TruScan Digital Reality™ Intelligent Signal Processing - "Because the Picture Intended Should be the Picture Presented"

3D Y/C Digital Frame Comb Filter

Dual HD Component Inputs (SYNCROSCAN™)

DVI Input with HDCP

Sub-Woofer Output

Virtual Dolby² with 4 Speakers (2 - 1" Tweeters, 2 - 5" Mid-Ranges)

Benefits

High definition picture tubes with color filter lenses and IntelliFocus™ Digital Auto Convergence for a bright, automatically-aligned picture.

Recognizes incoming signals & progressively converts them to achieve optimum digital picture. Automatically reverts converted film source material for best picture.

Separates the signal into separate components eliminating dot & edge crawl while providing better transitions between scene changes.

Auto-adjusting inputs allow a wide array of component compatible equipment (e.g. DVD/ Satellite) to be connected simultaneously. Helps simplify hook-up process.

DVI-HDTV allows transmission of (uncompressed digital) video signals from a set-top box to a digital TV. DVI delivers the purest digital transmission available today.

Allows powered sub-woofer to be connected directly to the TV without the need for a separate audio receiver.

Uses the TV's left & right speakers to simulate surround sound and create a "live performance" experience.
