**Q1: I inserted the TEW-623PI CD-ROM into my computer's CD-ROM Drive and the installation menu does not appear automatically. What should I do?**

**A1:** If the installation menu does not appear automatically, click Start, click Run, and type D:\Autorun.exe where "D" in "D:\Autorun.exe" is the letter assigned to your computer's CD-ROM Drive. And then click OK to start the installation.

**Q2: I completed all the steps in the quick installation guide, but my card is not connecting to my access point. What should I do?**

**A2:** You should first verify that the Network Name (SSID) matches your wireless router or access point's SSID. If they already match, you should check your TCP/IP properties to ensure that Obtain an IP Address Automatically is selected. Refer to your Windows User's Manual if you are unable to locate your TCP/IP properties.

**Q3: Windows is unable to recognize my hardware. What should I do?**

**A3:** Make sure your computer meets the minimum requirements as specified in Section 1 of this quick installation guide. Also, you must install the wireless configuration utility BEFORE you physically install your network card. Lastly, you may consider moving the card to a different PC Card Slot.

**Q4: I cannot open the wireless configuration utility. What should I do?**

**A4:** Access your device manager to make sure the adapter is installed properly. If you see a networking device with a yellow question mark or exclamation point, you will need to reinstall the device and/or the drivers. To access your device manager, right-click My Computer, click Properties, click the Hardware tab, and then click Device Manager.
