WARNING: Engine exhaust, some of its constituents, and certain vehicle components contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

NOTE: Your Front Weight Bar may look different from those shown in this diagram.

General Information

This manual will assist you in the safe operation and proper maintenance of your Husqvarna equipment. Read it thoroughly before attempting to operate the machine. Call your dealer or Dixon if additional information is required.

The following safety symbols are used throughout the manual to alert you to information about unsafe actions or situations:

WARNING indicates unsafe actions or situations that may cause severe injury, death, and/or major equipment or property damage.

CAUTION indicates unsafe actions or situations that may cause injury and/or minor equipment or property damage.

This equipment should not be modified without the manufacturer's prior written authorization. Doing so may not only affect the equipments' performance and durability, but also create safety hazards for the operator and the surroundings. Warranty will be void if changes are made to the equipment without the manufacturer's prior written authorization.

Safety Procedures

- 1 Training:
- Read the Operator's manual. If the operator(s) or mechanic(s) can not read English it is the owner's responsibility to explain this material to them.
- Become familiar with the safe operation of the equipment, operator's controls, and safety signs.
- All operators and mechanics should be trained. The owner is responsible for training the users.
- Never let children or untrained people operate or service the equipment. Local regulations may restrict the age of the operator.
- The owner/user can prevent and is responsible for accidents or injuries occurring to themselves, other people, and/or property.

2 - Preparation:

- Wear appropriate clothing including hard hat, safety glasses and ear protection. Long hair, loose clothing or jewelry may get tangled in moving parts.
- Inspect the area where the equipment is to be used and remove all objects such as rocks, toys and wire which can be thrown by the machine.
- Use extra care when handling gasoline and other fuels. They are flammable and vapors are explosive. Use only an approved container. Never remove gas cap or add fuel with engine running. Allow engine to cool before refueling. Do not smoke while fueling or operating equipment. Never refuel or drain the machine indoors.
- Check that operator's controls, safety switches, hoses, and shields are securely attached and functioning properly. Do not operate unless they are functioning properly.

3 - Operation

- Never run an engine in an enclosed area.
- Only operate in good light, keeping away from holes and hidden hazards.
- Slow down and use extra care on hillsides. Make turns gradually and at slow speed. Do not operate across the sides of slopes. Operate up and down slopes only. Do not operate on steep slopes.
- Turf conditions can affect the machine's stability. Do not operate on wet grass where traction may be reduced.
- Do not change the engine governor setting or overspeed the engine.
- Stop equipment and inspect vacuum impeller and hoses after striking objects or if an abnormal vibration occurs. Make necessary repairs before resuming operations.
- Look behind and down before backing up to ensure a clear path.
- Slow down and use caution when making turns and crossing roads and sidewalks. Stop vacuum and mower blades if not mowing.
- Do not operate machine under the influence of alcohol or drugs.

- Use care when loading or unloading the machine into a trailer or truck.
- Use care when approaching blind corners, shrubs, trees, or other objects that may obscure vision.

4 - Maintenance and Storage:

- Stop engine and disconnect spark plug wire. Wait for all movement to stop before adjusting, cleaning, or repairing.
- Clean grass and debris from muffler and engine to help prevent fires. Clean up oil or fuel spillage.
- Let engine cool before storing and do not store near sparks or open flame.
- Shut off fuel while storing. Do not store fuel near flames or drain indoors.
- Never allow untrained personnel to service machine.
- Keep hands and feet away from moving parts. If possible, do not make adjustments with the engine running.
- Keep all parts in good working condition and all hardware tightened. Replace all worn or damaged decals.

Unpacking Instructions

- 1. Cut plastic tie securing the hitch to the crate top.
- 2. Remove the top of the crate.
- 3. Remove the plastic bag.
- 4. Remove the hose.
- 5. Remove the sides and ends of the crate.
- 6. Remove the mounting kit box from the corner of the crate.
- 7. Cut the two plastic ties that secure the hitch assembly to the pallet. Remove the hitch assembly.
- 8. Cut the two plastic ties that secure the back of the hood, and the two that secure the front of the hood. Remove the hood assembly.
- 9. Cut and two plastic ties that secure the weight bar to the pallet. Remove the weight bar.
- 10. Cut the two plastic ties that secure the blower assembly to the pallet. Remove the blower assembly.
- 11. Remove the 1 x 4 that secures the cast weights to the pallet. Remove the weights.

FIGURE 1

4. Place the hitch assembly on the ground behind the mower. Place the (2) hitch pins thru the hitch and the hitch brackets. Secure the hitch pins with the (2) hairpins that are secured with the (2) lanyards. Figure 3.

5. Move to the rear of the hitch assembly and pick it up towards the rear guard. Secure using straps. Figure 2.

ASSEMBLY

- Place the hood assembly on to the hitch 7. assembly. Place both hood hinges between the upper hitch mounts on the hitch assembly. Be sure that the rubber seal is on the inside of the hood. Place the (2) friction washers between the hood hinge and the upper hitch mount. Place (2)990563, 3/8 x 1 bolt thru the hinge and mount. Secure with (2) 976979, 3/8 nyloc nut. Figure 3.
 - Open the hood and secure the (2) springs to the bolts on the hood assembly and the hitch assembly. Figure 3.

FIGURE 3

ASSEMBLY

- 8. With the hood open, secure the (3) bags in place. The back of the bags will hook over the mounting tabs on the hitch assembly. Figure 4.
- 9. Close the hood, and latch the draw latch over the draw latch keeper on the hitch assembly. Figure 4.

FIGURE 4

10. Install the (2) straps to the (2) support brackets on hitch assembly and the (2) support brackets on the frame. Figure 5.

FIGURE 5

Blower/Drive Kit

- 1. Open the blower/drive kit box and remove all of the components.
- 2. Place the deck in the lowest cutting height.
- 3. Remove the right side belt shield from the deck.
- 4. Remove the deck belt from the right side pulley.
- 5. Remove the deck pulley and spindle, but keep the hardware at hand for re-installation.
- Install new spindle. Use existing deck pulley and key. Add new pulley, with raised portion of pulley hub on the bottom. Secure with existing hardware and tighten to 70 - 80 ft./ lbs.
- Attach blower housing assembly to mower deck. First, insert the stud at rear of blower housing into tube at rear of deck discharge opening. See Figure 7.
 Rotate blower housing around toward the front. The eyelbolt at front of blower housing will nest into slot in deck bracket. Tighten with knob on eyeblot. See Figure 7.
- 8. Install blower drive belt so that blower rotation is clockwise when viewed from the operator's position. Belt will be easiest to install if it goes on the flat idler pulley last. Pull lever in Figure 8 to assist in routing belt around flat idler. After belt is installed, make certain the bolts are tight on the bracket supporting the rear "V" idler pulley. Refer to Figure 8.

FIGURE 8

- Install belt guard to blower assembly using three 1/4" washers and three 1/4" wing nuts. See Figure 9.
- 10. Install hose on the blower housing and secure with hose clamp.

FIGURE 9

Operating the Collection System

- 1. NEVER USE THE COLLECTION SYSTEM WITHOUT THE BLOWER ASSEMBLY AND HOSES SECURELY ATTACHED.
- 2. Make sure hoses are connected at both ends. Inspect hoses prior to each use.
- 3. Do not use the unit on slopes greater than 10 degrees.
- 4. The mower must be running in order to vacuum debris through the mower deck.
- 5. In heavy grass it may be necessary to mow and collect at a slower ground speed.
- 6. Never attempt to unclog the collection system until the mower's engine engine has been shut off and all moving parts have come to a complete stop.
- 7. Do not stand behind the vent at the rear of the collection system due to the potential for small pieces of blowing debris to escape through the vent.
- 8. Wear eye and ear protection.

Transport

WARNING The collection system bags must be completely empty or removed while driving forward onto a trailer. If the mower must be loaded onto a trailer while there is still deFor best results, clean poly mesh inside hood regularly. Instructions for doing this can be found in the Service section of this manual.

Cleaning and Washing

Regular cleaning, washing, and lubricating will prolong the service of the machine.

bris in the container, the mower must be backed up onto the trailer to avoid tipping.

NOTE: Use care with power washers to avoid damage to decals. Limit direct spray on these items.

DO NOT EXCEED 1000 PSI WATER PRESSURE FOR CLEANING.

Storage

- 1. Clean machine.
- 2. Cover all scratches with touch-up paint.
- 3. Covered or indoor storage is recommended.

Item	Before Each Use	Every 5 Hours	Every 25 Hours	Every 50 Hours
Inspect/Clean Poly Mesh	Х	Х

Check/Tighten Hoses	x			
Turn Hose End to End			Х	
Rotate Hose				Х
Clean Machine				х
Inspect Bags	Х			

Preventative Maintenance Schedule

Caring For Hoses

- 1. Inspect hoses before each use. If hoses have excessive wear, tears, or punctures, replace immediately.
- 2. To prolong the life of the hose, periodically rotate hose and turn hose end to end. Refer to Preventative Maintenance Schedule in this manual.
- 3. Avoid twists and sharp turns in the hoses, as they will increase wear on the hoses.
- 4. Avoid dragging the lower hose along the sides of buildings or other hard surfaces.

Cleaning Poly Mesh

The poly mesh on the collection system is located inside the container hood. For best results, clean poly mesh regularly.

Cleaning Instructions

- 1. Shut off engine.
- 2. Release the two (2) rubber latches under the rear of the hood. Open hood and brush debris off of both sides.
- 3. Close hood and re-latch.

DO NOT USE THE COLLECTION SYSTEM WITHOUT POLY MESH SECURELY IN PLACE.

Caring For Bags

Inspect the bags before each use. If bags have excessive wear, tears or punctures, replace immediately.

Cleaning Instructions

NOTE: Under normal usage the bag material is subject to deterioration and wear.

Troubleshooting Guide

Before servicing unit, wait for all moving parts to come to a complete stop. Turn engine off and remove the spark plug wire.

PROBLEM	POSSIBLE CAUSE	CORRECTION
Loss of Vacuum.	1. Blower, hose or hood inlet clogged. 2. Bags full.	 Remove hose and clean inlet. Inspect and empty.
	 Fan blades bent or broken. Poly mesh plugged. 	 Replace/repair impeller. Clean poly mesh.
Unusual vibration or noise.	1. Solid object jammed in unit.	 Check and remove any obstruction.
	 Loose or missing bolts on unit. Bent or damaged fan. 	 2. Tighten or replace bolts. 3. Replace/repair impleller.
Unit difficult to close.	 Obstructions keeping door from completely closing. 	1. Clear obstructions.
	2. Hood hinge bolts too tight.	2. Loosen bolts.

NOTE: Your Front Weight Bar may look different from those shown in this diagram.
