IMPORTANT NOTICE

The main lead on this equipment is supplied with a moulded plug incorporating a fuse. The value of the fuse is indicated on the pin face of the plug and if it requires replacing, a fuse approved to BS1362 of the same rating must be used.
Never use the plug with the fuse cover removed. If the cover is detachable and a replacement is required, it must be of the same colour as the fuse fitted in the plug. Replacement covers are available from your dealer.
If the fitted plug is not suitable for the power points in your house or the cable is not long enough to reach a power point, you should obtain a suitable safety approved extension lead or consult your dealer for assistance.
However, if there is no alternative to cutting off the plug, remove the fuse and then safely dispose of the plug. Do not connect the plug to a main socket as there is a risk of shock hazard from the bared flexible cord.
Never attempt to insert bare wires directly into a main socket. A plug and fuse must be used at all times.

Precautions

Ensure that the AC power supply in your house complies with the identification sticker located on the back of your player. Install your player horizontally, on a suitable base (furniture), with enough space around it for ventilation (7.5~10cm). Make sure the ventilation slots are not covered. Do not stack anything on top of the player. Do not place the player on amplifiers or other equipment which may become hot. Before moving the player, ensure the disc tray is empty. This player is designed for continuous use. Switching off the DVD player to the stand-by mode does not disconnect the electrical supply. In order to disconnect the player completely from the power supply, remove the main plug from the wall outlet, especially when left unused for a long period of time.

During thunderstorms, disconnect AC main plug from the wall outlet.
Voltage peaks due to lightning could damage the unit.
Do not expose the unit to direct sunlight or other heat sources.
This could lead to overheating and malfunction of the unit.
Protect the player from moisture(i.e. vases) , and excess heat (e.g.fireplace) or equipment creating strong magnetic or electric fields (i.e.speakers...). Disconnect the power cable from the AC supply if the player malfunctions. Your player is not intended for industrial use.
Use of this product is for personal use only.
Condensation may occur if your player or disc has been stored in cold temperatures.
If transporting the player during the winter, wait approximately 2 hours until the unit has reached room temperature before using.

Position of the DVD Player

- Place it on a stand or cabinet shelf, or under the TV stand.

Front Speakers Ⓛ Ⓡ

- Place these speakers in front of your listening position, facing inwards (about 45°) toward you.
- Place the speakers so that their tweeters will be at the same height as your ear.
- Align the front face of the front speakers with the front face of the center speaker or place them slightly in front of the center speakers.

Center Speaker Ⓒ

- It is best to install it at the same height as the front speakers.
- You can also install it directly over or under the TV.

Selecting the Listening Position

The listening position should be located about 2.5 to 3 times the distance of the TV's screen size away from the TV. Example: For 32" TVs 2~2.4m (6~8feet)
For 55" TVs 3.5~4m (11~13feet)

Rear Speakers ⓈⓁ ⓈⓇ

- Place these speakers behind your listening position.
- If there isn't enough room, place these speakers so they face each other.
- Place them about 60 to 90cm (2 to 3feet) above your ear, facing slightly downward.

  ★ Unlike the front and center speakers, the rear speakers are used to handle mainly sound effects and sound will not come from them all the time.

Subwoofer ⓈⓌ

- The position of the subwoofer is not so critical. Place it anywhere you like.

Connecting the Speakers

1 Press down the terminal tab on the back of the speaker.

(−) (+)

2 Insert the black wire into the black terminal (−) and the red wire into the red (+) terminal, and then release the tab.

Black ——— Red

(−) (+)

3 Connect the correct color speaker cable to the same color speaker output terminal on the rear of the subwoofer, according to the polarity markings (+/−).
Example: Connect the green center speaker cable to the green center speaker output terminal on the rear of the subwoofer according to the polarity markings (+/−).

Caution

- Do not let children play with or near the speakers. They could get hurt if a speaker falls.
- When connecting the speaker wires to the speakers, make sure that the polarity (+/−) is correct.
- Keep the subwoofer speaker out of reach of children so as to prevent children from inserting their hands or alien substances into the duct (hole) of the subwoofer speaker.
- Do not hang on the wall through the duct (hole).

Note

- If you place a speaker near your TV set, screen color may be distorted because of the magnetic field generated by the speaker. If this occurs, place the speaker away from your TV set.

About RDS broadcasting

Using the RDS (Radio Data System) to receive FM stations

RDS allows FM stations to send an additional signal along with their regular program signals. For example,the stations send their station names,as well as information about what type of program they broadcast, such as sports or music,etc.

When tuned to an FM station which provides the RDS service,the RDS indicator lights up on the display.

● **Description on RDS function**

1. **PTY (Program Type) :** Displays the type of programme currently being broadcast
2. **PS NAME (Program Service Name) :** Indicates the name of broadcasting station and is composed of 8 characters.
3. **RT (Radio Text) :** Decodes the text broadcast by a station (if any) and is composed of maximum 64 characters.
4. **CT (Clock Time) :** Decodes the real time clock from the FM frequency.
   • Some stations may not transmit PTY, RT or CT information therefore this may not be displayed in all cases.
5. **TA (Traffic Announcement) :** When this symbol flashes it shows that the traffic announcement is in progress.

Note • RDS may not operate correctly if the station tuned is not transmitting RDS signal properly or if the signal strength is weak.

Cautions on Handling and Storing Discs

Small scratches on the disc may reduce sound and picture quality or cause skipping.
Be especially careful not to scratch discs when handling them.
● Handling discs
**Do not touch the playback side of the disc.
Hold the disc by the edges so that fingerprints
will not get on the surface.
Do not stick paper or tape on the disc.**

● Disc Storage

**Do not keep in
direct sunlight**

**Keep in a cool venti-
lated area**

**Keep in a clean
Protection jacket.
Store vertically.**

Caution
• Do not allow the discs to become contaminated with dirt.
• Do not load cracked or scratched discs.

● Handling and Storing Discs

**When you get fingerprints or dirt on the disc, clean it
with a mild detergent diluted in water and wipe with a
soft cloth.**
• When cleaning, wipe gently from the inside to the outside of the disc.

Note

• Condensation may form if warm air comes into contact with cold parts
  inside the player. When condensation forms inside the player,
  the player may not operate correctly. If this occurs, remove the disc
  and let the player stand for 1 or 2 hours with the power on.
