Five Year Warranty

FEATURES

Precise and powerful, the **DUKANE ImagePro 9015** offers the maximum resolution on Data and Video. It is ideal for the professional presenter, or as a shared educational resource that needs to be used in a variety of lighting situations. Featuring dual computer inputs and three high resolution Video inputs the **ImagePro 9015** can accommodate Data to SXGA (1280 x 1024) and all High Definition Video (HDTV) sources yielding film like resolution. The **ImagePro 9015** sets new standards for image bright ness and quality. At 1500 Lumens of light output and a contrast ratio of <350:1 both Data and Video images are rendered with amazing clarity. The **ImagePro 9015** out performs units costing three times as much, maximizing your investment.

Projector Features

High Resolution Image--Natural resolution of 1365x1024 pixels provides easy handling of SXGA workstation 1280x1024 graphics and 1000 line TV images. New improved Digital TV display menu and function for SD (Standard Definition, 480i/480p) and high definition HDTV sources. Full 720p (progressive) and 1080i (interlocked) HDTV display options.

Superior Image Quality--High brightness, saturated color and crisp well defined details are provided by the color balanced Xenon lamp with extra-high brightness along with 10 bit digital gamma correction electronics for accurate color shades.

User Friendly--With size and weight below CRT projectors, this unit is easy to move and install. It has a simple IR remote and easy to read menu, and can be remotely controlled from a computer via the RS-232 serial port.
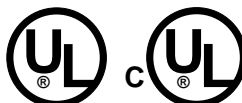

Quick and Easy Setup--The "out of box to operation" time is under 2 minutes! The single lens need only be adjusted by the power focus and zoom control. Inputs are clear and conveniently arranged.

Versatile--There are two computer and three video inputs. Computer images from VGA (640x480) through SXGA (1280x1024) are automatically detected and via Adaptive DPC (Digital Pixel Conversion) displayed in the optimum form. Composite, S-video, component or high definition video can also be displayed. Normal NTSC is displayed in enhanced form without visible scan lines. Full resolution of the 1080 interlace or 720 progressive HDTV images.
