## Xperia™ neo — Smart. Sharp. And bright too

Dancers in the twilight. Breathtaking skateboard scenes. Shoot them sharp, even in low light. Take bright movies and photos using the 8.1 megapixel camera and Sony's award-winning Exmor™ R for mobile camera sensor. Then show it all on a sharper screen. With Sony's Mobile BRAVIA® Engine powering the super-sharp, multi-touch Reality display, you see colours and contrasts in a whole new light. Snap superb scenes in the sunset. Browse through the latest fashion catalogue. But don't forget your shades.

### High octane fun on your TV. With HDMI™

Invite your friends to your big screen premiere. Just connect your phone to your HD TV using the built-in HDMI™ connector and start the show. Browse photos and videos using your TV's remote*.  Bored already? Why not browse the web from Xperia™ neo to check out what's new on YouTube™**, or check out the games charts and download what's hot? All on your TV. Now that's entertainment.

### More than 100,000 apps from Android Market™**

Find the app you'll love for doing what you like from Android Market™**. There's an app for whatever you want for whatever makes you smile. More than 100,000 actually. Busy? Get more efficient. Fix the date on Google calendar™**. Send your love by Gmail™**. Find your friends using Google maps™**. The whole world of Android™ and more in store. From the Xperia™ neo. One high quality phone with human curvature that's great to look at and good to hold.

*TV must be CEC compatible. Remote function only works for videos and photos, not for games or web browsing. Cable not included.

**The service is not available in all markets.*

# Sony Ericsson signature features

Xperia™ neo comes with a range of Sony Ericsson features as standard. Below is a summary of the key signature features.

## Sony Ericsson Timescape™

**The place to meet your friends**

The Timescape™ application manages all your communication with one person in one place. You can effortlessly browse by category your Facebook™, Twitter™, email and text communications, as well as view your photos. Now everything is all together and in chronological order, so you don't have to open different applications to see what's going on.

## Infinite button

**Everything you want – from everywhere**

Tap the infinite button in the Timescape™ application and smart filter each category of communication by person. For example, when viewing a text message from a friend in Timescape™, tap the infinite button to view a list of all chat messages with that friend.

## Sony Ericsson Sync

**Your mobile life on the web**

Synchronise your phone data using Sony Ericsson Sync so that you always have a backup. While you're at it, match your phone contacts with your Facebook™ contacts. All your synchronised phone data is right at your fingertips and in your account on www.sonyericsson.com.

## Sony Ericsson Local connectivity

**More control over your media**

Using Sony Ericsson Local connectivity, you can exercise more control over how media files get transferred and stored. For example, you can select MTP mode to transfer files if you want to limit the risk of data corruption or select MSC mode if you want to have more control over the data storage.

## Sony Ericsson Home screen application

**The place you call Home**

Customise your Home screen with widgets, shortcuts, folders, themes, wallpaper and other items. Where's best for you? Email top right? Music player bottom left? You decide. With four extensions to your Home screen, you've got plenty of space to put things where you want. Just remember to flick left or right to find them.

*\* Applications from the Android Market™ vary widely in size, from less than 100 KB for small utilities to 3-4 MB for full games, music player applications, or other major offerings. The average size, if a representative selection of useful and fun applications is selected, is about 1 MB. This means that, on average, more than 100 applications can be downloaded and used on your device without negatively impacting performance. With the ready availability of the Android Market™ application in the phone, it is also very easy to delete and later reinstall infrequently used applications.*

*\*\* **Note**: Some of the services mentioned above may not be available in all markets.*

# Positioning – location based services

Supported standards:

- OMA Secure User Plane Location (SUPL) v1.0

- 3GPP™ Control Plane location (incl. Emergency location)

- Qualcomm® GPSOneXtra™

Supported satellite systems:

GPS

GLONASS*

*  *NOTE: GPS and GLONASS are used together to calculate the position. With both systems active, the accuracy and robustness of the positioning is better in most conditions. The usage of GLONASS as an additional system is transparent both to users and developers, and the benefits are automatically available to applications currently using the Satellite Positioning API ("GPS Provider" in Android terminology).*
