ULTRA

4-Port USB 2.0 Hub with AC Adapter

Great for Connecting Multiple High-Speed Peripherals to Your PC

The Ultra USB 2.0 High-Speed Hub has four ports that will connect multiple, high-performance USB Revision 2.0 High-Speed peripherals to the PC. Moreover, this product is fully backward compatible with the USB Revision 1.1 products; meaning, your previously invested USB 1.1 devices can continue to function as usual.

The USB 2.0 High-Speed Hub is fully compliant with the USB 2.0 specifications and permits you to connect up to a maximum of 127 USB devices to your PC through daisy-chain. Furthermore, with its increased bandwidth of 480Mpbs, this hub will allow you to connect devices that consume a great deal of bandwidth such as external storage devices, scanners, printers, DVD drives, CDRW drives, MO (Magneto-Optical) drives, and USB devices, etc.
