

2005.7

Everywhere you imagine. **RENESAS**

Renesas Microcomputer
ReMarkey™
Secure Authentication Microcomputer

ReMarkey
Key to security

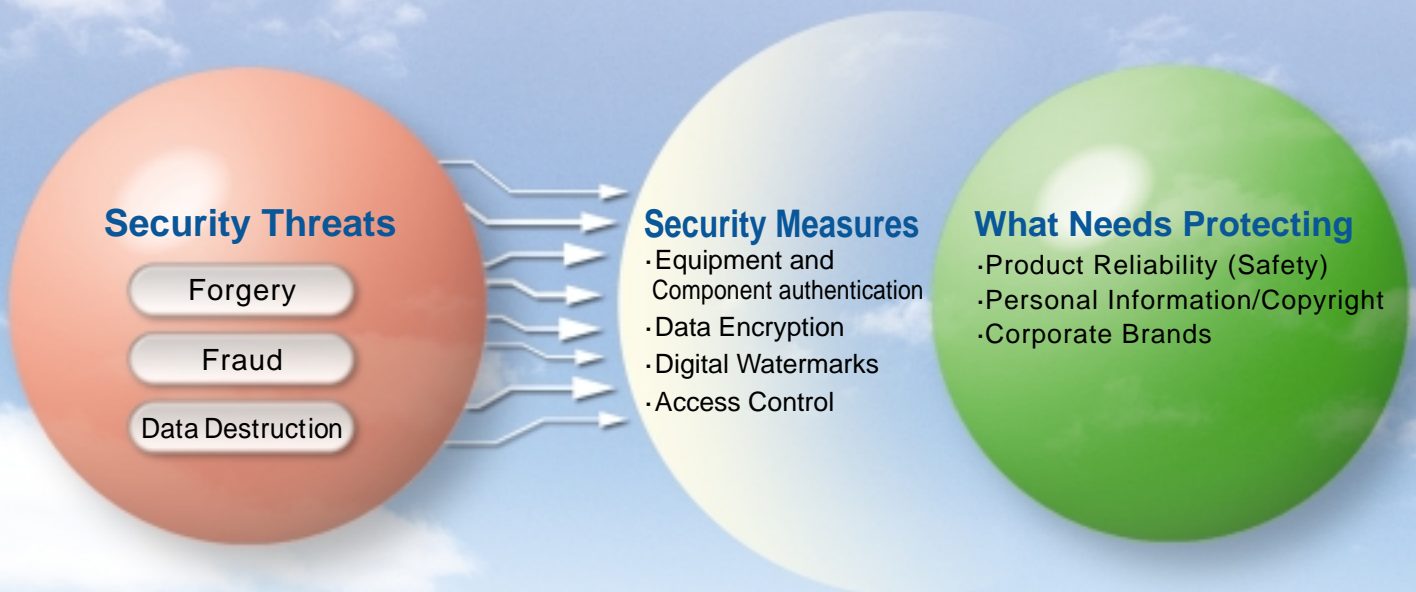

Renesas Technology
www.renesas.com

In the age of ubiquitous networking security enhances product value and corporate brand prestige.

In the age of ubiquitous networking, **everyone** is linked **everywhere, all the time.**

In a networked society, **security threats** including forgery, fraud, and data loss are numerous and varied.

Security means limiting access to **specific persons, in specific places, at specific times.**

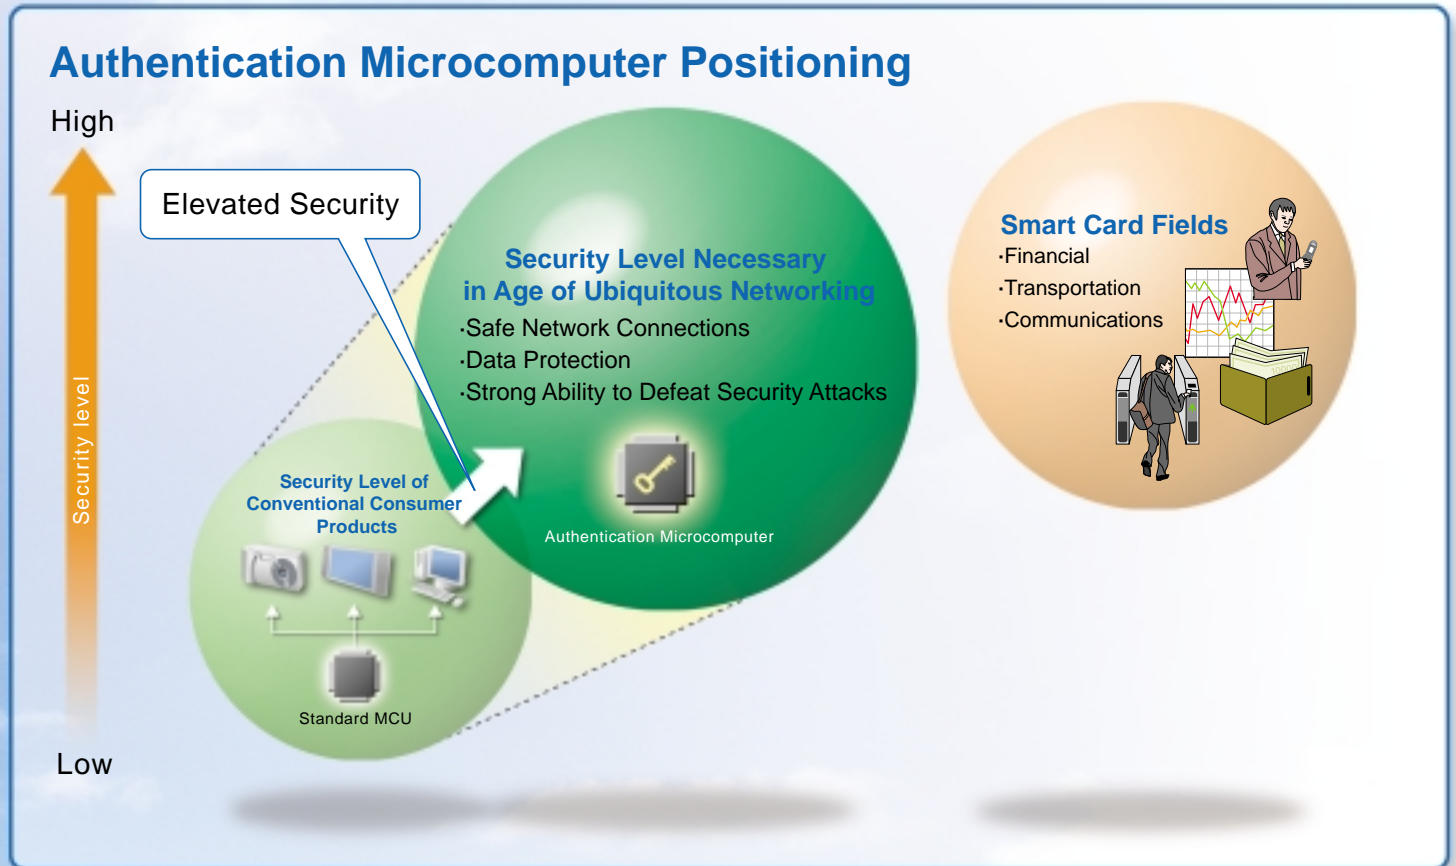

A key device for establishing corporate brand prestige

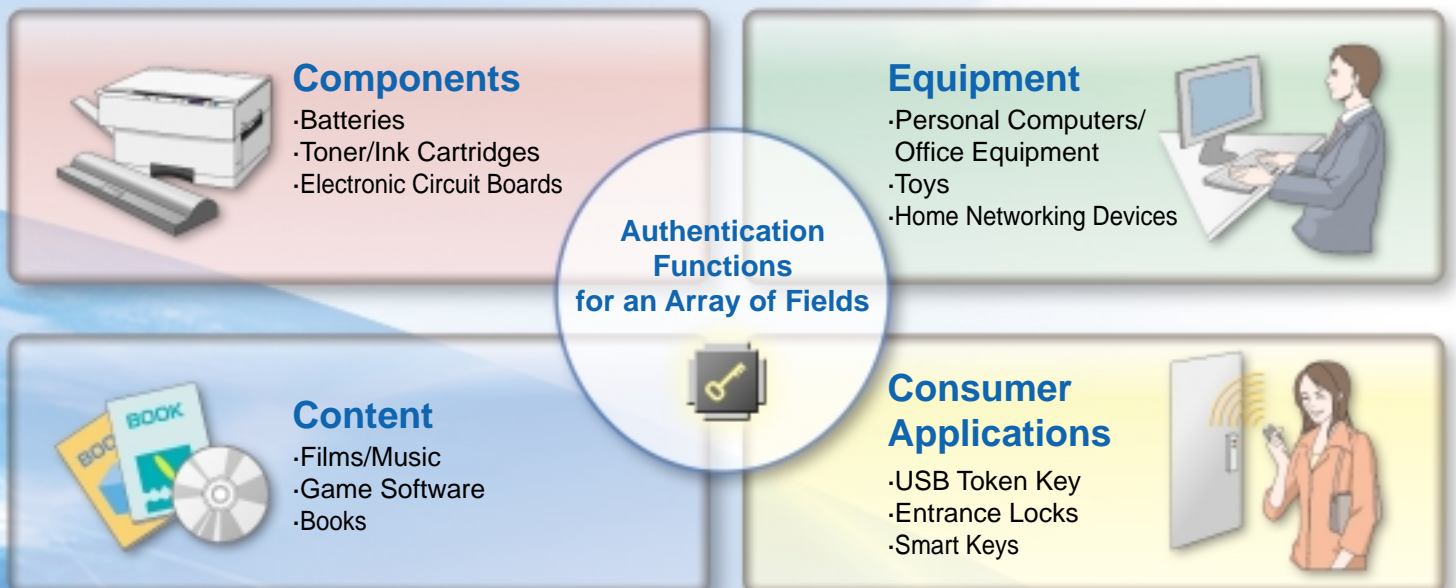

ReMarkey™

Secure Authentication Microcomputer

- Requiring authentication in order to connect makes it possible to verify the reliability of equipment and component
- Highly confidential data, such as personal information and product parameters, can be stored in encrypted form.
- Anti-tampering functions similar to those used in smart cards can be used to prevent unauthorized deciphering of data.

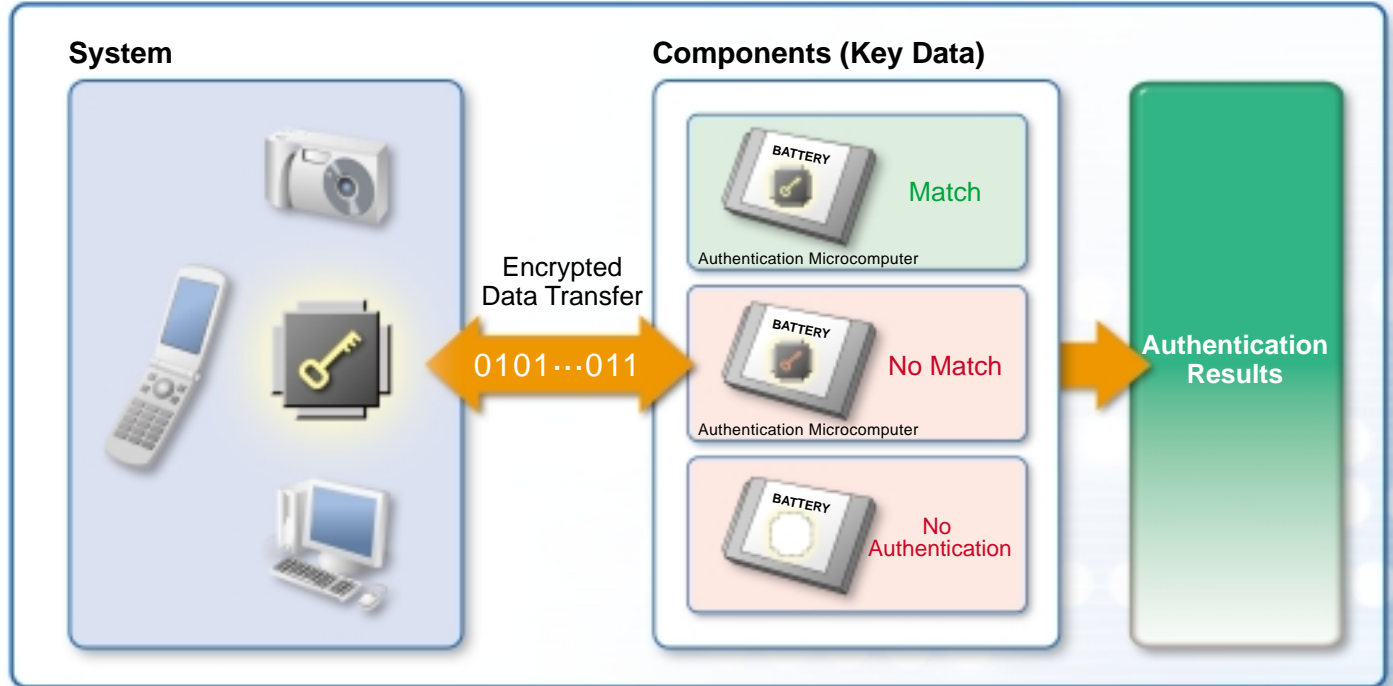

Application Fields

*ReMarkey™ is a trademark of Renesas Technology Corp. in Japan.

Authentication System Concept

- The built-in authentication microcomputer stores the matching key data and accurately transmits the authentication results.
- Security is enhanced by encrypting data transfers between the system and individual components.
- Unauthorized access is prevented by the strong anti-tampering function incorporated into the authentication microcomputer.

Features

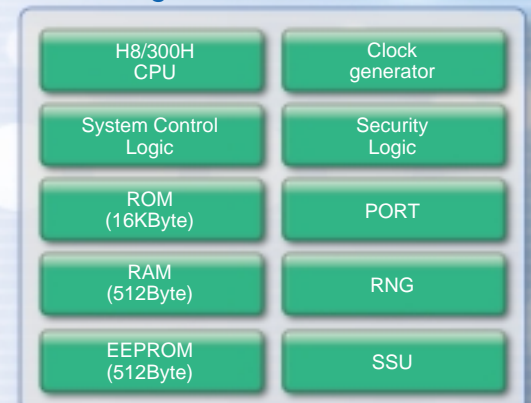

- Uses a secure communications protocol to verify the identity of devices attempting to establish a connection.
- Strong anti-tampering function prevents unauthorized access to the authentication microcomputer.
- Fast encryption processing function supports rapid data encryption and decryption.
- Built-in EEPROM non-volatile memory for storing data and programs.
- Slim security IP core for a compact package.
- A variety of encryption libraries (DES, 3DES, and MISTY public key encryption, etc.) are available.
- Support for the development of necessary software.

Product Specifications

Item	Specification
Model No.	R5H30101
CPU	H8/300H high-performance 16-bit CPU
Memory	512 B EEPROM non-volatile memory, 16KB ROM, 512B RAM
Peripheral functions	SSU, RNG, I/O ports, security
Encryption libraries	DES, 3DES, and MISTY, etc.
Power supply voltage	2.2~3.6V
Package	WSON-8 (3.00 x 4.06, 0.65 mm pitch)

Block Diagram

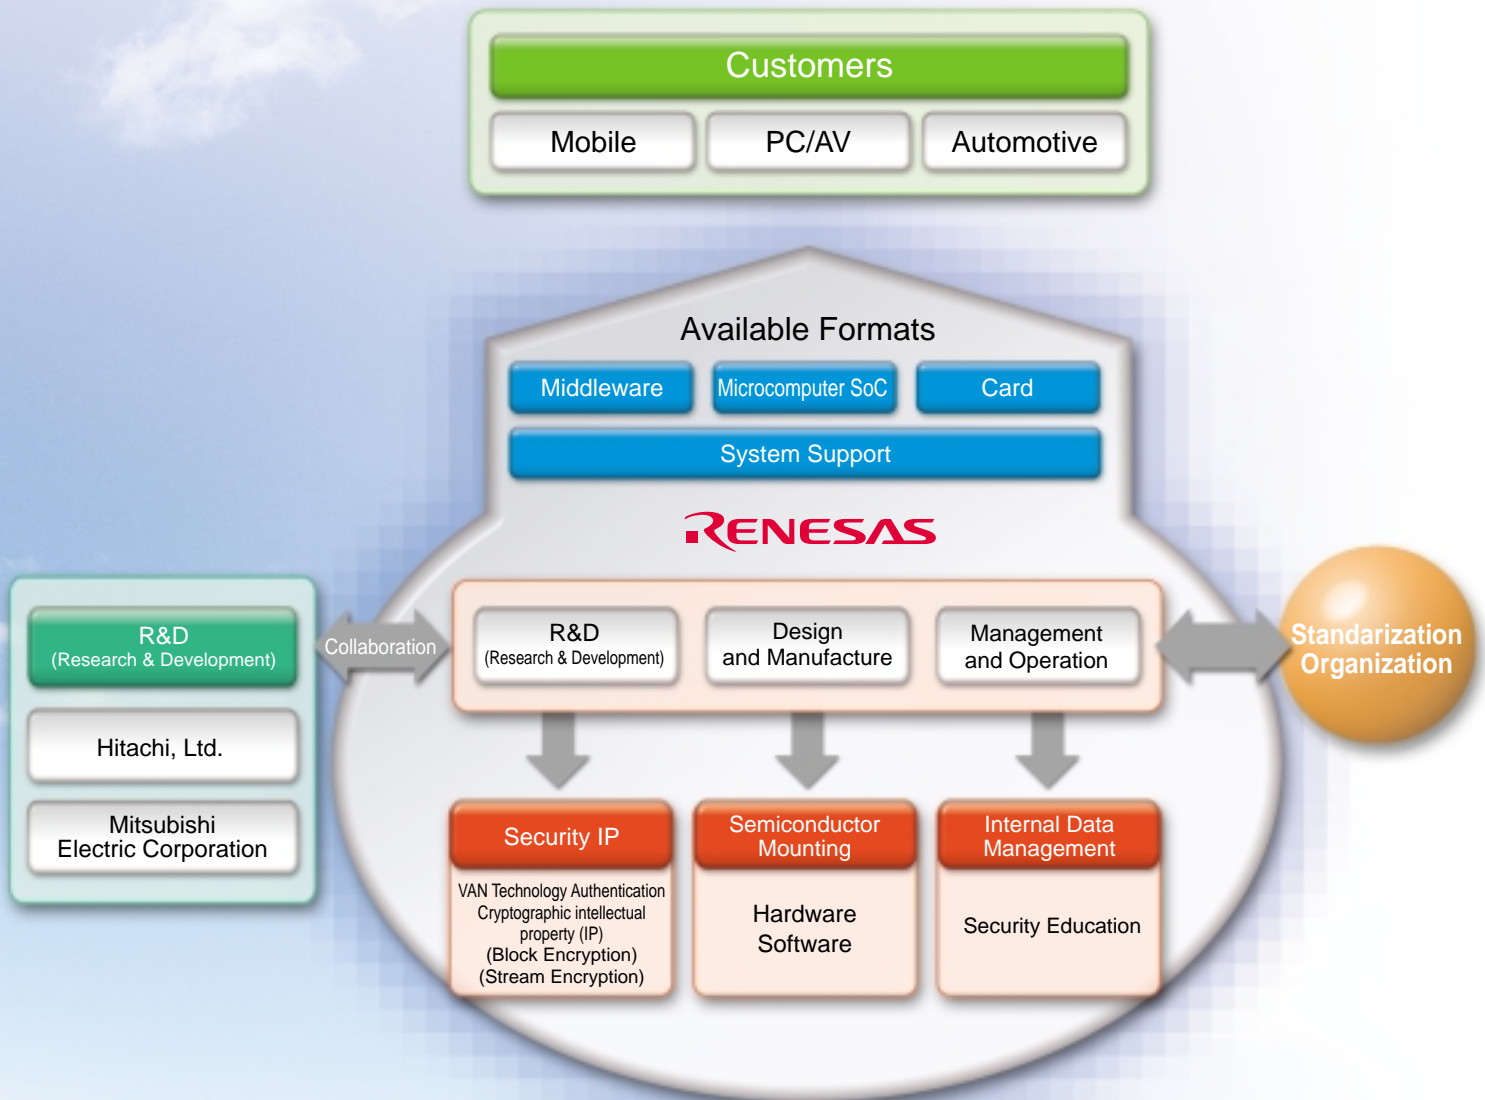

RNG: Random Number Generator
 SSU: Synchronous Serial Communication Unit
 EEPROM: Electrically Erasable and Programmable Read Only Memory

The semiconductor devices incorporated into a product form the core of its security.

Come to Renesas for security solutions.

- Implementation of security measures such as Cryptographic intellectual property (IP) by means of semiconductor chip devices.
- Developed in collaboration with the R&D labs of Hitachi and Mitsubishi Electric, both of which have an established track record in encryption technology.
- Renesas offers security solutions grounded in comprehensive and cutting-edge technological expertise.

R&D (Research & Development)

Renesas security solutions are developed jointly with the R&D labs of Hitachi, Ltd., and Mitsubishi Electric Corporation. With a positive emphasis on standardization and other key issues, this system supplies semiconductor security products that are internationally recognized for their excellence.

Abundant Security IPs

Renesas security solutions support world class encryption methods developed by the Hitachi and Mitsubishi Electric R&D labs, such as MISTY and KASUMI, as well as standards used in the United States, such as DES and AES. There is also support for network security IPs such as SSL, SSH, and IPsec.

Available in Many Formats

To provide flexible support for a wide range of user requirements, Renesas develops security solutions in a variety of hardware configurations, including ASIC, SoC, and microcomputer products. A line of middleware security products is also available.

MISTY is a trademark or registered trademark of Mitsubishi Electric Corporation. Other names of products, companies, and brands are the property of their respective owners.

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
The information described here may contain technical inaccuracies or typographical errors.
Renesas Technology Corp. assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors.
Please also pay attention to information published by Renesas Technology Corp. by various means, including the Renesas Technology Corp. Semiconductor home page (<http://www.renesas.com>).
4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
5. Renesas Technology Corp. semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
6. The prior written approval of Renesas Technology Corp. is necessary to reprint or reproduce in whole or in part these materials.
7. If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination.
Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
8. Please contact Renesas Technology Corp. for further details on these materials or the products contained therein.
