

8x8 DVI-D Matrix Switches

A high-performance matrix switch for multiple video and audio signals.

Switch manually, from a remote control unit,
or via a simple-to-use RS-232 connection
and your computer.

FCC and Industry Canada Statements

Federal Communications Commission and Industry Canada Radio Frequency Interference Statements

This equipment generates, uses, and can radiate radio-frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio communication. It has been tested and found to comply with the limits for a Class A computing device in accordance with the specifications in Subpart B of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This digital apparatus does not exceed the Class A limits for radio noise emission from digital apparatus set out in the Radio Interference Regulation of Industry Canada.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique publié par Industrie Canada.

We're here to help! If you have any questions about your application or our products, contact Black Box Tech Support at **724-746-5500** or go to **blackbox.com** and click on "Talk to Black Box." You'll be live with one of our technical experts in less than 30 seconds.

Instrucciones de Seguridad (Normas Oficiales Mexicanas Electrical Safety Statement)

1. Todas las instrucciones de seguridad y operación deberán ser leídas antes de que el aparato eléctrico sea operado.
2. Las instrucciones de seguridad y operación deberán ser guardadas para referencia futura.
3. Todas las advertencias en el aparato eléctrico y en sus instrucciones de operación deben ser respetadas.
4. Todas las instrucciones de operación y uso deben ser seguidas.
5. El aparato eléctrico no deberá ser usado cerca del agua—por ejemplo, cerca de la tina de baño, lavabo, sótano mojado o cerca de una alberca, etc.
6. El aparato eléctrico debe ser usado únicamente con carritos o pedestales que sean recomendados por el fabricante.
7. El aparato eléctrico debe ser montado a la pared o al techo sólo como sea recomendado por el fabricante.
8. Servicio—El usuario no debe intentar dar servicio al equipo eléctrico más allá a lo descrito en las instrucciones de operación. Todo otro servicio deberá ser referido a personal de servicio calificado.
9. El aparato eléctrico debe ser situado de tal manera que su posición no interfiera su uso. La colocación del aparato eléctrico sobre una cama, sofá, alfombra o superficie similar puede bloquea la ventilación, no se debe colocar en libreros o gabinetes que impidan el flujo de aire por los orificios de ventilación.
10. El equipo eléctrico debe ser situado fuera del alcance de fuentes de calor como radiadores, registros de calor, estufas u otros aparatos (incluyendo amplificadores) que producen calor.
11. El aparato eléctrico deberá ser conectado a una fuente de poder sólo del tipo descrito en el instructivo de operación, o como se indique en el aparato.
12. Precaución debe ser tomada de tal manera que la tierra física y la polarización del equipo no sea eliminada.
13. Los cables de la fuente de poder deben ser guiados de tal manera que no sean pisados ni pellizcados por objetos colocados sobre o contra ellos, poniendo particular atención a los contactos y receptáculos donde salen del aparato.
14. El equipo eléctrico debe ser limpiado únicamente de acuerdo a las recomendaciones del fabricante.
15. En caso de existir, una antena externa deberá ser localizada lejos de las líneas de energía.
16. El cable de corriente deberá ser desconectado del cuando el equipo no sea usado por un largo periodo de tiempo.
17. Cuidado debe ser tomado de tal manera que objetos líquidos no sean derramados sobre la cubierta u orificios de ventilación.
18. Servicio por personal calificado deberá ser provisto cuando:
 - A: El cable de poder o el contacto ha sido dañado; u
 - B: Objetos han caído o líquido ha sido derramado dentro del aparato; o
 - C: El aparato ha sido expuesto a la lluvia; o
 - D: El aparato parece no operar normalmente o muestra un cambio en su desempeño; o
 - E: El aparato ha sido tirado o su cubierta ha sido dañada.

Chapter 1: Specifications

1.0 Specifications

Specifications — Video

Bandwidth — 165 MHz, all digital

Clock Jitter — < 0.15 Tbit

Distance (Maximum) — Input: < 36 m, 1920 x 1200 @ 60 Hz;
Output: < 7 m, 1920 x 1200 @ 60 Hz

Error in DC Offset — 15 mV

Fall Time — < 0.3T bit (20–80%)

Gain — 0 dB

Input EDID — Default EDID

Transfer Delay (Maximum) — 5 nS (± 1 nS)

Maximum/Minimum Level — TMDS 2.9 V / 3.3 V

Resolution (Maximum) — 1920 x 1200 @ 60 Hz

Resistance — Video input and output: 50 ohms

Rise Time — < 0.3 Tbit (20–80%)

Signal Strength — TMDS +/- 0.4Vpp

Signal Type — DVI-D digital TMDS signal

Switching Speed — 200 ns (maximum)

Specifications — Audio (AVSW-DVI8X8 only)

CMRR — >75 dB @ 20 Hz – 20 kHz

Frequency — 20 Hz – 20 kHz

Gain — 0 dB

Gain Offset — ± 0.1 dB

Input Level (Maximum) — +19.5 dBu, balanced or unbalanced

Noise — 0.03% @ 1 kHz rating voltage

Output Level (Maximum) — +19.5 dBu, balanced or unbalanced

Resistance — Input: >10 k ohms balanced or unbalanced
Output: 50 ohms unbalanced, 100 ohms balanced

S/N — >90 dB

Signal Type — Stereo, balanced or unbalanced

Stereo Separation — >80 dB @ 1 kHz

Specifications — Control

Baud Rate and Protocol — Baud rate: 9600; data bits: 8; stop bits: 1; parity bit: none

Control Application — Switch 2.0

Serial Control Port — RS-232

Serial Control Poling Protocol — 2 = TX, 3 = RX, 5 = GND

Speed — Full/half-duplex 10/100M

Specifications — Physical

Connectors — (16) DVI-D F; (1) DB9 F; 1 RJ-45, (16) 3.8-mm screw connectors

MTBF — 30,000 hours

Operating Environment — Temperature: -4 to +158° F (-20 to +70° C)

Humidity: 10 to 90%

Power — Input: 100 – 240 VAC, 50/60 Hz, IEC 320

Size — 5.3"H x 10.2"W x 16.9"D (13.4 x 26 x 43 cm)

Weight — 9.3 lb. (4.2 kg)

Chapter 2: Safety

2.0 Safety

To ensure user safety, please comply with the following items during the installation, maintenance, and operation of the 8X8 DVI-D Matrix Switch.

- 1) The Matrix Switch must be in stable position. Use only the power supply that comes with unit. Using an unauthorized power supply may damage the unit.
- 2) Do not place the Matrix Switch near hot or cold surfaces or sources.
- 3) To avoid damage from overheating, make sure there is good ventilation, which is necessary to radiate the heat when operating the Matrix Switch.
- 4) The Matrix Switch should be turned off when it is not in use.
- 5) Do not attempt to remove the cover from the unit; high-voltage components inside could cause electric shock.
- 6) Do not splash any liquids or chemicals on or near the equipment.
- 7) Make sure all the cables are in good working condition; do not use cut or damaged cables.

NOTE: The operating instructions given in this user's manual can be used with other DVI Matrix Switch models from Black Box; however, for any maintenance information, consult the user's guide for those specific products.

3.0 Introduction

3.1 About the 8X8 DVI-D Matrix Switch

The 8X8 DVI-D Matrix Switch is a high-performance professional computer and audio signal switch that can be used for cross switching multiple computer and audio signals. Independent DVI and balance/unbalance I/O terminals enable each component signal to transmit and switch separately; this design can maximize the performance of both image and audio signal.

This Matrix Switch features flexible functionality and may be used in broadcast TV engineering, in multimedia meeting rooms, for big-screen display engineering, for television education, command control centers, or other fields. It provides a power-fail local protection function, LCD display, and A/V separate switching functions. It also has an adaptable compensation to extend the input distance to 70 feet. With the RS-232 interface, it can be used with a PC, a remote control system, or any other third-party control system devices.

Two versions of the 8X8 DVI-D Matrix Switch are available: the AVSW-DVI8X8 Matrix Switch with full audio capabilities, and the VSW-DVI8X8 Matrix Switch without audio.

3.2 What's Included:

- AVSW-DVI8X8 Matrix Switch with Audio or VSW-DVI8X8 Matrix Switch
- CD with application software
- Remote control unit
- Power supply cable
- RS-232 communication cable
- This user's manual

3.3 Front and Rear Views:

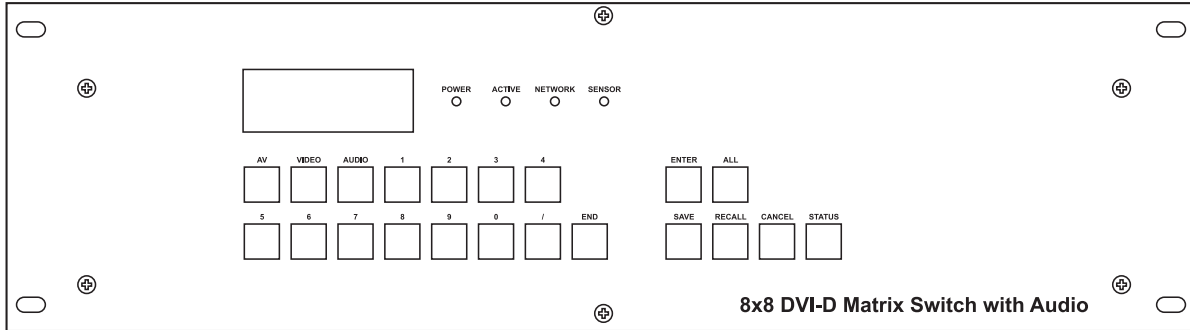

Figure 3-1. Front of the Matrix Switch

Figure 3-2. Back of the Matrix Switch

4.0 Installation

The 8X8 DVI-D Matrix Switch has a durable metal casing and can be stacked with other devices. It is also rackmountable and can be installed on a standard 19 inch rack. It is recommended to leave a 1U space between the units to allow easy access for cable installation.

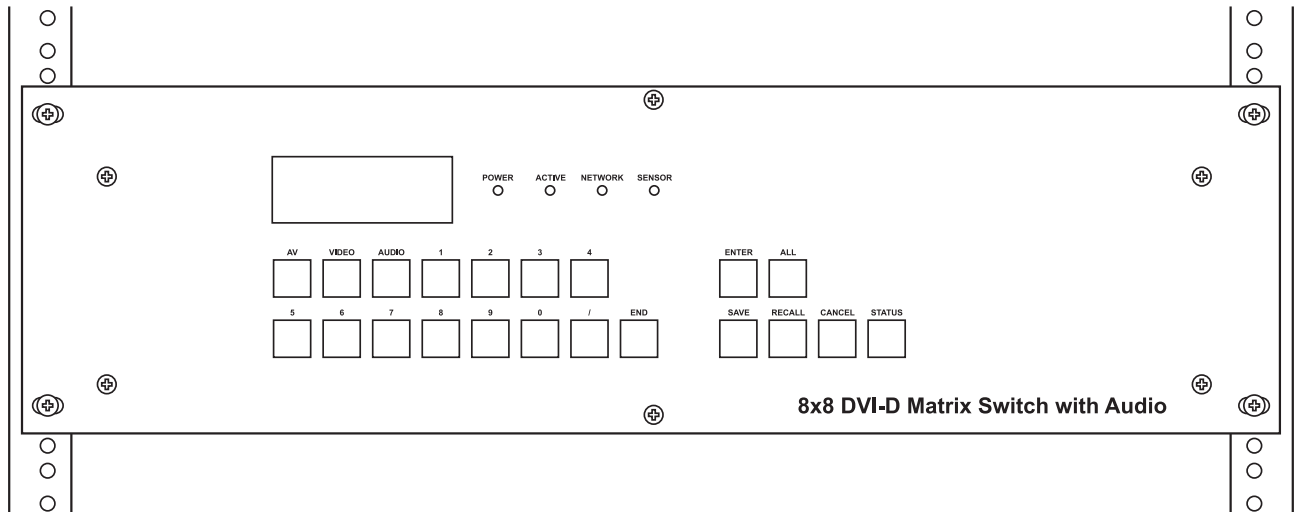

Figure 4-1. The Matrix Switch as mounted in a cabinet or rack.

Figure 4-2. Connect the Matrix Switch to a broad range of audio and video inputs and outputs, depending on the model.

Chapter 4: Installation

4.1 Connecting using Input and Output Terminals

The 8X8 DVI-D Matrix Switch may receive signals from DVD players, computers, graphics workstations, and other digital non-HDCP signals. The switch can provide output to projectors, video recorders, displays, and other DVI non-HDCP displays, depending on the application.

Figure 4-3. DVI-D dual-link port.

Table 4-1. Pinning for the DVI-D dual-link port.

Pin Number	Function	Pin Number	Function
1	TMDS Data	13	TMDS Data

8	Not used	Not used
9	Not used	Not used

Chapter 4: Installation

4.2 Connecting and Setting up Audio (AVSW-DVI8X8 only)

The 8X8 DVI-D Matrix Switch with Audio features two types of connections: balanced and unbalanced.

The balanced connection transmits a pair of balanced signals along two cables. Because interference will have the same intensity and the opposite phases on the two cables, the two signals will balance each other. For the low frequency end of the audio signal especially might be susceptible to interference across a long transmission. The balanced connection, therefore, should be used where sound quality is a premium.

The unbalanced connection transmits signals along one cable, and is more easily subjected to interference. It is recommended that this connection be used for consumer electronics or in instances where the need for superior quality is not an issue.

The Matrix Switch features an impedance control to enable you to adjust the impedance, which reduces the noise across a long cable run.

Figure 4-5. Example of Connection: Balanced Input

Figure 4-6. Example of Connection: Balanced Output

Figure 4-7. Example of Connection: Unbalanced Input

Figure 4-8. Example of Connection: Unbalanced Output

5.0 Operation and Control

5.1 RS-232, LAN, and Third-Party Control

The unit can be controlled one of four ways:

- Using controls on the front panel
- With the Remote Control unit that is provided with the Matrix Switch
- Using a PC and Black Box's software controller.
- Using the RS-232 control systems.

5.2 Front Control/Operation

LCD display: Real-time operations and status monitor

Table 5-1. Controls for operation of the Matrix Switch using the front-panel buttons.

Command Codes	Functions
0, 1-9	Keypad: Keys to select I/O channels and save/recall preset commands
AV	AV synchronal button: To transfer video and audio signal synchronously by the Matrix Switch. Example: To transfer both the video and the audio signals from input channel 3 to output channel 6. Operation: Enter this sequence: "3", "AV", "6", "END", "ENTER".
VIDEO	Video button: To transfer only video signals from input channel to output channel. Example: To transfer video signals from input channel 3 to output channel 10. Operation: Enter this sequence: "3", "VIDEO", "1", "0", "END", "ENTER".
AUDIO	Audio button: To transfer only audio signals from input channel to output channel. Example: To transfer audio signals from input channel 2 to output channel 6. Operation: Enter this sequence: "2", "AUDIO", "6", "END", "ENTER".
" / "	Break button: To break different channels in a command Example: To transfer video and audio from input channel 1 to output channels 2, 3, 6 at the same time Operation: Enter this sequence: "1", "AV", "2", "/", "3", "/", "6", "END", "ENTER".
END	Ending command button: Use when the command input has been finished.
ENTER	Execute Command: To perform a command after inputting it.
ALL	All button: To transfer an input channel to all output channels or switch off all output channels. Example 1: To transfer video and audio signals from input channel 7 to all output channels. Operation: Enter this sequence: "7", "ALL". <i>NOTE: Commands "END" and "ENTER" do not need to be used after this command.</i> Example 2: To transfer all input signals to the corresponding output channels. In other words, to switch to this status: 1->1, 2->2, 3->3, 4->4.....8->8. Operation: enter this sequence: "ALL", "1". Example 3: To switch off all the output channels. Operation: Enter this sequence: "ALL", "2".
SAVE	Save button: To save the present operation to a preset command. Example: To save the present operation to the preset command 2. Operation: Enter this sequence: "SAVE", "2". <i>NOTE: There are 11 preset commands ranging from 0 to 10.</i>
RECALL	Recall button: To recall the preset command. Example: To recall the preset command 2. Operation: Enter this sequence: "RECALL", "2".
CANCEL	Cancel button: To return to the standby status without performing any commands. Example: To cancel the input instructions "1", "AV", "2", "END". Operation: Press the "CANCEL" button after the above inputs.

Table 5-1, continued. Controls for Operation of the Matrix Switch using the Front Panel buttons.

STATUS	<p>Inquiring status button: To inquire about the present status. Example 1: To inquire the status of output channel 7. Operation: Press buttons in the following order "7", "STATUS".</p> <p>Example 2: To inquire the status of all the output channels one by one. Operation: Press the "STATUS" button.</p>
UNDO	<p>Undo button: To resume to the previous status of the command.</p>
PROGRAM	<p>Group programming button: To define, recall and clear a group of output channels. Example 1: To group the output channels 1, 2, 3, 4, 5 under the Group 1. Operation: Enter this sequence: "1", "Program", "Program", "1", "2", "3", "4", "5".</p> <p>Example 2: To transfer signal from input channel 1 to Group 2. Operation: Enter this sequence: "1", "Program", "2".</p> <p>Example 3: To clear the output channels under Group 1. Operation: Enter this sequence: "1", "Program", "0".</p> <p><i>NOTE: Please clear the group to be set before grouping it.</i></p>
"<-- "	<p>Backspace button: To erase the last input entry that was entered.</p>
THROUGH	<p>Through button: To transfer signals directly to the corresponding output channels. Example: To transfer signals from input channels 1, 2, 3 to their corresponding output channels. Operation: Enter this sequence: "1", "/", "2", "/", "3", "THROUGH".</p>
CLOSE	<p>Close button: To switch off the output channels. Example: To switch off the output channels 1, 2. Operation: Enter this sequence: "1", "END", "2", "END", "CLOSE".</p>
LOCK	<p>Lock button: To lock buttons on the front control panel hold it for 3 seconds.</p> <p><i>NOTE: When the control panel is locked, the Matrix Switch still can be controlled via the RS-232 port. You will need a password to unlock it.</i></p>
DEMO	<p>Demo button: To demonstrate the commands one by one every 3 seconds. The Switch can be controlled directly by entering the following command: "Input Channel" + "Switching Mode" + "Output Channel" + "END" + "ENTER".</p>

5.3 Entering a Sequence of Commands on the Front Control Panel

Figure 5-1. Press the button for input channel number "1". The LCD displays: "1".

Figure 5-2. Press the button for switching mode "AV". The LCD displays "B".

Figure 5-3. Press the button for the first output channel, number "3". The LCD displays "3".

Figure 5-4. Press the "Break" button: "/". The LCD displays a comma [","] to indicate a break between two channels in a command.

Figure 5-5. Press the button for the second output channel, number "4". The LCD displays "4".

Figure 5-6. Press the button "END" to finish the command. The LCD displays a period ["."] to indicate that the sequence is completed.

Figure 5-7. Press the "Enter" button to execute this sequence of commands. The LCD displays, "Switch OK".

Figure 5-8. Display feedback on LCD: The video signal of output channel 4 is transferred from the input channel 3 and the audio signal is from the input channel 2.

5.4 Remote Control Operation

Figure 5-9. Remote Control Unit

The Matrix Switch can be controlled with the infrared remote control. The function buttons on the remote are the same as those on the front control panel, and the remote uses the same commands and the same input sequence.

5.5 Operation of the Application Software

Video Matrix Switching Software is a compatible application that can be used with this series of Matrix Switches.

Requirements to run the software:

- Operating system: Windows® 98/2000/NT, Windows XP®, Windows 7
- Memory: at least 32 MB
- Space in hard disk: at least 10 MB
- CD-ROM
- COM port

When the Matrix Switch connects to the COM1 or COM2 of the computer with control software, users can control the switch with that computer. You can do so by using the application “Matrix Software” on the supplied CD-ROM or you may use a third-party control software. You can also get the software by visiting the product page at www.blackbox.com or by contacting our FREE Tech Support.

Chapter 5: Operation and Control

5.6 Operating the Unit through the RS-232 Connection

Table 5-2. Operating the Matrix Switch through an RS-232 Connection

Command Types	Command Codes	Functions
System Command	/*Type;	Acquires the model's information.
	/+xxxxxxx;	Rewrites the passwords; must be eight digits.
	/%Lock	Locks the keyboard
	/%Unlock	Unlocks the keyboard
	/:BellOff	Turns off the buzzer.
	/:BellOn;	Turns on the buzzer.
	/^Version	Acquires the version of software
	[x1]All.	Transfer signals from input channel [x1] to all output channels
Operation Command	All#.	Transfers all input signals to matching output channels.
	All\$.	Switches off all output channels
	[x1]#.	Transfers signals from input channel [x1] to output
	[X1]*[X2]\$	Transfers audio signals from input channel [x1] to output channel [x2].
	[X1]*[X2]%	Transfers video signals from input channel [x1] to output channel [x2].
	[X1]*[X2]&	Transfers video signals from input channel [x1] to output channel [x2].
	[x1]\$	Switches off output channel [x1].
	[x1] V[x2]	Transfers the video signals from input channel [x1] to output channel [x2].
	[x1] V[x2],[x3],[x4]	Transfers the video signals from input channel [x1] to output channels [x2], [x3] and [x4].
	[x1] A[x2]	Transfers the audio signals from input channel [x1] to output channel [x2].
	[x1] A[x2],[x3],[x4]	Transfers the audio signals from input channel [x1] to output channels [x2], [x3] and [x4].
	[x1] B[x2]	Transfers both video and audio signals from input channel [x1] to output channel [x2].
	[x1] B[x2],[x3],[x4]	Transfers both video and audio signals from input channel [x1] to output channels [x2], [x3] and [x4].
	[x1]P[x2]	Transfers signals from input channel [x1] to all output channels in group [x2].
	[x1]PP[x2],[x3],[x4]	Groups output channels [x2], [x3] and [x4] under group [x1].
	S[x].	Acquires the output channels in group[x].
	Status[x1].	Acquires the input channel to the output channel [x1].
	Status.	Acquires the input channel to the output channels one by one.
	Save[Y].	Saves the present operation to the preset command [Y].[Y] ranges from 0 to 9.
	Recall[Y].	Recalls the preset command [Y].
	Clear[Y].	Clears the preset command [Y].
	[X1]*[X2]!	Transfers both video and audio signals from input channel [x1] to output channel [x2].

6.0 Troubleshooting

6.1 Contacting Black Box

If you determine that your Matrix Switch is malfunctioning, do not attempt to alter or repair the unit. It contains no user-serviceable parts. Contact Black Box Technical Support at 724-746-5500 or info@blackbox.com.

Before you do, make a record of the history of the problem. We will be able to provide more efficient and accurate assistance if you have a complete description, including:

- the nature and duration of the problem
- when the problem occurs
- the components involved in the problem
- any particular application that, when used, appears to create the problem or make it worse

6.2 Shipping and Packaging

If you need to transport or ship your Matrix Switch:

- Package it carefully. We recommend that you use the original container.
- If you are returning the unit, make sure you include everything you received with it.
- Before you ship for return or repair, contact Black Box to get a Return Authorization (RA) number.
