HDMI splitter basics

This Rocketfish two-way HDMI splitter will send the HDMI audio and video signals from a single source, such as a Blu-ray/DVD player or cable/satellite box, to two destinations, such as a TV and A/V receiver. It is ideal for sending the audio signals from a 3D Blu-ray player to an A/V receiver that does not support 3D video pass-thru.

Setting up your HDMI splitter

- 1 Connect one end of a high-speed HDMI cable (not included) to your video source and the other end to the **IN** port on the HDMI splitter.
- 2 Connect another high-speed HDMI cable to your HDMI splitter's **OUT 1** port to an HDTV.
- 3 Connect another high-speed HDMI cable to your HDMI splitter's **OUT 2** port to an A/V receiver.
- 4 Connect the included AC adapter from the DC jack on the HDMI splitter to a standard 110/120V AC outlet. Power on all connected devices and operate per the manufacturer's instructions.

Connecting a TV and A/V receiver to a single HDMI source

Troubleshooting

| Symptom | Possible solution |
|-----------------------|--|
| LED is not ON or lit | <ol style="list-style-type: none"> 1 Make sure that the HDMI splitter's power adapter is plugged in. 2 Make sure that the video device or TV's power cord is plugged in. |
| No video and/or audio | <ol style="list-style-type: none"> 1 Make sure that your DVD movie is original. HDMI includes HDCP copy protection, which prevents playback of illegally copied movies. 2 Make sure that the HDMI cable is not broken and is securely connected. 3 Make sure that the audio and video formats of the content being used (i.e., Blu-ray disc) are supported by all connected devices. 4 Make sure that your destination components (i.e., TV and A/V receiver) are set to the HDMI inputs with which the splitter's HDMI outputs are connected. 5 Make sure that you are using high-speed HDMI cables for all connections. We recommend high-quality Rocketfish HDMI cables, available at your local Best Buy or Future Shop stores in lengths from 4 to 24 feet. 6 Unplug the HDMI splitter's AC power adapter, then plug it back in again. <p>NOTE: If using with two TVs or monitors, connect the TV with the lowest resolution to the OUT 1 port to make sure video is displayed on both TVs. The splitter uses the resolution, timing information, and audio formats of the TV with the lowest resolution for both TVs</p> |
| Video has some noise | <ol style="list-style-type: none"> 1 Make sure that you are using high-speed HDMI cables for all connections. We recommend high-quality Rocketfish HDMI cables, available at your local Best Buy or Future Shop stores in lengths from 4 to 24 feet. 2 Make sure that the TV's video resolution supports the video source's output resolution. |

Specifications

| | |
