## Advanced Technologies for Professional Use. Superb Image Expression with Flexible Installation and Easy Maintenance.

# **Higher Brightness and Superior Images**

#### True Full HD Resolution

The PDG-DHT100L employs DMD panel (16:9 aspect ratio). With 1,920 x 1,080 pixels in the panel, the PDG-DHT100L can project native HDTV 1080p signals in full resolution.

DMD Panel helps convey the ambience in a scene with such exceptional fidelity. Full HD goes beyond conventional technology to reproduce images that are vibrantly alive and rich in emotion.

#### Industry's Brightest<sup>\*1</sup>6,500 lumens and Rich Color Reproduction

A twin color wheel system make it possible to achieve both high brightness and high color reproduction that is accurate in image signal. In addition, user can change color wheel according as application. The 4-segment color wheels team up with two high-output 330-watt lamps to achieve up to 6,500 lumens<sup>\*1</sup> of brightness in our 2-lamp, full-HD, 1-chip DLP® projector. Or you can choose the 6-segment color wheels for even richer, purer color reproduction. \*1 As of the time of sales at the end of March, 2009, for 2-lamp, full-HD, 1-chip DLP® pro

## **Network Control**

#### **HD\*3 DATA WIRELESS**

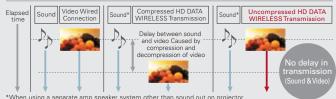

The Uncompressed HD\*3 DATA WIRELESSTransmission System allows pure uncompressed data transmission without delays between the video and sound. Technology in wireless system allows uncompressed data even from distances of about 100 feet away from the input source. Easier set-up for place such as large event halls and other large rooms/theaters as it eliminates the need to feed cables and run wires from sources to projectors.

HD Wireless Transmittion System is sold as optional accessory for PDG-DHT100L.

#### Featuring the PJ-Net Organizer Board

The PJ-Net Organizer board is provided as standard equipment, for centralized control of projectors over a wired network. Installing the optional PJ Master into a PC or server also lets you control the PJ-Net Organizer-mounted projectors over a network.

# **Easy Maintenance**

#### The Industry's longest-lasting\*5 35,000 hour-use filter 'Active Maintenance Filter', for cleaner and highly durable projection

Equipped with replaceable 'Active Maintenance Filter' for the Industry's longest lasting<sup>\*5</sup> 35,000 hour-use automatic reel filter cartridge to prevent dust from entering the lamp area, while still allowing enough airflow to help the area to remain cool longer durability and reliability from the increased dust resistance and longer lasting filters.

#### Equipped with new, dust-resistant sealed optical engine

New, improved sealed optical engine cooling design to prevent dust build up, maintaining optimal brightness and contrast, problems that traditionally are difficult to overcome, causing reductions in projection quality Improved air control for more flexibility in using the projector in a variety of environments.

#### **One-way Flow System**

The PDG-DHT100L is concentrated into one intake and one exhaust, both on the side, to solve dust-related problems and improve cooling reliability.

## Versatile Installation

#### **Edge Blending & Color Matching**

Equipped with "Edge Blending" function that allows what feels like boundary-less images with multi-image display possibilities Built-in "Color Matching" function correcting variations in color reproduction when using more than one projector. ### **Power Lens Shift**

Featuring both vertical and horizontal lens shift (vertical: 67 %, horizontal:41 % (maximum), the PDG-DHT100L enables intuitive operation for easy on-site setup. The lens shifts back to the center by pressing a lens shift button for a little.

#### Interchangeable Lenses

Lens removal and attachment are also very easy.

# **Useful Features**

There is also a Mechanical Shutter System which is popular for a variety of elite professional uses. The amazing PDG-DHT100L fills the needs of a host of demanding business venues including meeting, entertainment and promotional applications. It's a super nova in a star-studded

### **Vertical Tilt Angel Projection**

Realizes vertical 360 degree tilt angle projection allowing projection positions from the ceiling or floor, breaking from traditional projection settings

#### **Picture-in-Picture mode and Picture-by-Picture mode**

Capable of projecting two images simultaneously either using built-in picture-in-picture mode or picture-by-picture mode
