SAFETY & WARNING INSTRUCTIONS

WARNING! When using power tools, basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury.

1. Mind the environment surrounding your working area. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
2. Keep bystanders, children and visitors away while operating a power tool. Distractions can cause you to lose control. Protect others in the work area from debris such as chips and sparks.
3. All tools should be kept out of the reach of children either in high or locked storage areas.
4. Dress properly. Do not wear loose clothing or jewelry. Keep long hair, clothing and jewelry away from moving parts as these could get caught and cause personal injury.
5. **Always wear eye protection.** Dust mask, non-skid safety shoes, hard hat or hearing protection must be used for appropriate conditions.
6. Use clamps or any other practical way to secure and support the work-piece to a stable platform. Holding the work by hand or against your body is unstable and may lead to loss of control.
7. Do not force tool. Use the correct tool for your application. The correct tool will do the job better and safe at the rate for which it is designed.
8. Maintain tools with care. Keep cutting tools sharp and clean. Properly maintained tools with sharp cutting edges are less likely to bind and are easier to control.
