Product Highlights

Compaq, the leader in Network Storage, delivers the *StorageWorks™* NAS B3000 by Compaq – the entry-point into NAS/SAN fusion solutions bringing enterprise-level availability, scalability and performance in a turnkey package

- Entry-point to the fusion of NAS and SAN – Universal Network Storage – provides the best utilization of storage investment. Consolidate NAS and SAN into a single, managed storage infrastructure
- Enterprise level scalability – to 27 TB
- Highly available solution – including clustering, RAID ADG, fully integrated software packages, no-single-point-of-failure configurations available
- Turnkey package – configurations include all of the components to provide high performance block- and file-serving

Key Benefits

Maximized Return on Storage Investment

- Multi-protocol file serving – support for Microsoft® Windows® (CIFS), UNIX®/Linux® (NFS), Novell® NetWare® (NCP), Apple (AppleTalk), HTTP and FTP
- Minimize ongoing operational expenses associated with file serving
- Enable clients and applications to easily access data over the existing network, while also reducing the cost of accessing SAN based storage
- Save money and resources with centralized storage and system management

Unlimited Scalability

- Grow your storage capacity as your business grows- without downtime and without compromising performance
- Up to 27 TB capacity scalability, higher capacity can be reached with external switches
- The B3000 supports both 1 Gb/sec and 2 Gb/sec Fibre channel fabrics to ensure that your investment in infrastructure is protected.
- DAS to SAN means file data that is currently stored on 1" Universal disk drives using newer Compaq Smart Array controllers, as well as file data on an RA4100 can easily be migrated to the B3000. Simply remove the drives from the older systems and insert them into the B3000. All configuration information and data will be preserved allowing migration to be completed in minutes, not hours or days.

Continuous Data Availability

- Ensure that data is always available enabling business continuance through:
 - Cluster Configurations
 - Advanced Data Guarding
 - Hardware redundancy
 - File replication
 - Backup support
 - Antivirus support

NAS B3000 Base Configurations

NAS B3000 Model N900 230050-001	Processor	Two (2) 900-MHz Intel® Pentium® III Xeon™ Processors standard (up to 4 supported)
	Cache Memory	2-MB Level 2 writeback cache per processor
	Memory	2 GB (Standard, 4x 512-MB ECC SDRAM) to 4 GB (Maximum)
	Network Controller	Integrated Compaq NC3134 and NC3135 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (4 total 10/100 ports standard)
	Host Bus Adapter	One (1) FCA2101 Host Adapter
	Storage Controller	Integrated Smart Array Controller (Two channel, one channel for external SCSI backup)
	Hard Drive	Two (2) 36.4-GB Ultra3™ 10K 1" drives for redundant system software
	Power Supply	Two (2) hot pluggable 450 W Power Supplies
	Optical Drive	24x IDE CD-ROM Drive
	External Storage	One (1) MSA1000 with controller and 4 x 72-GB Ultra3 10K 1" drives
Form Factor	Rack 8U	
NAS B3000 Model C900 258123-001 <i>The clustered offerings of the StorageWorks NAS B3000 include two (2) server heads & one (1) MSA1000 SAN. The specifications shown are representative of what is included in each individual server head.</i>	Processor	Two (2) Intel Pentium III 900-MHz Xeon Processors standard (up to 4 supported)
	Cache Memory	2MB Level 2 writeback cache per processor
	Memory	2GB (Standard, 4 x 512-MB ECC SDRAM) to 4 GB (Maximum)
	Network Controller	Integrated Compaq NC3134 and NC3135 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (4 total 10/100 ports standard)
	Host Bus Adapter	Two (2) FCA2101 Host Adapters
	Storage Controller	Integrated Smart Array Controller (Two channel, one channel is SCSI only for backup)
	Hard Drive	Two (2) 36.4GB Ultra3 10K 1" for redundant system software
	Power Supply	Two (2) Hot pluggable 450W Power Supplies
	Optical Drive	24x IDE CD-ROM Drive
	External Storage	One (1) MSA1000 with two controllers and 6 x 72-GB Ultra3 10K 1" drives
Form Factor	Rack 12U	

NAS B3000 Base Configurations

NAS B3000 Model N900s 230051-001	Processor	Two (2) Intel Pentium III 900-MHz Xeon Processors standard (up to 4 supported)
	Cache Memory	2-MB Level 2 writeback cache per processor
	Memory	2 GB (Standard, 4 x 512-MB ECC SDRAM) to 4 GB (Maximum)
	Network Controller	Integrated Compaq NC3134 and NC3135 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (4 total 10/100 ports standard)
	Host Bus Adapter	One (1) FCA2101 Host Adapter
	Storage Controller	Integrated Smart Array Controller (Two channel, one channel is SCSI only for backup)
	Hard Drive	Two (2) 36.4-GB Ultra3 10K 1" for redundant system software
	Power Supply	Two (2) Hot pluggable 450 W Power Supplies
	Optical Drive	24x IDE CD-ROM Drive
	External Storage	One (1) MSA1000 with controller and 4 x 72-GB Ultra3 10K 1" drives
	Embedded Switch	One (1) 6 port embedded 2-Gb switch
	Form Factor	Rack 8U
	NAS B3000 Model C900s 258124-001 <i>The clustered offerings of the StorageWorks NAS B3000 include two (2) server heads & one (1) MSA1000 SAN. The specifications shown are representative of what is included in each individual server head.</i>	Processor
Cache Memory		2MB Level 2 write back cache per processor
Memory		2GB (Standard, 4x 512MB ECC SDRAM) to 4GB (Maximum)
Network Controller		Integrated Compaq NC3134 and NC3135 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (4 total 10/100 ports standard)
Host Bus Adapter		Two (2) FCA2101 Host Adapters
Storage Controller		Integrated Smart Array Controller (Two channel, one channel is SCSI only for backup)
Hard Drive		Two (2) 36.4-GB Ultra3 10K 1" for redundant system software
Internal Storage		Two (2) Hot pluggable 450 W Power Supplies
Power Supply		24x IDE CD-ROM Drive
Optical Drive		Two (2) Intel Pentium III 900-MHz Xeon Processors standard (up to 4 supported)
External Storage		One (1) MSA1000 with two controllers and 6 x 72-GB Ultra3 10K 1" drives
Embedded Switch		Two (2) 6 port embedded 2 Gb switches
Form Factor		Rack 12U

Standard Features

Processor	Model N900, C900, N900s, C900s Two (2) Intel Pentium III Xeon 900-MHz processors (upgradeable to 4)	
Cache Memory	2-MB level 2 write back cache per processor standard	
Memory	Standard Maximum	2 GB (512 x 4 PC100MHz ECC SDRAM Memory with Advanced ECC functionality) 4 GB NOTE: Advanced ECC Memory Technology protects the data even in the event of an entire SDRAM component failure. Embedded in the chipset design, this feature allows the use of Industry-Standard Registered DIMMs.
Upgradability	Upgradeable to four processors, upgradeable to 4 GB of ECC SDRAM, upgradeable storage capacity	
Network Controller	Integrated Compaq NC3134 Fast Ethernet NIC 64 PCI Dual Base 10/100 in a slot and a Compaq NC3135 Fast Ethernet NIC 64 PCI dual 10/100 daughter card (total 10/100 ports is 4) (Gigabit options available)	
Host Adapters	FCA2101 Host Bus Adapter	
Expansion Slots	I/O (6 Total, 2 Available) Two (2) 64-bit/66-MHz PCI Hot Plug Two (2) 64-bit/33-MHz PCI Hot Plug One (1) 64-bit/33-MHz PCI Non-Hot Plug One (1) 32-bit/33-MHz PCI Non-Hot Plug	1 available 0 available 0 available 1 available PCI Voltage: 3.3 Volt Only 5 Volt or 3.3 Volt 5 Volt or 3.3 Volt 5 Volt Only NOTE: One 64-bit/66-MHz PCI Hot Plug slot available and one 32-bit/33-MHz PCI Non-Hot Plug slot available
Storage Controller	Integrated Smart Array Controller (Two channel) (supports Internal RAID 0, 1, 0+1, 5 and external tape devices)	
Internal Storage	Diskette Drives CD-ROM Hard Drives	1.44 MB 24x IDE CD-ROM Drive (slim line) Two 1" 36.4-GB Ultra3 10K rpm hot plug drives (contain operating system in a RAID 1 configuration)
External Storage	Maximum Internal Storage Minimum External Storage	78.2 GB (2 x 36.4-GB Wide Ultra3 1" drives) MSA1000 (4 (for non-clustered) to 6 (for clustered) x 72-GB drives depending on model)
Interfaces	Parallel Serial Pointing Device (Mouse) Graphics Hot Plug Keyboard External Wide Ultra2™ SCSI	Not supported 1 1 Available through the "Remote Insight Board" only 1 1 NOTE: You can configure a second serial device to your NAS B3000 server by installing the auxiliary serial connector that ships with the server. The auxiliary connector attaches to a serial port B on the peripheral board and exits the rear of the server through the auxiliary serial knockout located directly above the dual power feeds.

Standard Features

Graphics	<p>Integrated 1280 x 1024, 16 M colour on PCI local bus, 4-MB video memory</p> <p>NOTE: The integrated video card is disabled, video is provided by the Integrated Remote Insight Board</p>
Form Factor	<p>Rack (8U = 14 inches), 4U for the Server component and 4U for the storage enclosure. Ships with sliding rails and cable management arm</p>
Compaq Software	<p><i>SANworks™</i> Virtual Replicator by Compaq <i>SANworks</i> Virtual Replicator combines a rich set of innovative capabilities that enhance and simplify storage management. Customers can pool physical storage and create virtual disks of up to a terabyte each. Virtual disk space can be allocated as needed, allowing customers to respond quickly to changing storage capacity requirements. Through virtualization, online volume growth, snapshot and management features, the software complements the standard capabilities within the operating system. By utilizing industry-standard server, storage, and network-interconnect components, an organization's current and future storage investments are protected.</p> <p><i>SANworks</i> Secure Path Secure Path software is included in the base system image. <i>SANworks</i> Secure Path is a high availability multi-pathing software that provides continuous data access</p> <p>NAS B3000 customers who desire to activate NAS Data Copy after the 30 day trial will need to order the license part number 278546-001</p> <p>NAS Data Copy NAS Data Copy is a host-based data replication package that allows data to be replicated over TCP/IP in either a synchronous or asynchronous mode. One-to-one, one-to-many, many-to-many replication is supported along with failover and fallback capabilities.</p> <p>Rapid Start Compaq designed rapid deployment and configuration tool</p> <p>Compaq <i>Insight Manager™</i> XE Compaq Insight Manager XE leverages the power of the Internet to provide web-based systems management, and plays a key role in Compaq's strategy to simplify IT management. Compaq Insight Manager XE reduces systems management cost, improves operational efficiency and effectiveness, and minimizes systems downtime.</p> <p>Compaq Management Agents The Compaq Management Agents (http://www.compaq.com/products/servers/management/agents.html) form the foundation for Compaq's Intelligent Manageability strategy. They provide direct, browser-based access to in-depth instrumentation built into Compaq servers, workstations, desktops, and portables, and send alerts to Compaq Insight Manager XE and other management consoles in case of subsystem or environmental failures. For additional information about the Compaq Management Agents and other management product from Compaq, please visit the management Web site at http://www.compaq.com/manage NOTE: These Web sites are available in English only.</p> <p>Compaq <i>SmartStart™</i> The server configuration and software integration tool from Compaq. Minimum SmartStart version supported 5.3</p> <p>Array Configuration Utility (ACU) with Smart Array Controllers Same easy to use yet powerful graphical user interface (GUI) configuration utility and easy to navigate wizards for all Smart Array Controllers</p> <p>Array Configuration Utility (ACU- XE) with Smart Array Controllers Compaq Configuration Utility XE (ACU-XE) web-based software for Smart Array products and the <i>StorageWorks</i> RAID Array 4x00 systems allows for ease of configuration and expandability for your disk arrays, remote configuration capabilities, and multi-platform support.</p>
Industry Standard Compliance	<p>ACPI 2.0 Compliant</p> <p>PCI 2.2 Compliant</p> <p>PXE Support (Optional when configured with a PXE-enabled slot-based NIC)</p> <p>WOL Support</p> <p>Physical Address Extension (PAE) Support</p> <p>Microsoft Logo certifications</p>

Standard Features

Intelligent Manageability	Compaq Remote Insight Lights-Out Edition Included Automatic Server Recovery-2 (ASR-2) Compaq Insight Manager Compaq Insight Manager XE Integrated Remote Console (IRC) Integrated Management Log (IML) Off-Line Backup Processor capability Dynamic sector repairing and drive parametre tracking (with Smart Array controllers) Redundant/adaptive load balancing NIC Support
Availability	Advanced Data Guarding PCI Hot Plug with push button functionality Continuous cooling provided by 8 Hot Plug Redundant System Fans Integrated Smart Array Controller for RAID data protection/performance and maximum data bandwidth Advanced Error Checking and Correcting (ECC) Technology NOTE: Advanced ECC Memory Technology protects the data even in the event of an entire SDRAM component failure. Embedded in the chipset design, this feature allows the use of Industry-Standard Registered DIMMs. Hot Plug Ultra2/Ultra3 Drive Bays 2 Redundant Hot Plug Power Supplies Standard Redundant NIC support Pre-Failure Warranty (covers processors, hard drives, and memory)
Serviceability	Internal Diagnostics Display (IDD) numerically indicates specific DIMM or processor failure. LED display on front panel indicates power/interlock, fan, and memory/microprocessor health Spring-loaded memory board release latches prevent unseating incidents PCI Card Guide locks full length PCI cards in place during transit Customer driven interior system fan design (all system fans interior to chassis) Removable, internal centre panel eases access to the power supply and hard drive backplane boards Optional High Voltage PDU cable exits chassis at a right angle to simplify cable management at rear of chassis
Security	Power-on password Hot plug keyboard password Diskette drive control Diskette boot control Network Server Mode Security Provision Parallel and serial interface control Administrator's password Disk configuration lock Hot plug access security
Server Power Supply	450-Watt Hot Plug Power Supply NOTE: Two 450-Watt Hot Plug Power Supplies ship standard with the system
OS Support	Windows Powered OS (OS and all software needed for storage management is pre-configured from the factory) NOTE: For an up-to-date listing of the latest drivers available for the <i>StorageWorks</i> NAS B3000, please see: http://www.compaq.com/storage/nas/B3000 . NOTE: This Web site is available in English only.
Service and Support	Compaq Services provides a wide range of service offerings, including a three-year, limited warranty that is fully supported by a worldwide network of resellers and service providers, toll-free 7 x 24 hardware technical phone support and Pre-Failure Warranty coverage of hard drives, memory and processors. NOTE: Certain restrictions and exclusions apply. Consult the Compaq Customer Support Centre.

B3000 External Storage Components

With the following components, your storage capacity and performance can be scaled to new levels:

Modular SAN Array 1000

The 4U cabinet houses up to fourteen 1" Compaq Universal hot pluggable Ultra2 and/or Ultra3 drives.

The modular design of the MSA1000 makes it possible to add redundant controllers, redundant single port Fibre Channel I/O Modules or Fabric Switches and storage expansion enclosures.

MSA1000 Controller

The MSA1000 Controller is an integrated RAID controller with an integrated LCD/LED status display and 128-MB read/write battery-backed cache (expandable to 256 MB per controller). Redundant MSA1000 controllers are an option.

Key Features

- Redundant controller support
- Fabric, Private Loop & Public Loop Support
- Auto Negotiated F, FL & L Port Login
- RAID 0, 1, 1+0, 5 and ADG
- 2Gb/1Gb Frequency Agile
- Primary & Secondary Inter-Controller Link (ICL)
- Host based configuration via ACU
- Remote configuration and monitoring via ACU XE (offline and remote) & CIM XE

MSA1000 Controller Management Features

- **Selective Storage Presentation:** allows multiple hosts to access a single MSA1000 storage system. Host access can be defined all the way down to a logical volume level.
- **Online RAID Level Migration:** allows for online post-configuration change to RAID level without destroying data or volume information.
- **Online Capacity Expansion:** lets you add storage to an operational MSA1000 — reducing expensive server downtime.
- **Online Volume Extension:** allows for the capacity growth of existing logical volumes.
- **Global Online Spare:** reduces the risk of data loss by facilitating automatic rebuilds after a drive failure.

Fault Tolerance

Several fault tolerant configurations, which keep data available and servers running while drives are being replaced, are supported including:

- **Advanced Data Guarding (RAID ADG):** Allocates the equivalence of 2 parity drives across multiple drives and allows simultaneous write operations.
- **Distributed Data Guarding (RAID 5):** Allocates parity data across multiple drives and allows simultaneous write operations.
- **Drive Mirroring (RAID 1, (1+0 Striped Mirroring)):** Allocates half of the drive array to data and the other half to mirrored data, providing two copies of every file.

Fault Recovery

Minimizes downtime, reconstructs data, and facilitates a quick recovery from drive failure

- **On-Line Spares:** If a failure occurs, recovery begins with an on-line spare and data is reconstructed automatically. One on-line spare can be assigned per array and used across multiple arrays. It is also possible to assign different on-line spares across different arrays.
- **Array Accelerator:** Onboard, battery-backed cache memory protects data in the event of a power failure. In the unlikely event of a controller failure, the battery-backed cache will save critical user data for up to three days.

MSA1000 Fibre Channel I/O Module

The Fibre Channel I/O module provides a 2 Gb/s Fibre Channel connection from the host side into the MSA1000. The MSA1000 Fibre Channel I/O Module includes one 2 Gb/s, Short Wave, Small Form Factor Pluggable Transceiver (SFP). A second MSA1000 Fibre Channel I/O Module can be installed for redundancy when a redundant controller is used.

MSA Fabric Switch 6

The MSA1000 Fabric Switch 6 is a six port, 2 Gb/s Fibre Channel Fabric Switch. The MSA1000 Fabric Switch 6 replaces the standard single port Fibre Channel connection provided by the MSA1000 Fibre Channel I/O Module. There are a total of five external fibre channel ports. Four of the external fibre channel ports are Small Form Factor Fixed (SFF) short wave transceivers and are not removable. The fifth port requires the installation of a Small Form Factor Pluggable (SFP) transceiver. One port is used internally by the MSA1000 controller.

B3000 External Storage Components

MSA Fabric Switch 6 Key Features

- 2 Gb/s 6 Port Fabric Switch integrated into the MSA1000 Chassis
- 5 ports external, 1 port internal
- 4 Small Form Factor Fixed Short Wave (SFF) Transceivers, 1 Small Form Factor Short Wave Pluggable (SFP) Transceiver with LC connectors
- 2 Gb/1 Gb Frequency Agile
- Managed Out of Band
- Hot Pluggable
- Efficient, space saving design

2Gb/sec Small Form Factor Pluggable (SFP) SW Transceiver Kit

2 Gb/s Small Form Factor Pluggable (SFP) SW Transceivers are industry standard connection devices, which hot plug into 2 Gb/s infrastructure components such as 2 Gb/s Fabric Switches. *StorageWorks* 2 Gb/s SFP SW Transceivers support distances up to 300 metres at 2 Gb/s and 500 metres at 1 Gb/s using multi-mode fiber optic cable.

Multi-Mode Fibre Channel Cables

Multi-Mode Fibre Channel cables provide a thin, flexible cabling solution that is immune to electromagnetic interference. Compaq offers cables to connect the MSA1000 to both 2 Gb and 1 Gb Fibre Channel infrastructures. LC to LC cables are used when connecting the MSA1000 to other 2 Gb Fibre Channel components because both connections will utilize small form factor transceivers. LC to SC cables are used when connecting the MSA1000 to 1 Gb Fibre Channel components. 1 Gb components use the larger GBIC style transceivers.

NAS B3000 Options

Processor	Pentium III Xeon X900 2MB Processor Option Kit	222627-B21
	NOTE: This processor option kit (PN 222627-B21) supports the <i>StorageWorks</i> NAS B3000	
	NOTE: The increasing power of new high-performance processor technology requires increased cooling efficiency for rack-mounted servers. The Compaq Rack 9000 series (120663-xx1 (42U), 120664-xx1 (36U), 120665-xx1 (22U)) provides enhanced airflow for maximum cooling, allowing these racks to be fully loaded with servers using the latest processors. When installing a server with Pentium III Xeon processors running at speeds of 550 MHz or greater in Compaq Rack 7000 series racks (165753-xx1 (42U), and 163747-xx1 (22U)), the new processor technology requires the installation of Compaq's new High Airflow Rack Door Insert (327281-B21 (42U) or 157847-B21 (22U)).	
Memory (DIMMs)	2048 MB PC100 Registered ECC SDRAM Memory Kit (4 x 512 MB)	189082-B21
	NOTE: Memory must be added in sets of four and be the same size.	
Communications	Compaq NC6132 Gigabit Module 1000 SX Upgrade Module for NC3134 and NC3131	338456-B23
	Compaq NC6133 Gigabit Module 1000 LX Upgrade Module for NC3134 and NC3131	338456-B24
	Compaq NC3135Fast Ethernet Module 100 FX Upgrade Module for NC3134 and NC3131	338456-B25
	Compaq NC6136 Gigabit Server Adapter, 64-bit/66-MHz, PCI, 1000 SX	203539-B21
	Compaq NC7131 Gigabit Server Adapter, 64-bit/66-MHz PCI, 10/100/1000-T	158575-B21
	NC7132 10/100/1000tx Upgrade for NC3134	153453-B21

	Compaq Power Distribution Unit-24A (200 to 240V)	207590-D72
	Compaq Power Distribution Unit-40A (200 to 240V)	207590-B23
	Compaq Power Distribution Unit-24A (100 to 127V)	207590-D71
	Compaq Dual Input Power Distribution Unit-24A High Voltage	191186-001
	Compaq High Voltage PDU Right Angled Cable Kit (IEC13-IEC14)	142257-004
	NOTE: The 10-Amp AC cord, which ships standard with the Compaq ProLiant DL580, utilizes a right angle plug on the server side (the side that plugs into the server) to avoid interference with the Cable Management Arm. Compaq High Voltage PDUs ship standard with 15-Amp AC cords that incorporate straight plugs on the server side. The optional Compaq High Voltage PDU Right Angled Cable Kit (142257-004) provides a right angle version of the 15-Amp AC cord. When deploying Compaq High Voltage PDUs with the Compaq ProLiant DL580, you may choose to simplify cable management at the rear of the server chassis by installing this option kit.

CarePaq™ Services

Remedial Services

- Compaq Services will also provide remedial services for ongoing maintenance.

Software Product Services

- Stand-alone telephone support
- Software Product Subscription

Hardware Product Services

- On-site Maintenance (includes warranty support)
- Response time upgrades during the warranty period
- Post-warranty coverage

Warranty Upgrade Options

- Response – Upgrade on-site response from next business day to same day 4-hours
- Coverage – Extend hours of coverage from 9 hours x 5 days to 24 hours x 7 days
- Duration – Select duration of coverage for a period of 1year to multi-years

Technical Specifications

Integrated Smart Array Controller	Data Compatible with all Smart Array Controllers	Yes
	Instant Upgrades to other Smart Array Controllers	Yes
	Consistent Software Manageability Tools	Yes
	PCI Bus	32-bit, 33 MHz (integrated on peripheral board)
	PCI Peak Data Transfer Rate	133 MB/s
	SCSI Protocols Supported	Ultra2, Wide-Ultra
	SCSI Peak Data Transfer Rate	80 MB/s
	NOTE: For ProLiant servers having TWO internal drive bays on separate SCSI ports: SCSI Peak Data Transfer Rate is 160 MB/s total; 80 MB/s per channel and Channels is 2.	
	Channels	2
	NOTE: For ProLiant servers having two internal drive bays on separate SCSI ports: SCSI Peak Data Transfer Rate is 160 MB/s total; 80 MB/s per channel and Channels is 2. The second channel on the DL580 is for external tape support only.	
	SCSI Ports (external/internal)	1/1
	NOTE: For ProLiant servers having two internal drive bays on separate SCSI ports: SCSI Peak Data Transfer Rate is 160 MB/s total; 80 MB/s per channel and Channels is 2. The DL580 has a SCSI port at the back of the server for external tape support only.	
	Drives Supported (maximum)	Maximum = total number of drives
	NOTE: Maximum is the total number of internal drives on each specific ProLiant server.	
	Cache	8-MB read only
	RAID Support	0, 1, 1+0, 5
	Logical Drives (maximum)	32
	Online Configuration	Yes
	Online Capacity Expansion	Yes
	Logical Drive Capacity Extension	Yes
	Online Stripe Size Migration	Yes
	Online RAID Level Migration	Yes
	Online Spare Support	Yes
	Automatic Data Recovery	Yes
	Drive Roaming	Yes
	Redundant Controllers	No
