IMPORTANT SAFEGUARDS

When using this electric appliance basic safety precautions should apply including the following:

- Always read and follow all instructions.
- Switch off and unplug before fitting or removing tools and/or attachments, after use and before cleaning.
- This machine is not intended for use by young children without supervision.
- Avoid contact with moving parts and fitted attachments. To reduce the chances of bodily injury and/or damage to the stand mixer, keep hands, clothing, cooking utensils etc... away from the moving parts during operation.
- The use of attachments not recommended or sold by the manufacturer may cause fire, electric shock or injury.
- Do not use more than one attachment at a time.
- Do not exceed the maximum capacities listed in this use and care instructions.
- Do not use the machine if it is damaged or if the cord is damaged. Have the machine checked and serviced before resuming usage.
- When using an attachment make sure that you have read the safety instructions that come with that particular attachment.
- Do not use this product outside.
- To protect against the risk of electric shock do not put the power unit in water or other liquid.
- Remove beater from stand mixer before washing.
- Do not let cord hang over edge of table or counter.
- For residential use only.

SAVE THESE INSTRUCTIONS

NOTE: The maximum rating is based on the attachment that draws the greatest load. Other attachments may draw significantly less power.

BEFORE USING THE FIRST TIME

- Before using the machine for the first time, remove all attachments from their packaging.
- Hand wash the stainless steel "V" beater, stainless steel wire whip, and stainless steel dough hook and dry with a clean dry towel or they can be put in the dishwasher.

USES OF THE STANDARD ACCESSORIES

- Stainless steel "V" Beater- for making cakes, mashed potatoes, fillings, muffins and éclairs.
- Stainless Steel Whip- for soufflés, meringues, beating eggs, creams, batters and mousses. Not indented for heavy mixtures, such as creaming butter and sugar for cakes; this could damage the attachment.
- Stainless steel dough Hook- For yeast mixtures such as breads.
NOTE: Do not scrape side of bowl while mixer is in use.

ASSEMBLING THE VIKING PROFESSIONAL STAND MIXER

TO ATTACH STAINLESS STEEL MIXING BOWL

- Turn the head lift release lever counter-clockwise to release the head and raise until it locks.
- Place the mixing bowl into the bottom, pre-cut slots and turn clockwise to lock into base.
- To lower the mixer head: turn the head lift release lever counter-clockwise to release the head and slowly lower it until it locks.

TO INSERT AND REMOVE A STANDARD ACCESSORY (V-BEATER, STAINLESS STEEL WHIP, DOUGH HOOK)

- Turn the head lift release lever counter clockwise to release the head and raise until it locks.
- Place the tool in the tool receptacle and easily turn counter-clockwise until it stops; push the tool into the receptacle.
- To remove the tool, simply unscrew, clockwise.
- To lower the mixer head: turn the head lift release lever counter-clockwise to release the head and slowly lower it until it locks.

TO RAISE AND LOWER THE LEVER ACTION HEAD

- To raise the head: turn the head lift release lever counter-clockwise to release the head and raise it until it locks.
- To lower the mixer head: turn the head lift release lever counter-clockwise to release the head and slowly lower it until it locks.

TO MOVE STAND MIXER USING EXCLUSIVE EASY-GLIDE™ WHEELS

- Make sure head is locked in down position and stainless steel bowl is locked securely in place
- Lift up on front of mixer using bowl handle or mixer head
- Now easily move mixer to desired location

HELPFUL HINTS

- If necessary, switch unit off and scrape sides of bowl with spatula for best results.
- Eggs at room temperature are best for whisking and beating.
- Before whisking egg whites, make sure there is no grease or egg yolk on the whisk or bowl.
- Use cold ingredients when making pastries unless recipe states otherwise.

TROUBLESHOOTING – STANDARD ACCESSORIES

(the “V” Beater, whip, and dough hook attachments are pre set at the factory, but they can be adjusted if necessary)

- If the accessories (stainless steel whip or stainless steel V-beater) should knock against the bottom of the bowl or is not reaching the ingredients in the bottom of the bowl, you can adjust the height by:
 - Unplug stand mixer.
 - Raise the mixer head and insert the accessory.
 - Hold it, and loosen the nut as shown.
 - Lower the mixer head.
 - Adjust the height by turning the shaft. For ideal operation the stainless steel whip and stainless steel V-beater should be almost touching the bottom of the bowl.
 - Raise the head, hold the accessory in place and tighten the nut.
- Your mixer is fitted with an overload protection device and will stop if overloaded to protect the machine. In the unlikely event this happens:
 - Switch off and unplug the mixer.
 - Remove some of the ingredients to reduce the load, and allow the mixer to stand for a few minutes.
 - Plug in and reselect the speed. If the mixer does not restart immediately allow to stand for additional time.

HINTS FOR BREAD MAKING

- Never exceed the maximum capacities below, this may overload the machine.
 - If the machine begins to strain, switch off immediately and remove half of the ingredients in the bowl.
 - Ingredients mix best if you put the liquid ingredients in first.
- * **Note:** Maximum capacities reflect using white, All-purpose flour. If using stone ground or high-gluten flours; recipes will have to be adjusted as not to overload the mixer.

Maximum capacities*:	5 quart	7 quart
Flour weight	4 lbs	5 lbs
Cake mix	6 lbs	10 lbs
Egg whites	12	16

SPEED CONTROLS – MIXING/ATTACHMENTS

(These are recommended speeds. Adjust to performance as needed for your recipe. For best results turn speed control slowly to the proper speed.)

Note: All three power outlets are engaged when power knob is engaged.

STIRRING

The stirring speed is for combining things such as the dry ingredients in a cake, or the initial mixing of ingredients for bread dough. As a guide when making bread dough, the ingredients should be mixed on STIR for 45 seconds to 1 minute, and then the speed increased to 2 for additional 3 to 4 minutes.

2-4 – MIXING

The mixing speeds are great for combining the ingredients to mix items such as mashed potatoes; it also works great on batters that are thin or mostly liquid. This speed is for the colander/sieve and high-speed juice extractor attachments.

5-8 – BEATING

The beating speed is for finishing cake batter. This speed works with the food grinder/stuffer and also the pasta maker.

9-12 – CREAMING

The creaming speed is for creaming shortening and sugar, for making cookies or cakes, and frostings.

MAX – WHIPPING

The Whipping speed is for adding air to the mixture as in making meringues or custards. The whipping speed is also for making whipped cream. This speed can also be used for the high-speed blender attachment.

PULSE

This feature is used with the high-speed blender attachment. For a quick, controlled pulsing job. Hold on "P"; this will operate the blender on high-speed until released.

CLEANING AND SERVICE

- Always switch unit off and unplug before cleaning.
- Stand mixer may emit a pungent odor, especially when new. This is common with electric motors.
- When power knob is on all 3 power outlets are engaged.
- A little grease may appear at slow speed outlet when you first use it. This is normal, simply wipe them off if this should occur.
- Wipe power unit with a damp cloth, then dry.
- Never use abrasives or immerse unit in water.
- Wash bowl by hand, then dry thoroughly or place in dishwasher.
- Never use a wire brush, steel wool or bleach on your stainless steel bowl. Use vinegar and water to remove spotting or rainbow effects.
- Keep stainless steel bowl away from heat sources such as cooktops, ovens or microwaves.
- Wash stainless steel "V" Beater, stainless steel whip, and stainless steel dough hook by hand and dry thoroughly, or may be washed in dishwasher.
- Wash pouring shield by hand and dry thoroughly.
