## FCC Information

This equipment has been tested and found to comply with limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio Communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause unacceptable interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced Radio/TV technician for help.

## DECLARATION OF CONFORMITY

PRODUCT NAME : 19" COLOR MONITOR

MODEL NAME : CTL 9Ln

MODEL NUMBER : B19BL

FCC RULES : TESTED TO COMPLY WITH FCC PART 15, CLASS B

OPERATING ENVIRONMENT : FOR HOME OR OFFICE USE

FCC COMPLIANCE STATEMENT :

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions : (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### ■ Package

First, we would like to thank you for your purchase of this monitor. This monitor is 19inch, high resolution, color display monitor. This manual covers the use, and points of caution, when operating this monitor.

Please take the time to read this manual so that you will obtain the best performance and most use from your monitor. After reading the manual, store it in a safe place for future reference.

This items illustrated below are contained in the carton.

First, be sure that your carton includes the following items.

If any items are missing or damaged, please contact your local dealer or supplier.

- Color Monitor
- AC Power input cable
- User's Manual (Warranty Registration Card)

### ■ Features

- 19-inch(18 inch visual)high performance display color monitor
- Automatically scans frequencies from
  - Horizontal frequency: 30 to 96kHz
  - Vertical frequency: 47 to 150Hz
- Compatible with VGA, SVGA, VESA, MAC Standards and maximum resolution modes up to 1600 × 1200.
- Supports VESA flicker free modes including 85Hz refresh rate.
- On Screen menu fingertip control system to visually select and adjust screen images using 6 buttons on front panel and on screen menus.
- Power supply operates on AC100~240Volt 50/60Hz for use all over the world.
- Equipped with DDC 1/2B for Plug & Play capability.
- Equipped with an energy-saving feature.  
Power management circuit when signaled by the computer system, will reduce power consumption when the computer system is not in use.
- Monitors with nonglare/antistatic screens are compliant with MPR 1990 Emissions standards and meets requirements for CE Marking.  
\* TCO99 : (option)

### ■ Safety information

- Provided with this monitor is a detachable power supply cord with IEC320 style terminations. It may be suitable for connection to any UL listed personal computer with similar configuration. Before making the connection ensure that the voltage rating of the computer convenience outlet is the same as the monitor and that the ampere rating of the computer convenience outlet is equal to or exceeds the monitor current rating.  
For 120Volt applications use only UL listed detachable power cord with NEMA configuration 5-15P type(parallel blades) plug cap.  
For 240Volt applications use only UL listed detachable power cord with NEMA configuration 6-15P type(tandem blades) plug cap.
- Use only a power source and connection appropriate for the monitor as indicated on the marking label.
- Slots and openings in the cabinet are provided for ventilation; these openings must not be blocked or covered. Never push objects of any kind into cabinet slots or other openings.
- Never insert anything metallic into the monitor openings. Doing so may create a danger of electric shock.
- To avoid electric shock, never touch the inside of the monitor. Only a qualified technician should open the monitor's case.
- Unplug the monitor from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp, lint-free cloth for cleaning.
- Install the monitor near an outlet that you can reach easily. Disconnect the product by grasping the plug firmly and pulling in from the outlet. Never disconnect it by pulling the cord.

### ■ Power management system

This monitor meets VESA(Video Electronics Standards Association) DPMS(Display Power Management Signalling)standards. In order for the monitor's power saving feature to function, the video board or computer must also meet VESA<sup>®</sup> DPMS<sup>™</sup> standards.

#### ■ Power management table

■ Troubleshooting guide

If your monitor is not performing properly, please use the following troubleshooting chart for quick solutions to common problems.

Problem	Possible cause	Remedy
No Picture	Is the power cord connected?	Connect power cord.
	Is the power switch on?	Turn on power switch.
	Is the signal cable properly connected?	Connect signal cable properly
Picture is unstable	Is the monitor in the power save mode?	Press any key on the keyboard or move the mouse.
	Is the signal cable properly connected?	Connect signal cable properly
	Are there signals which are outside of the required frequency range?	Input signals which are within the range of the monitor.
The display image is not centered, too small or large.	Is the signal connector pin assignments correct?	Use correct signal connector.
	Are there signals which are outside of the required frequency range?	Use correct signal which within the frequency range of the monitor (If the signal is correct, adjust the controls to desired image.)
The color of image on screen is abnormal.	Is the magnetic object nearby?	Move object far away.
	Is the pin arrangement of the signal connector correct?	Use correct signal cable. Use degauss control.
