**PixelPure 3G™** - *PixelPure 3G™ has high 14-bit internal digital video processing for accurate 12-bit output, and is therefore capable of producing an amazing 4,096 levels of gradation for a smooth, natural picture without image banding.*

*Superior processing creates a superior picture, and REGZA LCD TVs with PixelPure 3G set themselves apart with incredibly deep, sharp, and natural images, for home theater beyond your imagination.*

**DynaLight™ Back-Light Control** - *DynaLight utilizes advanced PixelPure histogram image processing to monitor the brightness level of each video frame, and automatically adjusts the backlight intensity based on the image content.*

*Precise signal analysis allows for 256 levels of backlight control. This creates seamless transitions, and a Dynamic contrast that is up to 5X that of the original panel contrast.*

*The result is a considerably deeper black level for increased detail and depth. All 2007 REGZA models include DynaLight to create superior lifelike images, even in low light environments.*

**High Gloss Black Cabinetry** - *High gloss black cosmetics complement the set and incorporate the slim SoundStrip™ speaker system, for rich full sound from a compact cabinet.*
