CASIO®

Introduction
Welcome to the CASIO PCR-360!

Congratulations upon your selection of a CASIO Personal Cash Register, which is designed to provide years of reliable operation.

Operation of a CASIO cash register is simple enough to be mastered without special training. Everything you need to know is included in this manual, so keep it on hand for reference.

Consult your CASIO dealer if you have any questions about points not specifically covered in this manual.

CASIO AUTHORIZED SERVICE CENTER

If your Casio product needs repair, or you wish to purchase replacement parts, please call 1-800-YO-CASIO for the authorized service center nearest your home.

If for any reason this product is to be returned to the store where purchased, it must be packed in the original carton/package.

If you need programming assistance, please call 1-800-638-9228.

In Canada, Call 1-800-661-2274.

Thank you.

GUIDELINES LAID DOWN BY FCC RULES FOR USE OF THE UNIT IN THE U.S.A.
(Not applicable to other areas)

WARNING: This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of the FCC Rules, which re designed to provide reasonable protection against such interference when operated in a commercial environment.

Operation of this equipment in a residential area is likely to cause interference in which case the user at his/her own expense will be required to take whatever measures may required to correct the interference.

This digital apparatus does not exceed the Class A limits for radio noise emissions from digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications.

The main plug on this equipment must be used to disconnect mains power.
Please ensure that the socket outlet is installed near the equipment and shall be easily accessible.

Important!

Before you do anything, be sure to note the following important precautions!

Do not locate the cash register where it will be subjected to direct sunlight, very high humidity, splashing with water or other liquids, or high temperature (such as near a heater).
Be sure to check the sticker on the side of the cash register to make sure that its voltage matches that of the power supply in the area.
Never operate the cash register while your hands are wet.
Use a soft, dry cloth to clean the exterior of the cash register. Never use benzene, thinner, or any other volatile agent.
Never try to open the cash register or attempt your own repairs. Take the cash register to your authorized CASIO dealer for repairs.

Getting Started

This section outlines how to unpack the cash register and get it ready to operate. You should read this part of the manual even if you have used a cash register before. The following is the basic set up procedure, along with page references where you should look for more details.

1.

Remove the cash register from its box, making sure that all of the parts and accessories are included.
2.
Remove the tape holding parts of the cash register in place.
Also remove the small plastic bag taped to the printer cover . Inside you will find the mode keys.

3.

Install the three memory backup batteries.

1. Remove the printer cover and inner cover .

2. Remove the battery compartment cover. Pressing down where the cover is marked " ▤ " and put it up.

8

3. Install the three memory backup batteries. (continued…)
3. Note the (+) and (-) markings in the battery compartment. Load a set of three new SUM-3 (UM-3) batteries so that their positive (+) and negative (-) ends are facing as indicated by the marking.
4. Replace the battery compartment cover   .
5. Replace the inner cover printer cover   .

Important!

These batteries protected information stored in your cash register's memory when there is a power failure or when you unplug the cash register   . Be sure to install these batteries.

Precaution!

Incorrectly using batteries can cause them to burst or leak, possibly damaging the interior of the cash register. Note the followings.

- Be sure that the positive (+) and negative (-) ends sides of the batteries are facing as marked in the battery compartment when you load them into the unit.
- Never mix batteries of different types.
- Never mix old batteries with new ones.
- Never leave dead batteries in the battery compartment.
- Remove the batteries if you do not plan to use the cash register for long periods.
- Replace the batteries at least once every two years, no matter how much the cash register is used during the period.

WARNING!

• Never try to recharge the batteries supplied with the unit.
• Do not expose batteries to direct heat, let them become shorted or try to take them apart.
Keep batteries out of the reach of small children. If your child should swallow a battery, consult a physician immediately.

7.
Install receipt/journal paper

Important!

**Never operate the cash register without paper.
It can damage the printer.**

7. Install receipt/journal paper (continued…)

To load 1-ply paper for printing of receipts

Roll paper spindle

Paper separator

Paper inlet
① Use a mode key to set the mode switch to REG position

② Remove the printer cover

③ Cut off the leading end of the paper so it is even.
④ Ensuring the paper is being fed from the bottom of the roll, lower the roll into the space behind the printer.

⑤ Work the paper roll gently between the two spindles so that they slip into the center hubs of the roll.

⑥ Pass paper over silver plate.

⑦ Press the FEED key until about 20 cm or 30 cm of paper is fed from the printer.

⑧ Replace the printer cover, passing the leading end of the paper through the cutter slot. Tear off the excess paper.

11

7. ■ Install receipt/journal paper (continued…)

To load 1-ply paper for printing of journal

Follow steps ① through ⑦ under "To load 1-ply paper for printing receipts" on the previous page.

⑧ Remove the flat side plate of the take-up reel.

⑨ Slide the leading end of the paper into the groove on the spindle of the take-up reel and wind it onto the reel two or three turns.
⑩ Replace the flat side plate of the take-up reel.

⑪ Place the take-up reel into place behind the printer, above the roll paper.

⑫ Press the [FEED] key to take up any slack in the paper.

⑬ Replace the printer cover.

12

7. Install receipt/journal paper (continued…)

To load 2-ply paper for printing of receipts

Follow steps ① through ⑤ under "To load 1-ply paper for printing of receipts" above.

⑥ Separate the two sheets of the paper. Pass the outer sheet under the separator.
⑦ Pass the inner sheet over the separator.

⑧ Join the ends of the paper again and insert them into the paper inlet.

Pass paper over silver plate.

⑨ Press the FEED key until about 20 cm or 30 cm of paper is fed from the printer.

⑩ Insert the leading end of the inner sheet (which will be your journal) into the take-up reel, as described starting from step ② under "To load 1-ply paper for printing of a journal."

⑪ Replace the printer cover, passing the leading end of the outer sheet through the cutter slot. Tear off the excess paper.

11. Tax table programming

Programming automatic tax calculation

> **Important!**
>
> **After you program the tax calculations, you also have to individually specify which departments (page 34) and PLUs (page 36) are to be taxed.**

For this cash register to be able to automatically register state sales tax, you must program its tax tables with tax calculation data from the tax table for your state.   There are two tax tables (U.S.) and three tax tables (Canada) that you can program for automatic calculation of two separate sales taxes.

Programming for the U.S. Tax Tables Procedure

Find your state in the tables (page 16 ~ 19) and input the data shown in the table.

State sales tax calculation data tables for all of the states that make up the United States are included on the following pages.   This data is current as of October 30, 1994.   *

*Some data are revised after Oct.30,1994.

> **Important!**
>
> **Be sure you use the state sales tax data specifically for your state. Even if your state uses the same tax rate percentage as another state, inputting the wrong data will cause incorrect result.**

Programming procedure

Example 1 (Alabama 6% sales tax to Tax Table 1)

Example 2 (Colorado 5.25% sales tax to Tax Table 2)

Example 1:

Assign Tax Table 1	→	0 1 2 5 SUB/TOTAL
0	→	0 CA/AMT =/TEND
1	→	1 CA/AMT =/TEND
1	→	1 CA/AMT =/TEND
8	→	8 CA/AMT =/TEND
24	→	2 4 CA/AMT =/TEND
41	→	4 1 CA/AMT =/TEND
58	→	5 8 CA/AMT =/TEND
Terminate program	→	SUB/TOTAL

Example 2:

Assign Tax Table 2	→	0 2 2 5 SUB/TOTAL
5.25	→	5 · 2 5 CA/AMT =/TEND
5002	→	5 0 0 2 CA/AMT =/TEND
Terminate program	→	SUB/TOTAL

How to read the printouts...

- The journal and receipts are records of all transactions and operations.
- The contents printed on receipts and journal are identical, except the date printing line. (The date line is printed on receipts and reports.)
- You can choose the journal skip function (page 56).
  If the journal skip function is selected, the cash register will print the total amount of each transaction, and the details of premium, discount and reduction operations only, without printing department and PLU item registrations on the journal.
- The following items can be skipped on receipts and journal.
  - Time
  - Consecutive number
  - Taxable status
  - Taxable amount

How to Use Your Cash Register…

The following describes the general procedure you should use in order to get the most out of your cash register.

BEFORE business hours…
- Check to make sure that the cash register is plugged in securely.   Page 10
- Check to make sure there is enough paper left on the roll.   Page 11
- Read the financial totals to confirm that they are all zero.   Page 72
- Check the date and time.   Page 30

DURING business hours…

- Register transactions.   Page 31
- Periodically read totals.   Page 71

AFTER business hours…
- Reset the daily totals.   Page 53
- Remove the journal.   Page 82
- Empty the cash drawer and leave it open.   Page 23
- Take the cash and journal to the office.

About the clerk control function

To keep track of the registrations performed by different clerks, specify the clerk control function.
In case of selecting the clerk control function, signing on operation is necessary before registering, programming or issuing reports.

Mode Switch
Clerk sign on

OPERATION

Signing clerk 1 on:	**1** ➡	OPEN/CLK #
Signing clerk 2 on:	**2** ➡	OPEN/CLK #
Signing clerk 10 on:	**1** **0** ➡	OPEN/CLK #

Important!

- **Once you select the clerk control function, the error code "E08" appears on the display whenever you try to perform a registration, a READ/RESET operation without signing on.**
- **You can choose either the clerk key function or the open key function.**
- **The signed on clerk is also identified on the receipt/journal.**

OPERATION

Signing clerk off:	**0** ➡	OPEN/CLK #

- The current clerk is also signed off whenever you set the Mode Switch to OFF position.

About post-finalization receipt

You can issue a receipt even if in no receipt mode.

The post -finalization receipt lets you issue a receipt after finalization of the transaction.

Note that all of the following conditions must be satisfied.

• The option "print receipts" is selected.

• The receipt issuance status must be OFF.

• The transaction must be finalized in the REG or RF mode using the $\boxed{\frac{CA/AMT}{=/TEND}}$, $\boxed{CH}$ or $\boxed{CHK}$ key.

Post-finalization receipt Example

You can program the cash register to print the transaction total only (below Total format) or full details (below Detailed format) on the post-finalization receipt.

Note that if the transaction contains more than 26 lines (including receipt header), the cash register prints in a Total format regardless of your programming.

Setting/Editing the store telephone number

You can program 4 lines of maximum 14 digits of unique number of your store, such as telephone number, tax payer code… etc.

If you want to print only the telephone number, just refer to page 21 of this manual.

The following procedure shows you how to set or edit your numbers including spaces and hyphens.

Mode Switch
1st line:
➡ 3 [SUB TOTAL] ➡ 0 1 3 2 [SUB TOTAL] ➡ | Enter the number within 14 digits, including spaces and hyphens. | ➡ [CA/AMT =/TEND] ➡ [SUB TOTAL]

Taxable status of the %] key

•Whenever you perform a discount/premium operation on the last item registered, the tax calculation for discount/premium amount is performed in accordance with the tax status programmed for that item.

•Whenever you perform a discount/premium operation on a subtotal amount, the tax calculation for the subtotal amount is performed in accordance with the tax status programmed for the %] key.

Convenient Operations and Setups

Programming discounts and premiums

You can use the %̄ key to register either discounts (percentage decreases) or premium (percentage increases). The following procedures let you select the operation you want for %̄ key. They also let you program a preset rate, the tax calculation method and the tax rounding method.

To program discount or premium rate.

Refer to "Preparing and using discounts" in "Basic Operations and Setups" on page 40.

To program tax calculation status, tax rounding method and the key attribution.

Tax calculation status

This specification defines where the result of the percent calculation on a subtotal should be reflected (added to or subtracted from) for tax purposes.

Note that this specification is for calculations with subtotal only, and is not applied for calculations involving individual items.

Registering manually entered tax amounts

You can program the cash register to change the function of the % key to that of a M-TAX (Manual Tax) key. The M-TAX key is used to register manually entered tax amounts.
Important!
If you program the cash register to perform registrations with manually entered tax amounts, the M-TAX key replaces the % key, so discount/premium registration to be impossible.

Programming calculator mode control

The following procedure lets you program a number of functions in CAL mode.
• Open/Not open the cash drawer when the "Equal" key (⌊CA/AMT =/TEND⌋ key on the keyboard) is pressed.
• Open/Not open the cash drawer when the "Drawer open" key (⌊#/NS⌋ or ⌊NS⌋ key on the keyboard) is pressed.
• Print/Skip the "Equal" key total/count on the daily READ/RESET report.

Printing READ/RESET reports

- READ report
  You can print READ reports at any time during the business day without affecting the data stored in the cash register's memory.
- RESET report
  You should print RESET reports at the end of the business day.

Important!

- **The RESET operation issues a report and also clears all sales data from the cash register's memory.**
- **Be sure to perform the RESET operations at the end of each business day. Otherwise, you will not be able to distinguish between the sales data for different dates.**

Troubleshooting

This section describes what to do when you have problems with operation.

When an error occurs...

Errors are indicated by an error tone. When this happens, you can usually find out what the problem is as illustrated below.

ERROR TONE

pi
Does the display show an error code?

No   Yes

Error Code	Meaning	Action
E01	Mode Switch position changed before finalization.	Return the Mode Switch to its original setting and finalize the operation.
E08	Registration without entering a clerk number. This error appears only when the clerk control function is activated.	Enter a clerk number.
E27	Transaction cancel buffer is full.	Finalize the transaction.
E31	Finalization of a transaction attempted without comfirming the subtotal.	Press the SUB TOTAL key.
E33	Finalize operation attempted without entering amount tendered.	Enter the amount tendered.
E38	READ/RESET operation without declaring cash in drawer. This error appears only when this fuction is activated.	Perform money declaration.
E94	Printer error.	Turn the power off, and remove jammed paper from the printer.

Press C key and check the appropriate section of this manual for the operation you want to perform.

When the register does not operate at all...

Perform the following check whenever the cash register enter an error condition as soon as you switch it on. The results of this check are required by service personnel, so be sure to perform this check before you contact a CASIO representative for servicing.

Troubleshooting

In case of power failure...

If the power supply to the cash register is cut by a power failure or any other reason, simply wait for power to be restored. The details of any on-going transaction as well as all sales data in memory are protected by the memory backup batteries.

- Power failure during a registration
  The subtotal for items registered up to the power failure is retained in memory. You will be able to continue with the registration when power is restored.
- Power failure during printing a READ/RESET report
  The data already printed before the power failure is retained in memory. You will be able to issue a report when power is restored.
- Power failure during printing of a receipt and the journal
  Printing will resume after power is restored. A line that was being printed when the power failure occurred is printed in full.
- Other
  The power failure symbol is printed and any item that was being printed when the power failure occurred is reprinted in full.

Important!
Once receipt/journal printing or printing of a report starts, it can be stopped only by interruption of power to the cash register.

When the L sign appears on the display

About the low battery indicator…
The following shows the low battery indicator.

If this indicator appears when you switch the cash register on, it can mean one of three things:
- No memory backup batteries are loaded in the cash register.
- The power of the batteries loaded in the unit is below a certain level.
- The batteries loaded in the unit are dead.

To clear this sign, press [C/AC] key.

Important!
Whenever the low battery indicator appears on the display, load a set of three new batteries as soon as possible. If there is a power failure or you unplug the cash register when this indicator appears, you will lose all of your sales data and settings.

**BE SURE TO KEEP THE POWER CORD OF THE CASH REGISTER
PLUGGED IN WHENEVER YOU REPLACE THE BATTERIES.**

To replace the ink ribbon

1. Remove the printer cover.
2. Remove the inner cover by grasping its top on the left side and lifting up to the right.
3. Unroll about 10 centimeters of ribbon and place the take-up spool on the left shaft.
4. Insert the ribbon into the ribbon feed slot between the printer rollers. Loop the ribbon around the outside guard brackets as in the illustration.
5. Move the ribbon clip to the left. While holding the clip open, place the feed spool on the right shaft and take up any slack in the ribbon.

Troubleshooting
| **Important!** |

Use only the RAP-01 ribbon (purple). Other types of ink ribbons can damage the printer. Never try to extend the life of an ink ribbon by replenishing the ink. Once an ink ribbon is in place, press the ⌗/NS or NS key to test for correct operation.

81

To replace journal paper
① Set the Mode Switch to the REG position and remove the printer cover.
② Press the FEED to feed about 20 cm of paper.

③ Cut the journal paper at the point where nothing is printed.

④ Remove the journal take-up reel from its holder.
⑤ Remove the flat plate from the side of the take-up reel.

⑥ Slide the printed journal from the take-up reel.

⑦ Cut the journal paper as shown in the photograph.

⑧ Press the FEED to feed the remaining paper from the printer.

⑨ Do not pull the paper out of the printer by hand. It can damage the printer.

⑩ Remove the old paper roll from the cash register.

⑪ Load new paper as described on page 10 of this manual.

82
