UH-052XR
Operating Guide

Uniden

WARNING!

➤ The *UH052XR* is splashproof* only when both the antenna and the battery are properly attached.

➤ Do not operate the transmitter of any radio equipment unless all the Radio Frequency (RF) connectors are secured and any open connectors are properly terminated.

➤ Do not operate the transmitter of any radio equipment near electrical blasting caps or in an explosive atmosphere.

➤ Do not let children operate any transmitter-equipped radio equipment unless supervised.

➤ Have your radio equipment serviced by a qualified technician.

➤ Do not operate the transmitter of any radio equipment with the antenna touching or close to the eyes, face, or exposed body parts.

NICKEL-CADMIUM BATTERY PACK WARNING

➤ This equipment contains a Nickel-Cadmium Battery Pack.

➤ The Nickel-Cadmium Battery Pack contained in this equipment may explode if disposed of in a fire.

➤ Do not short-circuit the Battery Pack.

➤ Do not charge the Nickel-Cadmium Battery Pack used in this equipment in any charger other than the one designed to charge this Battery Pack. Using another charger may damage the Battery Pack or cause the Battery Pack to explode.

➤ Nickel-Cadmium batteries must be disposed of properly.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

The "Splashproof" characteristic of this device complies to US Military Standard 810E Method 506.3, Rain II

CONTENTS

INTRODUCTION

The *UH-052XR* is a splash proof, portable two-way UHF-CB radio. It is compact, rugged and fits easily in your hand. This hand held UHF radio will give you consistent, outstanding performance in virtually all conditions and situations. To ensure that you get the most from the *UH-052XR's* features, please read this operating guide carefully before using the unit.

FEATURES

➤ Splash proof*

➤ 40 Channels

➤ 5W/1W Switchable RF Output Power

➤ LCD Display

➤ Duplex Capability

➤ Group Scan

➤ Open Scan

➤ Monitor

➤ Built in Continuous Coded Squelch System (CTCSS)

➤ Busy Channel Lock Out Function

➤ Built in Voice Activated Function (VOX)

➤ LCD and Keypad Back Light

➤ Auto Power Save

➤ Battery Level Indicator

➤ Battery Charge Indicator

➤ Built in Keypad Lock

The "Splashproof" characteristic of this device complies to US Military Standard 810E Method 506.3, Rain II

TECHNICAL SUPPORT AND SERVICE

Should you find it desirable or necessary to service your *UH-052XR*, we suggest you contact the Uniden dealer where you purchase your radio. Your dealer will be able to assist you with the complete service information.

If you require service that is within the terms of your warranty, you should present a copy of your receipt to your dealer to authenticate your claim.

If you find it inconvenient to obtain service assistance from a dealer, please pack your radio in a suitable packaging that will provide adequate protection to your radio. Enclose a note describing the problem, a copy of your receipt, and send it prepaid to:

INCLUDED IN YOUR UH-052XR PACKAGE

UH-052XR

Antenna

AC Adaptor (AAD-052S)

Wrist Strap
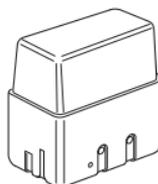

Battery BP-052 (7.2V, 950mAh)

Operating Guide
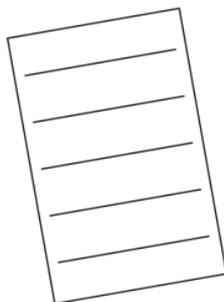

Product Registration Card

Note: If any of these items are missing from the box, contact your Uniden Dealer.

GETTING STARTED

ATTACHING THE ANTENNA

Attach the antenna to the *UH-052XR*
following direction as indicated below. Be
sure the antenna is firmly seated.
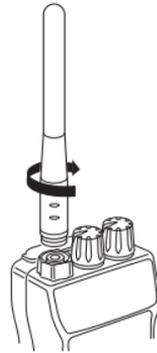

ATTACHING THE BATTERY PACK

1. Slide the battery pack onto the bottom
    of the radio.

2. Use a coin to turn the screw that
    connects the battery pack to the
    UH-052XR. Be sure the battery
    pack fits tightly against the
    UH-052XR body.
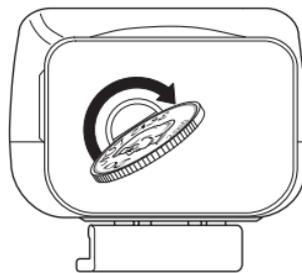

CHARGING THE BATTERY PACK

Your UHF CB radio is powered by a specially
designed nickel-cadmium battery pack.

Before operating the *UH-052XR*, charge the
battery pack for 15 hours using the ac
adaptor provided in this package.

AC-Power
Outlet
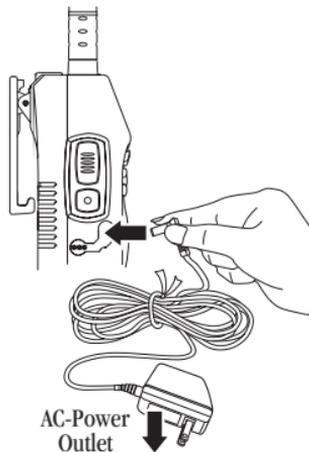

BATTERY CHARGE INDICATOR

When charging, the CHG icon appears on the display.
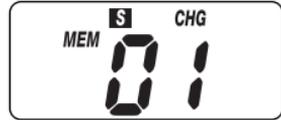

Note :

1. *Transmit Operation is disabled when* **UH-052XR** *is being charged.*

2. *A single tone is emitted by the radio and* **CHG** *is displayed to indicate that it has started charging.*

3. *When the battery is totally empty,* **CHG** *icon blinks or the display may totally disappear, the radio will be unable to receive any signal and all the keys are disabled. In this case, it is best to switch OFF the radio to help facilitate charging.*

   UH-052XR *will return to normal operation once enough power level is established.*

Note: If you are unable to charge a fully discharged battery, switch OFF the radio to avoid further discharging. When possible, recharge the batteries for the recommended time period.

OPERATION

➤ When you press any key (except PTT), a short tone sounds.

➤ See the Controls and Indicators page at the back of this operating guide for button and key operations.

POWER ON/OFF

To turn the unit **ON**, rotate the **[ON/OFF VOL]** clockwise until a "click" is heard. A channel number and battery level should appear on the display.

To turn the unit **OFF**, rotate the **[ON/OFF VOL]** knob counter-clockwise until a "click" is heard. The display will disappear.

VOLUME

Rotate the **[ON/OFF VOL]** knob clockwise or counter-clockwise to adjust speaker volume to desired listening level.

*Note: If no sound is heard, temporarily unmute the radio by briefly rotating the **[SQ]** until you hear the receiver's background noise. Rotate **[ON/OFF VOL]** to desired level. When finished, rotate **[SQ]** until noise disappears.*

SELECTING CHANNEL

Press [▲] or [▼] to select the desired channel.

Note: If you press and hold the [▲] or [▼], channel numbers will scroll rapidly.
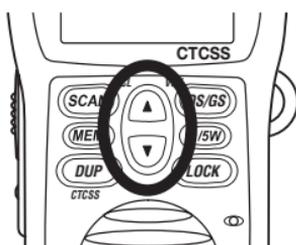

SQUELCH

The squelch is used to eliminate any annoying background noise when there are no signals present.

Think of squelch as a gate. Turn **[SQ]** fully clockwise. This raises the "Squelch Gate" so high that only the very strong signals can get through.

(Make sure to first select a channel not in use before setting the squelch in your UH-052XR UHF-CB radio.)
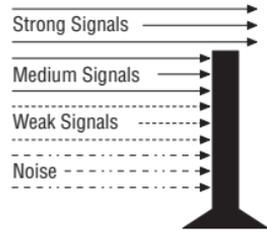

Turn **[SQ]** fully counter clockwise until you hear a hiss. This opens the "Squelch Gate" so that everything gets through - noise, weak signal, and strong signals.
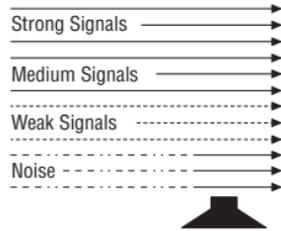

To set the "Squelch Gate" to the desired level, turn **[SQ]** counter-clockwise until you hear noise. Then turn the **[SQ]** clockwise just until the noise stopped. Now only the desired signal can get through.
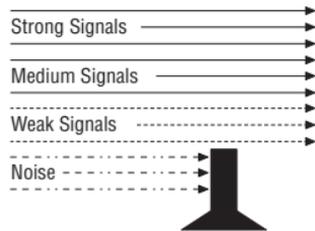

Note: If an incoming signal is very weak there is a possibility that you will have a choppy or broken reception, due to the sensitivity of the squelch. In this case, simply rotate the **[SQ]** *clockwise until the weak signal is heard clearly.*
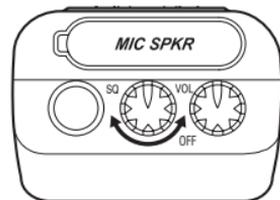

TO TRANSMIT AND RECEIVE

The *UH-052XR* uses the 40 UHF-CB Channels. For your reference a list of the available channels and corresponding frequencies is printed at the end of this manual.

1. The maximum RF transmit power of *UH-052XR* is 5 watts.

   To switch to low power, press the **[1/5W]**. **LOW** appears on the LCD.

   To switch back to higher power, press the **[1/5W]** again. **LOW** indicator disappears from the LCD.
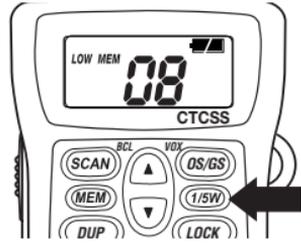

2. Before you transmit, listen for activity on the selected channel.

3. When the channel is clear, press and hold the **[PTT]** to transmit. **TX** appears on the LCD.
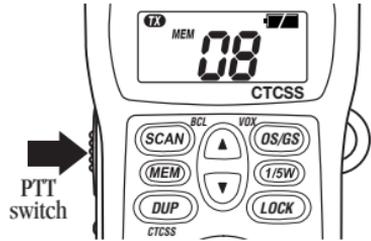

Hold the radio with microphone approximately two inches in front of your mouth with the antenna at approximately 45˚ angle away from your head. Speak in a clear, normal conversational voice.

4. When you have finished speaking, release the **[PTT]** and listen for a response. **TX** indicator then disappears on the LCD.

   The display shows **BUSY** when a transmission is being received by your radio.

8

USING A REPEATER CHANNEL

UHF CB Repeaters are used to retransmit or relay your signal. Repeaters will extend the range of your radio and overcome the shielding effect caused by solid obstructions.

In normal Simplex operation, your radio transmits on one particular frequency and receives on that same frequency. If there is a barrier (i.e. a Tall Building) that partially blocks your transmitted signal, the possibility of the other radio receiving the signal is very slim. Valleys, metallic structures, etc., tend to act as a screen between radios.

Standard Operation without the aid of a Repeater Station

Operation with the aid of a Repeater
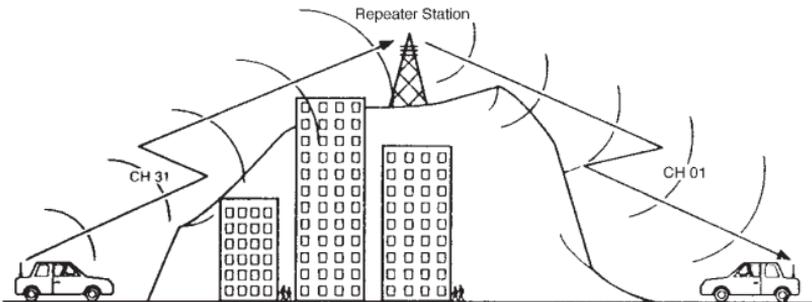

With Duplex operation, the signal coming from your radio is received by the Repeater station and then re-transmitted at the same time on another channel.

Your *UH-052XR* is designed with duplex capability on Channels 1 to 8. When any of these channels are set to operate in duplex mode during transmission, the *UH-052XR* automatically sends the signal at a frequency 30 channels above the original in order to access the repeater station. After transmitting, the radio reverts back to its original operating frequency.

For example:

1. CH01 is on Duplex Mode

   - will Receive on CH01 but Transmit on CH31

2. CH02 is on Duplex Mode

   - will Receive on CH02 but Transmit on CH32, etc....

   Refer to Duplex Operating Mode table on the last page.

TO OPERATE UH-052XR IN DUPLEX MODE

Eg. CH01 is being used in your area for repeater use.

Press **[DUP]** momentarily. The **DUP** icon appears.

Press **[DUP]** again to deactivate the duplex operation. *UH-052XR* will return to simplex operation.
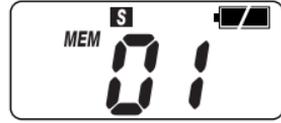

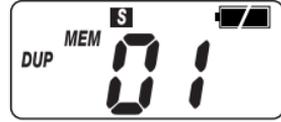

SCANNING

The *UH-052XR* has two types of scanning; Open Scanning (OS) and Group Scanning (GS), giving you flexibility and allowing you to use the radio more effectively.

Scanning allows you to search for active channels programmed in the OS or GS memory.

To initiate scanning,

1. Assuming the unit is on CH17 when switched on.

2. Press **[SCAN]** and scanning starts. Scan icon flashes during scanning
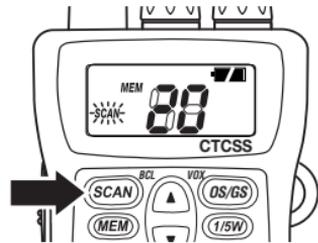

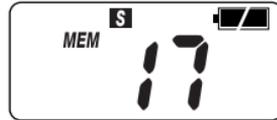

1. Open Scan (OS) Mode (the absence of GS icon indicates that the unit is on OS mode)

Allows continuous scanning of channels stored in the Open Scan (OS) memory. If an active channel is found, scanning will stop on that channel.

Note: The factory has preprogrammed all the 40 UHF channels into the Open Scan channel memory. However, you can change or customise the channels by following the steps on programming Scan Channels on page 12.

Example. CH40 becomes active

If the received signal cease, the unit will wait for at least 3 seconds for the signal to return, otherwise scanning resumes.

To skip the active channel, press **[MEM]** momentarily. Scanning resumes.

To deactivate SCAN, press the **[SCAN]** or **[PTT]**.

Note:

1. *If SCAN is deactivated while in an active channel, the UH-052XR will stay on that active channel. If no other channels are active, the UH-052XR will reinstate the starting channel.*

2. *Pressing* **[CTCSS]** *for 1.5 Secs. Will deactivate Open Scanning and activate CTCSS Scanning.*

3. *Pressing* **[OS/GS]** *will switch to Group Scanning.*

2. Group Scan (GS) Mode

Allows you to monitor a Priority Channel while scanning.

To use GS Mode Scanning, press the **[OS/GS]** key. **GS** icon appears on the display.

GS Scanning checks the Priority channel activity regularly.

If the Priority channel becomes active the radio will stay on that channel for as long as the signal is present. If the received signal ceases, Priority scanning continues after 3 seconds.

If scanning stops on a channel which is not a Priority Channel UH-052XR will continue monitoring the Priority Channel for activity while listening to the active one.

To deactivate SCAN, press the **[SCAN]** or **[PTT]**.

Note:

1. *If SCAN is deactivated while it is tuned to an active channel, the UH-052XR will stay on that active channel. If none of the channels are active, the UH-052XR will reinstate the Priority channel.*

2. *If GS Scanning is initiated when there are no channels programmed in GS memory, an error tone will be heard and scanning will not start.*

3. *Pressing* **[CTCSS]** *for 1.5 Secs. Will deactivate Group Scanning and activate CTCSS Scanning.*

4. *Pressing* **[OS/GS]** *will switch to Open Scanning.*
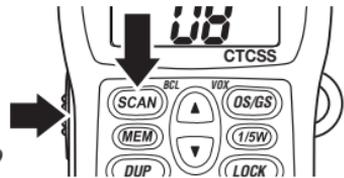

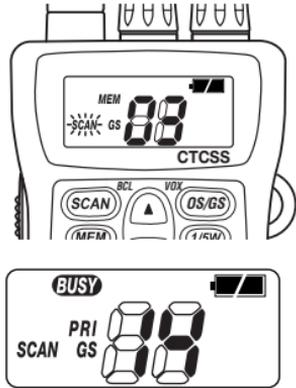

Programming Scan Channels

1. Select which Scanning Mode you wish to use on the channel

   OS or GS Mode

Note: OS is indicated by the absence of the GS icon

2. Select the channel you want to store by pressing [▲] or [▼]

3. Press and hold **[MEM]** for 1.5 secs. to store. **MEM** icon appears and a short tone beep is heard.

4. To remove the channel from Memory, press and hold **[MEM]** for 1.5 secs. once more. Two successive beeps are heard and the **MEM** icon disappears.
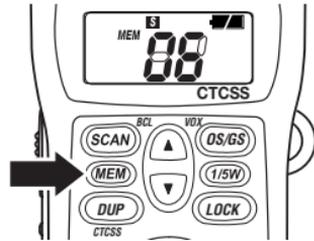

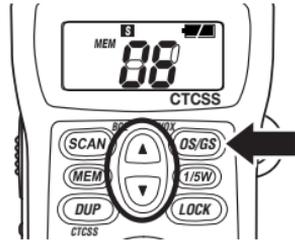

PRIORITY CHANNEL

The *Priority Channel* feature allows user to monitor one of 40 channels in the *UH-052XR*, monitoring it every 1.5secs during *Group Scanning*.

Choosing a *Priority Channel*

The starting channel, when *Group Scanning* is initiated, is always the *Priority Channel*. To change the priority channel setting while scanning, (eg. PRI Channel is CH17 (476.825 MHz))

a. press [▲], to select a higher channel (scanning pauses)

or

b. press [▼], to select a lower channel

DROP-OUT DELAY

While scanning, the *UH-052XR* stops at a busy channel and receives a transmission. When the received signal is over, the unit will wait for 3 seconds for the return of the signal, otherwise, the radio resumes scanning.

ADVANCED FEATURES

➤ **Continuous Tone Coded Squelch System** (CTCSS) is a feature that allows a group to talk to each other without hearing other users on the same channel.

NOTE : Uniden discourages the use of CTCSS feature until the Australian Communications Authority (ACA) grants the use of CTCSS on CB frequencies.

Programming CTCSS Code

1. Select a desired channel to be used with **CTCSS**.

2. Press and hold **[CTCSS]** for 1.5 secs. CTCSS icon blinks.

3. Press [▲] or [▼] to select the desired CTCSS code.

4. Press **[CTCSS]** to save the selected code. **CTCSS** icon stops blinking.

NOTE: UH-052XR will return to standby mode after 10 secs. of no activity. CTCSS code can be programmed on every channel. There are 38 available CTCSS tone per channel.
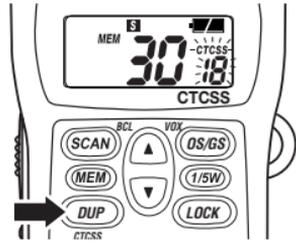

CTCSS Scan Operation

1. Press **[SCAN]** to start scanning (GS or OS) mode.

2. Press and hold **[CTCSS]** to change to CTCSS scan mode.

3. During scanning and a signal is sensed on a CTCSS CH, the *UH-052XR* stops for about 400msecs (decode time) to decode the CTCSS code. If there is no code or the receive code does not match the one programmed on the unit, the unit resumes scanning.

On the example below only radio 1 and 9 can communicate or hear each other because they are using the same or common CTCSS code.
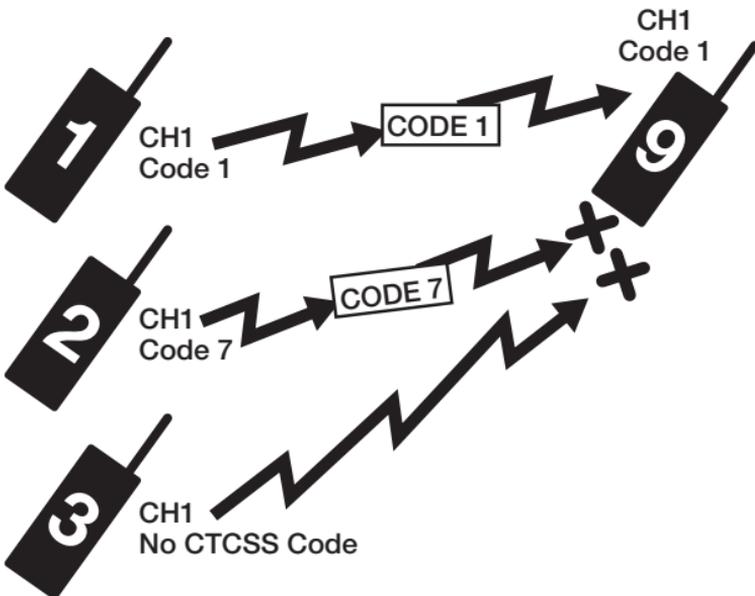

➤ **Built-in Voice Activated Circuit** (VOX) feature enables user to transmit automatically by speaking on the microphone of the VOX headset (not supplied) without pressing the PTT switch.

NOTE: VOX feature will not work without the Headset Microphone. Built in [PTT] of UH-052XR is temporarily disabled, however accidental pressing of [PTT] will cause the unit to transmit briefly.

To activate VOX

1. Press and hold **[VOX]** for 1.5 secs. **"VOX"** icon blinks.

2. Press either [▲] or [▼] within 10 secs. to select the desired VOX level number (9 with the lowest sensitivity to 1 with the highest sensitivity).

3. Press **[VOX]** to save the selected level. **"VOX"** icon stops blinking.

4. Install VOX Headset (not supplied) to *UH-052XR*
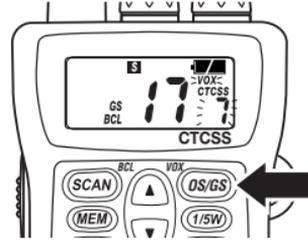

Installing VOX Headset

1. Remove SPEAKER MIC COVER.

2. Attach VOX headset mic by pushing down jack through to the speaker mic port of *UH-052XR* until it sits firmly on the radio.

Cover

Headset Mic
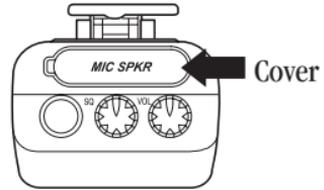

To De-activate VOX

1. Remove VOX Headset from *UH-052XR*.

2. Press and hold **[VOX]** for 1.5 secs until "VOX" blinks

3. Press [▼] repeatedly and until " o^F " displayed

4. Press **[VOX]** to save the setting. "VOX" icon disappears.

Note: changing the VOX sensitivity setting to " o^F " without removing the microphone will cause the unit to transmit continuously.

14

➤ POWER SAVE

Battery Save feature extends the battery life
by switching the receiver circuit power ON
and OFF. This feature automatically activates
during stand by mode (RX mode without
signal). A flashing $\underset{\cdot}{\overset{\cdot}{S}}$ icon will appear on

the display when the battery save feature is ON. It turns OFF
automatically when a signal is present, and activates again 3secs after
channel inactivity.
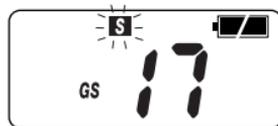

➤ BACK LIGHTING

The Liquid Crystal Display (LCD) and function keys are backlit for easy
viewing at night or in low light situations. The back lighting automatically
switches ON every time a key (except PTT) is pressed. It turns OFF 5secs
after the last key is pressed.

➤ SPLASHPROOF

the *UH-052XR* provides splashproof construction for protection against
tough weather conditions. The splashproof characteristic of this device
complies to US Military Standard 810E Method 506.3, Rain II.

➤ KEYPAD LOCK

To prevent accidental entries, you can
lock the keypad.

Press and hold the **[LOCK]** button until it
beeps to activate Key Lock. ☞ icon
appears.
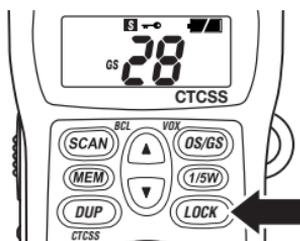

To unlock the keypad, press and hold the
[LOCK] button again. ☞ icon disappears.

Note: When the Key Lock is active, a warning beep will be heard if you
attempt to press the keys.

➤ SENDING CALL TONES

The *UH-052XR* is equipped with two types of tones that user can use to
alert other users or identify yourself prior to transmission. You can also
apply the signal at the end of the transmission.

To use the Call Tones,

Press [▲] (for call tone A) or [▼] (for
call tone B) while pressing the **[PTT]**
switch. Call tone will be transmitted for 3
seconds. (You will also hear this tone
from your radio as well).
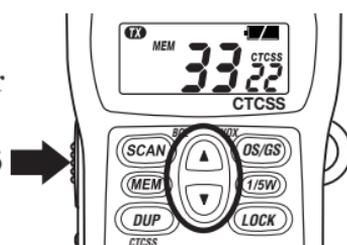

➤ BUSY CHANNEL LOCK-OUT(BCL)

This feature prevents accidental transmission on a busy channel.

This is recommended on channels where CTCSS is being used. If the channel is "active" and the signal is coming from a non or different CTCSS code user the BCL feature will prevent you from transmitting.

To activate BCL

Press and hold **[BCL]** for 1.5 secs until **"BCL"** appears on display.

To De-activate BCL

Press and hold **[BCL]** for 1.5 secs. until "BCL" disappears from the display.
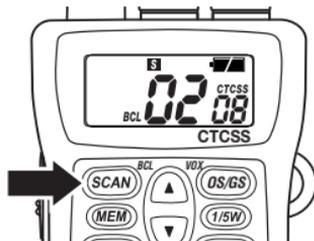

➤ MONITOR

This feature enables users to listen in for weak signals on the current channel at the press of a button.

To use monitor,

- For brief listening, press **[MON]**

- For continuous listening. Press and hold **[MON]** for 2 sec. A two tone beep will be heard and the receiver circuit will stay open letting in both the noise & weak signals.

- Display shows **MON** and **BUSY** icons.

- To return to normal receive mode press **[MON]**, **[PTT] [▲]** or **[▼]**.
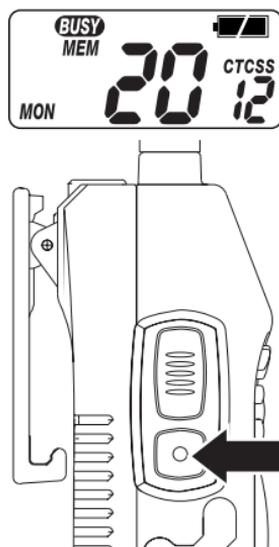

➤ **BATTERY LEVEL DISPLAY**

The ▆▇ icon in the top right hand corner of the screen indicates the
UH-052XR current battery voltage level at all times. The battery level is
displayed in 4 levels:

LEVEL 4
Battery 100% full

LEVEL 3
Battery approx 50% capacity
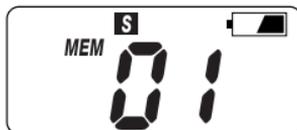

LEVEL 2
Low Battery

LEVEL 1 (flashing)
Empty Battery
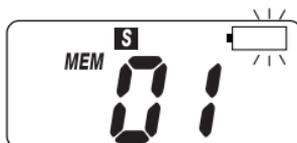

Note:
When **[PTT]** SW is pressed at
Level Empty, battery icon and
channel number will flash

WARRANTY

UNIDEN UH-052XR UHF CB RADIO
Australian One Year Warranty

*Note: Please keep your sales docket as it provides evidence of
           warranty.*

Warrantor: Uniden Australia Pty Limited ACN 001 865 498

Elements of Warranty: Uniden warrants to the original retail owner for the
duration of this warranty, its UH-052XR UHF CB Transreceiver Radio (hereinafter
referred to as the Product) to be free from defects in materials and craftsmanship
with only the limitations or exclusions set out below.

Warranty Duration: This warranty to the original retail owner only, shall
terminate and be of no further effect ONE (1) Year after the date of original retail
sale. This warranty will be deemed invalid if the product is; (A) Damaged or not
maintained as reasonable and necessary, (B) Modified, altered or used as part of
any conversion kits, subassemblies, or any configurations not sold by Uniden, (C)
Improperly installed, (D) Repaired by someone other than an authorised Uniden
Repair Agent for a defect or malfunction covered by this warranty, (E) Used in
conjunction with any equipment or parts or as part of a system not
manufactured by Uniden, (F) Installed, programmed or serviced by anyone other
than an authorised Uniden Repair Agent, or (G) Where the Serial Number label
of the product has been removed or damaged beyond recognition.

Parts Covered: This warranty covers for 1 year, the UHF CB Transceiver Unit
only. All accessories: AC Adaptor, Wrist Strap, Battery and Antenna are covered
for 90 days.

Statement of Remedy: In the event that the product does not conform to this
warranty at any time while this warranty is in effect, the warrantor at its
discretion, will repair the defect or replace the product and return it to you
without charge for parts and service. This warranty does not cover provide for
the reimbursement or payment of incidental or consequential damages.

Warranty card: If a warranty card has been included with this product, please
fill it in and return it to us within 14 days of purchase. Your name and serial
number of the product will then be registered in our database and this will help
us process your claim with greater speed and efficiency should you require
warranty service.

Procedure for obtaining performance or warranty: In the event that the
Product does not conform to this warranty, the Product should be shipped or
delivered, freight prepaid, with evidence of original purchase, (eg. a copy of the
sales docket, to the warrantor at:
