### CONSERVATOR MICROWAVE OVEN

3828W5A0948/4393927A

MODEL CMT135SG

# A Note to You

## Thank you for buying a CROSLEY® appliance.

To ensure that you enjoy years of trouble-free operation, we developed this Use and Care Guide. It contains valuable information about how to operate and maintain your microwave oven properly and safely. Please read it carefully.

Also, please complete and mail in the Ownership Registration Card provided with your appliance. The card helps us notify you about any new information on your appliance.

## Please record your model's information.

Whenever you call to request service for your appliance, you need to know your complete model number and serial number. You can find this information on the model and serial number plate (see diagram in the "Microwave oven features" section for location of plate).

Please also record the purchase date of your appliance and your dealer's name, address, and telephone number.

**Model Number** \_\_\_\_\_

**Serial Number** \_\_\_\_\_

**Purchase Date** \_\_\_\_\_

**Dealer Name** \_\_\_\_\_

**Dealer Address** \_\_\_\_\_

**Dealer Phone** \_\_\_\_\_

**Keep this book and the sales slip together in a safe place for future reference. It is important for you to save your sales receipt showing the date of purchase. Proof of purchase will assure you of in-warranty service.**

# Microwave Oven Safety

**Your safety and the safety of others is very important.**

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to hazards that can kill or hurt you and others.

All safety messages will be preceded by the safety alert symbol and the word "DANGER" or "WARNING." These words mean:

**! DANGER**

You will be killed or seriously injured if you don't follow instructions.

**! WARNING**

You can be killed or seriously injured if you don't follow instructions.

All safety messages will identify the hazard, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

## IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances basic safety precautions should be followed, including the following:

**WARNING:** To reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave energy:

- Read all instructions before using the microwave oven.
- Read and follow the specific "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY" found in this section.
- The microwave oven must be grounded. Connect only to properly grounded outlet. See "GROUNDING INSTRUCTIONS" found in the "Installation Instructions" section.
- Install or locate the microwave oven only in accordance with the provided Installation Instructions.
- Some products such as whole eggs in the shell and sealed containers – for example, closed glass jars – may explode and should not be heated in the microwave oven.
- Use the microwave oven only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in the microwave oven. This type of oven is specifically designed to heat, cook, or dry food. It is not designed for industrial or laboratory use.
- As with any appliance, close supervision is necessary when used by children.
- Do not operate the microwave oven if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.

**– SAVE THESE INSTRUCTIONS –**

### IMPORTANT SAFETY INSTRUCTIONS

- The microwave oven should be serviced only by qualified service personnel. Call an authorized service company for examination, repair, or adjustment.
- Do not cover or block any openings on the microwave oven.
- Do not store the microwave oven outdoors. Do not use the microwave oven near water – for example, near a kitchen sink, in a wet basement, or near a swimming pool, and the like.
- Do not immerse cord or plug in water.
- Keep cord away from heated surfaces.
- Do not let cord hang over edge of table or counter.
- See door surface cleaning instructions in the “Caring for Your Microwave Oven” section.
- To reduce the risk of fire in the oven cavity:
  - Do not overcook food. Carefully attend the microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
  - Remove wire twist-ties from paper or plastic bags before placing bags in oven.
  - If materials inside the oven should ignite, keep oven door closed, turn oven off, and disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
  - Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils, or food in the cavity when not in use.
  - Do not mount over a sink.
  - Do not store anything directly on top of the microwave oven when the microwave oven is in operation.

**– SAVE THESE INSTRUCTIONS –**

### PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY...

- (a) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- (b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
  - (1) Door (bent),
  - (2) Hinges and latches (broken or loosened),
  - (3) Door seals and sealing surfaces.
- (d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

# Installation Instructions

Before you begin operating the oven, carefully read the following instructions.

- 1. Empty** the microwave oven and **clean** inside it with a soft, damp cloth. **Check** for damage such as a door that isn't lined up correctly, damage around the door, or dents inside the oven or on the exterior. If there is any damage, do not operate the oven until an authorized service technician has checked it and made any needed repairs.
- 2. Put** the oven on a cart, counter, table, or shelf that is strong enough to hold the oven and the food and utensils you put in it. **(The control side of the unit is the heavy side. Use care when handling the oven.)** The weight of the oven is about 50 lbs (23 kg). The microwave oven should be at a temperature above 50°F (10°C) for proper operation.

legs are in place to ensure proper airflow. If vents are blocked, a sensitive thermal safety device automatically turns the oven off. The oven will not work until it has cooled.

## ⚠️ WARNING

### Fire Hazard

**Do not install the oven next to or over a heat source.**

**Doing so can result in death, fire, or electrical shock.**

**NOTE:** Do not block the exhaust vents or rear air intake openings. Allow a few inches of space at the back of the oven where the intake openings are located. Blocking the air intake openings and exhaust vents could cause damage to the oven and poor cooking results. Make sure the microwave oven

## Electrical requirements

Observe all governing codes and ordinances. A 120 Volt, 60 Hz, AC only, 15 amp fused electrical supply is required. (A time-delay fuse is recommended.) It is recommended that a separate circuit serving only this appliance be provided.

## ⚠️ WARNING

### Electrical Shock Hazard

**Plug into a grounded 3 prong outlet.**

**Do not remove ground prong.**

**Do not use an adapter.**

**Do not use an extension cord.**

**Failure to follow these instructions can result in death, fire, or electrical shock.**

### GROUNDING INSTRUCTIONS

For all cord connected appliances:  
The microwave oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. The microwave oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

**WARNING:** Improper use of the grounding can result in a risk of electric shock.

Consult a qualified electrician or serviceman if the grounding instructions are not

completely understood, or if doubt exists as to whether the microwave oven is properly grounded.

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the microwave oven.

For a permanently connected appliance: This appliance must be connected to a grounded, metallic, permanent wiring system, or an equipment grounding conductor should be run with the circuit conductors and connected to the equipment grounding terminal or lead on the appliance.

# Getting to Know Your Microwave Oven

This section discusses the concepts behind microwave cooking. It also shows you the basics you need to know to operate your microwave oven. Please read this information before you use your oven.

## How your microwave oven works

**Microwave ovens are safe.** Microwave energy is not hot. It causes food to make its own heat, and it's this heat that cooks the food.

Microwaves are like TV waves, radio-waves, or light waves. You cannot see them, but you can see what they do.

A **magnetron** in the microwave oven produces microwaves. The microwaves move into the oven where they contact food as it turns on the turntable.

The **glass turntable** of your microwave oven lets microwaves pass through. Then they bounce off a metal floor, back through the glass turntable, and are absorbed by the food.

**Microwaves** pass through most glass, paper, and plastics without heating them so food absorbs the energy. Microwaves bounce off metal containers so food does not absorb the energy.

---

## Radio interference

Using your microwave oven may cause interference to your radio, TV, or similar equipment. When there is interference, you can reduce it or remove it by:

- **Cleaning** the door and sealing surfaces of the oven.
- **Adjusting** the receiving antenna of the radio or television.
- **Moving** the receiver away from the microwave oven.
- **Plugging** the microwave oven into a different outlet so that the microwave oven and receiver are on different branch circuits.

---

## For the best cooking results

- **Always cook food** for the shortest cooking time recommended. Check to see how the food is cooking. If needed, touch the ADD MINUTE pad while the oven is operating or after the cooking cycle is over (see the "Using ADD MINUTE" section).
- **Stir, turn over, or rearrange** the food being cooked about halfway through the cooking time for all recipes. This will help make sure the food is evenly cooked.
- **If you do not have a cover** for a dish, use wax paper, or microwave-approved paper towels or plastic wrap. Remember to turn back a corner of the plastic wrap to vent steam during cooking.

---

## Testing your microwave oven

To test the oven put about 1 cup (250 ml) of cold water in a glass container in the oven. Close the door. Make sure it latches. Cook at 100% power for 2 minutes. When the time is up, the water should be heated.

## Testing your dinnerware or cookware

### Test dinnerware or cookware before using.

To test a dish for safe use, put it into the oven with a cup of water beside it. Cook at 100% cook power for one minute. **If the dish gets hot and water stays cool, do not use it.**

Some dishes (melamine, some ceramic dinnerware, etc.) absorb microwave energy, becoming too hot to handle and slowing cooking times. Cooking in metal containers not designed for microwave use could damage the oven, as could containers with hidden metal (twist-ties, foil lining, staples, metallic glaze or trim).

## Operating safety precautions

- **Never** lean on the door or allow a child to swing on it when the door is open.
- **Use hot pads.** Microwave energy does not heat containers, but heat from the food can make the container hot.
- **Do not** use newspaper or other printed paper in the oven.
- **Do not** dry flowers, fruit, herbs, wood, paper, gourds, or clothes in the oven.
- **Do not** start a microwave oven when it is empty. Product life may be shortened. If you practice programming the oven, put a container of water in the oven. It is normal for the oven door to look wavy after the oven has been running for a while.
- **Do not** try to melt paraffin wax in the oven. Paraffin wax will not melt in a microwave oven because it allows microwaves to pass through it.
- **Do not** operate the microwave oven unless the glass turntable is securely in place and can rotate freely. The turntable can rotate in either direction. **Make sure** the turntable is correct-side up in the oven. **Handle your turntable with care** when removing it from the oven to avoid possibly breaking it. If your turntable cracks or breaks, contact your dealer for a replacement.
- **When you use a browning dish,** the browning dish bottom must be at least  $\frac{3}{16}$  inch (5mm) above the turntable. Follow the directions supplied with the browning dish.
- **Never cook or reheat a whole egg inside the shell.** Steam buildup in whole eggs may cause them to burst, and possibly damage the oven. **Slice** hard-boiled eggs before heating. In rare cases, poached eggs have been known to explode. **Cover** poached eggs and **allow** a standing time of one minute before cutting into them.
- **For best results, stir any liquid several times before heating or reheating.** Liquids heated in certain containers (especially containers shaped like cylinders) may become overheated. The liquid may splash out with a loud noise during or after heating or when adding ingredients (coffee granules, tea bags, etc.). This can harm the oven.
- **Microwaves** may not reach the center of a roast. The heat spreads to the center from the outer, cooked areas just as in regular oven cooking. This is one of the reasons for letting some foods (for example, roasts or baked potatoes) stand for a while after cooking, or for stirring some foods during the cooking time.
- **Do not deep fry** in the oven. Microwavable cookware is not suitable and it is difficult to maintain appropriate deep frying temperatures.
- **Do not overcook potatoes.** At the end of the recommended cooking time, potatoes should be slightly firm because they will continue cooking during standing time. **After microwaving,** let potatoes stand for 5 minutes. They will finish cooking while standing.

## Electrical connection

If the incoming voltage to the microwave is less than 110 volts, cooking times may be longer. Have a qualified electrician check your electrical system.

## Microwave oven features

Your microwave oven is designed to make your cooking experience as enjoyable and productive as possible. To get you up and running quickly, the following is a list of the oven's basic features:

- 1. One-Touch Door Open Button.** Push this button to open the door.
- 2. Door Safety Lock System.** The oven will not work unless the door is securely closed.
- 3. Window with Metal Shield.** The shield prevents microwaves from escaping. It is designed as a screen to allow you to view food as it cooks.
- 4. Glass Turntable.** This turntable turns food as it cooks for more even cooking. It must be in the oven during operation. The turntable is sunken into the cavity floor to give you more cooking space and better cooking results.

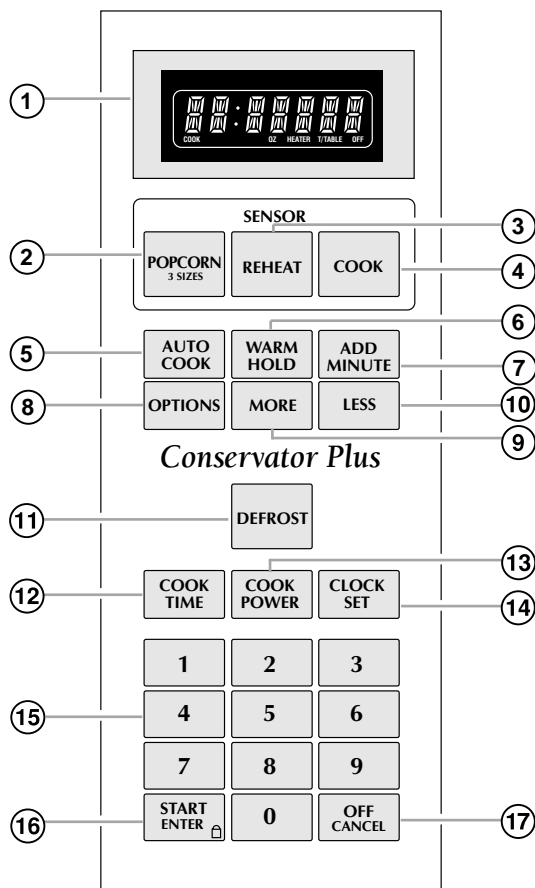

- 5. Removable Turntable Support** (under turntable).
- 6. Control Panel.** Touch pads on this panel to perform all functions.
- 7. Light** (not shown). The light automatically turns on when the door is opened or when the oven is running.
- 8. Cooking Guide Label.**
- 9. Model and Serial Number Plate.**

## Control panel features

Your microwave oven control panel lets you select a desired cooking function quickly and easily. The following is a list of all the Command and Number pads located on the control panel.

**For more information on these features, see “Using your microwave oven” section.**

1. **Display.** The display includes a clock and indicators to tell you time of day, cooking time settings, cook powers, quantities, weights, and cooking functions.
2. **POPCORN.** Touch this pad to pop popcorn, without entering a cook power or time. The oven’s sensor will tell the oven how long to cook depending on the amount of humidity it detects from the popcorn.
3. **REHEAT.** Touch this pad to reheat food, without entering a cook power or time. The oven’s sensor will tell the oven how long to reheat depending on the amount of humidity it detects from the food.
4. **COOK.** Touch this pad to cook food, without entering a cook power or time. The oven’s sensor will tell the oven how long to cook depending on the amount of humidity it detects from the food.
5. **AUTO COOK.** Touch this pad to cook food, without entering a cook power or time.
6. **WARM HOLD.** Touch this pad to keep hot, cooked foods safely warm in your microwave oven for up to 99 minutes, 99 seconds. You can use WARM HOLD by itself, or to automatically follow a cooking cycle.
7. **ADD MINUTE.** Touch this pad to cook for 1 minute at 100% cook power.
8. **OPTIONS.** Touch this pad and a Number pad to turn off tones, turn off the clock, change scroll speed, change weight measurement to kilograms, or turn on the demonstration mode.
9. **MORE.** Each time you touch this pad you will add 10 seconds to AUTO COOK or regular timed cooking.

10. **LESS.** Each time you touch this pad you will subtract 10 seconds from AUTO COOK or regular timed cooking.
11. **DEFROST.** Touch this pad to thaw frozen food by weight.
12. **COOK TIME.** Touch this pad followed by Number pads to set a cooking time.
13. **COOK POWER.** Touch this pad, after the cook time has been set, followed by a Number pad to set the amount of microwave energy released to cook the food. The higher the number, the higher the power or faster the “cooking speed.”
14. **CLOCK SET.** Touch this pad to enter the correct time of day.
15. **Number pads.** Touch Number pads to enter cooking times, cook powers, quantities, or weights.

**16.START/ENTER.** Touch this pad to start a function you have set.

**17.OFF/CANCEL.** Touch this pad once to erase an incorrect command or twice to cancel a program during cooking. This pad will not erase the time of day.

**NOTE:** If you try to enter unacceptable instructions, "ERROR" will appear on the display. Touch OFF/CANCEL and re-enter the instructions.

## Audible signals

Your microwave oven comes with audible signals that can guide you when setting and using your oven:

- A programming tone will sound each time you touch a pad.
- Three tones signal the end of a cooking cycle or Minute Timer function.

## Interrupting cooking

You can stop the oven during a cycle by opening the door. The oven stops heating and the fan stops, but the light stays on. To restart cooking, close the door and

TOUCH

### If you do not want to continue cooking:

Close the door and the light goes off.

**THEN**

TOUCH

**NOTE:** Before setting a function, touch OFF/CANCEL to make sure no other function is on.

## Using the child lock

The Child Lock locks the control panel so children cannot use the microwave when you do not want them to.

### To lock the control panel:

TOUCH

until **LOCKED** appears and **2 tones sound (4 seconds)**

"LOCKED" will appear on the display if a pad is touched.

### To unlock the control panel:

TOUCH

until **LOCKED** disappears and **2 tones sound (4 seconds)**

## Setting the clock

When you first plug in your microwave oven, the display tells you to "PLEASE SET TIME OF DAY". Then the display shows ":". If the electric power ever goes off, the display will repeat this message when the power comes back on.

**NOTE:** You can cook without setting the clock, but the display will not show the correct time of day after cooking.

### To set time:

#### 1. Choose the setting.

TOUCH

#### 2. Enter the time of day.

Example for 5:30:

TOUCH

#### 3. Complete your entry

TOUCH

## Using the minute timer

You can use your microwave oven as a kitchen timer. Use the Minute Timer for timing up to 99 minutes, 99 seconds.

**NOTE:** If you want to use other Command pads while the Minute Timer is counting down, touch OFF/CANCEL to cancel the Minute Timer.

#### 1. Touch "COOK TIME".

TOUCH

#### 2. Enter the time to be counted down.

TOUCH

Example for 3 minutes

#### 3. Set "0" cook power.

TOUCH

#### 4. Start the countdown.

TOUCH

#### 5. At the end of the set time:

Five tones will sound and the display will show "End".

#### 6. To show time of day:

## Cooking at different cook powers

For best results, some recipes call for different cook powers. The lower the cook power, the slower the cooking. Each Number pad also stands for a different percentage of cook power. Many microwave cookbook recipes tell you by number, percent, or name which cook power to use.

The following chart gives the percentage of cook power each Number pad stands for, and the cook power name usually used. It also tells you when to use each cook power. Follow recipe or food package instructions if available.

**NOTE:** Refer to a reliable cookbook for cooking times.

COOK POWER	NAME	WHEN TO USE IT
10=100% of full power (automatic)	High	<ul style="list-style-type: none"> <li>• Quick heating many convenience foods and foods with high water content, such as soups and beverages</li> <li>• Cooking small tender pieces of meat, ground meat, poultry pieces, fish fillets, and vegetables</li> </ul>
9=90% of full power		<ul style="list-style-type: none"> <li>• Heating cream soups</li> </ul>
8=80% of full power		<ul style="list-style-type: none"> <li>• Heating rice, pasta, or casseroles</li> </ul>
7=70% of full power	Medium-High	<ul style="list-style-type: none"> <li>• Cooking and heating foods that need a cook power lower than high (for example, whole fish and meat loaf) or when food is cooking too fast</li> <li>• Reheating a single serving of food</li> </ul>
6=60% of full power		<ul style="list-style-type: none"> <li>• Cooking requiring special care, such as cheese and egg dishes, pudding, and custards</li> <li>• Finishing cooking casseroles</li> </ul>
5=50% of full power	Medium	<ul style="list-style-type: none"> <li>• Cooking ham, whole poultry, and pot roasts</li> <li>• Melting chocolate</li> </ul>
4=40% of full power		<ul style="list-style-type: none"> <li>• Simmering stews</li> <li>• Heating pastries</li> </ul>
3=30% of full power	Medium-Low, Defrost	<ul style="list-style-type: none"> <li>• Defrosting foods, such as bread, fish, meats, poultry, and precooked foods</li> </ul>
2=20% of full power		<ul style="list-style-type: none"> <li>• Softening butter, cheese, and ice cream</li> </ul>
1=10% of full power	Low	<ul style="list-style-type: none"> <li>• Keeping food warm</li> <li>• Taking chill out of fruit</li> </ul>
<p><b>NOTE:</b> Once cook time has been entered you can also use the COOK POWER pad as a second Kitchen Timer by entering "0" for the cook power. The oven will count down the cooking time you set without cooking.</p>

## Cooking with more than one cook cycle

For best results, some recipes call for one cook power for a certain length of time, and another cook power for another length of time. Your oven can be set to change from one to another automatically, for up to 2 stages.

You can set your chosen cook functions in any order. However, when you use DEFROST, it must be the first stage.

1. Put the food in the oven and close the door.

2. Set the cooking time for the first cycle.

TOUCH

Example for 7 minutes, 30 seconds:

5	demo on/off	1 for on, 2 for off

**NOTE:** When you first plug in your microwave oven, tones are set on, the clock is set on, the scroll speed is set at normal, the weight measurement is set at lbs, and the demonstration mode is off.

## Using ADD MINUTE

ADD MINUTE lets you cook food for 1 minute at 100% cook power.

### NOTES:

- Each time you touch ADD MINUTE, it will add 1 minute.
- You can enter ADD MINUTE only after closing the door or after touching OFF/CANCEL.
- You can only use ADD MINUTE to start the oven if no other cooking function is running.

### 1. Make sure your food is in the oven.

### 2. Touch add minute.

Example when cooking for one minute:

## Using MORE or LESS

If a preset cooking time is too long or too short, you can lengthen or shorten the cooking time during the cooking cycle.

**NOTE:** You can only use MORE and LESS with Auto Cook or regular timed cooking.

### 1. To add 10 seconds to a remaining cook time of 1 minute:

TOUCH

### 2. To subtract 10 seconds from a remaining cook time of 1 minute:

## Using AUTO COOK

AUTO COOK lets you cook common microwave-prepared foods without needing to set times and cook powers. AUTO COOK has preset times and cook power for six major types of food.

**NOTE:** If you want to cook by entering a time and cook power, see the “Microwave cooking guide” in the “Cooking Guide” section.

### To use AUTO COOK:

1. Put your food in the oven and close the door.

2. Touch

3. Touch one of these Number pads to choose the type of food.

4. Touch one or more of these Number pads to enter the amount.

This chart tells you how to choose a food type and what amounts you can cook.

NUMBER PAD	FOOD	INSTRUCTIONS	AMOUNT
1	Bacon	Place bacon strips on a paper plate or dinner plate lined with paper towels or on a microwave bacon rack.	2 to 6 slices
2	Frozen Roll/Muffin	Remove from the package and place on a plate. If baked good size is over 3 oz (85 g) each, enter serving size as “2”.	1 to 6 each (2 to 3 ounces [57-85 g] each)
3	Fresh Roll/Muffin	Remove from the package and place on a plate. If baked good size is over 3 oz (85 g) each, enter serving size as “2”.	1 to 6 each (2 to 3 ounces each)
4	Beverage	Stir liquid several times during heating. Be careful when removing the beverage. It will be very hot.	1 to 2 cups (500ml - 750 ml)
5	Chicken Pieces	Place the chicken pieces in a microwavable container. Cover with plastic wrap and vent.	½ to 2.0 lbs (227g - .91kg)
6	Hot Cereal (instant)	Prepare as directed on the package and cook. Stir before eating. Use only instant hot cereal.	1 to 6 servings

**NOTE:** If you open the door or touch OFF/CANCEL during cooking, the oven will stop cooking and you will have to touch START/ENTER.

## Using DEFROST

You can defrost food by choosing a category and setting a weight. DEFROST has preset times and cook powers for 3 categories: Meat, Poultry, and Fish.

To use DEFROST, follow the steps below:

1. Touch

2. Touch one of three Number pads to choose the type of food.

3. Touch Number pad(s) to enter the weight.

4. Touch

### NOTES:

- See the “Defrost chart” later in this section for defrosting directions for each food.
- To defrost items not listed in the “Defrost chart,” use 30% cook power. Refer to a reliable cookbook for defrosting information.
- Twice during defrosting, the display will ask you to turn food over. After you do so, close the door and touch START/ENTER to continue defrosting. See the “Auto defrost chart” later in this section for instructions on what to do when you see this message.

This chart shows you how to choose a type of food and the weights you can set for each type.

## Weight conversion chart

You are probably used to food weights as being in pounds and ounces that are fractions of a pound (for example, 4 ounces (113.4 g) equals  $\frac{1}{4}$  pound). However, in order to enter food weight in DEFROST, you must specify pounds and tenths of a pound. If the weight on the food package is in fractions of a pound, you can use the following chart to convert the weight to decimals.

<u>EQUIVALENT WEIGHT</u>			
OUNCES	GRAMS	DECIMAL WEIGHT	
1.6	45.4	.10	
3.2	90.7	.20	
4.0	113.4	.25	One-Quarter Pound
4.8	136.1	.30	
6.4	181.4	.40	
8.0	226.8	.50	One-Half Pound
9.6	272.2	.60	
11.2	317.5	.70	
12.0	340.2	.75	Three-Quarters Pound
12.8	362.9	.80	
14.4	408.2	.90	
16.0	453.6	1.00	One Pound

## Defrosting tips

- **When using DEFROST**, the weight to be entered is the net weight in pounds and tenths of pounds (the weight of the food minus the container).
- **Before starting**, make sure you have removed any of the metal twist-ties which often come with frozen food bags, and replace them with strings or elastic bands.
- **Open containers** such as cartons before they are placed in the oven.
- **Always slit** or pierce plastic pouches or packaging.
- **If food is foil wrapped**, remove foil and place it in a suitable container.
- **Slit** the skins, if any, of frozen food such as sausage.
- **Bend** plastic pouches of food to ensure even defrosting.
- **Always underestimate** defrosting time. If defrosted food is still icy in the center, return it to the microwave oven for more defrosting.
- **The length** of defrosting time varies according to how solidly the food is frozen.
- **The shape of the package** affects how quickly food will defrost. Shallow packages will defrost more quickly than a deep block.
- **As food begins to defrost**, separate the pieces. Separated pieces defrost more easily.
- **Use small pieces of aluminum foil** to shield parts of food such as chicken wings, leg tips, fish tails, or areas that start to get warm. Make sure the foil does not touch the sides, top, or bottom of the oven. The foil can damage the oven lining.
- **For better results**, let food stand after defrosting. (For more information on standing time, see "Microwave cooking tips" in the "Cooking Guide" section.)
- **Turn over** food during defrosting or standing time. Break apart and remove food as required.

## Using WARM HOLD

You can safely keep hot, cooked food warm in your microwave oven for up to 99 minutes, 99 seconds. You can use WARM HOLD by itself, or to automatically follow a cooking cycle.

### NOTES:

- WARM HOLD operates for up to 99 minutes, 99 seconds.
- Opening the oven door cancels WARM HOLD. Close the door and touch WARM HOLD, then touch START/ENTER if additional WARM HOLD time is desired.
- Food cooked covered should be covered during WARM HOLD.
- Pastry items (pies, turnovers, etc.) should be uncovered during WARM HOLD.
- Complete meals kept warm on a dinner plate should be covered during WARM HOLD.
- Do not use more than 1 complete WARM HOLD cycle (about 1 hour, 40 minutes). The quality of some foods will suffer with extended time.

### 1. Put hot, cooked food in the oven and close the door.

### 2. Touch WARM HOLD.

TOUCH

### 3. Start the oven.

TOUCH

### To make WARM HOLD automatically follow another cycle:

- While you are entering cooking instructions, touch WARM HOLD before touching START/ENTER.
- When the last cooking cycle is over, you will hear 2 tones. "WARM" will come on while the oven continues to run.

# SENSOR Cooking

Your microwave oven has a sensor that detects the humidity released by the food. The amount of humidity detected tells the oven how long to cook or heat your food. The sensor is used by 3 special functions: SENSOR COOK, SENSOR REHEAT, and SENSOR POPCORN. The simple instructions for these functions are on the following pages.

## Using SENSOR COOK

SENSOR COOK has preset cook powers for cooking 10 different types of food.

### NOTES:

- If you want to cook by entering a time and cook power, see “Microwave cooking guide” in the “Cooking Guide” section.
- The oven should be plugged in at least 5 minutes before sensor cooking.
- Room temperature should not exceed 95°F.
- Be sure the exterior of the cooking container and the interior of the oven are dry. Wipe off each with a paper towel.
- The oven will not generate microwave energy for approximately 28 seconds at the beginning of the sensor cooking cycle.

### To use SENSOR COOK:

**1. Put the food in the oven and close the door.**

**2. Touch**

**3. Touch a Number pad to choose the type of food.**

**NOTE:** See the chart below for the types of food to choose from.

This chart tells you how to choose a food type and what amounts you can cook.

NUMBER PAD	FOOD	INSTRUCTIONS	AMOUNT
1	Baked Potato	Pierce each potato with a fork and place on the oven tray around the edge, at least 1 inch (2.54 cm) apart.	1 to 4 medium, about 8 to 10 oz (227g - 284 g) each
2	Fresh Vegetable	Place moist vegetables in a microwavable container. Cover with plastic wrap and vent.	1 to 4 cups (250ml - 1l)
3	Frozen Vegetable	Remove from package. Place vegetables in a microwavable container. Cover with plastic wrap and vent.	1 to 4 cups (250ml - 1l)

## Using SENSOR COOK (cont.)

<b>NUMBER PAD</b>	<b>FOOD</b>	<b>INSTRUCTIONS</b>	<b>AMOUNT</b>
4	Frozen Entrée	Remove from outer package. Loosen cover on three sides. If entrée is not in a microwave-safe container, place it on a plate, cover with plastic wrap and vent.	Works best if entrée is 10 to 20 oz. (284 g - 568 g)
5	Rice	Follow measurements on package for ingredient amounts. Place rice and liquid (water or chicken or vegetable stock) in a microwavable dish. Cover with plastic wrap. When cooking is complete, allow rice to stand 5 minutes or until liquid is absorbed. Stir rice.	½ to 2 cups (125 ml - 500 ml) of dry rice. Use medium or long grain rice. Cook instant rice according to directions on the package.
6	Casserole	Combine the ingredients per the recipe in a 1- to 2-quart (946 ml - 1.91 l) casserole. Cover with plastic wrap and vent. After cooking is complete, allow 5 minutes standing time.	1 to 3 cups (250 ml - 750 ml)
7	Ground Meat	Crumble meat into a microwavable container. Season and cover with plastic wrap. Vent cover for well-done meat.	¼ to 2 lbs (113 g - .91 kg)
8	Fish, Seafood	Place the food around the sides of a microwave-safe container. Season and add ¼- to ½-cup liquid (wine, water, salsa, etc.) if desired. Cover with plastic wrap, vented.	¼ to 2 lbs (113 g - .91 kg)
9	Eggs, Scrambled	Break eggs into a 4-cup (1 l) measuring cup or 1-quart (946 ml) casserole. Add 1 tablespoon milk or water per egg and beat. Cover with plastic wrap, vented. When cooking is complete, remove from oven, stir, and allow 1 to 2 minutes standing time.	1 to 4 eggs
0	Frozen Pizza	Follow package directions.	1 to 2 servings

**NOTE:** If you open the door or touch OFF/CANCEL during cooking, the oven will stop cooking and you will have to touch START/ENTER.

## Using SENSOR REHEAT

SENSOR REHEAT has preset cook powers for 3 different types of food.

**NOTE:** If you want to reheat by entering a time and cook power, see the "Heating/reheating chart" in the "Cooking Guide" section.

### To use SENSOR REHEAT:

**1. Put the food in the oven and close the door.**

**2. Touch**

**3. Touch one of three Number pads to choose the type of food.**

This chart tells you how to choose a food type and what amounts you can reheat. All foods are reheated from refrigerated temperature.

NUMBER PAD	FOOD	INSTRUCTIONS	AMOUNT
1	Dinner Plate	Place food to be heated on a dinner plate or similar dish. Cover with plastic wrap.	about 8 to 16 oz (227 g - 454 g)
2	Soup/ Sauce	Place food to be heated in a microwave container. Cover with plastic wrap.	1 to 4 cups (250 ml - 1 l)
3	Casserole	Place food to be heated in a microwave container. Cover with plastic wrap.	1 to 2 cups (250 ml - 500 ml)

## Using SENSOR POPCORN

SENSOR POPCORN lets you pop commercially packaged microwave popcorn by touching just 1 pad.

### NOTES:

- Pop only 1 package at a time.
- If you are using a microwave popcorn popper, follow manufacturer's instructions.

### To use SENSOR POPCORN:

**1. Place the bag in the center of the turntable and close the door.**

**2. Touch**

# Cooking Guide

## Microwave cooking tips

### Amount of food

- **If you increase or decrease** the amount of food you prepare, the time it takes to cook that food will also change. For example, if you double a recipe, add a little more than half the original cooking time. Check for doneness and, if necessary, add more time in small increments.

### Starting temperature of food

- **The lower the temperature** of the food being put into the microwave oven, the longer it takes to cook. Food at room temperature will be reheated more quickly than food at refrigerator temperature.

### Composition of food

- **Food with a lot of fat and sugar** will be heated faster than food containing a lot of water. Fat and sugar will also reach a higher temperature than water in the cooking process.
- **The more dense the food**, the longer it takes to heat. "Very dense" food like meat takes longer to reheat than lighter, more porous food like sponge cakes.

### Size and shape

- **Smaller pieces of food** will cook faster than larger pieces and same-shaped pieces of food cook more evenly than irregularly shaped foods.
- **With unevenly shaped foods**, the thinner parts will cook faster than the thicker areas. **Place** the thinner parts of chicken wings and legs in the center of the dish.

### Stirring, turning foods

- **Stirring and turning foods** distributes heat quickly to the center of the dish and avoids overcooking at the outer edges of the food.

### Covering food

Cover food to:

- **Reduce** splattering
- **Shorten** cooking times

- **Retain** food moisture

All coverings that allow microwaves to pass through are suitable.

### Releasing pressure in foods

- **Several foods** (for example: baked potatoes, sausages, egg yolks, and some fruits) are tightly covered by a skin or membrane. This can cause the food to burst from steam building up in them during cooking. To relieve the pressure and to prevent bursting, **pierce** these foods before cooking with a fork, cocktail pick, or toothpick.

### Using standing time

- **Always allow food to stand** for a while after cooking. Standing time after defrosting, cooking, or reheating always improves the results since the temperature will then be evenly distributed throughout the food.
- **The length of the standing time** depends on the volume and density of the food. Sometimes it can be as short as the time it takes you to remove the food from the oven and take it to the serving table. However, with larger, denser food, the standing time may be as long as 10 minutes.

### Arranging food

For best results, distribute food evenly on the plate. You can do this in several ways:

- **If you are cooking several items of the same food**, such as baked potatoes, **place** them in a ring pattern for uniform cooking.
- **When cooking foods of uneven shapes or thickness, such as chicken breasts**, **place** the smaller or thinner area of the food towards the center of the dish where it will be heated last.
- **Layer thin slices of meat** on top of each other.
- **When you cook or reheat whole fish**, **score** the skin – this prevents cracking. Shield the tail and head of whole fish with small pieces of foil to prevent overcooking but ensure the foil does not touch the sides of the oven.
- **Do not** let food or a container touch the top or sides of the oven. This will prevent possible arcing.

### Using aluminum foil

Metal containers should not be used in a microwave oven. There are, however, some exceptions. If you have purchased food which is prepackaged in an aluminum foil container, then refer to the instructions on the package. When using aluminum foil containers, cooking times may be longer because microwaves will only penetrate the top of the food.

If you use aluminum containers without package instructions, follow these guidelines:

- **Place** container in a glass bowl and add some water so that it covers the bottom of the container, not more than  $\frac{1}{4}$  inch (6 mm) high. This ensures even heating of the container bottom.
- **Always remove** the lid to avoid damage to the oven.
- **Use only** undamaged containers.
- **Do not use** containers taller than  $\frac{3}{4}$  inch (19 mm).
- **Container must be** half filled.
- **To avoid arcing**, there must be a minimum  $\frac{1}{4}$  inch (6 mm) between the aluminum container and the walls of the oven and also between two aluminum containers.
- **Always place** container on turntable.
- **Reheating food** in aluminum foil containers usually takes up to double the time compared to reheating in plastic, glass, china, or paper containers. The time when food is ready will vary depending upon the type of container you use.
- **Let food stand** for 2 to 3 minutes after heating so that heat is spread evenly throughout container.

### Cooking you should not do in your microwave oven

- **Do not** do canning of foods in the oven. Closed glass jars may explode, resulting in damage to the oven.
- **Do not** use the microwave oven to sterilize objects (baby bottles, etc.). It is difficult to maintain the high temperature required for safe sterilization.

# Caring for Your Microwave Oven

To make sure your microwave oven looks good and works well for a long time, you should maintain it properly. For proper care, please follow these instructions carefully.

**For interior surfaces: Wash** often with warm, sudsy water and a sponge or soft cloth. **Use** only mild, nonabrasive soaps or a mild detergent. **Be sure to keep the areas clean where the door and oven frame touch when closed. Wipe** well with clean water. Over time, stains can occur on the surfaces as the result of food particles spattering during cooking. This is normal.

For stubborn soil, **boil** a cup (250 ml) of water in the oven for 2 or 3 minutes. Steam will soften the soil. To get rid of odors inside the oven, **boil** a cup of water with lemon juice or vinegar.

**For exterior surfaces and control panel:** Use a soft cloth with spray glass cleaner. Apply the spray glass cleaner to the soft cloth; do not spray directly on the oven.

**NOTE: Abrasive cleansers, steel-wool pads, gritty wash cloths, some paper towels, etc.,** can damage the control panel and the interior and exterior oven surfaces.

**To clean turntable and turntable support,** wash in mild, sudsy water; for heavily soiled areas **use** a mild cleanser and scouring sponge. The turntable and turntable support are dishwasher-safe.

# Questions and Answers

QUESTIONS	ANSWERS
Can I operate my microwave oven without the turntable or turn the turntable over to accommodate a large dish?	No. If you remove or turn over the turntable, you will get poor cooking results. Dishes used in your oven must fit on the turntable.
Can I use a rack in my microwave oven so that I may reheat or cook on two levels at a time?	You can use a rack only if rack is supplied with your microwave oven. Use of any rack not supplied with the microwave oven can result in poor cooking performance and/or arcing.
Can I use either metal or aluminum pans in my microwave oven?	Usable metal includes aluminum foil for shielding (use small, flat pieces), small skewers, and shallow foil trays (if tray is $\frac{3}{8}$ inch [19 mm] deep and half filled with food to absorb microwave energy). Never allow metal to touch walls or door. (For more information, see "Using aluminum foil" in the "Cooking Guide" section.)
Is it normal for the turntable to turn in either direction?	Yes. The turntable rotates clockwise or counterclockwise, depending on the rotation of the motor when the cooking cycle begins.
Sometimes the door of my microwave oven appears wavy. Is this normal?	This appearance is normal and does not affect the operation of your oven.
What are the humming noises that I hear when my microwave oven is operating?	You hear the sound of the transformer when the magnetron tube cycles on.
Why does the dish become hot when I microwave food in it? I thought that this should not happen.	As the food becomes hot it will conduct the heat to the dish. Be prepared to use hot pads to remove food after cooking.
What does "standing time" mean?	"Standing time" means that food should be removed from the oven and covered for additional time to allow it to finish cooking. This frees the oven for other cooking.
Can I pop popcorn in my microwave oven? How do I get the best results?	Yes. Pop packaged microwave popcorn following manufacturer's guidelines or use the preprogrammed Popcorn pad. Do not use regular paper bags. Use the "listening test" by stopping the oven as soon as the popping slows to a "pop" every one or two seconds. Do not repop unpopped kernels. Do not pop popcorn in glass utensils.
Why does steam come out of the air exhaust vent?	Steam is normally produced during cooking. The microwave oven has been designed to vent this steam out the top vents.

# Troubleshooting

Most cooking problems often are caused by little things you can find and fix without tools of any kind. Check the lists below and on the next page before calling for assistance or service. If you still need help, see the "Requesting Assistance or Service" section.

## Microwave does not operate, first check the following:

- Is the microwave oven plugged into a live outlet with the proper voltage? (See Installation Instructions.)
- Have you blown a household fuse or tripped a circuit breaker?
- Has the electric company experienced a power failure?

## Other possible problems and their causes:

Problem	CAUSE
<b>Nothing works.</b>	<ul style="list-style-type: none"><li>• The power supply cord is not plugged into a live circuit with the proper voltage. (See the "Electrical requirements" on page 5 and "Grounding instructions" on page 6.)</li><li>• A household fuse has blown or a circuit breaker has tripped.</li><li>• The electric company has had a power failure.</li></ul>
<b>The microwave oven will not run.</b>	<ul style="list-style-type: none"><li>• You are using the oven as a timer. Touch OFF/CANCEL to cancel the Minute Timer.</li><li>• The door is not firmly closed and latched.</li><li>• You did not touch START/ENTER.</li><li>• You did not follow directions exactly.</li><li>• An operation that you set earlier is still running. Touch OFF/CANCEL to cancel that operation.</li></ul>
<b>Food is not cooked enough.</b>	<ul style="list-style-type: none"><li>• The electric supply to your home or wall outlets is low or lower than normal. Your electric company can tell you if the line voltage is low. Your electrician or service technician can tell you if the outlet voltage is low.</li><li>• The cook power is not at the recommended setting. Check the "Cooking guide" section on page 27.</li><li>• You have not allowed enough cooking time for the amount of food being cooked. Larger amounts of food need longer cooking times.</li></ul>
<b>The display shows a time counting down but the oven is not cooking.</b>	<ul style="list-style-type: none"><li>• You have set the controls as a minute timer. Touch OFF/CANCEL to cancel the Minute Timer.</li></ul>

If none of these items was causing your problem, see the "Requesting Assistance or Service" section on page 31.

# Requesting Assistance or Service

Before calling for assistance or service, please check the "Troubleshooting" section. It may save you the cost of a service call. If you still need help, follow the instructions below.

## 1. If you need assistance\* ...

Call our toll free number. Dial toll free from anywhere in the U.S.A.:

**1-800-253-1301**

and talk with one of our trained consultants. The consultant can instruct you in how to obtain satisfactory operation from your appliance or, if service is necessary, recommend a qualified service company in your area.

## 2. If you need service\* ...

Contact the dealer from whom you

purchased the appliance or the authorized servicer in your area. For help finding an authorized servicer in your area, call our toll free telephone number in Step 1.

## 3. If you need replacement parts ...

To locate replacement parts in your area, refer to Step 2 or call our Consumer Assistance Center number in Step 1.

### \* When asking for help or service:

Please provide a detailed description of the problem, your appliance's complete model and serial numbers, and the purchase date. (See the "A Note to You" section.) This information will help us respond properly to your request.
