7

Reverse side

1. Battery compartment: Included recharged lithium battery.
2. Bracket: A small shelf or shelves to support the MP5 player.

2. Charging the Battery

The player uses emovable and rechargeable high capacity lithium battery. The battery can be recharged directly through the power adaptor.

8

1. When the player is out of power, recharge the battery with the power adaptor for about 3 hours. The LED indicator is red while recharging, after the battery is fully recharged the indiator turns out.

2. Please note the specifications of the power supply: output voltage: 5V, output current: 2A.

Note:

1. Damage incurred by using other power adaptor that does not come with this device is not covered by our warranty.
2. For the initial use, please fully charge the battery.

3. If the screen of "Low Battery" appears repeatedly, this means the power is insufficient, please recharge the battery; if "The battery is critical low! Please plug in AC adapter." appears on the screen, the device turns off automatically.

4. When power is insufficient, please turn off the device first and then plug in AC adaptor to recharge the battery.

5. Personal data will be retained even the device is out of power, but please remember to turn off the power before taking out the battery.

9

3. Connecting to your PC

The player can act as a standard USB removable storage disk in Windows. Files can be transferred between the PC and the player.

3.1 Use of the player as Removable Storage Space

1. Start your computer.

2. Turn on the aigo P882 player, insert the smaller end of the USB line into the USB port of the aigo P882 player and insert the other end into the USB port of PC. An icon should appear indicating that aigo P882 is connected.

3. Double click "My Computer", and you will see a new "Removable disk" icon, representing the built-in hard drive of the aigo P882 player.

Note: When using the player for the first time, the system will spend some time on searching for an aigo P882 driver, please wait patiently. In Windows 2000/XP, an icon will appear in the bottom right in the taskbar, which represents the aigo P882 removable storage.

4. Aigo P882 can be used as removable storage to copy, modify and delete files.

10

aigo

Note: Never remove the USB cord while the computer is reading data, as your data will be lost.

3.2 Disconnecting from your PC

After using your aigo P882, please take the following steps to remove the mass storage device.

Windows 2000/XP: Click the icon on the bottom right of the screen once and a notice "Safely remove USB Storage Device" will appear then click again, indicating the USB has been removed safely.

4. System requirements

- CPU: Pentium III 500 MHz or above
- OS: Windows 2000 or Windows XP (only Windows XP can be used for DRM-MTP)
- Software requirement: Internet Explorer 4.0 or above
- Hard Disk Space: Greater thanthan 100MB
- RAM: 128MB RAM or more
- Transmission port: USB 2.0/1.1
- CD-ROM driver

Note: There is a built-in speaker in aigo P882.

11

Chapter II Operation

2-1. Precautions

➢ Press and hold the the "POWER" button for three seconds to turn the machine on and press one second to turn the machine off.

➢ According to the resolution of the video file, there will be some difference in the size of the video displayed.

➢ Since the display panel useshighly luminous CCFL (Cold Cathode Fluorescent Lamp) back-light source, mild heat from the display surface is natural.

➢ When connecting the player to your computer via the USB 2.0 port, it is suggested you connect the player to a power source via the adaptor.

➢ As there are precise electronic components inside the player, please do not disassemble.

➢ If the battery icon indicates low power, charge for at least 3 hours to ensure the battery is fully charged. If multimedia video files are played while charging, more time is needed.

12

![aigo logo]

> The aigo P882 couldn't play the files including Error code or beyond the supported files. If insist to play may cause shut down abnormally to restart the unit.

> Aigo P882 is supported by most USB storage, but not supported card reader.

Note：
Please do not plug out the USB cable while connecting preventing from data loss.

3.If use this function first time（all new WMP10）, the message appears, recommend to select first option to search the available files to transfer with aigo P882 and select "Next"

43

4. After searching, numbers of media files(it differs from every user) have added to media box and select "Next".

5. The computer can identify the aigo P882 as the mass storage (the message only appears on the first use) and select finish to confirm.

44

6.Media files automatically
synchronize to aigo P882
storage and select the left
side ⊟ 🔄 P882 to check.

7. Since second time use,
please select the second
option to select desired
media files to synchronize.

45

8. Click right mouse to add the synchronized files or drag the media files to list.

9. Synchronized media files would be listed on the right list, select ![button] to synchronize.

10. The synchronized precentage appears on the screen.

11. After operation, plugging out USB cable directly and aigo P882 returns to setting menu.

46

Chapter III Troubleshoting

Q: The aigo P882 player is not responding to the Power button, why?

1. Before using for the first time, please check whether the "HOLD" button has been pushed to the right side (unlocked state). The factory default is in a locked state where all functional buttons will not respond. This guarantees safety of the player during transportation. Push "HOLD" to the right side, and press the POWER ON/OFF button to turn on the player.

2. Press and hold "POWER ON/OFF" button for 3 seconds, the player should turn on.

Q: Is it necessary to charge the battery before using the aigo P882?

Yes. The battery must be charged for at least 10 hours before the first use.

Q: What is MPEG-4?

MPEG-4 is a new multi-media format. It has been widely applied in portable multimedia devices and internet file transfer processes, etc. The advanced MPEG-4 compression technology compresses files to a greater

47

degree by an *object-oriented calculation method* that still guarantees the picture and sound quality of the original video files. This method ensures fidelity even when compressing the file to less than 1/10 of its original size.

Q: How can I convert DVDs to MPEG-4 files?

DVDs are MPEG-1/ MPGE-2 files. Due to their large volume, it is difficult to save them on large-capacity hard disks for portable video display. However, in the current market, many producers have developed convenient and easy-to-use conversion software, ie.MPEG-4 coding software. Put your DVD into the DVD-ROM drive select MPEG-4 file specifications and the software automatically converts the videos into a MPEG-4 file.

We recommend Dr DivX software for users of aigo P882. The software is developed by DivXNetworks company and maintains the quality and compatibility of converted files. (www.divx.com)

Q: Can aigo P882 players play MPEG-2 files?

Yes, they can. However, MPEG-1/MPEG-2 video files are very large. Only 6-8 files can be stored on the aigo 80GB hard drive. Aigo P882 is designed for portable video display and hence uses, they adopt advanced MPEG-4 decoding and coding technologies, allowing 60 to 80 MPEG-4 compressed video files to be stored. Aigo 882 users are recommended to use MPEG-4 files,

48

in order to take full advantage of the player.

Q: What is the format of sound files recorded by the aigo P882?

aigo P882 players record sound in the WMA(*.WMA) and WAV (*.WAV) format. For details, please refer to Technical specifications of aigo P882.

Q: Why is the sound recording not working?

In order to prevent overly-short audio files or cutting off of the recording because of insufficient hard disk space,audio recording rests when there is less less than 200MB of hard drive space.

Q: What is the maximum length for a recorded audio file?

The player can record a high quality sound file of 2 hours.

Q: Are there any restrictions on file size for transfer to the aigo P882?

aigo P882 uses FAT32 file storage, it is recommended that you limit each file to 4GB.

Q: How long does it take to charge the aigo P882?

The battery needs 3 hours to be fully charged. If you are playing multimedia while the player is charging, please charge for a longer period.

Q: How do I reset the aigo P882?

In case of system failure, use the end of a paper clip or a pen press the recessed Reset button found on the bottom of the player. The player should turn off.

Q: In case of low power why might the player behave abnormally?

As you use the player, the battery gradually ages and may cause the battery indicator to lose accuracy. You could try changing the battery or directly contacting our after-sale service staff.

Q: Under a normal situation, why can't I disconnect from the PC? "The universal storage device could not stopped at this time"continually appears.

Please exit any programs that may be accessing the player, including WINDOWS Content Server. If it still doesn't work, please close all programs and try to disconnect the player after 20 seconds. If it still fails, press the POWER button to turn off the player and

50

disconnect the USB cable.

Q: Why can't I connect the player to an un-powered removable hard drive via USB?

Hard drives require a large amount of electric current. The aigo P882 only comes with a 5V power supply and hence can not be connected to a hard drive.

Q: How can I create E-books?

The player supports TXT text files, so you only need to download the text files to the E-book directory in the player. If you want to view the content of a website in the aigo P882 player, you need to save the website as TXT file.

Q: Why can't I connect the player via USB when the power is low?

The USB connection consumes some energy, detects low power and kicks in its automatic restart function.

Q: The removable disk is connected to the computer but I can't find the movable disk, why?

1. Ensure that the player aigo P882 is on when connecting to the computer. If it is OFF, turn it ON.

51

The player should enter the USB interface.

2. Make sure that the USB connection is secure. Otherwise, it is possible due to that the USB port has not been enabled in the BIOS settings in the system. Restart your computer and enter the BIOS settings and enable the USB port.

3. Check that the USB cable is functioning properly by attaching it to another device.

4. Check that theUSB driver has been installed in Win98. If not, install it.

Q: Do videl files support subtitles?

Yes. Subtitle files (.SRT) and corresponding video files of the same name are stored in the same directory. For example, for a movie titled"XXX.rmvb", the player would first try to find "XXX.srt". If these files can not found, subtitles for this video can not be used.

52

aigo.

Chapter IV Appendix

Technical Specifications

Index	*Parameters*
Dimensions	125mm(L)x77mm(W)x29.9mm(H)
Weight	304g±10% (with battery)
LCD display	4.3 inches TFT LCD, 480X272 pixels
Power supply	Rechargeable lithium cell. *unloadable at 2300 mAh*
HDD	2.5'' HDD, 80GB-160GB
Transmit connector	Mini-USB connector USB2.0 compatible with 1.1, USB OTG
Audio output	Earphone output: 32 Ω left 40mW ＋right 40mW: (maximum volume)
	Built-in loudspeaker: 8 Ω 0.5 W x2
Video output	Supported video output: PAL，NTSC
	Composite video output
Temperature scope	Operating temperature: 0℃~40℃
	Storage: -20℃~70℃
Language	Simplify Chinese / Traditional Chinese / English
Playing Time	Audio：MP3,128K,about 4 hours（Mpeg1.0 layer3，44KHz,128kbps，one file repreating，volume 50%，earpone，screen off，other default）

53

	Video:RM/RMVB, about 2.5 hours,RMVB，480*272，587kbps，24fps，one file repeating，volume 50%，earphone，other default ）
OperatingSystem	Computer configuration：Windows2000 / XP (only XP supportsDRM transfer)
	File system：FAT32 file system

Note：The design or format may be changed without notice.

Memory explanation: The HDD of this device is composed by 2GB and 72.5GB. The memory of 2GB is used by system and program and the other 72.5GB is for user. 10GB of 72.5GB is preserved DRM for MTP usage. User can view this space in the MTP of setting and put music or video files in this space.

72.5+2 = 74.5GB = 76288MB = 78118912KB = 79993765888B about 80G

The bios system is saved in HDD so user can't format by himself.

54

Supported Files

Item	*Description*		
Audio play	File types		MP3, WAV, WMA, OGG
	Bit rate		32Kbps~320 Kbps
Video play	File type	DAT	Video type: MPEG1
			Audio type: MP3, AC3
			Video frame rate: 30 fps
			Resolution rate:352x288
			Code flow: 1.5Mbps
		AVI	Video type : MPEG4 SP, ASP, DivX4.x, DivX5.x, DivX6.x, Xvid
			Audio type: MP3, AC3
			Video frame rate: 30 fps
			Resolution rate: 720x480
			Code flow: 8Mbps
		RM / RMVB	Video type: RV 30, 40
			Audio type: RA 10, 20
			Video frame rate: 30 fps
			Resolution rate: 720x480
			Code flow: 1.5Mbps
		WMV9	Video type: WMV9
			Audio type: WMA
			Video frame rate: 30 fps
			Resolution rate: 720x480
			Code flow: 7Mbps
		MPG2	Video type: MPG2
			Audio type: MP@ML
			Video frame rate: 30 fps
			Resolution rate: 720x480
			Code flow: 8Mbps

55

	Subtitle	*.SRT format
Photos	File types	JPEG, GIF, BMP, PNG, TIF
	Resolution	Max support 8Mpixel (24bit)
Recording	File types	WAV (8KHz, 32Kbps)
		WMA (16KHz, 64Kbps)
E-book	File types	TXT (Max 2MB)
		PDF (Max 5MB)

Packing list

Thank you for buying an aigo P882

When you open the package, please check for the following items:

Serial No.	Item Name	Quantity
1	Player	1
2	AV-out cable	1
3	USB cable	1
4	USB-OTG adaptor	1
5	Power adaptor	1
6	Earphones	1
7	LINE IN cable	1
8	Li-ion battery	1
9	User Manual	1
