## Chapter 4 Trooble Shooting

1. **Question:** What kind of photos does this device support?

**Answer:** The frame will display digital photos that are stored in the JPEG format, which is the standard format for nearly all digital cameras. Some cameras allow images to be stored as TIFF or RAW files as well as JPEG. The JPEG etc format is compatible with the frame. Photos of up to million pixels can be displayed.

2. **Question:** What should I do if the system does not respond when the power is turned on?

**Answer:** Please make sure the unit is properly connected to a power source. Then turn it off, re-connect the power and turn it on again.

3. **Question:** Why is the memory card not recognized?

**Answer:** The memory card might be inserted backwards or is not pushed far enough. After inserting the memory card in the right direction, if the still cannot be read, please turn off the unit and then power it on again.
