

Refilling Instructions

for Hewlett-Packard 51641A Tri-Color Cartridge

CONTENTS:

Your 51641A
Tri-Color Cartridge

Remove ink cartridge from printer and protect work surface. Refilling your cartridge is a clean & simple job, but it is best to cover your work area with newspaper or paper towel to protect from accidental spills.

1. Affix color sequence label over original cartridge label.

2. Holding the cartridge as shown in Illustration 1, use the tip of a ball point pen, or similar object, to push the three plugs which seal the ink fill holes into the cartridge.

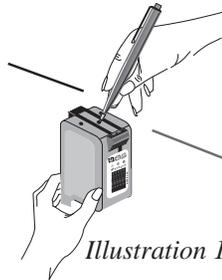

Illustration 1

3. Using the colored dots on the cartridge label as a guide determine which of the 3 ink chambers is empty. Select the corresponding ink dispenser (cyan, magenta or yellow). Remove the scabbard from the dispenser tip.

4. Tilt the cartridge forward so that you can insert the dispenser tip into the correct fill hole without dripping (Illustration 2). Insert the dispensertip into the cartridge as far as it will go.

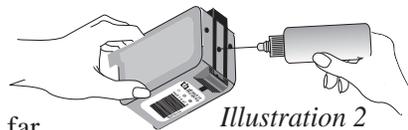

Illustration 2

5. Bring the cartridge and dispenser back to the vertical position. Gently squeeze the dispenser bottle while slowly drawing the tip upward so that the ink saturates all areas of the foam sponge inside the ink chamber (Illustration 3).

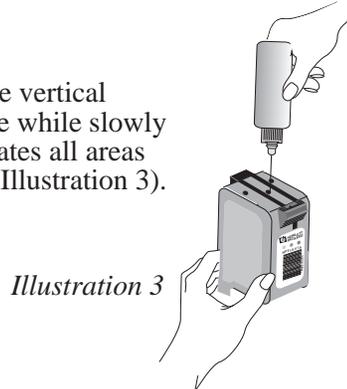

Illustration 3

6. Stop dispensing ink as soon as ink starts to overflow from the fill hole. Release the pressure from the bottle so that a small amount of the excess ink is drawn back into the bottle.

7. Remove the dispenser from the cartridge. Recap the dispenser and save for future use.

8. Use the cotton wipe to dry any overflow from around the fill hole.

9. Repeat the fill procedure with the other two colors so that all three ink chambers are topped off. There is no need to reseal the fill holes. Ink will not leak from them.
