your charger's DC power cord's cigarette lighter plug uses a 1.5A 250V fast-blow fuse to protect the charger from being damaged due to overload. The fuse blows when the load current exceeds 1.5 Amp. Should this happen, replace the fuse with the same type fuse (available at your local RadioShack store).

Important: If you are using a DC power cord other than the supplied one, be sure the cigarette-lighter plug has a protective fuse with the same specifications and polarity.

SPECIFICATIONS

Charging Current .... 0.8A Maximum

Life Test .... 5,000 Hours

Application .... Charges selected Motorola and Nokia Rechargeable Batteries (see "Cellular Phone Batteries" on Page 1)

Included RadioShack Charging Cables:
    Cable-V3620 .... for Motorola StarTAC/CD920/V3620/L2000/LF2000/V2088
    Cable-6120 .... for Nokia 6120/6185/5100/5190/CG-600/601

Available charging cable listed in RSU .... Audiovox 405
Ericsson CF-688, CF-738, DH-618
Ericsson CH-388, DH-318
Motorola Elite/Flare
Motorola PT950/MicroTAC
Motorola Populus
Motorola Nextel i600, IP-280, IP-370
Motorola Nextel I500
Motorola i1000
OKI 1325
Qualcomm 1920/2700
Qualcomm Q Phone
Samsung 1000/1900/1910
Samsung 2000/3500,
Samsung SGH-210/1500 and Samsung SGH811

Included Accessories .... 1AC Cord
1 DC Cigarette-Lighter Adapter
2 Charging Cables
Carrying Pouch
