HOW TO USE THE GLUE GUN:

- 1: Plug in gun. Load the glue sticks into the back of the gun.
- 2: Press trigger several times until the glue stick is firmly set into the inner tube.
- 3: Allow the glue gun to warm up for approximately 5 minutes.
- 4: Squeeze trigger until glue flows from the nozzle.
- 5: Glue need not be spread. Press surfaces together within 15 seconds. Use of clamps or other holding devices is not necessary. Clean surfaces for best bonding.
- 6: Unplug glue gun when finished. No clean up required. Never pull the glue stick out the back of the gun. Use 3/16" glue sticks only.

CAUTION: Hot melt glue can be hot! Nozzle gets to operating temperature of 380°. If accident or contact should occur, do not try to remove the glue. Put in cold water immediately.
