Serial number:

IMPORTANT INFORMATION

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

The lightning symbol in the triangle tells you that the voltage inside this product may be strong enough to cause an electric shock. **DO NOT TRY TO SERVICE THIS PRODUCT YOURSELF.**

The exclamation mark in the triangle tells you that important operating and maintenance instructions follow this symbol.

CAUTION

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED PLUG WITH AN EXTENSION CORD RECEPTACLE OR OTHER OUTLET UNLESS THE PRONGS CAN BE FULLY INSERTED INTO THE OUTLET TO PREVENT ANY EXPOSURE OF THE PRONGS ON THE POLARIZED PLUG.

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDERSIRED OPERATION.

CAUTION

The plug has one prong wider than the other and will fit only one way into a standard electrical outlet (120 volt AC, 60 Hz). If the plug does not fit into the outlet, try turning it around. If the plug still does not fit, the outlet is probably non-standard and must be replaced by a qualified electrician. **Do not tamper with the plug or try to force it into a non-standard outlet.**

Note to CATV system installers in the USA

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC, which provides guidelines for proper grounding, and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

IMPORTANT INFORMATION

Precautions

Installing your TV

- Place the TV on the floor or on a sturdy platform. The mounting surface should be flat and steady. If you install the TV on a soft floor, make sure that the floor is not damaged by the weight of the TV.
- Place the TV far enough away from the walls to allow proper ventilation. This will prevent the TV from overheating and avoid possible damage to the TV. Avoid dusty places.
- Damage may occur if you leave the TV in direct sunlight or near a heater. Avoid places subject to extremely high temperatures or humidity, and temperatures of 41°F(5°C) or lower.
- If you decide to subscribe to DIRECTV, we strongly recommend that you have the satellite system professionally installed. Installation can be arranged through the dealer where the TV was purchased.

Using your TV

- Do not stand or climb on the TV.
- Do not put any heavy object on top of the TV.
- Do not place containers with liquids such as drinks or cosmetics on the TV. If any foreign material or water leaks into the TV, unplug the AC cord and contact your dealer.
- If the room temperature suddenly rises, condensation may occur on the lenses resulting in picture distortion or color fading. In such a case, simply wait a while (with the power on) and the condensation will evaporate.
- **Avoid displaying stationary images on your TV screen for extended periods of time. Stationary patterns generated by a picture-out-picture (POP) display, computer displays, video games, stock market reports, etc., can become permanently engrained on the picture tube. This damage is not protected by your warranty because it is the result of misuse. If you wish to use your TV to display still images, reduce brightness and contrast settings. Never leave a POP, computer, or video game display unattended.**
- Sit approximately 10-25 feet away from the TV. Sitting too far to the left or right of the screen will cause the picture to appear dull as will direct sunlight and room lights. Turn the TV off to check for reflections on the screen. Then remove the source of any reflections while viewing.

Software Upgrade

- Your digital satellite receiver is able to receive upgrades or modifications to some of its features and functions. These modifications will occur automatically (usually at times when most viewers are not watching programming). When an upgrade or modification is sent, you may experience a disruption in reception for a few minutes. Your reception should return to normal after the modification is complete. Your receiver must be plugged in to receive upgrades. Do not unplug your receiver while an upgrade is in progress. Please consult the Upgrade menu to find a schedule of upgrades or modifications planned by DIRECTV.

Cleaning your TV

- Clean the TV with a soft dry cloth. Never use strong solvents such as thinner or benzene which might damage the finish of the cabinet. If the cabinet is very dirty, use a damp cloth to wipe the cabinet clean, then finish with a dry cloth.

WELCOME TO HDTV

High Definition refers to a new way of sending programming information over the airwaves and into your TV. There are two types of TV display formats available. One is ATSC format, which originated from the Advanced Television Systems Committee. The other is NTSC format, which is named for the National Television Systems Committee. What makes your High Definition Television (HDTV) special is that it has tuners capable of receiving ATSC and NTSC formats as well as digital satellite signals. You can receive: analog (in NTSC format), digital terrestrial (in ATSC format), cable (in NTSC and ATSC formats), and digital satellite. This TV makes receiving all types of signals seamless. Below is an example of how your HDTV can receive the different types of signals.

So why is it called High Definition? Definition—commonly called resolution—refers to the sharpness of the image and is determined by the number of dots, or pixels, your screen uses to create the image. The more pixels the sharper the image. An HDTV normally has either 1080 or 720 rows and over 1,000 columns of pixels. This results in a display of over one million pixels. Your HDTV also has a wide screen, or “wide aspect ratio” of 16:9 as opposed to the common 4:3 ratio. It is normally capable of displaying both interlaced images (like today’s analog TVs) and progressive images (like a computer monitor).

What this all means is that while digital broadcasting will bring many new possibilities, only people with HDTVs like yours will actually be capable of realizing many of them. A wide aspect ratio, one million pixel resolution, CD-quality audio with Dolby Digital surround sound, and improved interactivity are features of many digital broadcasts, and your HDTV will help bring it all into your home.

GETTING STARTED

Now that you have an understanding of what your HDTV can do, read on to find necessary information about how to use the TV.

The first section of this manual shows you how to connect components and speakers to your TV. The “Basic TV Operation” section describes how you receive the three signals and the important modes of operation: TV mode and DIRECTV mode. The rest of this manual describes how to use your television’s many features, such as program guides, picture and audio controls, and system options.

* The appearance of your satellite dish antenna may differ from that shown here.

If your satellite dish antenna is round instead of oval, you can receive programming from only the DIRECTV satellite.

SETUP AND CONNECTIONS

This section tells you how to get your HDTV set up and connected. It describes the cables you will need, explains the front and back panels, and walks you through the steps needed to start using your TV.

SETUP AND CONNECTIONS

STEP 1: CONNECT YOUR TV TO OTHER COMPONENTS

During the satellite dish antenna installation, the TV may have been connected with just a coaxial cable for the system test. Depending on what components you have, another connection may provide better picture and audio quality. The following sections provide cable and connection information to help you decide what connection is best for you.

THINGS TO KNOW BEFORE CONNECTING COMPONENTS

Protect Your Components from Power Surges

- Connect all components before plugging any power cords into the wall outlet.
- Always turn off the TV and other components before you connect or disconnect any cables.

Position Cables Correctly to Avoid Audio Hum or Interference

- Insert all cable plugs firmly into their jacks.
- Place the audio/video cables to the sides of the TV's back panel instead of straight down the middle after you connect your components.
- Try not to coil any twin-lead cables; keep them away from the audio/video cables as much as possible.
- Make sure all antennas and cables are properly grounded. Refer to the safety sheet packed with your unit.

Protect Your Components from Overheating

- Do not block ventilation holes in any of the components. Arrange the components so that air can circulate freely.
- Do not stack components.
- Allow adequate ventilation when placing your components in a stand.
- Place an amplifier on the top shelf of the stand so that heated air rising from it will not flow around other components.

SETUP AND CONNECTIONS

JACKS AND CABLES

Below is a description of the jacks and cables you can use to make connections. Note that not all cables come with your television unit.

ColorStream™ Jacks and Cables (RCA-type)

ColorStream cables come in sets of three and provide the best picture performance. ColorStream cables can only be used with ColorStream (component video) compatible components.

S-Video Jack and Cable

The S-Video jack provides better picture quality for your system. This jack is available on this TV and is used in conjunction with audio cables. Remember to connect the left and right audio cables because the S-Video jack carries only the picture signal, not the sound.

Audio/Video Jacks and Cables (RCA-type)

The audio/video jacks provide very good picture and stereo sound quality. These jacks are used for most audio/video connections between components. The audio/video jacks are often color coded (yellow for video, red for right audio, and white for left audio). If your component has only one input for audio (mono), connect it to the left (white L/Mono) audio jack on the TV.

RF Jacks and Coaxial Cables (F-type)

The RF jacks are necessary for reception of off-air broadcasts, cable, and DIRECTV signals.

These jacks are required for antenna or cable connections. The RF and coaxial jacks on the TV are labeled SATELLITE IN, ANTENNA A IN, and ANTENNA B IN. An RG-6 coaxial cable is required for all satellite signal distribution.

Optical Jack and Cables

The optical cable is used for connecting a Dolby Digital receiver. If you own a Dolby Digital receiver that uses an optical cable-type input, you can use an optical cable to connect the TV to that receiver for the best sound quality.

Telephone Jack and Cord

A telephone line cord is required to connect your TV to a phone line if you choose to subscribe to DIRECTV® programming. The phone line connection is used to periodically call out to DIRECTV. You will need an RJ11 type modular jack, which is the most common type of phone jack and might look like the one pictured here. If you don't have a modular jack, call your local telephone company to find out how to get one installed.

SETUP AND CONNECTIONS

FRONT OF THE TV

The diagrams below describe the front panel and front input jacks on the TV.

If you cannot find your remote control, you can use the front panel of the TV to operate many of the TV's features.

POWER Turns the TV on and off.

MENU/OK Brings up the main menu. When in the menu system, it selects highlighted items.

VOLUME ▼ (<) Decreases the volume. When in the menu system, < moves the highlight left and adjusts menu controls.

VOLUME ▲ (>) Increases the volume. When in the menu system, > moves the highlight right and adjusts menu controls.

CHANNEL ▼ (∨) Scrolls down through the current channel list. If you are in TV mode and press CHANNEL ▼, you scroll down through TV channels. If you subscribe to DIRECTV® programming and are in SAT mode, you scroll down through DIRECTV channels. In the menu system, ∨ moves the highlight down and adjusts menu controls.

CHANNEL ▲ (∧) Scrolls up through the channel list. If you are in TV mode and press CHANNEL ▲, you scroll up through TV channels. If you subscribe to DIRECTV® programming and are in SAT mode, you scroll up through DIRECTV channels. In the menu system, ∧ moves the highlight up and adjusts menu controls.

TV/SAT Toggles between TV mode and SATellite (DIRECTV) mode.

INFO Brings up the on-screen channel banner. Press when in the program guide to get more information on the highlighted program or channel.

VIDEO 3 Lets you connect a baseband NTSC (analog) component such as a VCR, Internet access device, game, or camcorder.

S-VIDEO Lets you connect an S-Video cable for better video quality picture to a component with S-Video capability, such as a VCR. When using S-Video, make sure to connect the two audio cables as well as the S-Video connector.

VIDEO Provides video connection. The video connector is usually yellow.

AUDIO L/MONO Provides left audio (stereo left channel or mono) connection. The left audio connector is usually white.

R AUDIO Provides right audio connection. The right audio (stereo right channel) connector is usually red.

SETUP AND CONNECTIONS

RESET Restarts the TV when the system is locked.

Making Connections to the Front Panel

You can connect one of many types of devices to the TV's front panel, such as a video game or camcorder for playback.

To connect a device to the front panel:

1. Open the small front panel door protecting the VIDEO 3 jacks.
2. Connect the device's audio/video outputs to the VIDEO 3 audio and video jacks on the TV.
3. If the device has S-Video capability, connect an S-Video cable (instead of the video cable) from the device to the S-VIDEO jack on the TV. If not, skip this step.
4. Press the TV/VIDEO button on the remote control until V-3 appears in the channel banner.

Below is an example of how you might connect a camcorder for playback.

SETUP AND CONNECTIONS

BACK OF THE TV

The diagram below describes each of the back panel jacks found on the TV. When connecting A/V cables, be sure to connect corresponding outputs and inputs (video to video, right audio to right audio, etc.).

SATELLITE IN Use to connect the satellite dish antenna to the TV.

ACCESS CARD INTERFACE Insert the access card into the slot so your program provider can identify you. Make sure the contacts on the access card are on the top of the card while inserting. (Refer to “New Access Card” in this manual’s “Assistance” section on page 84 for details.) The DIRECTV PLUS™ System requires a valid card.

PHONE JACK Use to connect a phone line to the TV. The DIRECTV PLUS™ system requires a phone line connection to periodically call out to program providers.

DIGITAL AUDIO OUT Use a digital optical cable (or SPDIF cable) to connect your TV to a compatible Dolby Digital receiver or decoder. Dolby Digital offers theatre-quality sound (six audio channels).

ANTENNA A IN Use to connect an off-air antenna or cable TV signal to the TV.

ANTENNA B IN Use to connect a second off-air antenna or cable TV signal to the TV.

You can also use the ANT A IN (or ANT B IN) for video games and switch between the two inputs using the ANTENNA button on the remote control. When using TV games, computers, and similar products with your TV, keep the contrast at a low setting. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high contrast setting, the image can be permanently imprinted onto the picture tubes. These types of imprints are not covered by your warranty because they are the result of misuse.

SETUP AND CONNECTIONS

VIDEO 1 Lets you connect a baseband NTSC (analog) component such as a VCR, laserdisc player or Internet access device.

- R AUDIO provides right audio (stereo right channel) connection. The right audio connector is usually red.
- L/MONO AUDIO provides left audio (stereo left channel or mono) connection. The left audio connector is usually white.
- VIDEO provides composite video connection. The video connector is usually yellow.
- S-VIDEO lets you connect an S-Video cable, for better video quality, to a component with S-Video capability, such as a VCR or DVD player. When using S-Video, make sure to connect the two audio cables, as well as the S-Video connector.

VIDEO 2 Provides connection to a second NTSC (analog) video component such as a VCR or laserdisc player. Its jacks are the same as described for VIDEO 1, above.

COLORSTREAM HD1 Lets you connect three ColorStream (component video) cables, for the best video quality, to a component with ColorStream capability, such as a Toshiba DVD player. When using ColorStream HD1, make sure to connect the two audio cables.

COLORSTREAM HD2 Lets you connect three ColorStream (component video) cables to a second component with ColorStream capability. Its jacks are the same as described for COLORSTREAM HD1, above.

VIDEO/AUDIO OUT Use to connect a VCR with video/audio inputs. These jacks are ideal for recording TV or video programs being displayed on the screen.

VARIABLE AUDIO OUT Use to connect an audio receiver or amplifier for variably controlled stereo output. The TV's remote control can be used to control audio.

AUDIO CENTER CHANNEL IN Use to connect an audio amplifier with a Dolby Digital (AC3) or Dolby Pro Logic surround sound capability. The TV's speakers can be used as center speakers.

ON/OFF Switch Set to OFF if you want to use the internal TV speakers only. Set to ON if you want to use a Dolby Digital (AC3) or Dolby Pro Logic surround sound system. The TV's speakers can be used as center speakers.

SETUP AND CONNECTIONS

THE BASIC CONNECTION

TV and VCR

Cable or any alternate RF signal, such as a digital or analog off-air antenna

Satellite dish antenna

How to view programming:

- To watch cable TV or off-air TV programs from an antenna in this connection, press ANTENNA on the remote control until ANTENNA A is displayed in the channel banner.
- To watch cable or any other alternate RF signal, such as digital or analog off-air, press ANTENNA on the remote control until ANTENNA B is displayed in the channel banner.
- To watch DIRECTV® programming, press TV/ SAT on the remote control and channel up or down to the desired program.

How to view your VCR:

- Press TV/VIDEO on the remote control and select the video input (in this example, V-1) in the channel banner. Because the digital decoder is in the TV, not the VCR, digital channels cannot be recorded with this hook-up. If an off-air antenna is used, the VCR output should be viewed using one of the video inputs.

The ANT A and ANT B jacks can receive digital or analog RF signals. The illustrations here are recommended connections in a cable environment.

Some cable systems may require a "conversion box." If so, consult your cable company's box tuning instructions for details.

SETUP AND CONNECTIONS

THE ADVANCED CONNECTION

TV, VCR, and DVD Player and Audio Amp.

After you have made your connections, program the TV to tune to the correct video input channel to see and hear audio and video from the attached component (VCR, DVD player, etc.). Program your TV as described in the "System Options and Preferences" section of this Manual.

How to view your DVD and VCR:

- To watch the VCR in this connection, press TV/VIDEO on the remote control until the correct video input appears (in this example, V-1). Note that because the digital decoder is in the TV, not the VCR, you cannot record digital channels with this hook-up.
- To watch the DVD player in this connection, press TV/VIDEO on the remote control until the correct video input appears (in this example, CS-1).

Some cable systems may require a "conversion box." If so, consult your cable company's box tuning instructions for details.

Please Read Before Using the Digital Audio Out Jack

This TV's optical digital output jack fully complies with the international standard governing this type of jack (IEC958), and is designed for connection to a Dolby Digital (AC-3 or PCM) receiver or Dolby Digital (AC-3 or PCM) decoder. Older equipment, some of which is not fully compliant with IEC958, may not be compatible with the Dolby Digital bitstream. Such a connection using anything

SETUP AND CONNECTIONS

other than Dolby Digital AC-3 or PCM receiver or decoder could create a high noise level, causing damage to headphones or speakers.

Connecting two VCRs

This connection allows you to record (dub/edit) from one VCR to another VCR while watching a video program. You will also be able to record from one TV channel while watching another channel.

Caution:

Do not connect one VCR to the output and input jacks on the TV at the same time. If you are using a S-VHS VCR, use the S-video connections and remove the video cable. Do not connect the video cable and the S-video cable to VIDEO 1 simultaneously.

The unauthorized recording of television programs, video tapes and other materials may infringe upon the provision of copyright laws.

Note:

To dub or edit, the VCR 2 must select Line IN, and the TV must select V-1.

Connecting a stereo amplifier

This connection allows you to use an audio amplifier to adjust the audio level. This also allows you to use external speakers.

To control the audio, turn on the TV and the stereo amplifier, then turn off the built-in speakers. (See "AUDIO CONTROLS" on pages 54-55.)

SETUP AND CONNECTIONS

STEP 2: PLACE BATTERIES IN THE REMOTE CONTROL

Follow these steps whenever you need to install or change the batteries in your TV's remote control.

1. Remove the cover from the battery compartment.

2. Insert batteries into the battery compartment, matching the + and – end of each battery.

3. Replace the cover.

STEP 3: COMPLETE THE INTERACTIVE SETUP

Interactive setup appears when you turn on your TV for the first time. Follow the steps to configure the basics of your system, such as setting up the time and day, searching for available channels, and setting up speakers. To run it again, select Assistance from the Main menu, then select Interactive Setup. For more details, see the section "Getting Assistance" on page 81.

STEP 4: ORDER PROGRAMMING

You should decide if you would like to receive DIRECTV® programming*. To receive DIRECTV® programming, your satellite dish antenna must be installed and pointed correctly. You must also contact your service provider, DIRECTV.

Programming with DIRECTV: Call 1-800-347-3288

When you order programming, you need to know your access card number. To get the number, select Assistance from the Main menu and then select System Test. Wait for the system to run all of its tests. The access card number is displayed at the end of the system test. Write the access card number in the space below for easy reference:

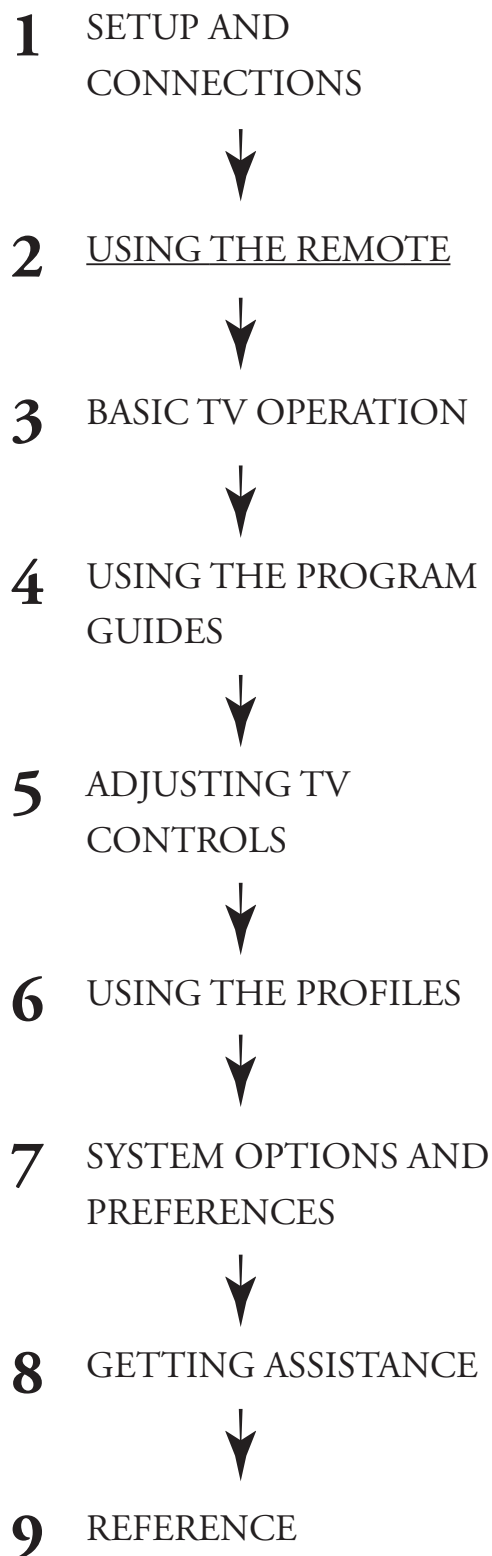

* DIRECTV programming is provided in accordance with the terms and conditions of the DIRECTV Customer Agreement, a copy of which is provided with your first DIRECTV billing statement. DIRECTV is a trademark of DIRECTV, Inc., a unit of Hughes Electronics Corp., and is used with permission.

USING THE REMOTE

In this section you will find out how to use your universal remote control. This section:

- defines the buttons on the remote control.
- describes how you toggle between TV “mode” and Satellite “mode.”
- shows you how to change between analog off-air, digital off-air, and DIRECTV channels.
- walks you through using the POP (picture-out-picture) feature.
- describes how to program the remote to control other devices such as a VCR.
- describes how to learn operating codes from most infrared remote control transmitters.

Important: Because this universal remote can control several different components (TV, VCR, etc.), it uses operational modes triggered by the component switch. For example, if you want the remote to control the VCR, you would select “VCR” position to put the remote into VCR mode.

USING THE REMOTE

REMOTE CONTROL BUTTONS

POWER When the remote control is in TV or SAT mode, turns the TV on or off. If in another component mode, (VCR, DVD, etc.) and programmed, will turn that component on and off.

TV/DVD/VCR/CABLE Switches among TV,DVD,VCR and CABLE modes.

Light button Press to illuminate the remote control's buttons(white keys only).

TV/SAT Switches between TV (off-air) and Satellite (DIRECTV) modes.

TV/VIDEO Toggles through the external input sources and TV mode.

CH ▲▼ Scrolls up or down through the current channel list. Press once to change the channel up or down; press and hold to continue changing channels. If you are in TV mode and press CH ▲▼, you scan through TV channels. If you subscribe to DIRECTV® programming and are in Satellite mode, you scan through DIRECTV channels.

VOL ▲▼ Adjusts the TV's audio volume.

MUTE Reduces the TV's volume to its minimum level. Press again to restore volume.

RETURN Moves you back and forth between the last two channels selected in either DIRECTV mode or TV mode. For example, if you have been viewing both DIRECTV and TV channels (and thus using both the DIRECTV and TV "modes"), pressing RETURN while watching a DIRECTV channel moves you back to the last DIRECTV channel you viewed. Pressing it while watching a TV channel moves you to the last TV channel you viewed.

▲▼◀▶ Used to point to different items in the menu system and adjust the menu controls.

OK (ENTER) When in the menu system, selects highlighted items.

MENU Brings up the main menu and selects highlighted items.

EXIT Removes on screen displays and returns to normal viewing.

NUMBER BUTTONS (0 - 9) Enters channel numbers and time settings directly though the remote control. For more information on entering digits to change channels, see the section "Basic TV Operation." When in the menus, the digit buttons can be used to directly select items without using the arrows. 0 can be used to return to the previous menu screen.

ANTENNA Switches the source of the off-air signal between ANTENNA A and B.

Don't worry about getting stuck inside a menu. Pressing the EXIT button on the remote control takes you out of the menu system.

USING THE REMOTE

FETCH Brings up the Fetch menu, which is a list of most commonly accessed menu items.

GUIDE When in TV mode, brings up the TV program guide. In Satellite mode, brings up the Satellite guide. Subsequent presses of the GUIDE button scroll through the different types of guides.

INFO Brings up channel and viewing information via the Channel Banner. Press again to bring up an extended channel banner. Press when in the program guides to get more information on the highlighted program or channel.

REW, PLAY, FWD, SLOW, STOP, PAUSE, TV/VCR, REC, +100/ENTER If programmed, provides control for some remote-controllable VCRs.

POP Brings up the picture-out-picture window. Press again to hide POP.

SWAP Exchanges the main picture with the POP window.

SOURCE Toggles through the external input sources for POP.

STILL Freezes the POP picture.

WHO Toggles through user profiles.

POP CH ▲▼ Scrolls up or down through the current POP channel list.

REW, PLAY, FWD, SLOW, STOP, PAUSE, SETUP, TITLE, SUBTITLE, AUDIO, SKIP ▲▼, (ENTER), (+100) If programmed, provides control for some remote-controllable DVD players.

PIC SIZE Toggles through 4 picture sizes “4:3 Standard”, “4:3 Full”, “4:3 Wide 1” and “4:3 Wide 2”.

USE/LEARN Switches between USE and LEARN positions. The USE position places the remote control in normal mode to control the TV or other components selected by the TV/DVD/VCR/CABLE switch. The LEARN position places the remote control in learning mode. You can program A to H buttons to control the component (such as a laserdisc player).

A-H If programmed, you can control the component (such as a laserdisc player).

USING THE REMOTE

PROGRAMMING THE REMOTE CONTROL

The universal remote can be programmed to control most brands of remote controllable components such as VCRs. The remote is already programmed to control most TOSHIBA TVs, VCRs, and DVD players.

Testing the Remote Control

To determine whether the universal remote control requires programming, turn on a component, such as a VCR, point the remote control at the VCR, and set the component (TV/DVD/VCR/CABLE) switch to "VCR". Then press POWER or CH ▲▼ to see if the VCR responds to the remote control commands. If not, it requires programming.

Programming the Remote Control

1. Refer to the "VCR code table", "DVD code table" or "Cable TV converter code table" on pages 26 and 27 to find the code number that corresponds to the brand name of your component.

If more than one number is listed, try each one separately until you find the one that works.

2. Set the component switch to "VCR", "DVD" or "CABLE" position.
3. While holding down EXIT, press the Number buttons to enter the three digit code number for your brand of component. The transmit indicator lights up for 1 second when the programming is completed. When an operation error has occurred, the indicator blinks. Press EXIT again to reset.
4. Point the Remote Control at the component and press POWER to test the code number.

– If the number is correct, the component should turn on.

– If the component does not respond to the remote control, repeat steps 1 through 4 with another code number.

- You have to reprogram the remote control when you change its batteries.
- Some newer VCRs are capable of working on either of two remote codes. These VCRs have a switch labeled "VCR 1/VCR 2."

If your VCR has this kind of switch, and does not respond to any of the code numbers for your VCR brand name, set the switch to the other position ("VCR 1" or "VCR 2") and reprogram the remote control.

- In some rare cases, you may not be able to operate your non-TOSHIBA equipment with the supplied remote control. This is because your equipment may use a code that is not provided with this remote control. In this case, please use the equipment's own remote control.

For future reference, write the code number you set.

DVD CODE: _____

VCR CODE: _____

CABLE CODE: _____

USING THE REMOTE

Using the Remote to Control A Component

Once the remote has been programmed successfully, you are ready to use it to control your components, such as a VCR, DVD player, or cable TV converter.

To operate the component:

1. Set the component switch to the appropriate position (VCR, DVD, or CABLE) to set the remote to control the component.
2. Press POWER to turn the component on or off.
3. Use the remote control buttons that apply to that component.

USING THE REMOTE

LEARNING OPERATING CODE OF ANOTHER REMOTE CONTROL

This remote control is capable of learning operating codes from most infrared remote control transmitters. You can control the functions of your TV and a variety of video/audio equipment with the supplied remote control only.

The A to H buttons can be used as the Learning buttons.

1. Set the USE/LEARN switch to the "LEARN" position.

2. Place the supplied remote control and the remote control transmitter to be learned, head to head approximately 1 to 3 inches (3 to 8 cm) apart.

3. Hold down the button to learn (A to H) on the supplied remote control for about 1 second until the LEARN indicator lights up. When you press a button other than a Learning button, the indicator will blink.
4. Hold down the button of the function to be learned on the other remote control transmitter for about 3 seconds until the LEARN indicator goes off.

Note:

If the LEARN indicator blinks, the supplied Remote Control cannot learn the operating code or an error has occurred.

5. Repeat steps 4 and 5 for storing other functions into other buttons.
6. Set the USE/LEARN switch to the "USE" position.

7. To check your programming, operate the appropriate equipment with the supplied remote control. If the equipment does not operate as expected, repeat steps 1 to 7. If needed, try changing the distance between the two remote controls.

USING THE REMOTE

- Attach the supplied Template to the remote control to enter the function names of the learning buttons (A to H) you have programmed. Use a ballpoint pen, etc. to write the function names.

cancelling the learned operating codes

- Set the USE/LEARN switch to the "LEARN" position.

- Hold down the button of the function to cancel on the remote control for about 1 second until the LEARN indicator lights up.
- Hold down EXIT and MUTE at the same time for about 6 seconds until the LEARN indicator goes off after blinking.

Note:

You cannot cancel the programming if you release the button while the indicator is blinking.

- Set the USE/LEARN switch to the "USE" position.

BASIC TV OPERATION

This section tells you about the channel banner ,which appears when you change channels or press INFO on the remote.

It also describes how to change channels and modes and how to use POP (picture-out-picture).

This section gives you a broad, clear view of basic TV operation.

BASIC TV OPERATION

ABOUT THE CHANNEL BANNER

The channel banner appears whenever you tune to a channel or press INFO on the remote control. Use the arrow buttons and OK to choose an item in the channel banner.

On-screen icons represent frequently-used features. Some icons also change appearance to show the item's status.

Below is a description of the icons you'll find on the channel banner.

Please note that when you're in TV mode, the channel banner will look differently than when you're in Satellite mode (if you subscribe to DIRECTV® programming).

BASIC TV OPERATION

Main menu icon When selected, takes you to the main menu.

TV/SAT logo Toggles between TV and Satellite mode. The highlighted icon indicates the current mode.

Green unlock icon Indicates that the system is unlocked. Spending, viewing and other limits can be accessed and changed.

Yellow unlock icon Indicates that a password has been entered to override profile limits. No limits can be accessed or changed.

Red lock icon Indicates that no limits can be accessed or changed. A password is required to override limits or access the system.

Audio language icon If the icon is highlighted when watching a digital off-air or a DIRECTV channel, more than one audio language is available. If you select the icon, you will hear the language, and the language name will appear in the channel banner. You will activate the language for the current channel (all other channels remain unaffected).

Highlighted mail icon Indicates that you have a message in your mailbox from your DIRECTV® programming providers. Select this icon to access the mailbox and read your mail. If you do not subscribe to DIRECTV® programming, this icon will be absent.

Press INFO on the remote control twice to view an expanded channel banner that shows a program description (when available).

BASIC TV OPERATION

CHANGING BETWEEN DIRECTV AND TV MODE

When you change channels by entering numbers with the remote control, you tune to programming that can come from one of three different sources: the DIRECTV satellite (if you have DIRECTV service), an off-air antenna, or cable TV. You tune to one of these sources by pressing TV/SAT on the remote control; then you can enter the channel numbers. The diagrams below show how your remote control communicates with the three sources.

In **SAT mode**, you tune to channels that come from the DIRECTV satellite signal (if you subscribe to DIRECTV® programming). Enter channel numbers that are three or four digits long. Then press OK to tune.

In **TV mode**, you tune to channels that carry the off-air or cable TV signal.

- To tune to a digital channel, enter channel numbers that are one, two, or three digits long. If necessary, press the right arrow and enter a subchannel number. These numbers appear in the box to the right of the primary channel number. Press OK to tune.
- To tune to an analog channel, enter channel numbers that are up to three digits long. Press OK to tune.

BASIC TV OPERATION

CHANGING CHANNELS

To change channels by entering numbers with the remote control, the remote needs to be in the correct “mode”: either SAT mode (if you subscribe to DIRECTV® programming) or TV mode.

When you want to watch DIRECTV® programming, put the remote in SAT mode

1. Make sure you are in SAT mode by pressing TV/SAT on the remote control.
2. Enter the channel number and press OK. The channel numbers are three or four digits long. If you do not enter at least three digits, “???” will appear in the channel entry box, and the system will wait for a valid entry.

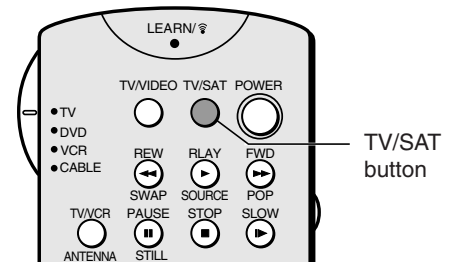

Channel entry box Highlighted to indicate DIRECTV mode

When you want to watch a digital or analog TV channel, put the remote in TV mode

If you want to watch a digital channel:

1. Make sure you are in TV mode by pressing TV/SAT on the remote control.
2. Enter the primary channel number. This number will appear in the primary channel entry box. If there is no subchannel, press OK.
3. If the primary channel number has fewer than three digits and you want to enter subchannel numbers, press the right arrow to advance to the subchannel entry box.
4. Enter the number of the subchannel. This number will appear in the subchannel entry box.
5. Press OK on the remote control to tune to the channel.

TV/SAT button

If you want to watch an analog channel:

1. Make sure you are in TV mode by pressing TV/SAT on the remote control.
2. Enter the channel number. This number will appear in the primary channel entry box. (Analog channels don't have subchannels.)
3. Press OK on the remote control to tune to the channel.

Primary channel entry box Subchannel entry box Highlighted to indicate TV mode

Note that you can always use the channel up and down buttons on the remote control to change channels within the SAT and TV modes.

BASIC TV OPERATION

POP (PICTURE-OUT-PICTURE) OPERATION

Your TV is capable of displaying two pictures simultaneously. This is called the Double-Window or POP (Picture-out-Picture) feature.

This TV is equipped with a dual NTSC tuner that tunes to cable or off-air television signals. You will only be able to use the POP window and main picture with analog channels.

Note that you will only be able to use POP with analog channels.

While the Caption Display is in On mode, the POP can not be displayed.

Window picture

POP Buttons

There are six remote buttons that control the way the POP window works:

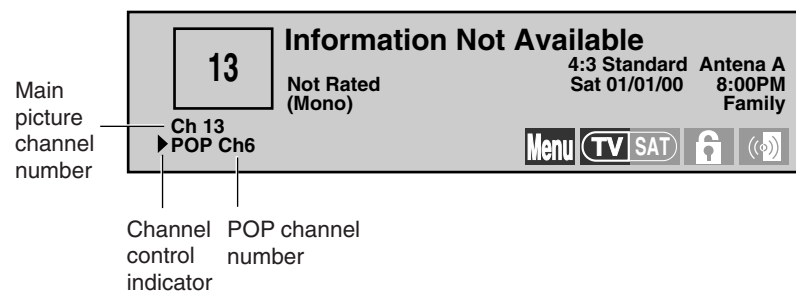

POP Brings up the POP window. Press POP again to remove the window.

POP CH ▲▼ Changes the POP channel.

SWAP Switches, or “swaps,” the video from the POP window with the main picture.

STILL Freezes the POP picture. Press STILL again to return to a moving picture.

SOURCE Toggles through the external input source (Video 1, Video 2, and Video 3) for the POP. ColorStream HD1 and ColorStream HD2 can not be selected.

BASIC TV OPERATION

Basic POP Operation

1. Press the POP button on the remote control. The POP window appears on the screen.
2. Press the POP CH ▲▼ buttons to select the desired program for the window picture.
3. To remove the POP window, press the POP button again.

POP Problems?

- If you are channel surfing and the POP disappears, you may have tuned to a digital channel. To view POP and the main picture, make sure that both the main and POP channels are analog inputs, or signals. Continue changing the channel until you find an analog (NTSC format) channel. The POP window will reappear.

The message "POP Not Viewable" in the channel banner lets you know that POP is not available on this channel and you should tune to another channel.

The channel banner and the message "POP Not Viewable" will disappear after a few seconds, you can refer to the POP message by pressing the INFO button on the remote control

- If you press POP and the POP box is grayed, you may have movie or TV rating limits set. These limits may block your access to the POP channel. For information on removing limits, see the section "Using the Profiles."
- If the POP window disappears when closed captioning is displayed or you press the MUTE button on the remote control, you have a conflict in your settings. You cannot view POP when parental controls have blocked the current program or closed captioning is displayed. In order to view POP, either unlock parental controls or change the closed captioning setting.

BASIC TV OPERATION

SELECTING THE PICTURE SIZE

Press PIC SIZE repeatedly. The 4:3 Standard, 4:3 Full, 4:3 Wide 1, 4:3 Wide 2 mode shown below will be selected in order.

4:3 Standard

This mode shows pictures in conventional ratio of 4:3.

Receiving a 4:3 program

4:3 Full

This mode shows the pictures stretched to fill the screen.

Receiving a 4:3 program

4:3 Wide 1

The central images will be close to their normal proportions. The left and right edges will be stretched.

Receiving a 4:3 program

4:3 Wide 2

The whole images will be retain to its true aspect, but some of the images on the top and bottom will be lost.

Receiving a 4:3 program

Picture size

PIC SIZE

- When the POP is displayed, the PIC SIZE button is not available.
- When a 16:9 program is received, the PIC SIZE button is ignored.

BASIC TV OPERATION

USING THE TV/VIDEO BUTTON

1. Repeatedly press the TV/VIDEO button to scroll through the available input sources until you find the input associated with the component (such as VCR or DVD player) you want to view.

Watch the channel banner to see the input sources change with each press of the TV/VIDEO button.

2. Once you have found the input source you want, the TV will display information from that component.
 - If you tune to VIDEO1 and your VCR is connected to that input, you will be able to view your VCR. To play, stop, or rewind the VCR tape using the remote that came with your TV, you must first set the component switch to "VCR" to put the remote control in VCR mode.

Press TV/VIDEO then GUIDE on the remote control to view a guide-like list of your line inputs and corresponding channels.

USING THE PROGRAM GUIDES

What is a program guide?

A program guide is an on-screen programming schedule. It is a list of the current and future programs. There are separate guides for television programs and DIRECTV® programming (available if you subscribe to DIRECTV® programming).

Both of these guides can be viewed in different formats.

Using the program guides is easy as long as you remember to highlight items on the screen by pressing the arrow buttons on the remote control. Then, press OK to tune to that channel.

USING THE PROGRAM GUIDES

BRINGING UP THE PROGRAM GUIDES

If you subscribe to DIRECTV® programming, you have access to two program guides: a DIRECTV® programming guide and a TV program guide. If you do not subscribe to DIRECTV® programming, you will have one guide: the TV program guide.

You can access the program guides by:

- Pressing MENU on the remote control and selecting Program Guide.

- Pressing the GUIDE button on the remote control.

Note that when you access a program guide, you view the guide corresponding to the “mode” you are in. For example, if you are in DIRECTV mode and press the GUIDE button, you will view the DIRECTV® programming guide. Similarly, if you are in TV mode and press the GUIDE button, you will view the TV program guide.

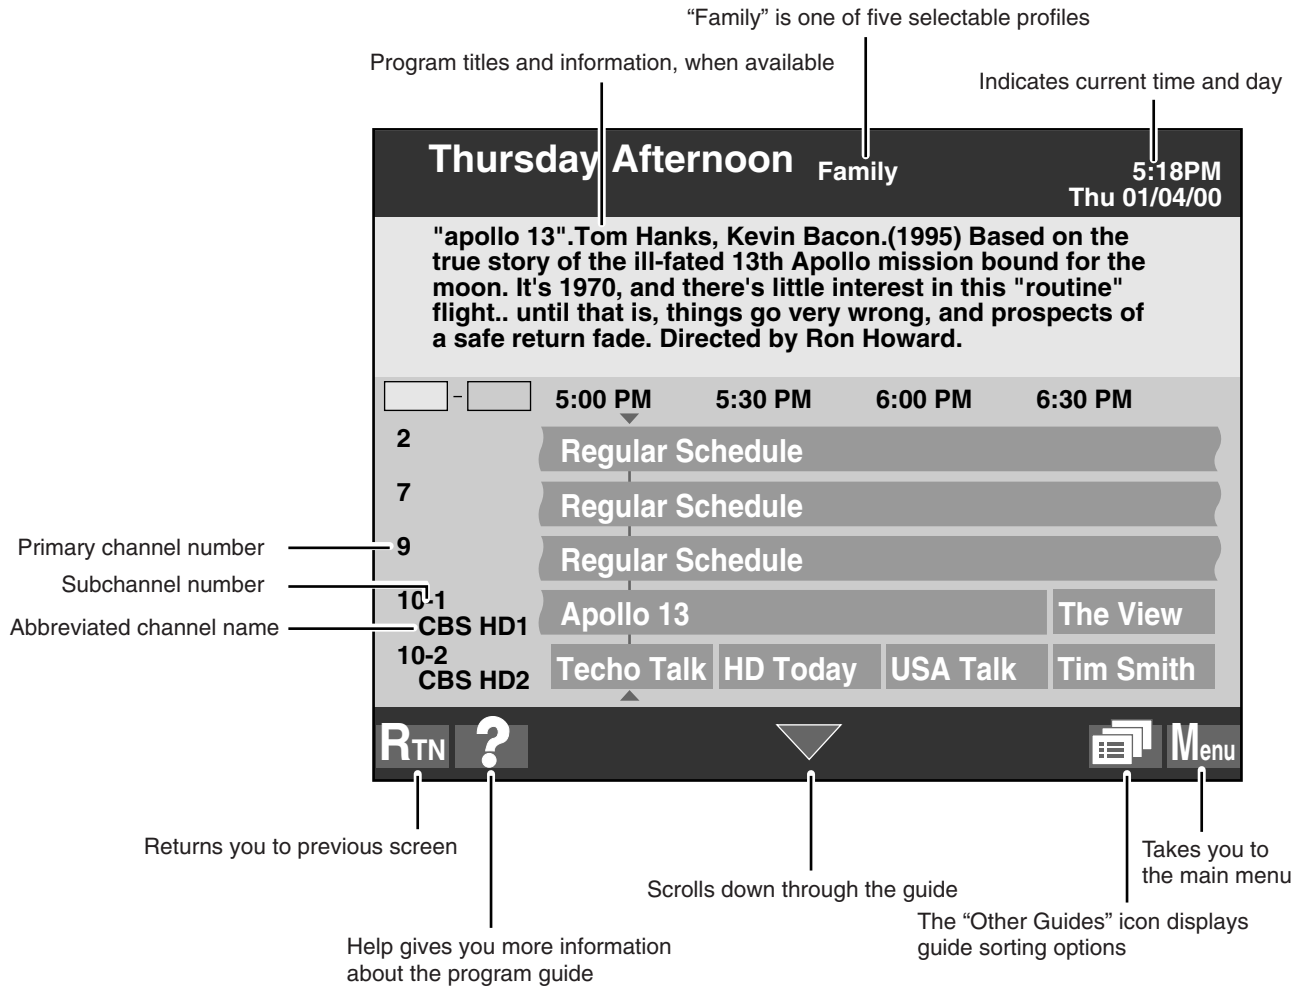

If you are viewing the TV program guide and would like to view the DIRECTV® programming guide, press TV/SAT on the remote control to change “modes” and view the other guide.

USING THE PROGRAM GUIDES

ANATOMY OF THE TV PROGRAM GUIDE

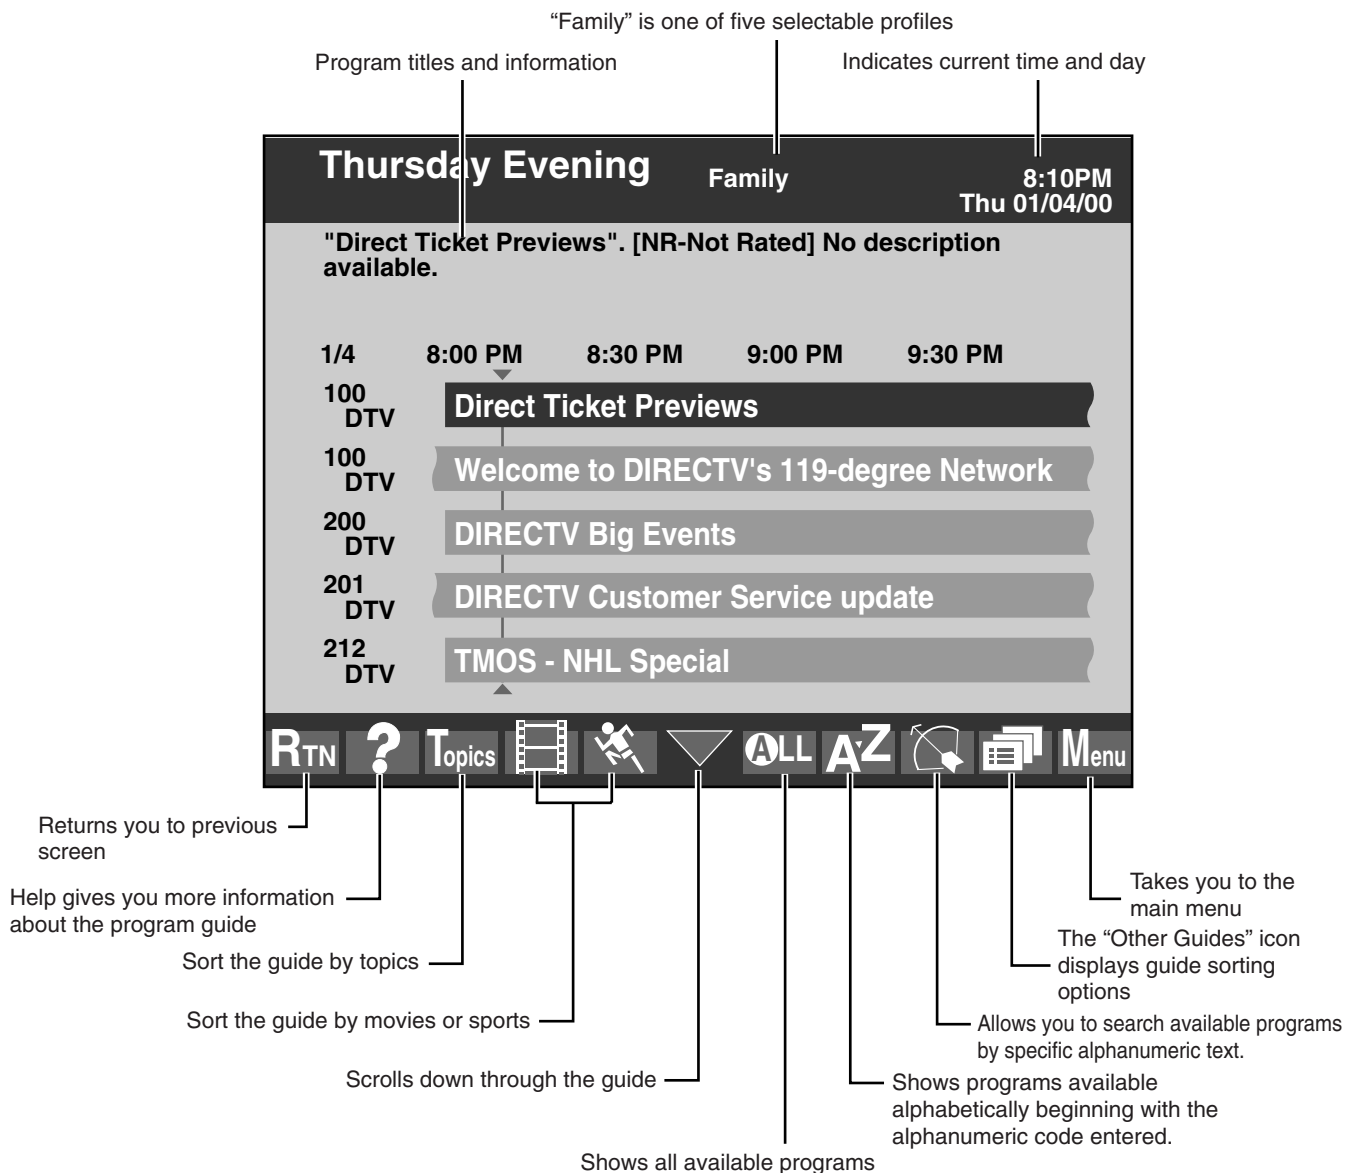

To access the TV program guide, press the TV/SAT button on the remote control in the TV mode, then press GUIDE on the remote control. The following diagram shows you the kind of information you will see in the TV program guide. Note that the availability of TV program titles and information is dependent upon information provided by local broadcasters.

USING THE PROGRAM GUIDES

ANATOMY OF THE DIRECTV® PROGRAMMING GUIDE

To access the DIRECTV® programming guide, you must subscribe to DIRECTV service. Press the TV/SAT button in the Satellite mode, then press GUIDE on the remote control. The following diagram shows you the kind of information you will see in the DIRECTV® programming guide.

USING THE PROGRAM GUIDES

GETTING AROUND IN THE GUIDES

There are several ways to change channels and move around the TV and DIRECTV® programming guides.

- **Point to channels with the number buttons (0-9)**

You can quickly highlight any channel in the program guides by entering the channel number with the number buttons (0-9). For example, to highlight channel 228, press the numbers 2-2-8 and press OK on the remote control. To highlight channel 73, press 7-3 and OK.

- **Scroll channel by channel**

The programs that you see on the TV screen make up one section—or page—of the total program guide. You can scroll to other sections using the arrows: highlight other times with the left and right arrows; highlight other channels with the up and down arrows.

- **Scroll page by page**

If you want to scroll up or down through the program guides faster, press the channel up and down buttons on the remote control. The highlight scrolls a page at a time.

TUNING TO A PROGRAM

- To tune directly to a current program listed in a guide, highlight the program name and press OK.
- To see information about a program or channel in the guide, highlight the program or channel name and press INFO.

After you highlight a program name and press INFO, the Program Details screen appears and gives you several options.

Then, if the program is non-PPV*, you can select:

- View Channel to tune to that channel
- Channel Guide to see a program lineup for that channel
- Other Times to see what other times the program is available

The options available to you may vary according to the type of program you select. If the program is PPV, you will have the option to buy the program.

* Pay per view programs (PPV) are DIRECTV programs that you purchase — like a movie ticket — on an event-by-event basis if you subscribe to DIRECTV® programming.

USING THE PROGRAM GUIDES

USING THE GUIDE BUTTON

Each press of the GUIDE button on the remote control takes you to an alternate type of TV or DIRECTV® programming guide: Detail Guide, SurfGuide (DIRECTV only), or Grid Guide.

By default, the Detail Guide appears when you press GUIDE on the remote control. You can change the default guide from the Detail Guide to the Grid Guide or SurfGuide (DIRECTV only). Select Preferences from the Main menu. Select Default Guide. Use the arrows and OK to choose the guide you want to appear first when you press GUIDE. If SurfGuide is selected as the default guide, the Grid Guide will appear when you access the TV program guide, since SurfGuide isn't available as a TV program guide.

The Detail Guide

The Detail Guide shows five channels in a time-and-channel format, with program information for the highlighted program at the top of the guide.

The SurfGuide (DIRECTV only)

The SurfGuide displays seven DIRECTV channels in a half-hour time-and-channel format, if you subscribe to DIRECTV® programming. The full name of the program and its rating are listed at the bottom of the screen. Press the right arrow button to extend the SurfGuide to show the next two hours.

The Grid Guide

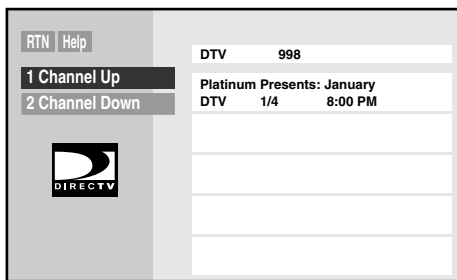

The Grid Guide shows seven channels in a time-and-channel format, with the full title of the highlighted program at the top of the guide.

The Other Guides Icon

Besides the Detail Guide, Grid Guide, and SurfGuide, there are a few more DIRECTV® programming guide formats you can access. The Other Guides icon at the bottom of the TV and DIRECTV® programming guides lets you sort the guides by different variables, such as by channels, data, channel lists, and channel groups.

You can access these guides by selecting the Other Guides icon at the bottom of the Detail Guide and Grid Guide.

- **Channel Guide** Displays a channel's DIRECTV® programming or TV programming schedule in a channel-by-channel format.

Channel Guide lets you see what programs are on a specific channel.

The Detail Guide

The DIRECTV SurfGuide

The Grid Guide

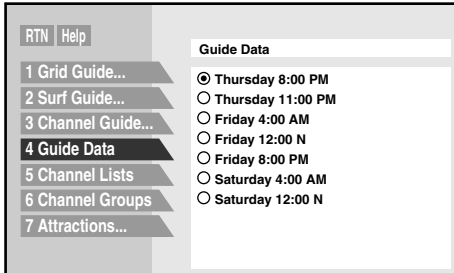

Other Guides icon

USING THE PROGRAM GUIDES

- **Guide Data** Shows you the guides that are available and lets you select one to view in either the DIRECTV® or TV programming guide.

You can point to any program then tune to that channel or get more information by pressing the OK or INFO buttons.

Guide Data shows you future guides.

- **Channel Lists** Displays a list of profiles. You can choose a profile from this list and the guide will display only the DIRECTV or TV channels which have been included in that profile's channel list.
- **Channel Groups** Lets you sort only the DIRECTV® programming guide to include only channels that fall into the selected category. For example, you could sort the DIRECTV guide by pay-per-view movies that are available at a future time.
- **Attractions...** Displays a list of DIRECTV channels that show coming attractions and special events information.

The Attractions Guide shows coming DIRECTV events and programs.

EXITING A PROGRAM GUIDE

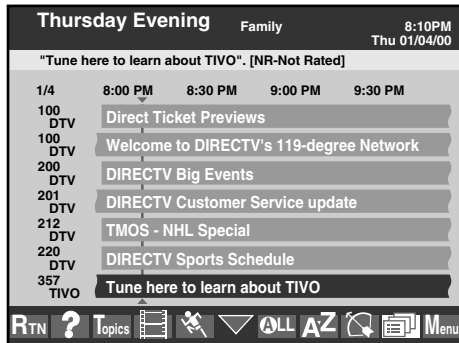

There are three ways to exit a guide:

- Highlight a channel and press OK.
- Highlight RTN and press OK.
- Press EXIT on the remote control.

USING THE PROGRAM GUIDES

SORTING THE DIRECTV® PROGRAMMING GUIDE

Sorting the guide is a way of organizing the DIRECTV® programming guide to show only the types of programs that interest you. There are several on-screen buttons that sort the DIRECTV® programming guide in different ways.

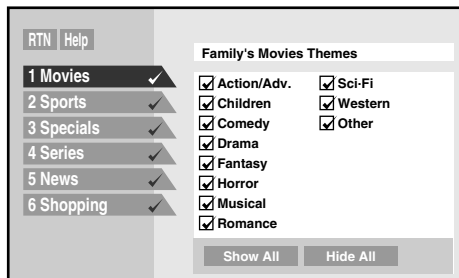

The Sorting icons appear at the bottom of the Grid Guide and Detail Guide.

Sorting the DIRECTV® Programming Guide by Topics

The topics icon sorts the DIRECTV® programming guide according to the current user's preferences. Select the topics icon to sort the guide.

After you select the topics icon, it changes to the topics themes icon. Select the topics themes icon to edit the current user's themes preferences. These preferences are saved in each user's profile.

Checkmark the themes that interest you.

Select the topic categories, and checkmark the themes you would like to appear when you select the topics icon in the guides. Programming that fits the description of checkmarked themes will appear in the DIRECTV® programming guide when you sort by the topics icon.

ADJUSTING TV CONTROLS

The following section tells you how to adjust the picture quality and audio quality of your TV.

- The Picture Quality menu contains the controls that let you adjust the picture.
- The Audio menu contains the controls that let you adjust the way the audio sounds.

ADJUSTING TV CONTROLS

PICTURE QUALITY CONTROLS

The Picture Quality menu contains all of the TV's video configuration controls. To access the Picture Quality menu, press MENU on the remote control to go to the main menu, then select Picture Quality.

Picture Settings

The Picture Settings menu displays the controls for adjusting the way the picture looks. The picture settings you specify apply to your current mode. Use the left and right arrow (◀▶) buttons on the remote control to move the slider to the desired position. Then select RTN when you are finished.

Your options under the Picture Settings menu are:

- **Contrast** Adjusts differences between the light and dark areas of the picture.
- **Color** Adjusts the richness of the color.
- **Tint** Adjusts the balance between the red and green levels.
- **Brightness** Adjusts the brightness of the picture.
- **Sharpness** Adjusts the crispness of edges in the picture.

You can have seven different picture settings: one for analog channels, one for digital channels (including DIRECTV channels), and one for components attached to VIDEO 1, VIDEO 2, VIDEO 3, ColorStream HD1 and ColorStream HD2.

To make settings for analog and digital channels:

1. Enter the "mode" for which you would like to apply the setting by pressing TV/SAT.
2. Then press MENU.
3. Select Picture Quality, and then select Picture Settings to set picture settings.

To make settings for the components connected to VIDEO 1, VIDEO 2, VIDEO 3, ColorStream HD1 and ColorStream HD2, take the following steps:

1. Press TV/VIDEO on the remote control until the input that corresponds with the component you want to make settings for appears in the channel banner. (For example, if your VCR is connected to V-1, stop pressing TV/VIDEO when V-1 appears.)
2. Point the remote at the TV once again, press MENU, and select your picture settings.

ADJUSTING TV CONTROLS

Color Temp

Color Temperature displays a list that lets you set one of three automatic color adjustments: Cool for a more blue palette of picture colors, Medium for neutral picture colors, and Warm for a more red palette of picture colors.

Convergence

The projection TV uses three separate TV tubes: a red one, a green one, and a blue one. The red, green, and blue images are projected onto the screen where they converge to form a full color picture. You can see a clear picture only when they converge correctly. Convergence may drift over time or if you move the TV. If you can see clear images on the screen, skip this procedure. This adjustment should be made after the TV has been on for at least 30 minutes.

To check and adjust the color convergence:

1. Press MENU.
2. Select Picture Quality, and then select Convergence.
3. Press ◀ or ▶ to display the center convergence menu.
If you see separate colored lines, you have to adjust the convergence.

(Correct convergence)

(Adjustments are needed)

4. Press OK (ENTER) to select RED or BLUE.
5. Press ▲ (up), ▼ (down), ◀ (left), ▶ (right) to converge the red or blue line into the green line. When color convergence is correctly adjusted, you will see two single white lines.
6. Press "0" to display the circumference convergence menu.
7. Press the corresponding Number button (1-9) to select the place you want to adjust.

8. Press OK (ENTER) to highlight RED or BLUE.
9. Press ▲▼◀▶ to converge the red or blue line into the green line.
Repeat steps 8 and 9 until you see two single white lines.
10. Press 1-9 to select any other place you want to adjust, then repeat steps 7 through 9.
11. Press EXIT to close the convergence menu.

ADJUSTING TV CONTROLS

Picture Pref

Picture Preference displays a choice list that lets you set one of three preset picture types: Normal for a default picture setting, Theater for a movie-like picture setting, and Memory for your personal preference including Contrast, Color, Tint, Brightness, and Sharpness.

Reset Controls

Allows you to reset all picture quality controls to their original defaults.

AUDIO CONTROLS

The Audio menu lets you adjust the controls that involve the TV's audio outputs.

To access the Audio menu, press MENU on the remote, then select Audio from the main menu.

When changes are made to the Audio profile settings, the AUDIO output is temporarily muted.

Do not change Audio profile settings while recording.

Mute

Turn Mute on (select Sound Off) to set the TV's volume to its minimum level. The same can be accomplished by pressing MUTE on the remote control.

Tone Settings

The Tone Settings menu displays the controls for adjusting the sound quality of your TV. The tone settings you specify apply to your current mode. Use the left and right arrow (◀ ▶) buttons on the remote control to move the slider to the desired position. Then select RTN when you are finished.

Your options under the Tone Settings menu are:

- **Bass** Adjusts the bass performance of your TV.
- **Treble** Adjusts the treble performance of your TV.
- **Balance** Adjusts the volume balance between left or right speakers.
- **Reset** Controls reset all sound quality controls to their original defaults.

ADJUSTING TV CONTROLS

Audio Processor

Audio Processor displays a choice list of available audio modes, which control the way the sound comes through your speakers. Depending on your speaker setup, any combination of the following options will appear:

- **Mono** Plays the sound in mono only. This is a good choice when receiving broadcasts where distance from the broadcasters makes the stereo signal weak. The channel banner displays the word Mono when you tune to a program that is broadcast in mono.
- **Stereo** Splits the incoming stereo audio signal into left and right channels. Most TV programs and recorded materials have stereo audio. The channel banner displays the word Stereo when you tune to a program that is broadcast in stereo.
- **Surround** Expands the audio listening field wider and deeper to create exceptional sound quality from the TV's speakers. This feature uses stereo signals from a TV broadcast or video input.

Audio Output

Audio Output controls whether the built-in speakers are on or off. Select Speakers Off if the TV is connected to an audio amplifier and external speakers.

SAP

When turned on, Second Audio Program (SAP) plays the program's audio in a second language, if one is available. SAP is also used to broadcast a program's audio with descriptions of the video for the visually impaired. SAP is broadcast in mono and is not available for digital programs.

SBS

When turned on, Sub-Bass System allows you to improve bass performance even when the sound volume is low.

SBS Level

You can use the slider to control the level of the Sub-Bass System. Sliding the slider left using the left arrow (◀) button decreases the SBS level, sliding the slider right using the right arrow (▶) button increases the SBS level. The SBS level can be changed even if SBS is Off.

For more information on the variable audio jacks, see the section "Setup and Connections" under "Back of the TV" and "Connecting a Stereo Amplifier."

You will find an audio language icon in the channel banner. When this icon is highlighted, it indicates that a Second Audio Program (SAP) is available for analog programs. If you select it when highlighted, you will activate the SAP for the current channel (all other channels remain unaffected). If the icon is highlighted when watching a digital channel or a DIRECTV channel, more than one audio language is available. If you select the icon, you will hear the language and the name will appear in the channel banner.

ADJUSTING TV CONTROLS

Optical Output

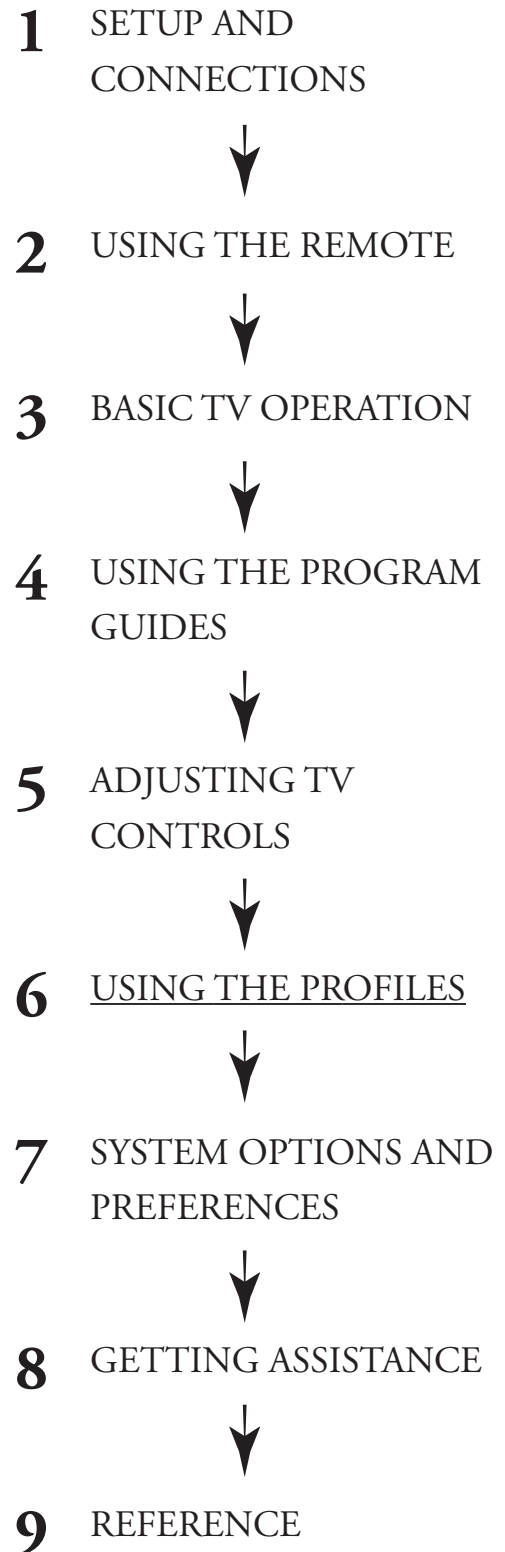

Select Auto Select if your TV is connected to a Dolby Digital and PCM decoder. Select Dolby Digital if the TV is connected to a Dolby Digital only decoder; it will provide six independent soundtrack channels through the optical output jack (labeled DIGITAL AUDIO OUT). Select PCM if it is connected to a PCM only decoder; it will then provide two independent soundtrack channels. Select Off if you want no optical audio output.

When the TV is connected to an optional, compatible six-channel amplifier/ receiver and speakers via the DIGITAL AUDIO OUT jack on the back panel, you receive Dolby Digital Surround Sound, if transmitted. Use the Optical Output menu to specify Auto Select, PCM, Dolby Digital, or Off.

USING THE PROFILES

This section describes the user profiles feature. It includes information about:

- creating a profile's TV and DIRECTV viewing lists.
- setting spending limits.
- setting DIRECTV® programming, TV, and movie rating limits.
- blocking unrated TV programs.
- locking and unlocking a profile.

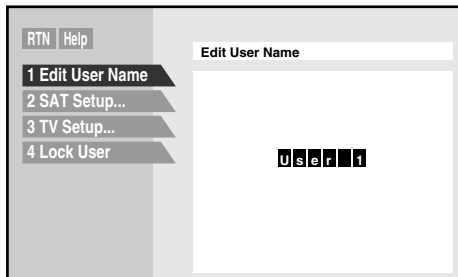

USING THE PROFILES

ABOUT PROFILES

When you select Profiles from the main menu, you can create four different profiles in addition to the pre-set “Family” profile. You can set up specific channels, rating limits, and spending limits for each profile. After you’ve set up these profiles, press the WHO button on the remote control to scroll through your profiles and access a certain one.

But first, personalize a profile by entering a name.

1. Select Profiles from the main menu.
2. Select a profile to edit: User 1, User 2, User 3, or User 4.
3. Select Edit User Name from the next menu.
4. Use the up, down, and right arrows on the remote control to find and select a letter.

You can personalize each profile.

To continue editing the profile, select DIRECTV Setup (if you have ordered DIRECTV® programming) or TV Setup. The following sections describe how to set up these features.

THE SAT (DIRECTV) SETUP

The SAT Setup menu item only exists if you subscribe to DIRECTV® programming. Through this menu you can establish DIRECTV channel lists, set spending limits, and set rating limits for DIRECTV programs using the SAT Setup menu.

Editing Channels in a DIRECTV List

You should create a DIRECTV channel list to establish which DIRECTV channels the selected profile can access. To create the DIRECTV channel list:

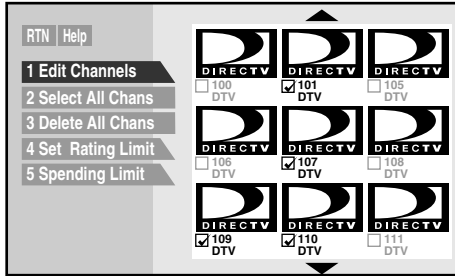

1. Highlight and select a user name, then select SAT Setup.
2. Highlight Edit Channels and press OK.

Use the MENU button on the remote control to bring up the main menu, use the arrows to highlight an option, and press OK to select it.

If the main menu does not appear, the remote control might not be in TV or DIRECTV mode. Try pressing the TV/SAT button and then MENU.

You can also set up profiles as categories instead of as users. For example, name a profile “Sports” and include only sports channels in the profile. Or, name it “Movies,” include only movie channels, and set a rating and spending limit for yourself or your family.

USING THE PROFILES

Check the channels you want to include in the list (programming subject to change).

3. Use the arrow buttons to point to a DIRECTV channel, and press OK to remove (or replace) the check mark.

Checkmarked items appear in the DIRECTV channel list. In other words, when you select that profile and begin surfing through DIRECTV channels with the channel up and down buttons, only the checkmarked channels will appear as you surf.

Selecting or Deleting All DIRECTV Channels

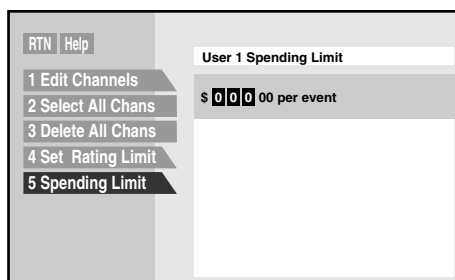

You might be able to save time when creating a DIRECTV channel list by using the Select All Chans option or the Delete All Chans option to either add or delete all channels before removing or adding individual channels.

Also, DIRECTV program providers may make additional channels available. To prevent new channels from appearing in a profile channel list, choose Delete All Chans and checkmark only the channels you want to appear in the list.

Setting the DIRECTV Spending Limit

Use the Spending Limit option to indicate a profile's per-event spending limit for pay per view (PPV) programs. To set the spending limit, choose the user profile name, select SAT Setup, then follow these steps:

1. Highlight Spending Limit, and press OK.

You can set a per-event spending limit for each profile.

2. Use the digits or the arrow keys on the remote control to enter a single-program spending limit.
3. Lock the system. See "Locking the System" near the end of this section for details.

Tip

You can also access spending limits by selecting System Options from the main menu and then selecting Purchases. You can then select Spending Limit and set limits for each user.

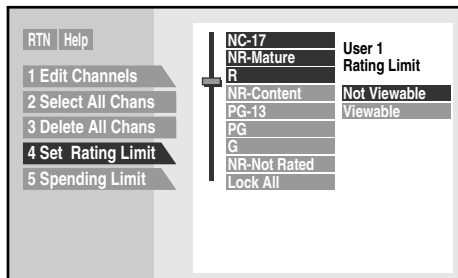

USING THE PROFILES

After a spending limit is set and the system is locked, you must enter a password to purchase a pay per view program that costs more than your spending limit allows. The system will then temporarily unlock the limits you have set until the power is turned off. When the system is turned back on, the system will be locked again.

Setting the DIRECTV Rating Limit

The Set TV Ratings Limit menu enables you to set a maximum viewing limit for rated DIRECTV movies (based on the MPAA ratings system), as long as the DIRECTV program provider has transmitted the proper code.

- Note that the ratings limit cannot be enforced if a DIRECTV program has not been rated, if rating information for that program is not transmitted by the program provider, or if the system has not been locked.
1. Select a user.
 2. Select SAT Setup.
 3. Highlight Set Rating Limit and press OK.

Use the arrow buttons on the remote control to move the selector up and down.

4. Use the up and down arrows to move the rating selector to the highest rating you want to be able to view. In the preceding illustration, movies that are rated up to and including a PG-13 rating can be viewed.

After the rating limit is set and the system is locked, you must enter the system password to watch programs with a rating higher than the limit. The system will then temporarily unlock the limits you have set until the power is turned off. When the system is turned back on, the system will be locked again.

Important!

You need to lock the system in order for rating limits, channel limits, and spending limits to go into effect.

To edit the limits after you lock the system, you need to enter the system password. See "Locking the System" for details.

Please note that the rating limit you set while in the SAT Setup menu applies only to DIRECTV programs—they do not apply to TV programs.

To set limits for TV programming, select a profile, select TV Setup and then select Set TV Rating or Set Movie Rating.

USING THE PROFILES

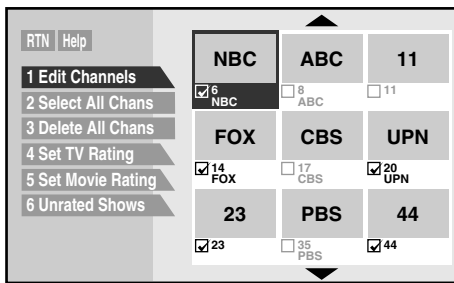

THE TV SETUP

You can establish TV channel lists, set spending limits, and set rating limits for TV programs using the TV Setup menu.

Editing Channels in a TV List

You should create a TV channel list to establish which TV channels (including both analog and digital) the selected profile can access. To create the TV channel list:

1. Select a user.
2. Select Edit Channels.

To start, you can add or delete all channels.

3. Use the arrow buttons to highlight a TV channel, and press OK to remove (or replace) the check mark.

Checkmarked items appear in the channel list. In other words, when you select that profile and begin surfing through TV channels, only the checkmarked channels will appear as you surf. Note that the only channels you can add to a list are ones that were found during the channel search (see the “Getting Assistance” section in this book for details on searching for channels).

Selecting or Deleting All TV Channels

You might be able to save time when creating a TV channel list by using the Select All Chans option or the Delete All Chans option to either add or delete all channels before removing or adding individual channels.

Also, off-air program providers may make additional channels or subchannels available. To include new channels in your TV channel list:

1. Select System Options from the main menu, then select Channel Search. The system will run a channel search, making it aware of the new channel(s).
2. Select Profiles from the main menu.
3. Select the user profile name, then TV Setup.
4. Choose Edit Channels and checkmark the new channel.

Don't forget about the EXIT button.

Press the EXIT button on the remote control to remove the on-screen menus and return to normal viewing.

USING THE PROFILES

SETTING THE TV RATING

The Set TV Rating menu enables you to program your TV so children cannot see certain programs or channels.

The last three choices in the TV Setup menu involve software inside your TV (often called V-Chip) which allows you to “block” TV programs and movies based on violence, sex, or other content you may believe children should not view. In other words, it lets you program your TV so it will not display certain programs. Once you block programs, you or other adults are not limited to only parent-approved programs; you can “unblock” programs by entering the system password.

The V-Chip software inside your TV is initially turned “off,” so if you choose not to implement it, you can just ignore it.

When turned “on,” the V-chip software reads a code that most broadcasters send with programs. That code tells the V-Chip software the program’s age-based rating (TV-MA, TV-14, etc.) and content themes (Violence (V), Adult Language (L), etc.). If you have blocked the rating or content themes that the program contains, you will receive the message, “Program exceeds the TV rating limit you set,” when you turn to that particular channel. Broadcasters are not required to provide ratings. However, you can block out programs that have been given a rating of “Not Rated,” and programs that are considered “unrated” because no code has been sent by the broadcaster.

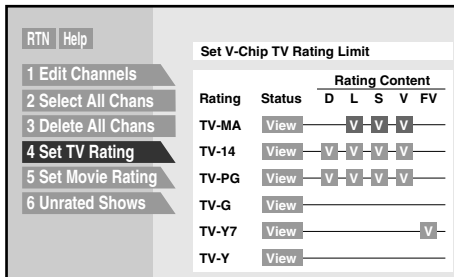

The TV age-based ratings and content themes you can block are listed in the table below.

Age-Based Rating	Description and Content Themes for Age-Based Ratings
TV-MA	Mature Audience Only. Specifically designed to be viewed by adults and may be unsuitable for children under 17. It contains one or more of the following content themes: crude indecent language (L), explicit sexual activity (S), or graphic violence (V).
TV-14	Parents Strongly Cautioned. Contains some material that many parents would find unsuitable for children under 14. Parents are strongly urged to exercise greater care in monitoring this program and are cautioned against letting children under the age of 14 watch unattended. This program contains one or more of the following content themes: intensely suggestive dialogue (D), strong coarse language (L), intense sexual situations (S), or intense violence (V).
TV-PG	Parental Guidance Suggested. Contains material that parents may find unsuitable for younger children. Many parents may want to watch it with their younger children. The program contains one or more of the following content themes: some suggestive dialogue (D), infrequent coarse language (L), some sexual situations (S), or moderate violence (V).
TV-G	General Audience. Most parents would find this program suitable for all ages. It contains little or no sexual dialogue (D), no strong language (L) or sexual situations (S), and little or no violence (V).
TV-Y7	Directed to Children 7 years and older. Designed for children ages 7 and above. It may be more appropriate for children who have acquired the developmental skills needed to distinguish between make-believe and reality. Themes and elements in this program may include mild fantasy violence (FV) or comedic violence, or may frighten children under the age of 7.
TV-Y	All Children. Themes and elements in this program are designed for a young audience, including children from ages 2-6. It is not expected to frighten younger children.

USING THE PROFILES

To set TV programming limits:

1. From the main menu, select Profiles.
2. Select the user name you would like to set limits for through the Profiles menu.
3. Select TV Setup from the next menu.
4. Select Set TV Rating.

Selecting TV Rating allows you to set a limit for TV programs based on rating and content.

Once you get to the Set TV Rating screen, use the arrows and OK buttons on your remote control to change the status of a TV program rating from View to Block. The following sections give you more details about how to change the status of TV program limits.

Remember you are only blocking TV programs and movies for the one Profile you select in the Profiles menu. If you would like to block different programs for different users, be sure to complete the process for each of them.

You must remember to lock the system for rating limits to take effect.

The Rating Limit Screen

Below is an example of where items are located within the Rating Limit screen.

Age-Based Rating Limit
Lists the available ratings you can block or view with the rating status buttons.

Rating Status Buttons
Lets you know whether the status of the age-based rating limit to the left is View or Block.

Content Themes
Lists the content themes you can block or view with the content status buttons.

Content Status Buttons
Lets you know which content themes are available for that rating, and whether the status of the content theme is View (V) or Block (B).

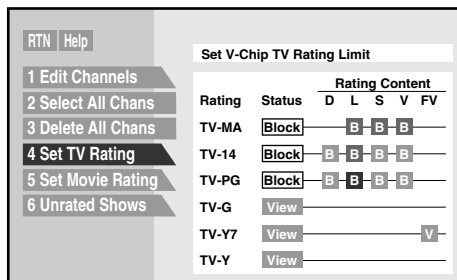

USING THE PROFILES

BLOCKING AGE-BASED RATINGS

You can automatically block all program ratings above a specified age-based rating level. For example, if you only want your child to watch programs that have a TV-G rating and lower (in other words, you want the child to watch only TV-G, TV-Y7, and TV-Y programs), then you need to block other programming with higher ratings.

To block programs with higher ratings:

1. First, determine the lowest level rating you do not want the child to watch.
2. Highlight the rating status button that corresponds with the lowest rating you do not want the child to watch. (In the example above, you would point to the rating status button corresponding to TV-PG, since the highest rating you want her to watch is TV-G.)
3. Press OK to change the button from View to Block. The status for this and all higher ratings automatically change to Block (and B).

Changing the TV-PG rating status button from View to Block causes the buttons for the higher ratings and content to change to Block and B.

4. Press the left arrow button on the remote control to return to the menu.

Viewing Age-Based Ratings

After you block age-based ratings, you have the option of going back and changing some of the ratings to View.

1. Determine the rating you want to view that is currently blocked.
2. Use the arrows on the remote control to highlight the rating status button, such as TV-14, whose status is Block.
3. Press OK to change the status to View. Your child would then be able to watch all programs with a TV-14, TV-G, TV-Y7, and TV-Y rating.

Note that the content theme buttons corresponding to TV-14 change to View as well. They and the age-based rating status buttons are the only buttons that automatically change back to View when you complete this process.

When you change the status of a rating to Block, the system will automatically block higher ratings and all corresponding content themes.

Hierarchy of Age-Based Ratings	
TV-MA	Mature Audience Only
TV-14	Parents Strongly Cautioned
TV-PG	Parental Guidance Suggested
TV-G	General Audience
TV-Y7	Directed to Children 7 Years and Older
TV-Y	All Children

USING THE PROFILES

Blocking Specific Content Themes

You can block programs based on their content. (Content is represented by the D, L, S, V, and FV on your screen. See “Setting the TV Rating” for details.) When you block a content theme for a particular rating, you automatically block that content theme for higher rated programs as well.

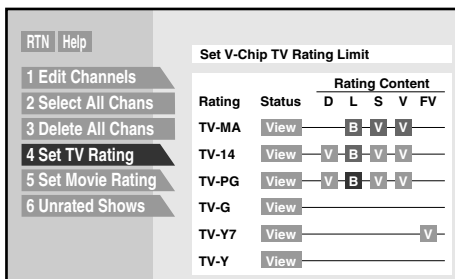

For example, if you do not want your child to watch programs that have adult language (L) rated TV-PG or higher, you need to block adult language in all programming rated TV-PG and above.

To block program content:

1. Determine the lowest level of content you do not want the child to watch.
2. Highlight the content button that corresponds with the lowest content you do not want the child to watch. (In the example above, you would highlight the V button located under the L and to the right of TV-PG.)
3. Press OK to change the button from V to B. All higher ratings’ language content theme button will automatically change to B.

You must remember to lock the system for rating limits to take effect.

Content Themes	
D	Sexually Explicit Dialogue
L	Adult Language
S	Sexual Situations
V	Violence
FV	Fantasy Violence

Selecting the content theme button corresponding with adult language (L) and TV-PG blocks all programs with adult language (L) rated TV-PG and higher.

4. Press the left arrow to return to the menu or exit the screen.

Viewing Specific Content Themes

After you block specific content themes, you have the option of going back and changing some of the content themes back to View (V):

1. Determine the content themes you want to change to View (V).
2. Use the arrows to highlight a particular content button, such as the B under language (L) corresponding with TV-14.
3. Press OK to change its status back to V. Your child would then be able to watch programs with TV-14 adult language content, but not programs with TV-PG or TV-MA language content.

You must remember to lock the system for rating limits to take effect.

Note that only the content theme status button corresponding to TV-14 language (L) changes to View (V). Higher rated content theme buttons, such as that for TV-MA language, do not change.

USING THE PROFILES

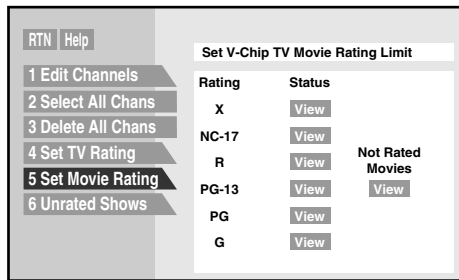

SETTING THE MOVIE RATING

You set movie rating limits by blocking movies rated above a specified level. To access the Set Movie Rating menu:

1. From the main menu, select Profiles.
2. Select the user for whom you would like to set limits.
3. Select TV Setup from the next menu.
4. Select Set Movie Rating.

Please note that the rating limits you set while in the TV Setup menu apply only to TV programs—they do not apply to DIRECTV programs.

To set limits for DIRECTV® programming, select a profile, select SAT Setup and then select Set Rating Limit.

Selecting Set Movie Rating allows you to set a limit for movies based on rating.

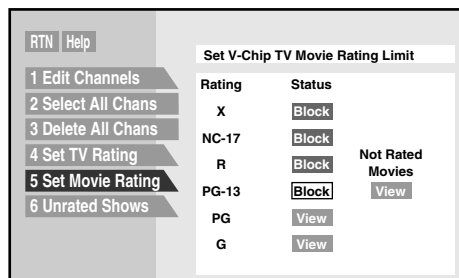

Blocking Movie Ratings

If you only want your child to watch movies that have a PG rating and lower (in other words, movies rated PG and G), then you can automatically block out all other movies with higher ratings.

You must remember to lock the system for rating limits to take effect.

To block movies:

1. Determine the lowest level rating you do not want the child to watch.
2. Highlight the rating status button corresponding to the lowest rating you do not want the child to watch. (In the example above, you would highlight the rating status button corresponding to PG-13, since the highest rating you want the child to watch is PG.)
3. Press OK to change the button from View to Block. All higher ratings' View buttons will automatically change to Block.

Change the button from View to Block and all higher rated movies will also be blocked.

4. Press the left arrow to return to the menu or exit the screen.

USING THE PROFILES

Viewing Movie Ratings

After you block movie ratings, you have the option of going back and changing some of the rating status buttons back to View:

1. Determine the movie ratings you want to change to View (V).
2. Use the arrows to highlight the status button you want to change.
3. Press OK to change its status back to View.

For example, if movies with a rating of PG-13 and higher are blocked, you can change the rating status button corresponding with NC-17. Your child would then be able to watch all movies with a G, PG, and NC-17 rating.

Some movies may be given a "Not Rated" rating. After blocking movie ratings, you must separately set "Not Rated Movies" to View to see these movies.

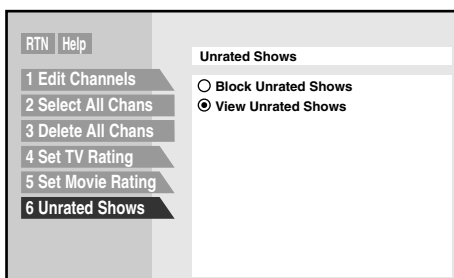

BLOCKING UNRATED TV SHOWS

Some TV programming is not rated and may contain material you do not want your children to see. These shows must be blocked separately.

To block unrated shows:

1. Select the user you would like to set limits for through the Profiles menu.
2. Select TV Viewing.
3. Select Set TV Rating.
4. Now select Unrated Shows.
5. Highlight the radio button beside your choice of View Unrated Shows or Block Unrated Shows and press OK to select it.

Note that "unrated" TV shows may include news, sports, political, religious, local and weather programs, emergency bulletins, public announcements, and programs sent without ratings. It could also include programs whose ratings are either "None" or "N/A."

Selecting Unrated Shows allows the user to view or block all unrated programs.

USING THE PROFILES

CHOOSING YOUR PROFILE

Each time you turn on the TV, the Family profile is selected by default. To select a different profile:

1. Press the WHO button to scroll through the profiles in the channel banner.

The WHO button toggles through the profiles.

2. When your profile appears, enter your four-digit personal password to access your profile. If the profile is not password protected, you can just press OK to activate it.

The channel, spending, ratings and viewing limits associated with the chosen profile will be active only when the system is locked.

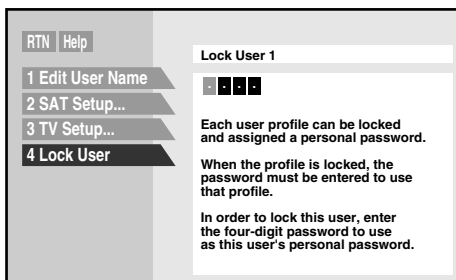

USING THE PROFILES

LOCKING AND UNLOCKING A USER PROFILE

When you lock a profile, you prevent anyone who does not know the user password from accessing the locked profile. This applies only when they press WHO on the remote control. It does not prevent them from accessing and editing the profile via the main menu if they first enter the system password.

When you lock a profile (excluding “Family”), you lock its channel limits, rating limits, and spending limits. After locking the profile, you need to enter the system password to edit these settings.

1. Choose the profile you want to lock or unlock from the Profiles menu, highlight Lock User or Unlock User, and press OK.

Locking the user profile protects the limits you set up.

2. When locking a user, use the arrows or the digits on the remote control to enter a four-digit user password.

Some other things to remember about locking and unlocking profiles are:

- For a lock to be effective, you must exit out of the menu system.
- When you attempt to access a profile’s channel that is blocked by one or more limits and the system is locked, you will be asked to unlock the video by entering the SYSTEM password.
- If you enter the system password to override a limit, the lock on the channel banner will turn yellow, and all limits are temporarily unlocked until you turn off the television. When you turn on the television again, the system will be locked, and the Family profile channel list will be active. If you want to re-lock without turning off the television, you can select the lock icon in the channel banner.
- If a profile is locked and you want to access its channels, press WHO on the remote control and then enter the user password.
- If a profile is locked and you want to access its settings, you can access it through the menu system by choosing Profiles, then choosing the profile name. Then enter the system password.

Don't Forget Your Password

If you forget a USER password and the system is locked, you need to unlock the system and then assign a new user password. If the system is not locked, select Profiles from the main menu, choose Unlock User, and enter a new password.

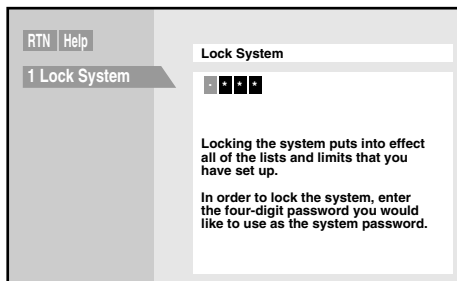

USING THE PROFILES

LOCKING THE SYSTEM

When you lock the system, all limits set up for all profiles are put into effect, regardless of whether the profile is locked or unlocked. Unlocked profiles require no user password to access their channel list if the system is locked.

When the system is locked, you can still access a profile and watch a channel in its channel list (if the profile is locked, however, you must have the user password). Locking the system activates all rating, spending, viewing, and channel limits for all profiles. When you lock the system, no one can modify any of these settings without first entering the four-digit system password.

1. Select Profiles from the main menu. Then select Lock System and press OK. Or, press INFO on the remote control and select the green unlock icon from the channel banner.

You can lock the system via the channel banner by entering a password.

2. Use the arrows or the digits to enter a four-digit system password.
3. Enter the password a second time to confirm it.

For the changes to be effective, you must exit out of the menu system.

Unlocking the System

When the system is unlocked, the channel, spending, viewing, and ratings limits that you set are no longer in effect. To unlock:

1. Highlight Unlock System in the Profiles menu and press OK.
2. Highlight Yes and press OK to confirm that you want to unlock the system.

When you attempt to access a channel that is blocked by one or more limits and the system is locked, you will be asked to temporarily unlock the system by entering the four-digit system password.

If you enter the system password to override a limit, all limits are unlocked until you turn off the TV. When you turn on the TV again, the system will be locked, and the Family profile channel list will be selected. If you want to re-lock the system without turning off the TV, you can select the lock icon in the channel banner.

The Lock/Unlock icons in the channel banner are an easy way to lock or unlock the system. Press INFO and select the icon to change the lock status.

- *Green Unlock icon* The system is unlocked. Spending, viewing and other limits can be accessed and changed.
- *Yellow Unlock icon* A password has been entered to override family or profile limits. No limits can be accessed or changed without a password.
- *Red Lock icon* Limits cannot be accessed or changed without the password and all limits are in effect.

If you subscribe to DIRECTV® programming and forget the SYSTEM password, contact your satellite program provider's authorization center.

If you forget the system password and do not have DIRECTV, remove the access card from the TV's back panel (store it in a safe place, or reinsert it upside down to store it in the TV). Press and hold the INFO button on the front panel; simultaneously press and hold the WHO button on the remote control. Continue to hold for three seconds. All passwords will be cleared.

SYSTEM OPTIONS AND PREFERENCES

This chapter describes the other options available to you such as:

- selecting a signal source and type
- searching for all available channels
- checking your mailbox
- purchasing programs
- setting up system preferences
- using the FETCH button on the remote control

- 1 SETUP AND CONNECTIONS
↓

- 9 REFERENCE

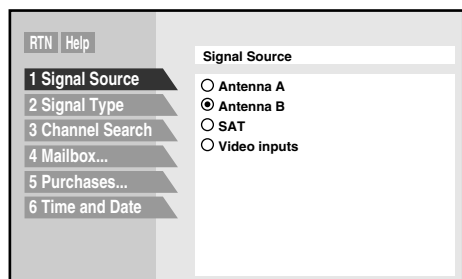

SYSTEM OPTIONS AND PREFERENCES

CHANGING THE SIGNAL SOURCE

The Signal Source menu allows you to choose the source from which you would like the signal to come: Antenna A, Antenna B, or DIRECTV (SAT) or Video Inputs. The same can be accomplished using the ANTENNA, TV/SAT, and TV/VIDEO buttons on your remote control. If you misplace your remote control, use the front panel buttons to access this menu and change the signal source.

To access the Signal Source menu:

1. Press MENU on the remote control to access the main menu.
2. Select System Options from the main menu.
3. Select Signal Source from the next menu.

The Video Inputs selection is only for "Video 1" source.

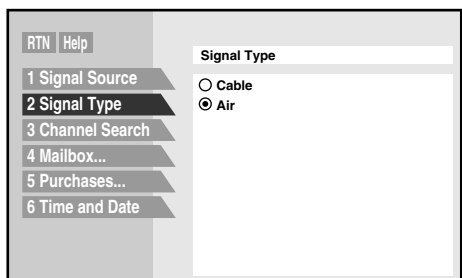

To select other signal sources, use the TV/VIDEO button on the remote control.

Select the appropriate signal source.

4. Use the arrows and OK to select which source from which you would like to receive a signal.

CHANGING THE SIGNAL TYPE

The Signal Type menu lets you choose whether you are receiving a signal from cable TV or an off-air antenna. When you run Channel Search (see "Channel Search" in this section for details), the TV automatically detects your signal and you don't have to specify it here. However, if you decide to change the source, you will need to use the Signal Type menu. Note that if your signal source is coming from DIRECTV, this menu will not be available.

Select whether you are receiving signals from an off-air antenna or cable.

SYSTEM OPTIONS AND PREFERENCES

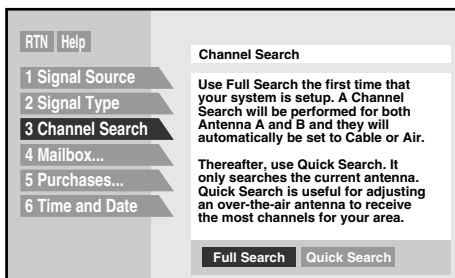

CHANNEL SEARCH

Engaging in a channel search tells the TV to search automatically for all the TV channels available through the Antenna A and B inputs. When the TV finds an active channel, it places it in the channel list. Inactive channels (weak stations or channels with no signal at all) will not be placed into the channel list.

- **Full Search** searching through all the TV channels (off-air and Cable) for both antenna inputs (ANTENNA A and B).
- **Quick Search** searching through the off-air or Cable channels of the current ANTENNA (A or B).

You can edit the channel list and remove unwanted channels by using the Profiles menu.

Please note that because channel search will search for both digital and analog TV channels on all antenna inputs, the process may take a few minutes.

Running channel search collects all available channels in a channel list.

MAILBOX

If you have ordered DIRECTV® programming, the mailbox shows you messages that are sent—or “mailed”—from your program providers. For example, you may receive a message calling your attention to a new service or special program offering. If you have new or unread mail, the mail icon in the channel banner is highlighted.

Checking Your Mail

1. Select Mailbox from the System Options menu or the mail icon from the channel banner to view your mail.
2. Highlight a message and press OK. The message opens for you to read.
2. Press OK again to close the letter.
3. If you want to erase a message, highlight Erase Message and press OK. When you exit the display screen, messages not erased are saved in memory.

Mail provides the latest information from program providers.

SYSTEM OPTIONS AND PREFERENCES

PURCHASES: PAY PER VIEW PROGRAMS

Pay per view programs (PPV) are DIRECTV® programming that you purchase—like a movie ticket—on an event-by-event basis if you subscribe to DIRECTV® programming. Pay per view programs are labeled “PPV” in the DIRECTV® programming guide. A channel labeled PPV could run nothing but previews for movies. After previewing the movie, you can purchase it or find out more details about it.

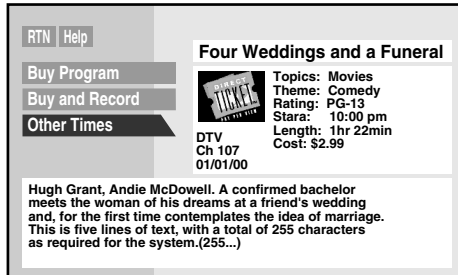

Purchasing and Previewing

There are several ways to purchase and preview DIRECTV pay per view movies and events if you subscribe to DIRECTV® programming:

- Tune to a pay per view program’s channel. Program providers may offer on-screen purchase instructions, usually as the pay per view program begins.
- Highlight a pay per view program from the program guide and press INFO.
- Preview a coming attraction by selecting a channel from the Attractions Guide.

Tuning to a Pay Per View Program

When you use the channel up and down buttons or digits on the remote control to tune to a pay per view channel, you need to press the INFO button to bring up the Program Details screen in order to purchase a program.

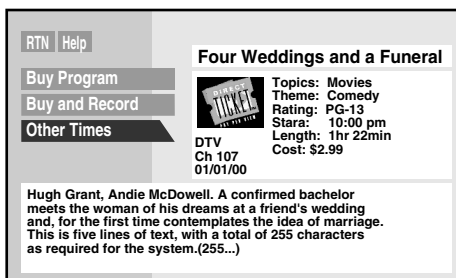

You may need to enter your four-digit system password to order a PPV program if it costs more than the spending limit you set up in the Profiles menu.

Use the program guide to get to the Program Details screen.

SYSTEM OPTIONS AND PREFERENCES

Using the Program Guide for Pay Per View Programs

Another way to get to the Program Details screen is by using the DIRECTV® programming guide (if you subscribe to DIRECTV® programming). Press TV/SAT on the remote control, then press GUIDE. Highlight a program name in the DIRECTV® programming guide and press INFO.

You need to connect your phone line to your television to be able to order PPV programs using the on-screen menus.

The Program Details screen gives you several options.

You can select:

- View Channel to tune to that channel
- Channel Guide to see a program lineup for that channel
- Buy Program to purchase the program
- Other Times to see what other times the program is available

The options available to you may vary according to the type of program you select.

SYSTEM OPTIONS AND PREFERENCES

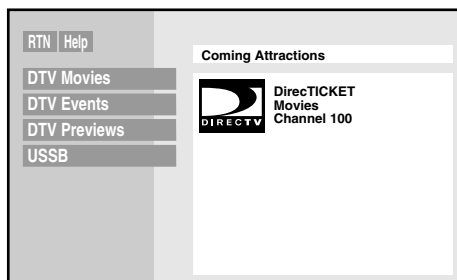

Using the Attractions Guide

Your program providers may offer future programming events not currently listed in your DIRECTV® programming guide. These events are called “coming attractions” and can be previewed in the Attractions Guide. To access the Attractions Guide:

1. Press the TV/SAT button on the remote control. Then press GUIDE.
2. Use the down arrow icon to move the highlight to the bottom of the screen.
3. Select the Other Guides icon.
4. Select Attractions.
5. Select a channel.

The Other Guides icon

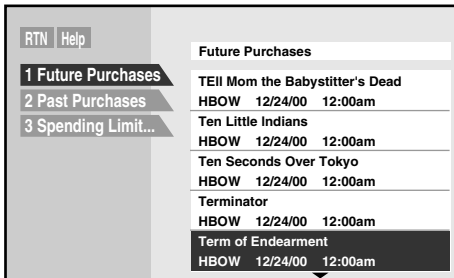

The Attractions Guide is accessed through the Other Guides menu.

SYSTEM OPTIONS AND PREFERENCES

Using the Purchases Menu

The Purchases menu allows you to review upcoming and past DIRECTV pay per view purchases.

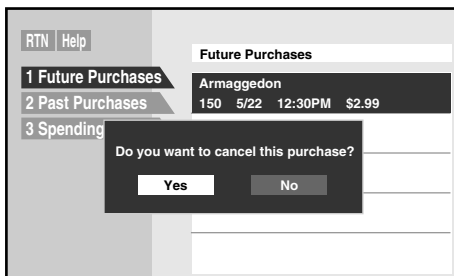

The Purchases menu shows you upcoming or past DIRECTV purchases, and spending limits.

The list of purchases may be longer than one screen; use the down arrow buttons on the remote control to see more items. The display also shows the title, channel, date, time, and cost of each program.

- Note that the past purchases list might not be updated until the end of the billing cycle, and therefore may show purchases for which you have already paid.

Reviewing and Canceling an Upcoming Purchase

Highlight an upcoming purchase from the DIRECTV Future Purchases screen. You can review the program description, as well as cancel an upcoming purchase.

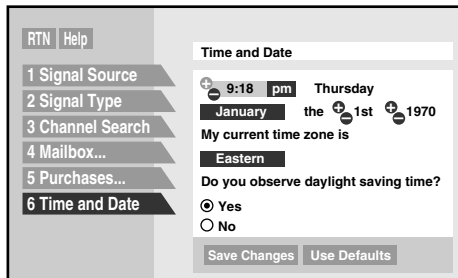

The Future Purchases screen lets you cancel an upcoming purchase.

SYSTEM OPTIONS AND PREFERENCES

SETTING THE TIME AND DATE

You can set the current time and day, the current date, the time zone, and whether or not you observe daylight saving time.

Indicate the settings for your area.

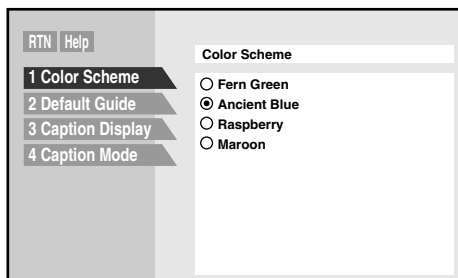

Use the arrow buttons to move around the menu screen, OK to select an item and the digit buttons on your remote control to enter numbers. If you have already acquired a digital signal, the time was automatically set and you cannot reset it.

USING THE PREFERENCES MENU

The Preferences menu allows you to change some aspects of your TV to fit your personal preference. The following sections outline what you can do in this menu.

Color Scheme

You can change the color that appears in the menu and guides. To change the color, select Preferences from the main menu and select Color Scheme.

Use the up and down arrows and OK button to select the menu color scheme you prefer.

SYSTEM OPTIONS AND PREFERENCES

Default Guide

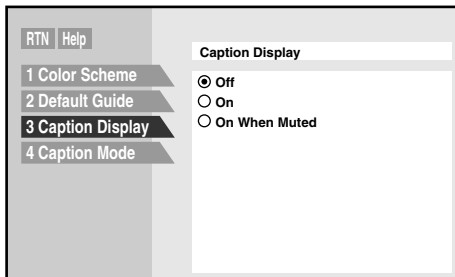

By default, the Detail Guide appears when you press GUIDE on the remote control, no matter if you access the DIRECTV® programming guide or the TV guide. You can change the default guide from the Detail Guide to the Grid Guide or SurfGuide (DIRECTV only).

For more information about the three types of guides, see the section, "Using the Program Guides."

1. Select Preferences from the Main menu, then select Default Guide.
2. Use the arrows and OK to choose which guide you want to appear first when you press the GUIDE button on the remote control.

Caption Display

The Caption Display menu displays a choice list that lets you choose when closed captioning information is shown on the screen.

On Captioning information is shown always, when available.

On When Muted Captioning information is only shown when the TV's sound is muted, when available. (To mute the sound, press the MUTE button on the remote control.)

When the captioning is turned on while the POP is on the screen, the POP will disappear.

Off No captioning information is displayed.

SYSTEM OPTIONS AND PREFERENCES

Caption Mode

You can also select a closed caption mode, which is the mode, or source, used for displaying captioning information. The content of CC and Text are different; you can select which one you want to see on the screen.

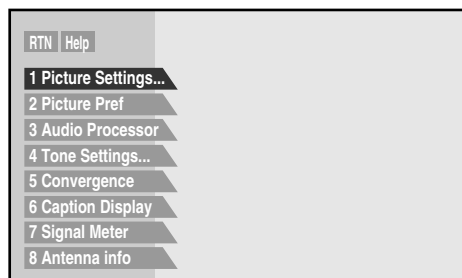

- CC displays information at any position on the screen. It overlays the text on top of the picture as it is received.
- Text displays information at one particular position (such as the bottom third) of the screen. You cannot see the picture underneath the text.

You can choose between eight closed caption modes, or sources:

- **CC1 and Text 1** are the primary caption and text services. The captioning or text is displayed in the same language as the program's dialog.
- **CC3 and Text 3** serve as the preferred data channels. The captioning or text is often a secondary language translation, simplified English, or displayed at a slower rate.
- **CC2 and CC4 and Text 2 and Text 4** are rarely available and broadcasters use them only in special conditions, such as when CC1 and CC3 are not available, or Text1 and Text3 are not available.

USING FETCH

The Fetch menu is a list of eight most-used menu items. It serves as a shortcut to access these menu items. To view the Fetch menu, press FETCH on the remote control.

Using FETCH is a convenient way to call up frequently used menu items.

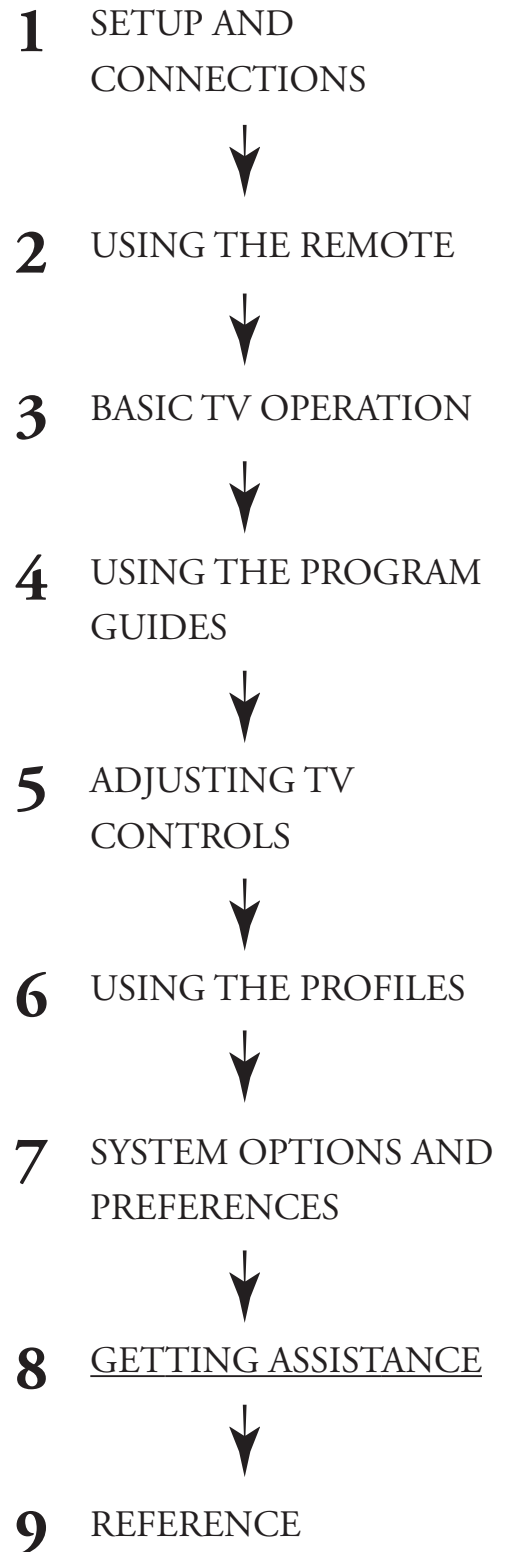

GETTING ASSISTANCE

If you run across any problems or need to rely on the system to give you feedback, you should use the Assistance menu to get information. This section explains the different types of assistance your system is capable of giving you. It walks you through the Assistance menu, which is accessed by pressing MENU then selecting Assistance.

This section:

- tells you about the interactive setup process
- helps you get antenna and signal meter information
- explains the on-screen signal meter
- tells you how to validate a new access card
- describes how to use the system test

Most of the screens contain information to help you decide what to do next. If you get stuck, look for the help text at the bottom of the screen.

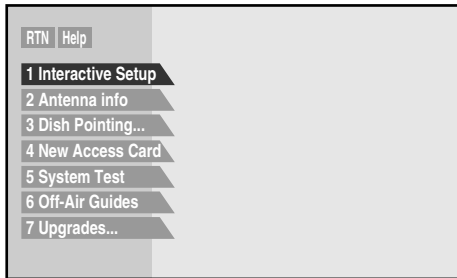

GETTING ASSISTANCE

RUNNING THE INTERACTIVE SETUP

You should have completed the interactive setup the first time you plugged in your TV. However, if you need to access the interactive setup again, you can access it through the Assistance menu.

1. Press MENU on the remote control to access the main menu.
2. Select Assistance from the main menu.
3. Select Interactive Setup and follow the on-screen directions.

The interactive setup process allows you to complete all steps or selectively skip steps.

The steps involved in the interactive setup include:

- Setting the time and date
- Searching for channels
- Setting up speakers
- Selecting an audio processor
- Specifying your satellite dish antenna type
- Entering Zip Code
- Running the Signal Meter
- Running the system test

Note that if you do not subscribe to DIRECTV® programming, you can select “Skip this step” for running the system test.

If you decide to subscribe to DIRECTV, we strongly recommend that you have the satellite system professionally installed.

Installation can be arranged through the dealer where the TV was purchased.

GETTING ANTENNA INFORMATION

The Antenna Info menu helps you measure the strength of all available TV channels. It will help you adjust any off-air TV antennas. (The actual adding of channels is done by using the Channel Search menu.)

To access the Antenna Info menu:

1. Press MENU to bring up the main menu.
2. Select Assistance.
3. Then select Antenna Info.

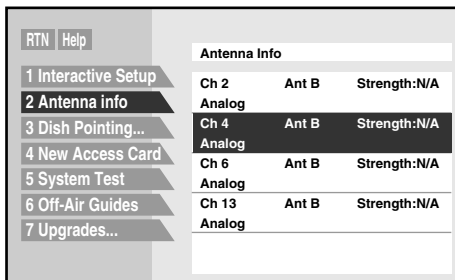

A dialog box reports the status of the signal search and lists channels that are being received or have been received from all off-air antennas. To switch between antennas, highlight a channel and then press ANTENNA on the remote control.

GETTING ASSISTANCE

When getting antenna information, the screen lists:

- the channel number,
- the station name, if available,
- whether the channel is digital or analog,
- which antenna is receiving the signal, and
- if a digital channel, the current signal strength.

Note that if you highlight a channel in the Antenna Info menu, you tune to the channel and, if digital, get a real-time update of the signal strength.

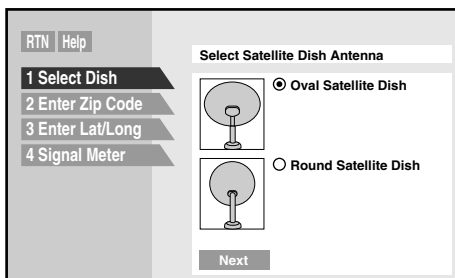

The channel list consists of all channels being received or that have been received from terrestrial antennas.

THE SELECT DISH MENU SCREEN

To specify the type of dish you are using:

1. Press MENU on the remote to bring up the main menu.
2. Select Assistance, then Dish Pointing, then Select Dish.
3. Specify the type of dish you are using.

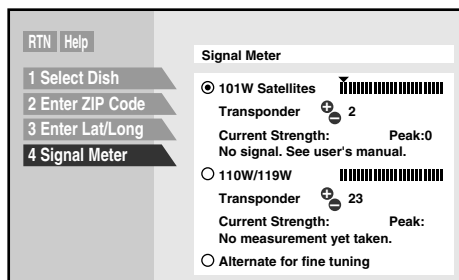

GETTING ASSISTANCE

Using the On-Screen Signal Meter

The signal strength meter is used to determine whether you are receiving the DIRECTV signal; it also indicates the strength of the DIRECTV signal once the signal is acquired. Follow these steps to bring up the on-screen signal meter:

1. Press MENU on the remote to bring up the main menu.
2. Select Assistance then Dish Pointing.
3. Enter ZIP Code.
4. Enter Lat/Long.
5. Select Signal Meter.

If the dish is pointed correctly, the signal meter will show you the current signal strength (and you should hear a continuous tone).

4. Use the arrows and OK button on the remote control to toggle between the satellites. Try to achieve the peak signal for each.

YOUR NEW ACCESS CARD

Periodically, your program provider may issue you a replacement access card if you subscribe to DIRECTV® programming. The New Access Card Setup screen allows you to transfer the information from the old card onto the new one. The access card fits into the TV through the back panel.

To replace the card:

1. Select Assistance from the main menu.
2. Select New Access Card.
3. Follow the on-screen directions to validate the new card.

Peak Signal

The "Peak Signal" indicates the highest signal strength you have obtained, which is not necessarily the highest possible signal.

While the maximum signal strength is 100, the signal strength you achieve will probably be less. Although there is no difference in picture quality between signal strengths of 60 and 85, the higher the signal, the less likely you are to experience negative effects in degraded conditions such as rain or snow (called "rain fade").

GETTING ASSISTANCE

RUNNING THE SYSTEM TEST

The System Test display screen is accessed through the Assistance menu and allows you to initiate diagnostic procedures on the DIRECTV System, if you subscribe to DIRECTV. You should use this feature to get your access card number or when your television doesn't seem to be receiving satellite signals correctly.

A message screen appears when you select System Test from the Assistance menu. This message tells you whether the system passed each test. If your system fails the test, run the system test several times before concluding that there is a problem. Occasional fluctuations in the phone line or satellite signal can give temporary false readings. Note that if you do not subscribe to DIRECTV® programming or do not have your satellite dish antenna installed, the test will fail.

ACQUIRING OFF-AIR GUIDES

If you have trouble tuning to known off-air TV channels, try to select "Do Not Acquire Off-Air Guides" mode.

UPGRADES

Your digital satellite receiver is able to receive upgrades or modifications to some of its features and functions. These modifications will occur automatically (usually at times when most viewers are not watching programming). When an upgrade or modification is sent, you may experience a disruption in reception for a few minutes. Your reception should return to normal after the modification is complete. Your receiver must be plugged in to receive upgrades. Do not unplug your receiver while an upgrade is in progress. Please consult the Upgrade menu to find a schedule of upgrades or modifications planned by DIRECTV.

TROUBLESHOOTING

Can't select certain channel

- Channel may be blocked or not approved in the Profiles menu.
- If using a VCR, check to make sure the TV/VCR button on the VCR is in the correct "mode."
- The searching for available channels portion of the interactive setup (page 19, step 3) was not completed.

Noisy stereo reception

- May be a weak station. Change to mono mode instead of stereo in the Audio menu under Audio Processor.

No picture, no sound but TV is on

- Maybe a vacant channel is tuned.
- If watching VCR (connected only through antenna input), make sure TV is tuned to channel 3 or 4 – same as CH3/4 switch on VCR. Also check to make sure the TV/VCR button on the VCR is in the correct "mode."

Sound okay, picture poor

- Check antenna connections and antenna direction and also check for interfering sources.
- Try adjusting the picture quality, especially sharpness, to improve weak signals.

Black box appears on the screen

- Captioning may be turned on. Check the Caption Display in the Preferences menu.

Wrong picture

The TV and most VCRs let you toggle between pictures: one can be the picture from DIRECTV signal or an off-air antenna (or cable) and one can be from the VCR. If you don't see the picture you think you should be seeing, try using these buttons to toggle between the pictures:

- Press the TV/VCR button on the VCR remote or on the VCR's front panel.
- Press the ANTENNA button on the remote control.

Taking either of these actions lets you switch the source of the video signal from DIRECTV to the off-air antenna or cable, and vice versa.

Problems with the remote control

- Maybe something is between the remote control and the remote sensor on the front of the TV.
- Maybe the remote control is not in the correct mode. Push the component switch on the remote to the appropriate position (TV/DVD/VCR/CABLE).
- Maybe the batteries in the remote control are weak, dead or installed incorrectly. Try replacing batteries. (Note, if you remove the batteries, you may have to reprogram the remote to control other components.)
- Some functions do not operate when menu is displayed. Wait for menu to time out.

Temporary loss of reception

Software Upgrades – Your digital satellite receiver is able to receive upgrades or modifications to some of its features and functions. These modifications will occur automatically (usually at times when most viewers are not watching programming). When an upgrade or modification is sent, you may experience a disruption in reception for a few minutes. Your reception should return to normal after the modification is complete. Your receiver must be plugged in to receive upgrades. Do not unplug your receiver while an upgrade is in progress. Please consult the Upgrade menu to find a schedule of upgrades or modifications planned by DIRECTV.

REFERENCE

Blank screen

- Maybe the component (VCR, DVD, etc.) connected to the input jacks is not turned on.
- Try another channel, because there may just not be any programming on at that time.
- Cables in back may be disconnected.

TV will not turn on

- Check to make sure it is plugged in, and try the front panel POWER button.
- Check the wall receptacle (and extension cord, if applicable) to make sure it is “live” by plugging in something else.
- Maybe batteries in remote control are “dead.” To test, see if the LED lights up when you press a button.
- Maybe remote control is not aimed at remote sensor.

TV turns off while playing

- Electronic protection circuit may have been activated because of a power surge. Wait 30 seconds and then turn on again. If this happens frequently, the voltage in your house may be abnormally high or low.

Problems with your system password

- If you forget your system password and subscribe to DIRECTV® programming, you should call DIRECTV to obtain a new one.

Audio recording problems

- When changes are made to the Audio profile settings, the AUDIO output is temporarily muted. Do not change Audio profile settings while recording.

System Lock-up

- If the system locks up, press the RESET button on the front panel of the TV.

CARE AND CLEANING

CAUTION: Turn OFF your TV before cleaning.

You can clean the TV as required, using a soft lint-free cloth. Be sure to occasionally dust the ventilation slots in the cabinet to help assure adequate ventilation.

The TV's screen may be cleaned with a soft, lint-free cloth as well. Take care not to scratch or mar the screen. If necessary, you may use a cloth dampened with warm water.

Never use strong cleaning agents, such as ammonia-based cleaners, or abrasive powder. These types of cleaners will damage the TV.

While cleaning do not spray liquid directly on the screen, or allow liquid to run down the screen and inside the TV. Also, avoid placing drinks, vases, or potted plants with water on top of the TV. This could increase the risk of fire or shock hazard or damage to the TV.

LIMITED UNITED STATES WARRANTY

Toshiba America Consumer Products, Inc. ("TACP") and Toshiba Hawaii Inc. ("THI") make the following limited warranties. These limited warranties extend to the original consumer purchaser or any person receiving this set as a gift from the original consumer purchaser and to no other purchaser or transferee.

Limited One (1) Year Warranty

TACP and THI warrant this product and its parts against defects in materials or workmanship for a period of one (1) year after the date of original retail purchase. During this period, TACP and THI will repair or replace a defective part, at their option, with a new or refurbished part, without charge to you. TACP/THI Authorized Service Station personnel will come to your home when warranty service is required. Depending on the type of repair required, the service will either be performed in your home or the set will be taken to the TACP/THI authorized service station for repair and returned to your home at no cost to you.

Limited Two (2) Year Warranty of Picture Tube

TACP and THI further warrant the picture tube in this product against defects in materials or workmanship for a period of two (2) years after the date of original retail purchase. During this period, TACP and THI will repair or replace a defective picture tube at their option, with a new or refurbished picture tube, without charge to you, except that if a defective picture tube is replaced after one (1) year from the date of the original retail purchase, you pay labor charges involved in the replacement.

Rental Units

The warranty for rental units begins with the first rental or thirty (30) days from the date of shipment to the rental firm, whichever comes first.

Commercial Units

Products sold and used for commercial use have a limited ninety (90) day warranty for all parts, labor and picture tube.

How to Obtain Warranty Service

If after following all of the operating instructions in this manual and checking the section "BEFORE CALLING SERVICE PERSONNEL," you find that service is needed:

- (1) Call the TACP toll free number 1-800-631-3811 after you find a defective product or part to find the nearest TOSHIBA Authorized Service Station.
- (2) Please present your bill of sale or other proof to the Authorized Service Station. "Authorized TACP/THI service station personnel will come to your home when warranty service is required. Depending on the type of repair required, the service will either be performed in your home or the set will be taken to the TACP/THI Authorized service station for repair and returned to your home at no cost to you."

In the Continental United States call:

In Hawaii contact:

Toshiba Hawaii, Inc. 327 Kamakee Street, Honolulu, Hawaii 96814 (808) 591-8377

All warranties implied by state law, including the implied warranties of merchantability and fitness for a particular purpose, are expressly limited to the duration of the limited warranties set forth above. With the exception of any warranties implied by state law as hereby limited, the foregoing warranty is exclusive and in lieu of all other warranties, guarantees, agreements and similar obligations of manufacturer or seller with respect to the repair or replacement of any parts. In no event shall TACP or THI be liable for consequential or incidental damages.

No person, agent, distributor, dealer or company is authorized to change, modify or extend the terms of these warranties in any manner whatsoever. The time within which action must be commenced to enforce any obligation of TACP or THI arising under this warranty or under any state, or law of the United States or any state thereof, is hereby limited to 90 days from the date you discover or should have discovered, the defect. This limitation does not apply to implied warranties arising under state law.

This warranty gives you specific legal rights and you may also have other rights which may vary from state to state. Some states do not allow limitation on how long an implied warranty lasts, when an action may be brought, or the exclusion or limitation of incidental or consequential damages, so the above provisions may not apply to you.

REFERENCE

FCC REGISTRATION INFORMATION

Your HDTV is registered with the Federal Communications Commission and is in compliance with parts 15B and 68, FCC Rules and Regulations.

1. Notification to the Local Telephone Company.

On the back of this equipment is a label indicating among other information, the FCC Registration number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company.

The REN is useful to determine the number of devices you may connect to your telephone line and still have all these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

Note: This equipment may not be used on coin service provided by the telephone company. Party lines are subject to state tariffs, and therefore you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company. Notice must be given to the telephone company upon permanent disconnection of your equipment from your line.

2. Rights of the Telephone Company.

Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance, (2) afford you the opportunity to correct the situation, and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment or operations of procedures where such action is required in the operation of its business and not inconsistent with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.
