BEFORE THE FIRST USE

Remove all packaging and any promotional labels or stickers from your waffle iron. Be sure that all parts (listed above, **Parts and Features**) of your new waffle iron have been included before discarding any packaging materials. You may want to keep the box and packing materials for use at a later date.

Before using your Cuisinart® Traditional Waffle Iron for the first time, wipe housing and waffle plates with a damp cloth to remove any dust from the warehouse or shipping.

Note: The Cuisinart® Traditional Waffle Iron has been treated with a special nonstick coating. Before the first use, we suggest you season the grids with cooking spray or flavorless vegetable oil. If using oil, apply oil with a paper towel or pastry brush. You may find it helpful to repeat this process before each use of the waffle iron.

OPERATING INSTRUCTIONS

1. Place the closed waffle iron on a clean, flat surface where you intend to bake.
2. Plug the power cord in a standard electrical outlet.
3. Turn the control dial clockwise from the OFF position to the desired browning setting. Setting #1 for the lightest color waffles and setting #6 for the darkest color waffles. We recommend using setting #3 or #4 for golden brown waffles.

The red indicator light will turn on to signal power. Allow the waffle iron to preheat. When the waffle iron has reached desired temperature, the green indicator light will turn on and the audible tone will sound. You are now ready to begin baking.

Note: The first time you use your waffle iron it may have a slight odor and may smoke a bit. This is normal, and common to appliances with a nonstick surface.

- Lift lid of waffle iron by grasping the handle and pushing back and up in one fluid motion. Lid will stay open at 105° position until you lower it.

- Pour batter onto the center of the lower waffle grid. Use a heat-proof spatula to spread batter evenly over the grids. Close the lid. The waffle iron will automatically latch shut when you lower the lid. The green light will turn off but the red light will stay illuminated.
- Baking time is determined by the browning level that you chose in Step 3. It may take up to 4 minutes to bake your waffle on setting #6.
- When the waffle is ready to eat, the green light will turn on and the audible tone will sound. Remove the waffle by gently loosening the edges with a heat-proof plastic spatula or wooden spatula. Never use metal utensils, as they will damage the nonstick coating.
- When you are finished baking, turn the control dial counterclockwise to the OFF setting. The red indicator light will turn off. Unplug the power cord from the wall outlet. Allow the waffle iron to cool down completely before handling.

CLEANING AND CARE

Once you have finished baking, turn the control dial to the OFF position and remove plug from electrical outlet. Leave top lid open so grids begin to cool. Allow waffle iron to cool down completely before handling.

Never take your waffle iron apart for cleaning. Simply brush crumbs from grooves, and absorb any excess cooking oil by wiping with a dry cloth or paper towel.

You may clean the grids by wiping with a damp cloth to prevent staining and sticking from batter or oil buildup. **Be certain grids have cooled completely before cleaning.** If batter adheres to plates, simply pour a little cooking oil onto the baked batter and let stand approximately 5 minutes, thus allowing it to soften for easy removal.

To clean exterior, wipe with a soft dry cloth. Never use an abrasive cleanser or harsh pad. NEVER IMMERSE CORD, PLUG OR UNIT IN WATER OR OTHER LIQUID.

STORAGE

Store with cord wrapped securely under base. For compact storage, stand waffle iron on back end with control panel facing up. The waffle iron has been designed with a special latching feature so the lid stays closed during storage.

TIPS TO MAKE PERFECT WAFFLES

We recommend setting #3 or #4 for golden brown waffles, either from mix or homemade.

If you prefer crisper, darker waffles, increase the browning control. For lighter waffles decrease the browning control.

For evenly filled waffles, pour the batter onto the center of the lower grid and spread out evenly to the edges. The entire lower grid should be filled.

We recommend using 1/3–1/2 cup batter per waffle for evenly filled waffles.

Waffles are best when made to order, but baked waffles may be kept warm in a 200°F oven. Place in a baking pan or wrap in foil while in the oven. Waffles wrapped in foil may lose their crispiness.

Baked waffles may be frozen. Allow to cool completely, then place in plastic food storage bag. Use waxed paper to keep waffles separated. Reheat in a toaster or toaster oven when ready to use.

- 1/2 cup cottage cheese**
- 1 cup reduced-fat milk**

Place oats, flour, sugar, baking powder, cinnamon, and salt in a mixing bowl. Stir to combine. Stir in remaining ingredients as listed one at a time until mixture resembles a smooth batter. Let batter rest 5 minutes before using. Preheat your Cuisinart® Waffle Iron on setting #3.

When preheated, green indicator light will illuminate. Pour 1/2 cup of batter onto the center of the lower grid. Allow batter to spread toward edges for 5 seconds. Close lid of waffle iron – green indicator light will turn off. When green indicator light turns on again, waffle is ready. Open lid and carefully remove baked waffle. Repeat with remaining batter. For best results, serve immediately. You may keep waffles warm on a rack placed on a baking sheet in a warm (200°F) oven.

Limited Three-Year Warranty

This warranty is available to consumers only. You are a consumer if you own a Cuisinart® Traditional Waffle Iron which was purchased at retail for personal, family or household use. Except as otherwise required under applicable law, this warranty is not available to retailers or other commercial purchasers or owners.

We warrant that your Cuisinart® Traditional Waffle Iron will be free of defects in materials and workmanship under normal home use for 3 years from the date of original purchase.

We suggest you complete and return the enclosed product registration card promptly to facilitate verification of the date of original purchase. However, return of the product registration card does not eliminate the need for the consumer to maintain the original proof of purchase in order to obtain the warranty benefits. In the event that you do not have proof of purchase date, the purchase date for purposes of this warranty will be the date of manufacture.

If your Cuisinart® Traditional Waffle Iron should prove to be defective within the warranty period, we will repair or, if we think necessary, replace it. To obtain warranty service, please call our Customer Service Center toll-free at 1-800-726-0190 or write to: Cuisinart, 150 Milford Road, East Windsor, NJ 08520.

To facilitate the speed and accuracy of your return, enclose \$10.00 for shipping and handling. (California residents need only supply a proof of purchase and should call 1-800-726-0190 for shipping instructions.) Please be sure to include your return address, description of the product's defect, product serial number, and any other information pertinent to the return. Please pay by check or money order.

NOTE: For added protection and secure handling of any Cuisinart® product that is being returned, we recommend you use a traceable, insured delivery service. Cuisinart cannot be held responsible for in-transit damage or for packages that are not delivered to us. Lost and/or damaged products are not covered under warranty.

Your Cuisinart® Traditional Waffle Iron has been manufactured to the strictest specifications and has been designed for use only with authorized accessories and replacement parts.
