

Introduction

This manual contains detailed instructions on the operation and maintenance of this machine. To get maximum versatility from this machine all operators should carefully read and follow the instructions in this manual. Please keep this manual in a handy place near the machine.

Please read the Safety Information before using this machine. It contains important information related to USER SAFETY and PREVENTING EQUIPMENT PROBLEMS.

Notes:

Some illustrations may be slightly different from your machine.

Certain options may not be available in some countries. For details, please contact your local dealer.

Operator Safety:

This machine is considered a CDRH class 1 laser device, safe for office/EDP use. The machine contains two 15milliwat, 760-800 nanometer wavelength, GaAIAs laser diodes. Direct (or indirect reflected) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

Laser Safety:

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical unit in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified Customer Engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement of the optical subsystem is required.

Warning:

Use of controls or adjustment or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

Notes:

The model names of the machines do not appear in the following pages. Check the type of your machine before reading this manual.

Basic type : SDC410_CS210

Edit type : SDC410E_CS210e

Certain types might not be available in some countries. For details, please contact your local dealer.

Two kinds of size notation are employed in this manual. With this machine refer to the inch version.

For good copy quality, Ricoh recommends that you use genuine Ricoh toner.

Ricoh shall not be responsible for any damage or expense that might result from the use of parts other than genuine Ricoh parts in your Ricoh office product.

Power Source

120V, 60Hz, 16A

Please be sure to connect the power cord to a power source as above. For details about power source, *** see page 202.

Do not make copies of anything which is prohibited from copying by law. The following items are normally prohibited from copying by national law. Other items may be prohibited by local law.

- Money
 Stamps
 Bonds
 Stocks
- Bank drafts Checks Passports Driver's licenses

The copy samples in this Operating Instructions differ somewhat from actual copies due to printing effects.

The coloring of each Color key may differ somewhat from the actual copies.

This copier has a function that prevents making counterfeit bills. So, if you use an original image that is similar to a bill, you may not get proper copies.

Safety Information

When using your machine, the following safety precautions should always be followed.

Safety during Operation

In this manual, the following important symbols are used:

*∆*WARNING: Ignoring this warning could cause serious injury or even death.
 *∆*CAUTION: Ignoring this caution could cause injury or damage to property.

Examples of Indications

Symbols \land mean a situation that requires you take care.

Symbols \land mean "Hot surface".

Do NOT carry out the operation represented by this symbol \otimes . This example means "Do not take apart".

0-5,-

Symbols ● mean you MUST perform this operation.

This example means "You must remove the wall plug".

MARNING:

- Avoid multi-wiring.
- Do not damage, break or make any modifications to the power cord. Do not place heavy objects on it, pull it hard or bend it more than necessary. These actions could cause an electric shock or fire.
- Do not plug or unplug the power cord with your hands wet. Otherwise, an electric shock might occur.

• Make sure the wall outlet is near the machine and freely accessible so that in event of an emergency it can be unplugged easily.

• Do not remove any covers or screws other than those specified in this manual. Some parts of the machine are at a high voltage and could give you an electric shock. Also, if the machine has laser systems, direct (or indirect) reflected eye contact with the laser beam may cause serious eye damage. When the machine needs to be checked, adjusted, or repaired, contact your service representative.

• Do not take apart or attempt any modifications to this machine. There is a risk of fire, electric shock, explosion or loss of sight. If the machine has laser systems, there is a risk of serious eye damage.

• If the machine looks damaged or breaks down, smoke is coming out, there is a strange smell or anything looks unusual, immediately turn off the operation and main power switches then unplug the power cord from the wall. Do not continue using the machine in this condition. Contact your service representative.

• If metal, liquid or foreign matter falls into the machine, turn off the operation and main power switches, and unplug the main power cord. Contact your service representative. Do not keep using the machine with a fault or defect.

• Do not put any metal objects or containers holding water (e.g. vases, flowerpots, glasses) on the machine. If the contents fall inside the machine, a fire or electric shock could occur.

• Do not incinerate used toner or toner containers. Toner dust might ignite when exposed to an open flame. Dispose of the used toner containers according to local regulations for plastics.

• Do not insert your hands between sorter bins when your machine is equipped with the 20bin sorter stapler. You may be injured.

| ≜CA l | JTION: |
|--------------|---|
| \bigcirc | Keep the machine away from humidity and dust. A fire or an electric shock might occur. Do not place the machine on an unstable or tilted surface. If it topples over, it could cause injury. |
| 0 | • After you move the machine, fix it with the caster fixture. Otherwise, the machine might move or come down to cause a personal injury. |
| | When you move the machine, unplug the power cord from the wall outlet to avoid fire or electric shock. When the machine will not be used for a long time, unplug the power cord. |
| | • When you pull out the plug from the socket, grip the plug to avoid damaging the cord and causing fire or electric shock. |
| 0 | • If you use the machine in a confined space, make sure there is a continuous air turnover. |
| \bigcirc | • Do not reuse stapled paper. Do not use aluminum foil, carbon-containing paper or other conductive paper. Otherwise, a fire might occur. |
| | • When removing misfed paper, do not touch the fusing section because it could be very hot. |
| | • This machine has been tested for safety using this supplier's parts and consumables. We recommend you only use these specified supplies. |
| | Do not eat or swallow toner. Keep toner (used or unused) and toner containers out of reach of children. |
| | • This equipment is only to be installed by a qualified service personnel. |
| | |

• Deliver to collection point for waste products. Do not be disposed of via domestic refuse collection.

<u>/!</u>`

How to Read this Manual

Symbols

In this manual, the following symbols are used:

A WARNING:

This symbol indicates a potentially hazardous situation that might result in death or serious injury when you misuse the machine without following the instructions under this symbol. Be sure to read the instructions, all of which are described in the Safety Information section.

▲ CAUTION:

This symbol indicates a potentially hazardous situation that might result in minor or moderate injury or property damage that does not involve personal injury when you misuse the machine without following the instructions under this symbol. Be sure to read the instructions, all of which are described in the Safety Information section.

*The statements above are notes for your safety.

Important

If this instruction is not followed, paper might be misfed, originals might be damaged, or data might be lost. Be sure to read this.

Preparation

This symbol indicates the prior knowledge or preparations required before operating.

🔗 Note

This symbol indicates precautions for operation, or actions to take after misoperation.

Limitation

This symbol indicates numerical limits, functions that cannot be used together, or conditions in which a particular function cannot be used.

P Reference

This symbol indicates a reference.

[]

Keys that appear on the machine's panel display.

[]

Keys built into the machine's operation panel.

Where it is & What it is

Machine Exterior

1. Exposure glass Position originals here face down for copying.

 (platen glass)

2. Platen cover (option) Lower this cover over original

- 3. Operation switch
- 4. Operation panel
- 5. Front cover
- 6. Paper tray
- 7. Auto duplex tray
- 8. Stopper
- 9. Copy tray
- 10. Main power switch

Lower this cover over originals placed on the exposure glass (platen glass) for copying.

Press this switch to turn the power (on the **On** indicator lights up). To turn off the power off, press this switch again (the **On** indicator goes off).

🕿 See page 5.

Open to access the inside of the machine.

Set paper here. 🖛 See page 172.

Use to make two-sided copies.

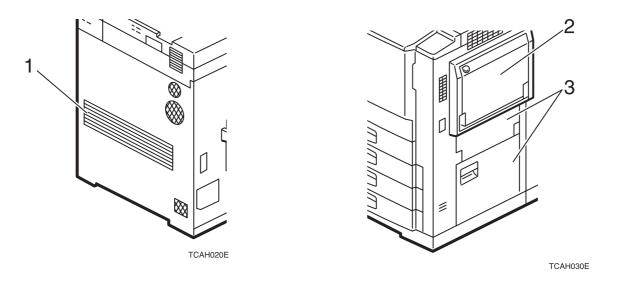

When you copy onto thin paper, raise this to prevent curling.

Completed copies are delivered here.

To start the machine, turn on this switch.

🔗 Note

□ If the machine does not operate after turning on the operation switch, check if the main power switch is turned on. If it is off, turn it on.

- 1. Ventilation hole
- 2. Bypass tray

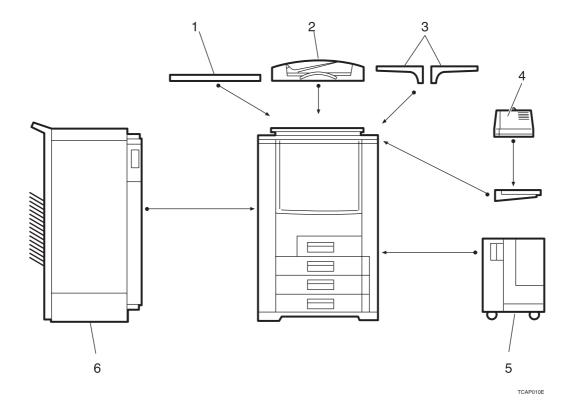

Prevents overheating. Do not obstruct the ventilation hole by placing or leaning an object near it. If the machine overheats, a fault might occur.

- Use to copy onto OHP transparencies, adhesive labels, translucent paper, post cards, and non-standard size paper, * See page 48.
- 3. Right side cover
 /Lower right cover

 Open this cover to remove jammed paper.

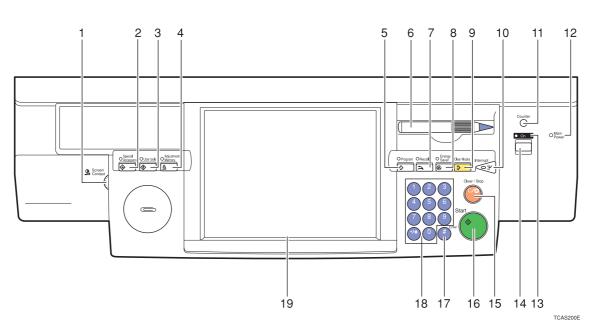

Options

This machine can be provided with the following options:

| 1. Platen cover | Lower this cover over originals placed on the exposure glass (platen glass) for copying. |
|------------------------------|---|
| 2. Document feeder (ADF) | Insert a stack of originals here. They will be fed automatically. |
| 3. Original tray | Put your originals. |
| 4. Film projector unit | Use to copy films. 🖛 See page 207. |
| 5. Large capacity tray (LCT) | Note The holder is required for installation. Holds 1,500 sheets of paper. |
| 6. 20-bin sorter stapler | Note The adapter is required for installation. Sorts, stacks, and staples copies. |

Operation Panel

1. Screen Contrast knob

You can change the brightness of the display.

2. [Special Accessory] key

Press to use the optional film projector unit. See page 207.

3. [User Tools] key

Press to change the default setting. See page 187.

4. [Adjustment/Memory] key

Press to adjust the image or color balance, or to make user colors. ***** See page 123.

5. [Program] key

Press to select the program mode. See page 57.

6. Editor pen

Use to designate areas.

7. [Recall] key

Press to recall the previously selected copy jobs.

8. [Energy Saver] key

Press to enter/exit the Energy Saver mode. See page 55.

9. [Clear Modes] key

Press to clear the previously entered settings.

10. [Interrupt] key

Press to make interrupt copies.

🖝 See page 55.

11. [Counter] key

Press to display the total number of copies made.

12. Main Power indicator

This indicator lights up when the main power switch is turned on, and goes off when the switch is turned off.

13. On indicator

This indicator lights up when the operation switch is turned on, and goes off when the switch is turned off.

14. Operation switch

Press this switch to turn the power on (the **On** indicator lights up). To turn the power off, press this switch again (the **On** indicator goes off).

15. [Clear/Stop] key

Press to cancel the copy number entered. While copying, press to stop copying. This key is also used to clear data.

16. [Start] key

Press to start copying.

17. [#] key

Press to enter data in selected modes.

18. [Number] keys

Use to enter the desired number of copies. They are also used to enter data.

19. Touch panel display

You can see the operation status and messages here.

Touch Panel Display

Messages and instructions appear here.

Keys that have been selected.

Keys that have the option of being selected. Keys that do not have the option of being selected are fainter.

In this manual, keys on the display are indicated as follows:

Example:

Key on the display:

Auto Paper Select

In the manual:

[Auto Paper Select] key

🔗 Note

Do not press the touch panel display with any hard or sharp object. Always use the editor pen.

Entering Numbers

When the display prompts you to enter a number, type in the number with the **[Number]** keys and press the **[#]** key on the display to accept it.

Should you make a mistake:

- If you have not pressed the [#] key yet, press the [Clear] key and then re-enter it. If there is not the [Clear] key on the display, press the [Clear/Stop] key.
- If you have already pressed the **[#]** key, press the item you wish to change on the display and re-enter the number with the **[Number]** keys. Press the **[#]** key on the display to accept it.

Checking the Functions You Have Selected

When you set one or more copy settings, the last item you selected will remain on the screen.

Basics

Starting the Machine

To start the machine, press the operation switch to turn the power on.

🖉 Note

This machine automatically enters Energy Saver mode or turns itself off if you do not use the machine for a while. About Energy Saver mode, *e* see page 55. About Auto Timer, *e* see page 191.

Power Switches

This machine has the operation switch and main power switch.

Operation switch (right side of the operation panel)

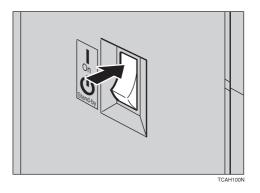

Press this switch to activate the machine. When the machine has warmed up, you can make copies.

□ Main power switch (left side of the machine)

When the machine is not to be used for an extended period of time, turn off the main power switch.

Starting the Machine

- Make sure that the power cord is plugged into the wall outlet firmly.
- 2 Turn on the main power switch.

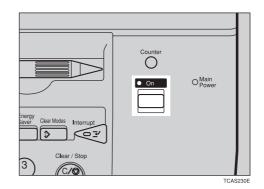

Turning on the Power

Press the operation switch to make the **On** indicator lights up.

🔗 Note

- If the power is not turned on when the operation switch is pressed, check if the main power switch is on. If off, turn it on.
- During the warm-up period (about 9 minutes), you can use the Auto Start function. See page 56.

When the machine is set for user codes

🖉 Note

□ To prevent others from making copies with your user code, press the [Clear Modes] key and the [Clear /Stop] key simultaneously after copying.

₽ Reference

For setting user codes, - see page 196.

When the Energy Saver indicator is lit

The machine is in Energy Saver mode.

Press any key.

The machine will return to the ready condition.

🔗 Note

The machine will also return to the ready condition when an original is set in the document feeder, or when the platen cover or the document feeder is opened.

Originals

Standard Size Originals

The machine will detect original of the following sizes and directions as standard size originals:

When you set originals on the exposure glass (platen glass)

| Metric version | A3□, B4□, A4□□, B5□□, A5□□, 81/2" × 13"□ |
|----------------|--|
| Inch version | 11" × 17"□, 10" × 14"□, 81/2" × 13"□, 81/2" × 11"□□, 51/2" × 81/2"□□ |

 $\ensuremath{\square}$ When you set originals in the document feeder

| Metric version | A3□, B4□, A4□], B5□], A5□], B6□], 81/2" × 13"□, 81/2" × 11"□, 11" × 17"□, 11" × 81/2"] |
|----------------|---|
| Inch version | 11" × 17"□, 81/2" × 14"□, 81/2" × 11"□□, 51/2" × 81/2"□□, 11" × 15"□, A4□□, 10" × 14"□, 8" × 13"□□, 8" × 10"□ |

Recommended Originals

₽ Reference

For originals that the document feeder can handle, - see page 241.

Non-recommended Originals for the Document Feeder

🔗 Note

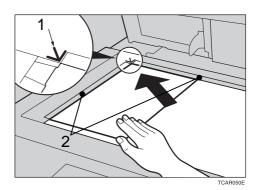

- The following types of originals are not recommended for use with the document feeder. Place them directly on the exposure glass (platen glass).
- □ Originals thicker than 128g/m², 34 lb
- □ Originals thinner than 40g/m², 11 lb
- □ For originals between 40 and 52g/m², 11 and 14 lb, the document feeder must be set to ADF Thin paper mode with the user tools. See page 198.
- □ Originals larger than A3, 11" × 17"
- \Box Originals smaller than B6 \Box , 51/2" × 81/2" \Box
- $\ensuremath{\square}$ Folded, curled, creased, or damaged originals
- Mailing labels, or perforated originals
- □ Bound, stapled, or clipped originals
- OHP transparencies

- Translucent paper
- Pasted originals
- Damp originals
- □ Sticky originals
- Wavy originals
- Originals that are not made from paper
- Originals written in pencil on both sides, or two-sided carbon originals
- □ Thermal fax paper, CRO (camera ready originals) or aluminum foil
- Books, pamphlets, and booklets

Setting Originals on the Exposure Glass (Platen Glass)

Lift the platen cover or the document feeder.

Set the original face down on the exposure glass 2 (platen glass). The original should be aligned to the rear left corner.

1. Reference mark

2. Scale

П

3 Lower the platen cover or the document feeder.

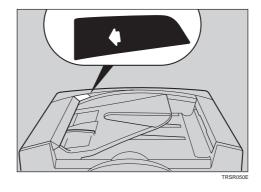

31

Setting a Stack of Originals in the Document Feeder

You can insert a stack of originals into the document feeder. These originals are individually fed onto and removed from the exposure glass (platen glass).

🖉 Note

- Some originals are unsuitable for the document feeder. See page 30.
- $\hfill\square$ Do not press down or hold originals after inserting them.
- I While originals are fed from the original table to the exposure glass (platen glass), do not pull them out.
- Do not lift the document feeder until the original has been completely fed out.
- Correct any curl, fold, or crease in the originals before setting the originals.
- 2 Make sure the **Insert Original** indicator is lit and the exposure glass (platen glass) is clear of originals.

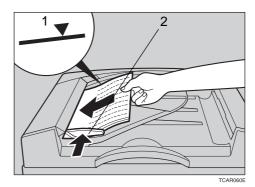

- Adjust the guide to the original size.
- Set the originals <u>face up</u> into the document feeder until the **Insert Original** indicator goes off.

🖉 Note

3

- □ The last page should be on the bottom.
- The original guide must touch the front side of the originals.
- Do not stack originals above the limit mark.

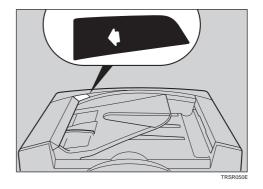

1: Limit mark 2: Original guide

Setting one Original at a Time in the Document Feeder

If you set one original at a time in the document feeder, the second and subsequent originals can be fed and copied automatically without pressing the **[Start]** key.

🖉 Note

- Do not press down or hold originals after inserting them.
- I While originals are fed from the original table to the exposure glass (platen glass), do not pull them out.
- Do not lift the document feeder until the original has been completely fed out.
 - Correct any curl, fold, or crease in the originals before setting.
- 2 Make sure the **Insert Original** indicator is lit and the exposure glass (platen glass) is clear of originals.

3

Adjust the guide to the original size.

Set the original <u>face up</u> into the document feeder until the **Insert Original** indicator goes off.

🔗 Note

- If you are copying a stack of originals one sheet at a time and you want to keep them in order, start with the last page of the originals.
- □ The original guide must touch the front side of the original.
 - Press the [Start] key.
- While the **Auto Feed** indicator is lit after an original is fed, set the next original. The original is automatically fed and copied.

🖉 Note

5

You can adjust the time the machine waits before being ready for the next original with the user tools.
 See page 191.

Setting Originals of Different Sizes in the Document Feeder

You can insert a stack of originals of different standard sizes (e.g. A4, B5 etc.) into the document feeder. These originals are individually fed onto and removed from the exposure glass (platen glass).

Preparation

To use this function, you have to select ADF Mixed Sizes mode with the user tools. - See page 198.

Limitation

 \square The weight of originals that can be set with this function is 52 - 81g/m², 14 - 20 lb.

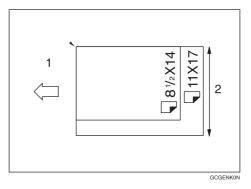

□ Smaller size originals might be skewed a little.

🖉 Note

□ If your stack of originals contains pages of different sizes, make sure that:

- Longer originals are at the bottom of the stack, and shorter originals are at the top.
- All originals are flush with the back fence of the document feeder.

1: Set into the document feeder

2: Vertical size

Adjust the guide to the widest original size.

Set the aligned originals face up into the document feeder.

Setting Non-standard Sized Originals

When copying from non-standard sized originals, enter the original size so that copy is well aligned.

Limitation

 $\hfill\square$ You must set your non-standard size originals on the exposure glass (platen glass).

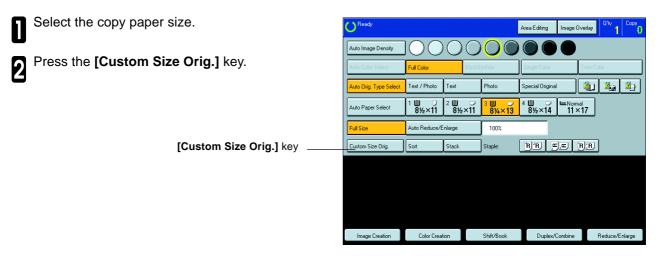

₽ Reference

For the standard sizes the machine can detect, \clubsuit see page 30.

🖉 Note

 $\hfill\square$ The dimensions you can enter must be within the following ranges:

| Vertical size | 50 - 297mm (in 1mm steps), 2.0" - 11.7" (in 0.1" steps) |
|-----------------|---|
| Horizontal size | 50 - 432mm (in 1mm steps), 2.0" - 17" (in 0.1" steps) |

3 Make sure that the **[Orig. Horiz.]** key is selected. Enter the horizontal size with the **[Number]** keys, then press the **[#]** key.

🔗 Note

□ To change the value entered, press the [Clear] key and enter a new value.

| Custom Size Orig. | Cancel | OK |
|---|------------|----|
| Enter Horizontal length of original with number keys, then press # key. | | |
| | Clear | |
| Orig. Vert. 8.2inch | (#) | |

Press the **[Orig. Vert.]** key and enter the vertical size with the **[Number]** keys, then press the **[#]** key.

6

Set your original on the exposure glass (platen glass), then press the [Start] key.

Removing the Platen Cover to Copy a Large Original

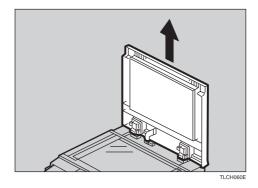

You can remove the platen cover to copy a large (more than A3, $11" \times 17"$) original.

🔗 Note

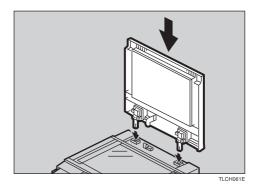

- $\hfill\square$ You cannot remove the document feeder.
- To remove the platen cover, lift it out.

🖉 Note

Lift the platen cover with both hands. Place the removed cover on a flat surface such as a desk and where it will not be damaged.

To reset the platen cover, align the pins of the platen cover and the holes of the copier. Then push the platen cover into the copier.

Copying

Basic Operation

How to Make Copies

- Set your original on the exposure glass (platen glass) or in the document feeder. See page 31, 32, or 33.
- 2 Confirm that the [Auto Color Select], [Text/ Photo], [Auto Paper Select], [Full Size] keys are selected. If not, press the keys.

🔗 Note

- □ Auto Color Select ◄ see page 40.
- □ Text/Photo 🖛 see page 44.
- □ Auto Paper Select ◄ see page 47.

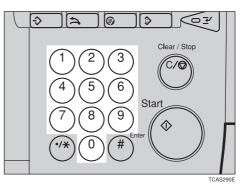

B Enter the number of copies required using the [Number] keys.

🔗 Note

□ To change the number entered, press the **[Clear/ Stop]** key, then enter the new number.

Press the [Start] key.

🖉 Note

- □ To stop the machine during a multi-copy run, press the **[Clear/Stop]** key.
- □ To return the machine to the initial condition after copying, press the **[Clear Modes]** key.

Adjusting Copy Image Density

Image density affects the contrast of copies. With these functions you can control the image density so that copies match originals. Make the selection you require then set your originals and press the **[Start]** key.

Auto image density

The machine automatically controls the image density.

🔗 Note

□ Auto Image Density and Auto Color Select cannot be set together.

- If Auto Color Select mode is selected, select other color modes to cancel it. See page 40.
- Press the [Auto Image Density] key.

| O ^{Ready} | | | | Area Editing | Image Overlay | Q'ty 1 | Сору |

Selecting a Color Mode

Select a color mode that best suits your originals and copying requirements.

Auto color select mode

The machine automatically detects whether the original has color parts or not. Originals with only black images will be copied in Black & White mode. Originals with some color areas will be copied in Full Color mode.

🔗 Note

- If you make one copy set of a black original using the document feeder, it is recommended to select Black & White mode. If you choose Auto Color Select mode, the machine will reset the color selection for every original page, taking a long time to complete the job.
- Make sure that the [Auto Color Select] key is selected.

🔗 Note

□ If not, press the [Auto Color Select] key.

Press the [OK] key.

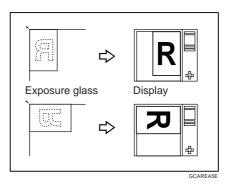

Set your originals, then press the [Start] key.

-Scanned color (Only for Edit type)

Note

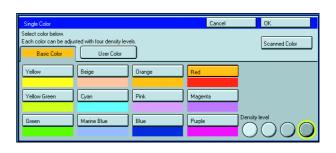

- When Single Color copying, Scanned colors might come out lighter.
- "Scanned color" means that the color is specified from the original image directly.

Press the [Single Color] key.

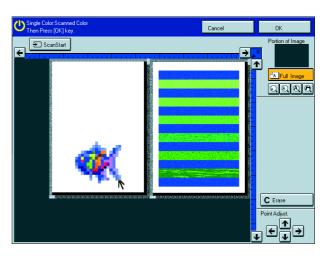

- **2** Set your original, then press the **[Scanned Color]** key.
- Note
- □ The image of the original is displayed.

3 Press the color on the image you wish to scan in with the editor pen.

Note

- Point to an area of color with a radius of at least 5 mm.
- □ To cancel the pointing, press the [Erase] key.
- □ For details of this display, 🛩 see page 142.

Note

□ The color you have chosen is scanned in.

5 Press the [Start] key.

Twin color mode

This function makes copies with black parts in the selected color and other parts in the other selected color.

₽ Reference

For copy samples, - see page 12.

🖉 Note

- □ You can have colored areas copied in one of the following colors:
- Red, Green, Blue, Yellow, Cyan, Magenta, Yellow Green, Orange, Marine Blue, Beige, Pink, Purple and User Colors You can have black parts copied in one of the following colors:
- Red, Green, Blue, Yellow, Cyan, Magenta, Yellow Green, Orange, Marine Blue, Beige, Pink, Purple, and User Colors

Press the [Twin Color] key.

2 Select the color you want to copy in for the color parts of the original.

| Twin Color | | | | Cancel | | ОК |
|--|-----------------------------|-----------------------------|--------------|--------|---|--------------|
| Change Color Portion [N Then Press [OK] key. Basic Color | lot Black Portion] of the o | original to one of the colo | rs listed be | łow. | (| Change Black |
| Yellow | Beige | Orange | Red | | | |
| Yellow Green | Cyan | Pink | Mageni | a | | |

Copying from the Bypass Tray

Use the bypass tray to copy onto thick paper, adhesive labels, OHP transparencies, or non-standard size paper. Also use the bypass tray to copy onto the reverse side of paper that has already been copied onto.

Note

□ The following limitations apply:

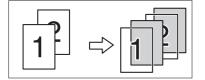

| Acceptable paper types | Normal paper (64 ~ 105g/r Thick paper (105 ~ 157g/n Extra thick paper (157 ~ 29 Post cards OHP transparencies Adhesive labels Translucent paper | n², 28 ~ 42 lb) |
|--|---|---|
| | Standard size | Metric version: □: A3, B4, A4, B5, A5, B6, 11" × 17", 12" × 18", 13" × 19" □: A4, B5, A5, B6, A6, 11" × 81/2" |
| | | Inch version: \Box : 81/2" × 11", 81/2" × 51/2", 10" × 14", 11" × 17", 12" × 18", 13" × 19", A3 \Box : 81/2" × 11", 81/2" × 51/2", A4 |
| | Non-standard size | Metric version: Vertical: 100 ~ 330mm (in 1mm steps) Horizontal: 140 ~ 483mm (in 1mm steps) |
| | 2 3 CEMPATE 1:Horizontal 2:Vertical 3:Feed direction | Inch version: Vertical: 3.9" ~ 13" (in 0.1" steps) Horizontal: 5.5" ~ 19" (in 0.1" steps) |
| Number of sheets that can be set at one time | Normal paper, OHP transp Thick paper, Extra thick pa Adhesive labels: Translucent paper: | |

□ Select one of the following settings or keys:

[Normal Paper] : normal paper

| thick paper, post cards, adhesive labels, translucent paper |
|---|
| Heavier than 157g/m ² , 42 lb |
| OHP transparencies |
| Copying onto the reverse side of paper that has been already copied onto See page 52. |
| Select this after the paper type for non-standard sized paper. 🖛 See page 50. |
| |

When you copy onto OHP transparencies, you can select whether a blank slip sheet is inserted between OHP transparencies.

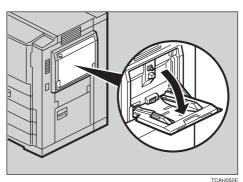

- **D** When you set several sheets at a time, fan them to get air between them before loading.
- □ If the copy paper is curled, gently roll it to remove the curl.
- $\ensuremath{\square}$ When you copy onto OHP transparencies, insert them with the copy side up.
- $\hfill\square$ Do not stack copy paper above the limit mark.
- If the copy paper is curled, correct it before setting paper in the bypass tray. If the curled is not corrected, a paper misfeed might occur.
- When the optional sorter stapler is installed, copies made onto thick or OHP transparencies are not delivered in the proof tray but in the first bin instead.

Copying onto standard size paper with the bypass tray

🖉 Note

□ When you copy onto the reverse side of paper that has been already copied onto, < see page 52.

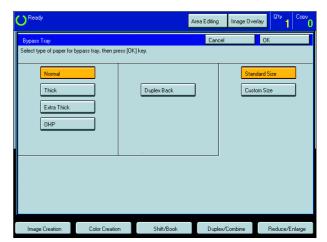

Open the bypass tray.

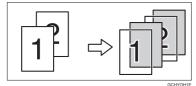

Press the [Normal Paper], [Thick], [Extra Thick], or [OHP] key.

🖉 Note

 $\hfill\square$ Make sure that the **[Standard Size]** key is selected.

□ When you copy onto OHP transparencies, you can select whether a blank slip sheet is inserted between OHP transparencies.

4

Press the [OK] key.

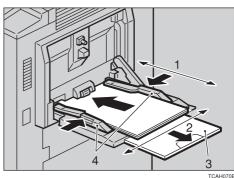

Adjust the paper guides to the paper size.

Note

- Make sure that the paper guides matches to the paper size. If the paper guides are not adjusted to the paper size properly, paper might be skewed or a paper misfeed might occur.
- □ With large copy paper (more than A4□, 81/2"×11"□), swing out the extender.
 - With the side you wish to copy onto face up, insert the paper into the bypass tray until it stops.
- 🖉 Note

5

□ The paper size is displayed.

1:Horizontal size 2:Vertical size 3:Extender 4:Paper guides

Set your originals, then press the [Start] key.

Copying onto non-standard size paper with the bypass tray

Preparation

You can register non-standard paper sizes you use often in keys [Custom1], [Custom2], and [Custom3] with the user tools. - See page 193.

🔗 Note

□ Be sure to set the size. Otherwise, a paper misfeed might occur.

| Π | Open the baypass tray. |
|---|------------------------|
| | |

Press the [Normal Paper], [Thick], [Extra Thick], or [OHP] key.

| O ^{Ready} | | A | rea Editing | Image Ove | ilay Q'ty | Сору |

| | | | | | | |
| Image Creation | Color Creation | Shift/Book | Duplex/ | Combine | Reduce/ | Enlarge |

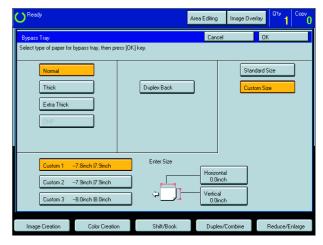

Press the [Custom Size] key.

Select [Custom1], [Custom2], [Custom3] or [Enter Size] keys.

🔗 Note

3

□ If you select [Custom1], [Custom2], or [Custom3], go to step 7.

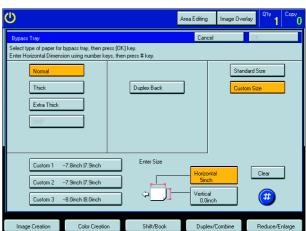

| R | If you select [Enter Size] in step 4, enter the horizontal paper size with the [Number] keys |
|---|--|
| U | horizontal paper size with the [Number] keys |
| | then press the [#] key. |

🖉 Note

□ To change the value entered, press the [Clear/ Stop] key and enter a new value.

7

Adjust the paper guides to the paper size.

🔗 Note

Make sure that the paper guides match the paper size. If the paper guides are not adjusted to the paper size properly, paper might be skewed or a paper misfeed might occur.

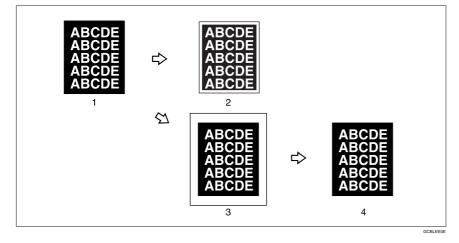

Insert the paper into the bypass tray.

9

Set your originals, then press the [Start] key.

Making A3, 11" \times 17" full bleed copies

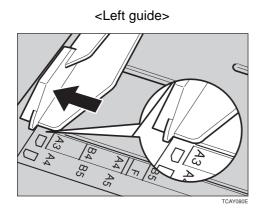

- 1: A3, 11" \times 17" size Original
- 2: In standard copy mode, margins appear on copies
- 3: 12" \times 18" or 13" \times 19" Full Bleed Copy
- 4: Cut around the margins to produce a full image

If you adjust the paper guides of the bypass tray more than A3 (11") size, A3 11" \times 17" full bleed copying mode is automatically selected.

In this mode, you can make A3, $11" \times 17"$ full bleed copies with $12" \times 18"$ or $13" \times 19"$ paper. This is useful to make A3, $11" \times 17"$ size copies with colored background (e.g. catalogues).

🖉 Note

- \square This function can be used with 12" \times 18" or 13" \times 19" paper.
- □ If you want to select this mode, expand the paper guides as shown in the illustration.

<Right guide>

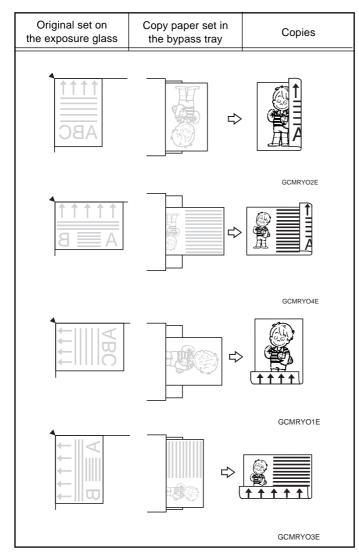

Copying

TCAY070

Copying onto the reverse side of paper that has been already copied onto

Note

- □ If you wish to copy 2 sided onto normal paper, use the Duplex feature. See page 68.
- D Make sure that you set your original and the copy paper in the correct direction to achieve the results you require.

- □ You cannot use this function for OHP transparencies, translucent paper, adhesive labels and postcards.
- □ Do not use copy paper that has been already copied on with other machines.
- If the copy paper is curled, correct it before setting paper in the bypass tray. If the curl is not corrected, a paper misfeed might occur.

Insert the paper into the bypass tray.

Note

□ Make sure the front side (the side that has been copied onto) faces down.

Press the [Duplex Back] key.

🖉 Note

When you copy onto non-standard size paper, press the [Custom Size Orig.] key and select or enter the size. For details, *e* see page 50.

| Ready | | Α | rea Editing | Image Ove | erlay Q'ty | 1 Copy |

| | | | | | | |
| | | | | | | |
| | | | | | | |
| Image Creation | Color Creat | ion | Shift/Book | Duplex/ | Combine | Reduce/Enlarge |

- 2 Set your original on the exposure glass (platen glass) or in the document feeder. See page 31, 32 or 33.
- 3 Choose your copy paper size (e.g. A4 \Box , $8_{1/2}$ " × 11" \Box).
- Press the **(Start)** key. The original image is enlarged or reduced to fit the selected copy paper.

Energy Saver Mode—Saving Energy

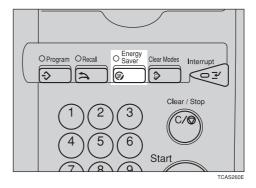

If you do not operate the machine for a certain period after copying or press the **[Energy Saver]** key, the display goes out and the machine enters Energy Saver mode. When you press the **[Energy Saver]** key again and originals are set in the document feeder or when the platen cover or document feeder is opened, the machine returns to the ready condition. In Energy Saver mode, the machine uses less electricity.

Press the **[Energy Saver]** key to enter the Energy Saver mode.

🖉 Note

□ To cancel this mode, press the **[Energy Saver]** key again.

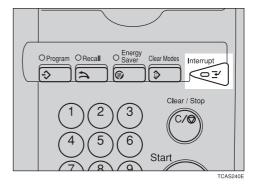

Interrupt Copying—Temporarily Stopping one Job to Copy Something Else

Use the [Interrupt] key to interrupt a copy run and make urgently needed copies.

₽ Reference

For functions that cannot be used together with this function, - see page 106.

Press the **(Interrupt)** key. The machine will stop the copy run and store the present settings in the memory. The machine will return to the ready condition.

2 Remove the previous originals. Set your original for interrupt copying on the exposure glass (platen glass) or in the document feeder.

Make your copies.

3

5

After interrupt copying is completed, press the **[Interrupt]** key again. The machine will recall the previous copy settings.

Reset the previous originals and press the [Start] key to resume the previous run.

Auto Start—Entering Copy Job Settings during the Warm-up Period

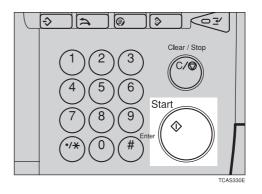

If you press the **[Start]** key during the warm-up period, the **[Start]** key will blink and the machine will start copying after the warm-up period.

Press the [Start] key.

Note

□ To cancel Auto Start, press the [Clear/Stop] key.

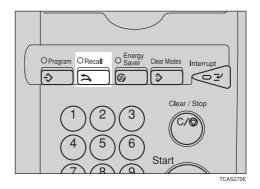

Recall—Recalling the Previous Job Settings

This machine automatically stores the previous job settings. If you want to copy with the same settings as the previous job, press the **[Recall]** key. You can also change the recalled job settings.

🖉 Note

When the recalled job setting is for area editing or image overlay, you cannot change it.

Program—Storing and Recalling Your Copy Settings in Memory

You can store up to five frequently used copy job settings in machine memory and recall them for future use.

Note

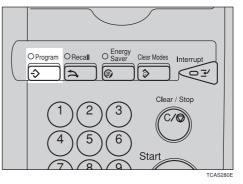

□ If you want to change the stored programs, store another program again.

Storing Your Settings

Set the copy settings you want to put into Ш memory.

Press the [Program] key. 2

Press the [Program] key.

| -Program | Cancel |
|-------------------------------------|--------|
| <store></store> | |
| Select program number key. | |

3

Set your originals, then press the [Start] key.

Zoom—Reducing and Enlarging in 1% Steps

You can change the reproduction ratio from 25% to 400% in 1% steps.

🖉 Note

You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or blank margins will appear on copies.

□ To return to 100%, press the [100%] key.

□ You can select a preset ratio which is near the desired ratio, then press the [Zoom] key and adjust the ratio with the [+] or [-] key.

 $\hfill\square$ There are two ways to set the ratios.

Using the [-] and [+] keys

Press the [Reduce/Enlarge] key.

2 Make sure that the **[Preset R/E / Zoom]** key is selected.

|---|---|
| 5 | 4 |

Enter the reproduction ratio with the [Number] keys.

Ø Note

 $\hfill\square$ To change the ratio entered, press the **[Clear]** key and enter a new ratio.

Press the [#] key.

Size Magnification—Fitting the Original to a Copy of a Different Size

The suitable reproduction ratio will be automatically selected when you enter the length of the original and the length of the copy image you want.

Ø Note

□ You can select a ratio regardless of the size of an original or copy paper. With some ratio, parts of the image might not be copied or blank margins might appear on copies.

□ You can select a ratio from between 25% to 400%.

Enter the original size with the [Number] keys, 3 Enter the original c._____ then press the **[#]** key.

Note

□ Up to 999mm (metric version), 99.99" (inch version) can be entered.

5

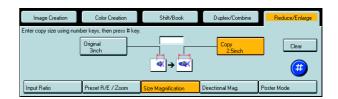

Enter the copy paper size with the [Number] keys, then press the [#] key.

🖉 Note

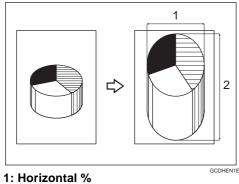

To change the ratio entered, press the [Original] key or the [Copy] key then enter a new ratio.

63

Directional Size Magnification (inch)—Stretching and Squeezing the Image into the Copy Area

- 1: Horizontal original size
- 2: Vertical original size
- 3: Horizontal copy size
- 4: Vertical copy size

The suitable reproduction ratios will be automatically selected when you enter the horizontal and vertical lengths of the original and copy image you require.

🖉 Note

□ You can enter sizes within the following ranges:

| Metric Version | 1 - 999mm (in 1mm steps) |
|----------------|------------------------------|
| Inch Version | 0.1" - 99.9" (in 0.1" steps) |

If the calculated ratio is over the maximum or under the minimum ratio, it is corrected within the range of the ratio automatically. However, with some ratios, parts of the image might not be copied or blank margins might appear on copies.

Press the [Directional Mag.] key.

3

Press the [D. Size Mag. (inch)] key.

Enter the horizontal original size with the **[#] [Number]** keys, then press the **[#]** key.

🖉 Note

- □ To change the value entered:
- If you have not pressed the **[#]** key yet, press the **[Clear]** key and enter a new value.
- If you have already pressed the **[#]** key, select the specified key and enter the a value.

6 Enter the vertical original size with the **(Number)** keys, then press the **[#]** key.

Enter the vertical copy paper size with the **[Number]** keys, then press the **[#]** key.

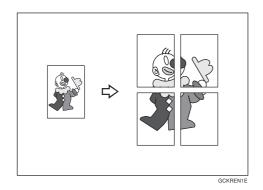

Set your originals, then press the [Start] key.

8

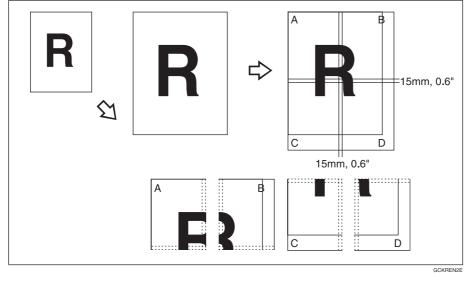

Poster Mode—Enlarging the Complete Image onto Several Sheets

You can enlarge the complete image of originals onto several sheets. This function is convenient for making posters.

🖉 Note

In this function, the copies are delivered with margins around the copy image (about 15mm, 0.6"). If you want to paste the sheets to make a poster (one large sheet), cut the margins out.

□ You can specify different ratios or numbers of pages in the horizontal and vertical directions.

Limitation

- □ If the [Auto Paper Select] key is selected, you cannot use this function.
- □ You cannot use the document feeder for Poster Mode. Set your originals on the exposure glass.
- □ When you use the non-standard size originals for Poster Mode, blank pages will be fed out.

Using the [Number of Pages] key

By entering the desired number of pages, the machine automatically calculates the suitable enlargement ratio for copying.

Select the copy paper size.

Press the [Reduce/Enlarge] key.

Press the [Poster Mode] key.

🖉 Note

- If you are using Auto Color Select mode and then choose Poster Mode, the machine switches automatically to Full Color mode.
- A Make sure that the [Number of Pages] key is selected.

7

Enter the number of pages.

🖉 Note

- □ Up to 20 pages can be entered.
- □ You can specify different ratios or numbers of pages in the horizontal and vertical directions.
- □ If the number of pages coincides with an enlargement of more than 400%, blank pages will be fed out.

Duplex—Making 2 Sided Copies

1 Sided \rightarrow 2 Sided—Making Two-sided Copies from One-sided Originals

This function makes 2 one-sided originals onto two-sided copy.

□ You cannot use the following copy paper in this function:

- \bullet Paper smaller than A5, 51/2" \times 81/2"
- Translucent paper
- Adhesive labels
- OHP transparencies

🖉 Note

□ The following paper limitations apply:

Metric version

| | Single color | Full color |
|-------------------|----------------------------|--------------------|
| Paper weight | 64 - 105g/m² | |
| Copy Number Input | smaller than B4: 50 sheets | A3 - A5: 20 sheets |
| | A3: 30 sheets | |

Inch version

| | Single color | Full color |
|-------------------|---|--|
| Paper weight | 17 - 28 lb | |
| Copy Number Input | smaller than $81/2" \times 14"$: 50 sheets | 11" \times 17" - 51/2" \times 81/2": 20 sheets |
| | 11" × 17": 30 sheets | |

🖉 Note

 $\ensuremath{\square}$ The image on the back-side of copies is shifted by just the binding margin.

 $\ensuremath{\square}$ You can change the width and position of the binding area.

□ You can change the default binding margin and width.

₽ Reference

For functions that cannot be used together with this function, - see page 106.

The resulting copy image will differ according to the direction in which you set your original (lengthwise \Box) or widthwise \Box).

*1 The illustrations show the directions of copied images on the front and back, not the directions of delivery.

Press the [Duplex/Combine] key.

| Imaj | ge Creation | Color Creation | Shift/Book | | Duplex/Combine | | Reduce/Enlarge |

Press the [OK] key.

Follow the steps 4 and 5.

Color Creation

Color Conversion—Converting a Selected Color into a Different Color

This function converts a selected color of an original into a different color on the copy.

₽ Reference

For copy samples, - see page 17.

🖉 Note

- □ Up to 4 colors can be converted at one time.
- □ Colors you can convert to:

Yellow, Red, Magenta, Green, Cyan, Blue, Black, White, and Scanned Color (only one Scanned Color can be selected at a time)

□ Colors that can be used after conversion:

Yellow, Orange, Red, Magenta, Green, Cyan, Blue, Yellow Green, Black, White, Beige, Pink, Marine Blue, Purple, User colors, and Scanned Color

- This function can be made more or less sensitive to the color to be converted. It can be adjusted within five levels from "Narrow" to "Wide". See page 197.
 For example, if red is selected as the color to be converted, "Narrow" will result in only red being converted, and "Wide" will result in other colors close to red being converted.
- □ This function can be used in Full Color mode.
- When using Color Conversion and Color Erase together, you can only choose Scanned Color for one of these functions only.

Press the [Color Creation] key.

Press the [Color Conversion] key.

Select the original color (color to be converted). 3

| ט | | | Area Editing I | mage Overlay |

Mirror Image—Making a Mirror Image

This function makes a mirror image copy of the original.

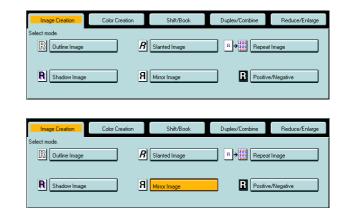

🖉 Note

 $\hfill\square$ Set the original as below when setting on the exposure glass (platen glass).

Press the [Mirror Image] key.

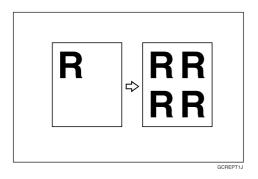

3 Set your originals, then press the [Start] key.

2

Repeat Image—Copying a Part of an Original Image Repeatedly

This function copies a part of the original image repeatedly.

🖉 Note

- □ When this function is used, the leading edge margin of 10mm, 0.4" is set on the copy paper.
- □ There are three ways to specify the image of the original to be repeated as follows:

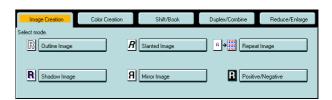

| Size Input: | This function allows you to reproduce the top band of an original repeatedly down the entire copy. You specify the width of the band (the vertical length of image) and it is repeated as many times as will fit on the copy. |
|-------------------------|--|
| Number of Images: | This function also allows you to reproduce the top band of an original repeatedly down the entire copy, but here you specify the number of image repetitions you want and the copier will determine the width of the top band. |
| Editor Area: | This function allows you to select an area of the original and reproduce it repeatedly down the copy. The repetitions are made one below the other, and are all aligned to the right. (Only for Edit type) |
| I For an explanation of | st optoring numbers 🖛 soo page 25 |

- □ For an explanation of entering numbers, *◄* see page 25.
- The number of repeated images that can be fit on a single sheet of copy paper is calculated automatically based upon the copy paper size, copy paper direction and enlargement/reduction ratio.
- Depending on the copy paper size, copy paper direction and enlargement/reduction ratio, parts of repeated images may be cut off.
- When using the Length key or the Editor Area key, parts of some repeated images may be cut off depending on the values you enter.

2

2 Press the [Repeat Image] key.

Set your original on the exposure glass (platen glass), then press the **[Editor Area]** key.

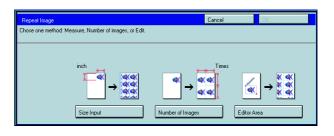

Limitation

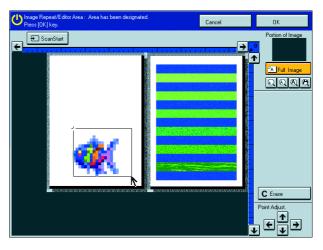

□ You cannot set your originals in the document feeder.

A Mark diagonally opposite corners of area to be repeated.

🖉 Note

- □ The area you have designated is scanned in.
- For details about designating the area, see page 142.

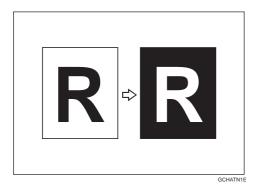

5 Press the **[OK]** key.

6

Press the [Start] key.

Positive/Negative—Copying in Complementary Colors

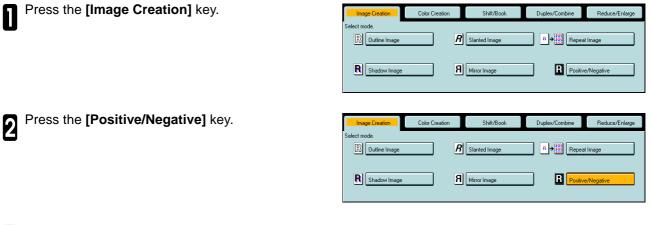

This function copies the original image in complementary colors. If you use a black and white original, black and white areas of the original are reversed.

🖉 Note

3

If you copy using twin color mode, white areas are changed to black, black areas are changed to white, and color areas are changed to the selected color.

Set your originals, then press the $\ensuremath{\left[\textbf{Start} \right]}\xspace$ key.

Finishing

🖉 Note

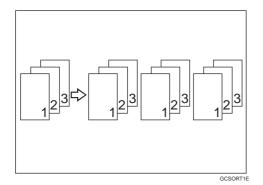

To avoid problems caused by curled copies, try turning over the paper stack in the paper tray. If there is no improvement, change to copy paper with less curl.

₽ Reference

For functions that cannot be used together with this function, - see page 106.

Sort-Sorting into Sets (123, 123, 123)

The optional 20-bin sorter stapler is required to use this function.

One copy of each original is delivered to each bin and copies are collated into sets.

Note

□ It is recommended to set originals in the document feeder with this function.

□ For sorting, the following limitations apply:

| | Normal paper mode | Thick mode | Extra Thick mode |
|-------------------------------|--------------------|--------------------|---------------------|
| Maximum paper size | □: A3, 13" × 19" | □: A3, 13" × 19" | □ : A3, 13" × 19" |
| | □: A4, 81/2" × 11" | □: A4, 81/2" × 11" | □ : A4, 81/2" × 11" |

Staple—Stapling Copies

The optional 20-bin sorter stapler is required to use this function.

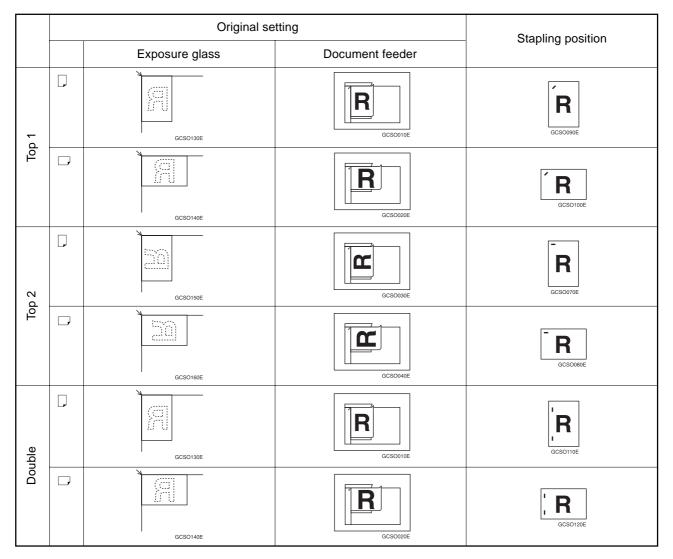

Each copy set can be stapled together.

Note

 $\hfill\square$ When you select Staple mode, Sort mode is automatically selected.

- □ You cannot use Staple mode with Stack mode.
- □ You cannot use OHP transparencies or non-standard size paper in Staple mode.
- ☐ You cannot staple different widths of paper.
- $\ensuremath{\square}$ Stapling position and original setting:

□ For stapling, the following limitations apply:

| | Normal paper mode | Thick mode | Extra Thick mode |
|-------------------------------|--------------------|--------------------|--------------------|
| Maximum paper size | □: A3, 13" × 19" | □: A3, 13" × 19" | □ : A3, 13" × 19" |
| | □: A4, 81/2" × 11" | □: A4, 81/2" × 11" |]: A4, 81/2" × 11" |
| Minimum paper size | □: B5, 8" × 10" | □: B5, 8" × 10" | □: B5, 8" × 10" |
| | □: B5, 81/2" × 11" | □: B5, 81/2" × 11" | □: B5, 81/2" × 11" |
| Maximum paper capacity of bin | 2 - 50 copies | 2 - 25 copies | 2 - 10 copies |

₽ Reference

If you want to add staples, - see page 179.

When the stapler is jammed, - see page 181.

Stapling copies automatically after copying

The optional document feeder is required to use this function.

Select the stapling position.

Set your originals in the document feeder.

Press the [Start] key.

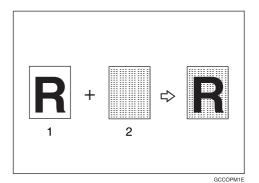

Image Overlay (Only for Edit Type)

Summary of Image Overlay

There are four kinds of Image Overlay.

Full Image Overlay (Only for Edit Type)

- 1: Foreground image original
- 2: Background image original

This function overlay the foreground image original onto a background image original.

Text Overlay

This function can colorize a text original (foreground image original) and overlay it on the full color image original (background image original).

₽ Reference

For functions that cannot be used together in image overlay. - See 106.

Note

Colors that can be selected as a text color:

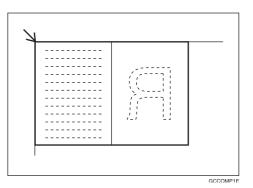

Yellow, Beige, Orange, Red, Yellow Green, Cyan, Pink, Magenta, Green, Marine Blue, Blue, Purple, White, Black, and User Colors

- □ You can adjust the density to one of four levels (except white).
- □ If you did not select the text color, the text will be copied in the original color.
- **I** The modes that can be set for the background image original are:
 - Color/Image Adjustment: Image Density, Color Mode, Original Type, Image Adjustment, Color Adjustment, Color Balance Adjustment
 - Color Creation: Color Conversion, Color Erase, Color Background
- □ The modes that can be set for the job settings as follows:
 - Auto Paper Select
 - Manual Paper Select
 - Reduce/Enlarge (Preset Reduce/Enlarge, Zoom, Auto Reduce/Enlarge)
 - Margin Adjustment
