## TECHNOLOGY & BENEFITS

### VIDEO

**ColorStream Pro® Component Video Outputs** - These outputs allow the video signal to be sent from the DVD player to a component video equipped interlaced or progressive scan TV. When this connection is utilized with today's HD-compatible sets, typical NTSC artifacts-like video noise, dot crawl, and flicker-are virtually eliminated, resulting in a low-noise, highly detailed picture with unequaled color purity.

**DivX® Home Theater Certified** DivX Home Theater Certified allows playback of DivX (.div/.dvix), AVI and MPEG4 (.ASF) compressed files downloaded from the internet from a personal computer and stored on a CD-R/-RW. The support extends to full version of DivX 3.11, 4.12 and 5x as well as DivX PRO, with video resolutions of 720 x 480 @30 fps and 720 x 576 @25 fps. Audio support for a multitude of formats including: MP3, AC-3 (2 ch and 5.1 ch), WMA, LCPM, ADPCM and Ogg Vorbis.

**Digital Cinema Progressive (3:2 Pulldown)** - Delivers the smoothest, most film-like images to any progressive scan television, such as an HD-compatible one, and ensures maximum resolution.

**JPEG Viewer** - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

### AUDIO

**WMA & MP3 Playback** - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats are compatible with the DVD player.

**Coaxial Dolby® Digital and DTS® Surround Sound Output** - Use the single RCA-type jack to send signature multi-channel audio to an audio/video receiver with a compatible input.

**Virtual Surround Sound** - Provides a simulated surround sound effect when using two stereo speakers; convenient when playing DVD films with home theaters not equipped with multi-channel playback compatibility.

### CONVENIENCE

**Digital Picture Zoom** - This interactive DVD feature allows the user to select an area of the picture to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.

**Screen Saver** - The player can be set to automatically go into a screen saver mode after several minutes of inactivity. While in this mode, the Toshiba DVD logo appears and "ping-pongs" across the screen. Many movies will display the main movie menu indefinitely after the movie has ended. If left onscreen for a prolonged period, burn-in on the TV screen may result without this feature.
